Chapter 3 Martial

Chapter 4 Magic

Chapter 5 Playing the Game

Chapter 6 Game Master's Tools

Index

Introduction

Crescent revolves around immersing oneself in the life of a character — an avatar cultivated by a player. Players are the actors within the Game Master's story. Their decisions shape the landscape and themselves in turn. Crescent features growth over time, allowing characters the capacity to gain access to new abilities and perform outstanding feats.

The Player creates their character with passions, flaws, motivations, and strengths, while the Game Master's weaves a story with rich settings, aspirations, struggles, and joy. Whether you're a Game Master or a Player, this manual outlines the mechanics of your universe, although the GM has ultimate say over the rules of their story.

Basic Concepts

Crescent promotes the concept of choice in both character creation and playstyle.

Speeds of Play

Within **Crescent** there are two primary speeds of play: turn by turn and exploration modes.

Turn by Turn Mode

Turn by turn mode is made up of rounds, each of which lasts four seconds. Players can spend *actions* to execute abilities. This mode presents the most intensive period of play, wherein each moment matters.

Exploration Mode

Exploration mode makes up the period of time when players are simply interacting with the world around them casually. Meeting friends at a windswept desert or hanging out together inside of a temple bathhouse are aspects of exploration mode. Players generally have an opportunity to interact with the world in a manner of their choosing in this mode, where time is not necessarily of the essence. Exploration mode can seamlessly transition to turn by turn mode depending on the actions taken by the players and the characters around them.

Dice

Rolling dice is a crucial component of **Crescent**; it acts as the determinant for failure or success. Based primarily around d10s, a standard set of dice is nevertheless recommended — d4, d6, d8, d10, d12, and d20. Notation for the polyhedral set of dice exists as follows, these dice will have a “d” followed by the number of sides of the die that the player will be using. If multiple dice are used, a number at the start determines how many should be rolled for the associated ability. For example, “3d6” requires rolling three six-sided dice.

High Rolls are Good Rolls

Roll High for damage, attack rolls, the setting of resistance checks, and resisting those effects. When making an attack roll, a character must exceed their target’s *Defense Values* (DVs). When inflicting damage, a player (usually) wants to have a higher value on their dice. When resisting the effect of a spell, a character wants to match or exceed the value of the resistance check with their roll.

Types of Rolls

While playing **Crescent**, a player will make two types of rolls:

- ❖ Attribute Checks
- ❖ Skill Checks

Each type of roll has its own rules that separate them from each other, found in the *types of rolls* section. In shorthand, attack rolls, initiative rolls, and resistance check rolls are **attribute** checks, the character rolls 2d10 and adds an attribute value. In the case of attack rolls of any kind, the character adds their PER, the character adds their AGI to their initiative rolls, and adds the ability’s dominant attribute when setting a resistance check. Skill checks are determined by adding *half* of the character’s attribute to a 2d10 roll and the total ranks a character has in the specified skill.

Types of Actions in Turn by Turn

Crescent has four distinct actions; together making the *action economy*. Actions are the primary means of acting within turn by turn mode.

Each round within turn by turn mode lasts for four seconds. Characters may take up to four distinct actions during this time period; a core action, movement action, swift action, and reaction. At the start of each of the character's turns, each of their actions is restored. Any movement, core, or swift actions that are not spent by the end of the character's turn are wasted.

Core Action

The main component of a turn. This action can be converted to any of the three other actions.

Movement Action

The character may move any amount of space, up to their movement speed. A character's base speed is typically set to 30'.

Swift Action

The character takes a particularly fast action. Typically fast acting spells and the activation of certain abilities. 'Buffing' spells that involve enhancing one's allies tend to be *swift actions*.

Reaction

The character takes an action in response to an event; typically a specific effect. This can occur at any point throughout the round. If the reaction interrupts another character's turn, they can continue their turn after the reaction is taken.

Basic Rules

Each character has defense values and hit points that determine how long one can keep fighting before they fall unconscious.

Defense Values

Defense Values (DVs) represent how hard it is to hit a target or pierce their armor. DVs are composed of Movement, Armor, Bonus, and Shield DVs which additively define how difficult it is to strike a target. Every character begins with 10 movement DVs, armor DVs are decided by their archetype, shield DVs are earned by holding a shield, and bonus DVs are typically temporary DVs granted by an ability.

Stacking

Bonuses can exist to change a character's PER, DVs, movement speed, barriers, damage, placed rolls, and more. In cases where the character has two bonuses of the same type, the largest active effect will always take precedence over any other ones — preventing the stacking of multiple effects. If an effect is labeled as stacking, such as the stacking placed rolls granted by the augur archetype, these rules do not pertain to that instance of the effect.

Hit Points

Hit points (HP), indicate a character's ability to sustain damage. When damaged, they have hit points subtracted from their current HP. Their current HP indicates their new condition. There are several means of restoring hit points, one of which is resting. Upon taking a complete rest period, a character restores a number of hit points equal to ten times their HEA attribute. HP may not be restored beyond the original maximum HP total through rest. A character at level 1 begins with 18 HP. Only a single rest period can be taken in a twenty-four hour period.

Character Creation

When playing Crescent it is necessary to create a character. Players envision and determine the past experiences, personalities, and beliefs of their characters — bringing them to life with imagination.

When determining what sort of character a player wishes to play, they can ask themselves several questions or draw inspiration from the origins and backgrounds provided. After determining basic concepts, players can then begin to think about a character's personality and details about their life. Does the character uphold an ideal of a background, or do they instead go against the grain and carve out their destiny, defying the stereotypes they have been laden with — challenging existing norms.

It is unnecessary to have a complete concept of a character before playing Crescent. Just as with real people, life experiences lead to discovering aspects of a character that were not known previously, leading to more natural growth and goal fulfillment.

1 - Attributes

The player selects attributes for their character utilizing point buy (38) or standard array (7, 6, 6, 5, 5, 4, 3, 2.)

2 - Personality

These provide culture, substance, and depth to the character. They include *background*, *languages*, *origin*, and *exceptionals*.

3 - Motivation

Lunar motivations are starsigns and personality types reflecting the innermost goals and desires of a character.

4 - Archetype

Archetypes provide a unique and powerful bonus. Everyone gets *one* archetype and this archetype also defines their armor class.

5 - Ability Purchase

Setting their level to 1, the character purchases any abilities utilizing their 10 ability points.

6 - Equipment

Characters start out with 2d6 + 2 starting gold and may purchase any equipment listed in the book with this gold.

Attributes

Eight attributes define a character's natural predispositions and abilities. These attributes are interwoven into everything a character does whether they are rolling to set a check, resisting an effect, or purchasing abilities. The maximum attribute score a character can have is **10**.

Strength (STR) *Heavy Weapons, Versatile Weapons, Might, Martial Perks*

Strength measures a character's physical might. Those who keep fit have backs that can carry the weight of larger burdens.

Agility (AGI) *Precision Weapons, Versatile Weapons, Acrobatics, Subtlety, Martial Perks*
Kinesthetic control and speed is represented by Agility. Agile individuals are nimble, dodging and concealing themselves easily from opponents.

Health (HEA) *Fitness*

Categorizing a character's physical well-being and hardiness; Health measures the typical function and hardiness of a character's body.

Perception (PER) *Awareness*

Perception constitutes a character's clarity of senses, instinct, and accuracy. Perception When laws teeter a part and shadows rule, perception reigns.

Willpower (WIL) *Alchemy*

Willpower is the blaze that powers resolution and faith; it is mental and emotional strength. When reason and strength fail, willpower shoulders the burden.

Charisma (CHA) *Interpersonal,*

Performance, Divine Spellgroups
A natural charisma allows a character to trick and influence everything around them.

Intelligence (INT) *Elemental Spellgroups, Knowledge, Crafting*

A keen Intellect enables individuals to engage in abstract thinking and deep concentration.

Power (PWR) *Spells, Metamagic*

Innate magical potential and a character's ultimate capacity for expressing that potential is represented by power

Determining Attribute Scores

There are two ways of determining attributes in Crescent; standard array and point buy. The standard array tends to be simpler for most players and leaves options open in the long term, however, point buy is much more personalized for players that know exactly what they want.

Standard Array

The standard array is **7, 6, 6, 5, 5, 4, 3, 2**. Utilize each of these values and assign them to a single one of your character's attributes.

Point Buy (Not Recommended)

Set all of a character's attributes to 0, they are then given a pool of 38 points. The cost of increasing an attribute is one of these points

Backgrounds

A character's background is analogous to their race. Backgrounds are purely aesthetic in Crescent. Characters do not even need to be humanoid or have typical limbs, but cannot have extra functional limbs. All starting characters are in the medium size class and have a height between 3' 1" and 6' 11" and a weight between 60 and 400 pounds.

Background	Description
Hill Dwarves	Descended from humans, the typical hill dwarf is short of height. This background is known for its hardy nature and intense loyalty and stubbornness. Cowardice is alien to their nature.
Pthoran Dwarves	The blistering cold tundras of Pthora are ruled by dwarves. Theirs is a family-based culture, one where family dictates your upbringing and status, as well as your success. Unlike their hill-dwelling cousins, they are lighter of hair and skin, while their eyes are typically dark, muted tones.
Elemental	Elementals are by and large a unique race. Wild elementals are largely feral and instinctual, adhering to their base elements and the fierceness of their homes. They absorb and take on the mood of the areas around them and are born from magical rituals
Daemon	Daemons vary wildly different in appearance and size. All of them have a few continuous traits, however; A tail, horns of some number, or absurdly sharp teeth. Their iridescent skin can range from a slew of reds and purples and is often thicker and denser.
Lizard	Lizards are the results of ancient experiments in Old Dahahbu. Strong and brawny bipeds, Lizardfolk have made their homes in beaches or inhospitable waters. Lizards are often stereotyped as solitary people.
Orc	Brawny and heavy, orcs are known for their physical strength and combat prowess. Orcs are the descendants of elves and lizardfolk, their dissimilarity from their ancestors left them with no true place in the world, rendering them a roaming, neglected band of people, leaving honor and loyalty the most important concepts in life.
Human	Humans exist in many lands, and their spread is bound only by their shorter lifespan. They are perhaps the most sociable; Indeed, humans thrive where social interaction and congregations of any kind take place. The first humans were elves stripped of longevity at the end of Old Dahahbu.
Muhkt Elf	Tall and graceful, with a charming air about them and a sharp wit just beneath the surface. They're known for being more discerning than some give them credit for. Muhkt Elves are the descendants of Dahahbi and Saedic elvs.
Dahahbi Elf	Aside from their sun-touched locks, Dahabi Elves have eyes that seem to sparkle with colors matching those of gemstones hewn from the earth. It is rare for a Dahabi elf to be short or curt with any. Cruelty is alien to their kind, but a trusting nature leaves them vulnerable to manipulation.
Saedic Elf	Touched by the primal, arcane forces of magic; Their propensity for natural magic is matched only by their unbending pride and arrogance. Dark of eye and hair, their pale, blue skin is easily recognized. The first peoples of Cahyali, the Saedic Elves, prefer their homeland of Buyuk.
Fae	A rare and whimsical bunch, Fae are often born with wild hair and eye colors. Fae are the size of children, even when full grown.
Other	Create any race of the player's choosing.

Languages

There are hundreds of different languages that feature regional differences; though characters typically know a language that reflects their place of origin or their cultural background. Saedic is the most commonly spoken language. Other languages can help a character engage with others in discrete or unique manners.

Features of Languages

Language serves to accentuate the personality and origin of a character, influencing their ability to communicate with those around them. The languages listed here vary between being rare to relatively commonplace.

A character has access to **2** languages upon creation, both known at rank 6.

Dialects

The development and usage of a language vary depending upon geographical ranges of the language. Regional dialects of a language reflect the developmental pattern of that language as it relates to a specific region.

Sign Language

Some languages lack a verbal component - allowing them to be utilized for sign language. Characters that are deaf, or deafened can continue to communicate as long as their hands are free.

Learning New Languages

Languages can be bought as though they were any other skill or ability at a base cost of 1. A character is considered proficient in a language at rank **4**, a native speaker at rank **6**, and a master at rank **8**.

Buying Up Languages

Languages can be bought up like any other ability, though it has no governing attribute or restrictions when choosing to do so.

Language	Description
Abyssal	Language spoken by infernal beings from beneath Cahyali.
Auric	The ancient tongue of Old Dahahbu.
Cahalan	A language with no verbal component, often used by the deaf.
Divinic	This language is inherent to higher beings.
Dahbi	Language commonly spoken by modern Dahahbi Elves.
Draconic	Created by the elemental drakes of Shinneok.
Entish	Spoken by intelligent forest creatures.
Primordial	The language of magical power and elemental magic.
Saedic (Common)	The most common language in Cahyali.
Uli	A language of humans from Ulos.

Origins

Every character has an origin story. A character's origin represents their past experiences and the skills they have gained from them. Every character gets a stacking placed roll in two skills - these are considered their origin skills.

Origin	Description	Skills
Academic	A character wrapped in formal academia — their pursuit of knowledge brings them to new adventures.	Metamagic Knowledge
Acolyte	Traveling acolytes search for new lands to spread the message of their teachings to others. Training their knowledge, acolytes are capable of bringing masses of uninformed characters more easily to their view.	Knowledge Awareness
Animal Handler	Animal handlers focus on their kinship with beasts, finding solace in their friendship. They have a special relationship with nature, finding that most normal wildlife is drawn to them and unwilling to hurt them unless provoked.	Awareness Subtlety
Artisan	Tuning their craft, the artisan tirelessly works to create marvels that will make others impressed. Typically part of a guild, artisans are renowned and respected at most marketplaces and institutions.	Crafting Knowledge
Entertainer	A character with an innate ability to entertain others; entertainers are adept at defusing heated situations.	Acrobatics Interpersonal
Exile	Banished from their homeland, the exile seeks to either find a new home or wander in search of a greater purpose.	Acrobatics Subtlety
Merchant	Adept at money-handling, merchants are well-acquainted with the structure and layout of most cities. Merchants are experts at finding where to purchase and sell goods for the best price.	Interpersonal Knowledge
Noble	Born into wealth; nobles are most at ease when other powerful characters surround them, commanding respect from normally arrogant individuals.	Awareness Interpersonal
Nomad	Never sticking to one place, the nomad roams the land. Nomads never have trouble scouring the landscape to find survival equipment.	Fitness Awareness
Outlaw	Making their living outside of acceptable norms, outlaws force their will upon others through violence or subterfuge. Outlaws command the respect of other outlaws or bandits by brandishing what group they are a part of.	Might Subtlety
Servant	A servant of others, giving their life in the service of other people, causes, or beliefs. Servants get along well with other servants, finding themselves at home amongst them.	Alchemy Interpersonal
Other	Of an unknown origin, the path they have set for themselves is determined by <i>the player</i> .	Pick any two Origin Skills

Exceptional Attributes

Exceptional attributes and resistances represent attributes a character is particularly adept with. A player character receives one exceptional attribute at creation.

Exceptional Attributes

Characters with an exceptional attribute gain a static + 1 bonus to the attribute; the character can stress their exceptional for benefits. General stress of exceptional attributes entitles them to two placed rolls on any check related to the attribute. Exceptionals are expended when stressed. If the character naturally has the exceptional — it is regained upon completing a rest period, allowing the character to make use of the exceptional once again. A character can only have a single exceptional active at once for an associated attribute. If a moment is pivotal to a character's overall motivation, the GM can choose to reward a character with a temporary exceptional.

Inferior Attributes

Characters with an inferior attribute receive a displaced roll on all checks associated with the attribute; a character with an attribute of 0 automatically receives an inferior in the relevant attribute as long as it is 0. An inferior attribute reflects an attribute in which a character is inept.

Stressing

A character with an exceptional attribute may *stress* it to gain one of the following bonuses according to the attribute stressed.

Name	Description
STR	The character rolls the maximum number on their choice of 3 damage dice this turn.
AGI	The character gains 10 additional movement DVs until the start of their next turn.
HEA	The character halves all incoming mundane and elemental damage from an individual instance.
PER	The character does not roll on their next attack roll - they instead automatically hit (within reason.)
WIL	The character automatically makes the attempted resistance check.
CHA	The character adds their <i>CHA</i> twice to an interpersonal check, instead of their interpersonal skill.
INT	The character may instead roll a skill check using their <i>INT</i> attribute as the modifier.
PWR	The character converts all damage they inflict this turn into <i>pure magic</i> damage.

Motivations

Motivations are the overarching reasons that characters act the way they do. Motivations inform actions that a character is struggling with. Representing 8 fundamental goals, characters with motivations are more determined in some situations over others. A character willing to fatally sacrifice themselves so that others could live is fulfilling their *sacrifice* motivation. In practice; motivations allow characters to **stress their exceptional once while keeping it** - if the situation is particularly appropriate to them.

Reasoning for Motivations

When the Old Dahahbi magocracy brought a celestial body closer to Cahyali; they asked it to discern the motivations of the Council's 8 Mages. It assigned each a different one; Discovery, Immortality, Sacrifice, Kinship, Ideology, Envy, and Domination. It labeled the last mage as Wayward. Extrapolating this assessment to the rest of the population, they became "Lunar Motivations." Each motivation aligns with one of the eight phases of the moons. Populaces have long yearned for insight into themselves and those around them. Motivations may change over time much as the phases of the moons change - one thing is constant, everyone has *something* that drives them. Individuals with opposite Lunar Motivations are foils for each other, or so the rumors say.

Discovery - Waxing Crescent

There is a mystery in everything. Knowledge, experience, and wonder are the things most worth pursuing in the universe. Searching for new thrills, living a life worth living, knowing the valleys and mountains of the mind, and finding questions that have yet to be conceived is the goal of discovery. Those motivated by discovery have neither desire nor ability to commit to a single path, for better or worse.

Kinship - First Quarter

All people are linked together; they experience the same range of emotions and express the same hardships. One seeking kinship aims to bond with others over this shared common ground. There is no nectar sweeter than love and friendship. For better or worse, reason takes a second place to the war drums of the heart. These individuals are often easily manipulated and overly trusting.

Sacrifice - Waxing Gibbous

Martyrdom is the sacrifice's only goal. Ruination of the self is an unintended consequence. The sacrifice is the first in a battle and the last out; always willing to bear the burden of others, both emotional and physical, long past their breaking point. All suffering is biblical, and the sacrifice would gladly pay any price to staunch the blood loss of another. A primal soul stronger than any material mundane or magical, they *will* protect. But how can one protect another if they lack the will to defend themselves?

Immortality - Full Moon

Above all, seekers of immortality strive to burn a searing mark on the annals of history. Wealth and power are all well and good, but their transience renders them worthless to the eye of the aspiring immortal. A legacy stretching into the millennia is the only worthy desire, and no sacrifice is too great to make in its pursuit. Striving to infinity, at the back of every immortal's mind lies the worry that the contrast between their achievements and those of one who lives only in the moment is merely one of degree.

Ideology - Waning Gibbous

Unshakeable and pure; the ideologue knows that the world is a manichean duality. There is right and wrong, and the ideologue stands on the side of righteousness - where are you? Faith substitutes for food and water in the mind of the ideologue. Carrying a natural wisdom and fine temperament, the ideologue strives for their own sense of justice, regardless of what others think of them. If only everyone else adopted... the right way of doing things. Doubt is for the weak willed; the ideologue knows they have the answers. At least, they're convinced that they do.

Domination - Third Quarter

If people were meant to exercise freedom; they would not be so willing to submit. In order to save others from themselves, it is necessary to give them a leader - something the seeker of domination selflessly volunteers for. Every conversation, war, and struggle is nothing more than another battle in the competition for influence. In that battle there is only victory and defeat. Modesty is a hubris that cannot be afforded. If progress is to be made, others must know who is in charge. They are the shield that stands between civilization and chaos.

Envy - Waning Crescent

The envious are ambitious and motivated individuals, always striving to have more and never satisfied with what they have. The envious look longingly at those with steadfast beliefs and motivations wishing for a stronger sense of self. The envious are often distrusting and manipulative: pulling others down, setting friends against one another, never taking the blame, turning individuals against their most sacred beliefs. Every other person is an enemy on some level, even when the envious has deluded themselves into believing someone is their friend. At the core of it all though, the person the envious hates the most is themselves.

Wayward - New Moon

The wayward are anything but lacking in motivation. Seeing the fools around them destroyed in futile struggles to live up to self-contradicting ideals, the wayward chose a different path. Motivation can only be found in the world around you, not in dusty tomes, grand palaces, or great triumph, be it on the battlefield or at the negotiating table. The only winning move in the game of the powerful is not to play. The wayward enjoy unparalleled freedom, but also face the great uncertainty of a life lived without clear purpose.

Archetypes

Heavy Armor

Augur	Augurs have an additional stacking placed roll on <i>all</i> origin skill checks.
Breaker	Breakers can reroll all dice greater or equal to a d12 once each round and their attacks ignore shield DVs.
Paladin	Upon casting a spell, the paladin may restore an amount of HP to themselves or another character within LOS 20' for (mana cost)d6 without action cost.
Warden	Wardens may choose to have either mundane or elemental resistance.

Medium Armor

Mage	Spells cast from a mage have a free finesse that stacks with other finesse bonuses. Mages have a finesse cap of 6.
Monk	By spending a reaction, monks may take their turn immediately instead of during their normal turn in the initiative order. This may only be done once per round.
Rogue	Rogues do not have standard action sets. Rogues have 4 points to spend on actions each round. Core Actions cost 2 points, Swift Actions, Reactions, and Movement Actions cost 1. If the rogue chooses to spend all points on core actions, they lose their movement DVs until the start of their next turn.

Light Armor

Mystic	Mystics may expend their swift action to prepare a spell, converting it to an on hit effect until the end of the turn. This strips the spell of its resistance check while retaining its effects. If the attack misses, the spell dissipates and the mana is lost. Should the spell be continuous or focus, the resistance check is determined when the target re-attempts the check (3 times between rest periods.)
Nomad	Nomads may prepare 2 spells they know, for free, as once per rest period magic items that may be activated by their wielder as a reaction. Previous items lose power when more are created. These spells can have a combined additive rank equal to the character's PWR attribute or twice their level; whichever is lower.
Priest	The range of all priests' spells, including touch spells, is increased by 30'. Priests can also cast spells with a self target on other willing targets at a 30' + 10'/F LOS range.
Elementalist	Elementalists can choose to convert any damage dealt this turn by the character into their magical element type (Must have bought at least one elemental spell to have an element type) as a swift action. Regardless, each type of elemental damage has additional effects: ❖ Fire: Inflicts an instance of <i>suffering (Fire)</i> to all struck enemies (applies once per enemy per round) ❖ Ice: <i>Slows</i> all struck enemies until the end of their next turn. ❖ Force: Pushes the creature or character (if they are within melee reach of a creature or a surface) up to 10' in a direction of the character's choice. ❖ Lightning: <i>Paralyzes</i> a singular struck target until the end of their next turn, HEA save to negate (check is set with PWR.)
Sorcerer	Sorcerers can have four abilities that require focus active at once.

Optional Creature Categories

As a part of creating their character, players gain access to a handful of traits that help to actualize the character they are creating. This can include an organization or trait.

Traits

The traits listed in the table are *optional* bonuses that come with advantages and disadvantages. Players selecting one of these traits should be cautious as they tend to be challenging to work with. A character can choose only one creature category trait.

Creature Category Traits

Construct, Elemental, Plant and Undead traits are located in the creature category section. These traits have unique benefits and drawbacks that make them incredibly difficult for new players to deal with.

Trait List

Ability	Description
Construct	The character is a construct (mechanical) with all benefits and maluses. This bonus is always paired with soulless.
Elemental	The character is attuned to a particular element. They are <i>immune</i> to an element type and <i>vulnerable</i> to it's opposition element (Fire - Ice, Lightning - Force.)
Plant	The character is a sentient plant with all benefits and maluses.
Small	The character's size category is <i>small</i> .
Soulless	The character has been stripped of their soul in some manner. Harmful and beneficial spells that work on souls must account for the character's lack of a soul.
Undead	The character is an undead - with all benefits and maluses.

Ability Purchase

Ability Points are the currency a character uses to purchase abilities. It is standard for a character to begin with **10 ability points**. Ability points simulate the knowledge that accumulates throughout a character's travels. Ability points are used to keep track of a character's **level**, creating a rough measure of their power. Gaining ability points increases a character's total attributes and hit points. The rate at which these increase attributes can be found in *Character Alterations and Attributes*.

Purchasing with Ability Points

To buy up an ability to its next rank, the player multiplies the base cost of an ability by the rank — this determines the cost of buying up the ability to the next rank. Typically, this would be the rank itself. For example, a character buying the 2nd rank of Pyromancy (base cost 1) after having bought up the first rank must expend 2 ability points for a total of 3 ability points spent on pyromancy.

Determining Base Costs

Groups with a maximum rank of 10 always have a base cost of one. Groups with a maximum rank of 5 (Martial Perks, Fauna, and Effigy) always have a base cost of 3.

Available Abilities

Characters can find abilities to purchase under Elemental Spells, Divine Spells, Skills, and Martial Abilities. Specific archetypes will benefit certain abilities more than others, however in no way do they enforce what a player will buy.

Ability Restrictions

A character's attributes determine the normal strengths and weaknesses of a character, dictating the limitations they will be subject to. For example, when buying up weapon skill a character is limited by either their agility or strength — as directed by the weapon's inherent conditions. Power likewise acts as the limiting attribute for the usage of spells. Any given ability can only be bought up to its governing attribute.

Breadth vs Depth

When characters invest in breadth they invest in gaining new schools of abilities; when characters invest in depth they gain access to stronger abilities. Attributes like INT and CHA limit breadth and attributes like STR, AGI and PWR tend to limit depth (with some expectations). Because of attribute limitations, characters will eventually need to invest in both. No character can be a master of everything and even masters will eventually need to branch out.

Character Templates

Character templates provide a model a character can utilize to more easily build their character when starting. These templates could either be used as is, or they could instead be modified - treating them as a shell to create different kinds of characters by changing what they purchase with ability points. For example, instead of buying up *versatile weapons* or *swords*; A Knight could instead buy up *heavy weapons* and *polearms*. Characters are free to change their starting attributes, archetype, origin, and languages as they see fit as well. Templates are a useful reference of what a fully bought character looks like and new players are free to use them.

Knight

Level 1

HP: 21, DVs: 18/18 (Heavy)

Attributes

STR	AGI	HEA	PER	WIL	CHA	INT	PWR
7	5	6	6	6	4	2	3

A crafter drawn to adventure, they use their skills to improve and help others. Helping others and gathering skills is a crucial part of improving, maintaining, and establishing their legend.

Character Progression

As a character's level increases, so too does their HP and attributes. Each level is worth 10 ability points. Depending on the rate of ability point acquisition your GM decides on, you might gain several levels each game, or even a fraction of a level.

Level	Hit Points	Attributes Increase
1	18	Starting Attributes
2	26	+
3	34	-
4	38	+
5	42	-
6	46	+
7	50	-
8	54	+
9	58	-
10	62	+
11	66	-
12	70	+
13	74	-
14	78	+
15	82	-
16	84	+
17	86	-
18	88	+
19	90	-
20	92	+
21	94	-
22	96	+
23	98	-
24	100	-
25	102	-

Skills

When a character makes a skill check, roll 2d10 **plus** their rank in the skill **and half of** the relevant attribute. Executing a skill typically costs a core action. The ultimate action cost is dependent upon the situation and the scale of change sought by the character.

Purchasing Skills

The base cost of all Skills is **1**, and they can only be purchased up to their relevant attribute, to a maximum rank of 10.

Exceptional Attribute and Skill

Upon reaching rank 8 in a skill, the character gains an exceptional in the related attribute. If the character already has an exceptional in a skill they have purchased to 8, they may reallocate it to another attribute of their choice. These exceptionals follow normal rules for exceptional attributes.

Skill Difficulty

Skills have a variable difficulty, though there are broad benchmarks that dictate the difficulty of achieving a value.

Rolled Value	Level of Mastery
10	Untrained
15	Trained
20	Professional
25	Master
30	Mythical
35	Legendary

Essential Skill Roll

When making a skill roll essential to the story, such as breaking into a critical area utilizing *subtlety* or attempting to glean information with *knowledge*, the character still succeeds at their task, but a consequence occurs as a result. The repercussions are dependent upon the rolled value. More generally, skills overlap in their usage, often allowing a character to substitute one skill for another.

Skill Example

Name of Skill

A description of the skill, the benefits it grants, and how it can be used. If The skill says it is explained elsewhere, the skill is elaborated on immediately after this section.

Skills

Strength

Might

Might is a character's ability to lift and leverage their strength to their advantage.

- ❖ At rank 4, the character decreases the STR requirement of all weapons by **half** of their might skill. If they have 150% or more of the required strength, they can wield the weapon in one hand, even if it requires two hands to utilize.
- ❖ At rank 5, the character can grapple targets a size category larger than they are.
- ❖ At rank 9, the character can treat any STR resistance or grapple check as a *might skill* check.

Agility

Acrobatics

Balance, tumbling, running - acrobatics encompasses the broad way in which a character can manipulate their body to more deftly weaving through all manners of space. For each rank in *Acrobatics* a character...

- ❖ Nullifies 10' worth of falling/push damage *in all situations*.
- ❖ Adds 2' of movement to all movement speeds they have access to.
- ❖ Adds 2' to their jump height.

At rank 5, the character can walk up walls / on water, at rank 8 the character's jump height is set to their highest movement speed, and at rank 10 the character gains a stacking placed roll on all AGI resistance checks.

Subtlety

A character's ability to pickpocket, perform feats that require manual dexterity, hide in the shadows, and influence others indirectly. These include subtle jobs, such as forgery, lock picking, traps, disguising, hiding, hacking, and ciphering. When the character is hidden, the target must first have some inkling the character is present, and then they contest their PER or awareness against the undetected character's subtlety to detect them.

- ❖ The character receives 2 placed rolls on the first attack roll they make against a target while *undetected*. The target cannot take a reaction against an action taken from a character undetected from them.

The difficulty of a subtlety check must be adjusted with the situation, receiving either placed or displaced rolls – though it is impossible to hide in many situations. *Undetected* is broken if a character is forced to make a check, is the target of an attack roll, makes an attack roll, casts a spell, or is the target of a spell. At rank 6, the cost of attempting to become *hidden* is a swift action. While *Hidden* a character can attempt to become *undetected* as a swift action at this rank as well.

Health

Fitness

Fitness is the ability to lift, swim, climb, stave off exhaustion, and the ability to maintain composure throughout rough travels. For each rank of *Fitness* a character...

- ❖ Adds 3 HP to their maximum natural HP total.

At rank **5**, the character's size category increases. At rank **7**, the character can choose to re-attempt a failed resistance check with a placed roll as a reaction **once between** rest periods. At rank **10** the character gains a stacking placed roll on all HEA resistance checks.

Perception

Awareness

Awareness dictates the ability to read body language, subdue, calm, and communicate with applicable animals. For each rank in *Awareness* a character can...

- ❖ Increase the range increment for all ranged weapons by 5'.

Awareness also allows characters to read the intentions of a target by contesting their awareness against the target's subtlety. Should they fail, the character knows if the target is telling the truth or is hostile.

Awareness also determines a character's general knowledge of the wilds, their ability to identify natural life and geographic features, ability to track, and ability to hunt, capture, or maintain wildlife.

- ❖ At rank **3**, the character can utilize a swift action to locate an undetected or hidden character (Contesting their awareness against the subtlety of the target), if the character has an inkling that an undetected character is present.

Willpower

Alchemy

Alchemists dabble in the transmutation of materials into elemental energy, potions, poisons, and raw magic. Initially, a character requires an *Alchemy Lab* to engage in alchemy. Characters are not limited by the amount of potions they may make in a day so long as they have a recipe and ingredients. Different alchemical ingredients have different properties and difficulty associated with working with them. As an alchemist becomes more skilled they are able to work with more difficult ingredients and create more interesting combinations. This skill is elaborated upon in the following sections.

- ❖ At rank **10** the character gains a stacking placed roll on all WIL resistance checks.

Charisma

Interpersonal

A character's ability to persuade, be perceived as generally likable, deceive, unnerve, intimidate, and personally *charm* others. This ability tends to be useful in a variety of social-oriented situations, though it heavily revolves around circumstance. The strength of their reasoning and predispositions/attitudes of the target could lead to bonuses or maluses. It is not always possible to persuade someone.

- ❖ A character can attempt to use their interpersonal skill on a target by contesting their interpersonal skill against the target's awareness, or knowledge (target's choice) to persuade them toward a believable direction.

At rank **6**, a character can force a target to spend their next turn directing any attack rolls at a target of choice (That the chosen target is hostile to) as a core action.

Performance

A character's ability to perform via a musical instrument, dance, and song is governed by performance. Performance can be used to learn a new set of skills useful in and out of combat for casters and martial characters alike. This skill is elaborated upon in the following sections.

Intelligence

Crafting

Crafting determines how well the character is generally capable of creating objects, repairing them, or working with their hands. Common crafting professions include potters, blacksmiths, weaver, masons, and others. Characters can craft armor, equipment, weapons and even general purpose magical items by gathering together the components in their creation. At rank **9**, the crafter gains another magic item slot, bringing their total number of available magic items up to 7. This skill is elaborated upon in the following sections.

Knowledge

Knowledge concerns itself with an in-depth explanation of academic subjects. Possible topics include history, religion, medicine, and science. The character can use this ability to assess physical health and administer medical treatments. For each rank in *Knowledge* a character...

- ❖ Can cause a target to recover an amount of **HP** equivalent to a knowledge skill roll, stabilizing the target in the process should they be in critical condition as a **core** action. Stabilized targets stop bleeding out, but remain at whatever HP they stabilize at. This ability can be utilized (Rank) times each day.
- ❖ Advances a language they already know onto its next rank.

At rank **4**, when the character executes a knowledge check to stabilize a target who is in a state of unstable unconsciousness, the target is restored to 0 HP, should their HP be below that threshold.

Power

Metamagic

Representing a character's knowledge about the manipulation of primal magical energy - the GM can call for a metamagic check when the caster attempts to alter their spell. The character cannot use metamagic to apply a bonus that finessing can apply. Twisting magic too much or overusing metamagic can result in a backlash against the caster, add mana cost, or otherwise cripple a character. There is no action or mana cost to applying metamagic unless the metamagic is a significant deviation from the spell's purpose.

- ❖ At rank 3, the character may exclude targets from the area of effect of their spells. To do so, they must make a metamagic check. This check's difficulty is equal to 6 multiplied by the number of targets the caster wishes to exclude. On failure, no targets are excluded and the area of effect is not altered.
- ❖ At rank 5, the character can choose to forego the manual *or* verbal components for spellcasting.
- ❖ At rank 7, the character may finesse their spells down. Finessing down works similarly to regular finesse, except the effect granted by a certain number of finesse is instead removed. Finesse categories that take multiple finesse are decremented with the first finesse. For example, a finesse category with the value $3 + 1/4F$ d10 will be 2d10 when finessed down one to four times, 1d10 when finessed down five to eight times, and so on. No finesse category may be decreased below zero or equivalent. Finessing down as specified by this rank **does** affect mana costs, however all spells that originally cost mana must cost at least 1 mana and a spell's mana cost may only be decreased by a maximum of 4 mana. Additionally, finessing down **does not** contribute to the finesse limit in any way. There is no cap on finessing downwards.
- ❖ At rank 10, a character can choose to forego the manual and verbal components for spellcasting.

Alchemy

Basics

Alchemical potions all share a few properties. They have ingredients (every potion must have at least 2 ingredients; at least one of them being a base), a difficulty score, and a market value. Unless otherwise specified it takes 1 minute to brew a potion and a swift action to use one.

Alchemical Ingredient Difficulty

Individual ingredients have a difficulty value associated with them. A player's ranks in alchemy must at least match the difficulty of an ingredient to be able to brew a potion utilizing this ingredient.

Difficulty of Creating Potions

The difficulty of a given alchemical potion can be calculated by summing the individual difficulty of each chosen ingredient + 10. When a character wishes to brew a potion they must expend the needed ingredients and attempt an alchemy check. If the alchemy roll is at least as high as the difficulty value, the potion is successfully created. If the alchemy roll is **10** or even **15** higher than the required number, you instead make 2 or even 3 potions respectively. On an unsuccessful attempt all ingredients are wasted.

Resistance Checks

Every potion must have either a resistance save or associated attack roll. Imbibed potions and thrown potions with an AOE have a HEA save equivalent to the difficulty of that potion. Making the save halves any damage and negates all utility effects.

Types of Ingredients

Bases

Bases are required for every potion and typically define how the potion is used on a basic level: if it is imbibed, thrown, etc.

Reagents

A potion may have either one or no reagents. Reagents provide flat damage, mana, HP, and mana drain. All reagents have instantaneous effects.

Mutagens

A potion may have as many mutagens as the alchemist desires. Mutagens provide a wide variety of effects and utility. Mutagenic effects typically last until the start of the character's next turn (continuous effect) unless indicated otherwise.

Modified Instantaneous Effects

Some mutagens, like salt, change the duration of a potion, lengthening the continuous effect. If the potion has instantaneous effects, those effects reapply each round for the entire duration.

Mutagens that Affect Damage Type

Some mutagens, like elemental essence, change the damage type of a potion. If lathered onto a weapon, these mutagens will also change the damage of a weapon (base damage and damage caused by weapon specialization/combat style abilities) along with any other damaging effects in the brew. By themselves, reagents do not have this effect on the damage of a weapon.

Failure and Sickening

If the alchemy check fails, all materials are lost. An individual may only imbibe/make use of a number of potions equal to their HEA each day. Individuals with skill in alchemy may make use of a number of potions equal to their HEA + their ranks in alchemy. Beyond this point, the character gains a rank of *sickened* for each potion they make use of. Each effect caused by a rank of sickness is cumulative with the last.

Effect	Sickness Description
<i>Sickened</i>	<i>Sickened I.</i> Target suffers a displaced roll on all checks. Upon entering combat, the target becomes <i>confused</i> . <i>Sickened II+.</i> Target gains a stacking instance of toxic <i>suffering</i> .

Price

A character can typically buy a potion for its cumulative market value and brew a potion by expending the required ingredients.

Ingredients, like potions, may also be purchased in towns depending on the resources they have access to. When looking to purchase potions, they are typically made to order since it is possible for them to decay.

Decay

Depending on the quality of a potion, a potion could decay in a matter of days, weeks, or months. Mechanically speaking, each time players complete a rest period they must roll a d20. On failure, a potion of their choice decays and might become entirely inert, simply less effective, or the potion might produce entirely different effects altogether (GM discretion).

Bases

Name	Difficulty Value	Effects	Ingredient Cost	Added Market Value
Water	1	Imbided potion	1 cp	1 sp
Strong Spirits	2	Single target thrown potion	2 sp	4 sp
Magical Blood	3	Lathered onto a weapon as a swift action lasting 1 minute. Consumed upon the next successful strike.	5 sp	8 sp
Pure Alcohol	4	Thrown potion that explodes in a 10' radius	1 gp	1gp 1sp
Hydrablood	5	Thrown potion that explodes in a 20' radius	2 gp	2gp 6sp
Ichor	6	Lathered onto a weapon as a swift action lasting indefinitely. Consumed after the next 5 successful strikes.	3 gp	3gp 9sp

Reagents

Name	Difficulty Value	Effects	Ingredient Cost	Added Market Value
Sunflower Seed	1	Heals for 1d6	2 cp	1 sp
Parasol Mushroom	1	Damages for 1d6 toxic damage	2 cp	1 sp
Saffron Seeds	3	Heals for 5d6	5 sp	8 sp
Hairy Panus Mushroom	3	Damages for 5d6 toxic damage	5 sp	8 sp
Mandrake Seed	5	Heals for 10d6	1gp 2sp	1gp 8sp
Nightcap Mushroom	5	Damages for 10d6 toxic damage	1gp 2sp	1gp 8sp
Dragon Scales	7	Restores 2d4 mana	2gp 5sp	3gp 7sp
Moonlight Cherry Blossom	7	Removes 2d4 mana	2gp 5sp	3gp 7sp
Unicorn Horn	9	Restores 4d4 mana	5gp	8gp 6sp
Moonbloom Shroom	9	Removes 4d4 mana	5gp	8gp 6sp
Ancient Willow Seed	10	Heals for 20d6 and any excess is converted to an HP shield that lasts for the next minute	3gp 5sp	8gp

Mutagens

Name	Difficulty Value	Effects	Ingredient Cost	Added Market Value
Soap	1	The target and their belongings are made highly presentable through cleaning, removing stains, drying clothes, etc.	2 cp	1 sp
Weeping Carnation	1	The target is slowed	1 sp	2 sp
Jellyfish Stingers	1	The target falls prone. (instantaneous)	1 sp	2 sp
Lurch Reeds	1	The target is cured of fatigue and hangovers. (instantaneous)	2 sp	3 sp
Dwindleberries	2	The next attack roll made against the target has a placed roll to hit.	1sp 5cp	4 sp
Clam Shells	2	Target can breathe and form verbal components of spells underwater.	3 sp	5 sp
Iron Shavings	2	The target is granted an additional strike for the round. (instantaneous)	4 sp	6 sp
Elemental Essence	2	Change the damage type to an elemental magic damage type of your choice	4 sp	7 sp
Psilocybin Mushroom	2	The target is frightened	5 sp	7 sp
Lizard Scales	3	The target receives 2/2 Bonus DVs.	3 sp	6 sp
Stargazer Lily	3	The target cannot talk quietly and must yell.	4 sp	7 sp
Moondew	3	Target experiences vivid hallucinations.	6sp 5cp	1gp
Starbloom	3	Grants the target vision through obstructions such as non-magical darkness and physical barriers	8 sp	1gp 1sp
Myrrh	4	The target is heavily perfumed and can be detected by means other than sight by other creatures.	6sp	1gp 1sp
Raven's Eyes	4	All of the target's abilities have their ranges doubled.	7sp 5cp	1gp 2sp
Burst Cherries	4	The target is befuddled.	7sp 5cp	1gp 1sp
Fractal Lichen	4	The target experiences vague visions of the future. Adding personal items can influence the direction or subject of the visions.	1gp 4sp	1gp 9sp
Quartz Powder	4	The target is teleported LOS 60' to a location of their choice.	1gp 8sp	2gp 3sp
Phosphorus	5	Any damage dealt by the potion is instead dealt as suffering in the potion's relevant damage type.	5 sp	1gp 1sp
Gnomish Mead	5	The target shrinks one size category smaller.	6 sp	1gp 2sp
Crystalline Light	5	The target glows brightly, eradicating natural darkness in the target area and eliminating stealth and invisibility	9 sp	1gp 5sp
Magician's Little Helper	5	The next spell cast by the target in this round is finessed 2 times. (instantaneous)	1gp 6sp	2gp 2sp

Mutagens Cont.

Name	Difficulty Value	Effects	Ingredient Cost	Added Market Value
Salt	6	Potion's effects apply continuously for 2 rounds	5 sp	1gp 2sp
Spring Shrooms	6	The target is immune to falling damage.	7 sp	1gp 4sp
Holy Water	6	The damage type of the potion changes to divine.	9 sp	1gp 6sp
Mythril Powder	6	The target becomes nearly weightless and hovers above the ground. The target receives a displaced roll on all STR Checks. If the target has a flight speed, it is doubled.	1 gp	1gp 8sp
Fairy's Cap	6	The target is instantly teleported to their position from 3 rounds ago.	1gp 8sp	2gp 6sp
Mercury	7	Delays potion effect by 1 hour	1gp 3sp	2gp 3sp
Mandrake Root	7	The target can understand all languages.	1gp 5sp	2gp 5sp
Primordial Orchid	7	The target becomes immune to an elemental damage type. (decided at the time of creation)	1gp 7sp	2gp 8sp
Tallow	7	Grants the target an inferior stat of the alchemist's choice(set at the time of the potion's creation).	2gp 2sp	3gp 3sp
Poppy Seeds	7	The target is made sluggish, their Martial Point total is halved.	4gp 2sp	5gp 6sp
Tiger Lily	8	The target is rendered mute.	2gp 1sp	3gp 6sp
Powdered Essentia	8	Delays potion effect by 12 hours	2gp 4sp	4 gp
Realgar Dust	8	A random chaos effect is rolled, wherein the target is considered both the target and the caster.	3gp	4gp 8sp
Reishi Mushroom	8	The target is cured of disease and cleansed of all status effects	5gp	7gp 2sp
Cloudbloom	9	The target falls upwards at 20ft per round.	1gp 2sp	2gp 8sp
Copper Powder	9	Potion's effects apply continuously for 4 rounds	2gp 3sp	4gp 5sp
Ectoplasm	9	The target is made <i>ethereal</i> .	2gp 8sp	5gp 3sp
Selenium	9	The potion does the exact opposite of what it would do otherwise. Healing effects would deal pure magic damage.	3gp 7sp	6gp 6sp
Banana Slugs	10	The target is permanently transformed into a gender of the alchemist's choice(set at the time of the potion's creation).	3gp 4sp	7gp 8sp
Heaven's Drop	10	A target that has died within the last two weeks is revived (instantaneous)	6gp 5sp	14 gp
Polymethaqualone	10	The target is permanently transformed into a creature that the alchemist has studied (set at the time of the potion's creation). The target can receive any adaptations natural to the creature, with a total point cost up to the target's HEA stat. (instantaneous)	7gp	15 gp

Items and Crafting

Crafting governs the creation of items, mundane and magical. An adventurer may only activate/make use of up to six distinct magic items each week (including their weapons, armor, or shield if these items have an enchantment component.)

Magic Item Slots

A character has access to **six** magic items that they can make use of each week - each magic item typically takes up a single slot, attuned at the **start** of a rest period or as soon as the item is obtained if they still have slots. Certain magic items of particularly extreme power may take up more than one of these slots.

Weapon / Armor Crafting

Crafting allows a character to create and customize weapons or armor. When creating an item, there are three components a character must consider: the technique, the material, and the enchantment (optional) applied to the armor. The more complicated the armor or weapon component and the more additions it has - the more difficult it is to create. The difficulty of creating an armor or weapon component is the sum difficulty of all of the additions in that particular section. The crafter must have a number of ranks in crafting equal to or higher than the difficulty of the armor or weapon component they are creating. The crafter can combine these components to create a complete set of armor, a shield, or weapon without a check.

Cost

There are two separate costs listed for every item in the crafting tables, in the format, "number /number." The first cost is the cost of the raw materials that the crafter must pay, and the second cost is the market value of the particular addon/feature. Enchantments come with a mana cost that either the crafter or the assisting caster must pay at the time of enchantment. The mana cost is equal to the difficulty score of the enchantment. Characters may find armor and weapons crafted in the world (depending on rarity and difficulty of the components) and may buy these items at the listed costs at appropriate locations.

Crafting, Step by Step:

Before beginning, a character must decide how they are going to craft their item. There are two options: Either crafting it themselves using their crafting skill or having a relevant expert craft an item for them.

- ❖ Having a relevant expert craft an item for a character does not require skill in crafting. When getting the help of an expert; the character should use the second value in the "Cost/Other Prerequisites" column for a component's cost. There is no guarantee that a given component is available at any expert. The character may provide non-gold components (for example, ranks in a given spell school) to the expert themselves.

Crafting Armor Yourself

Crafting items yourself lets you use the first value in the “Cost/Other Prerequisites” column, but confers limitations on components selected. When selecting components, for armor you craft yourself, you may not choose a component if its Difficulty Score is higher than your Crafting skill. This restriction applies to all components.

- ❖ First, select the item’s technique. This means deciding whether you wish to make armor of a particular class (heavy, medium, light, or robe), whether you want to make a shield, or a certain weapon.
- ❖ Next, select your item’s technical addons. You may select any number of technical addons so long as the sum of their difficulty scores does not exceed 10.
- ❖ Next, select your item’s material. An armor must have exactly one material. While selecting your material it is important to consider if you would like any material coverings. You may have as many covers as you like so long as the sum of their difficulty scores and the difficulty score of your chosen material does not exceed 10.
- ❖ Finally, select your item’s enchantments. You may select any number of enchantments so long as the sum of your enchantments’ Difficulty Scores does not exceed 10.
- ❖ To complete the item, pay the sum of the components’ costs as dictated by your crafting method. After the requisite amount of time to craft the item (determined by the GM), you will obtain the armor.

Items and Bonuses

Items cannot benefit from multiple components of the same type. To receive benefits, they must be of a different type (an item cannot benefit from multiple technical or material components; for example.) General Stacking rules still apply.

Technique, Material, and Enchantment

Many aspects of a component for a piece of armor or weapon are optional - though their total difficulty score added together may never exceed 10.

Modifying Crafted Armor

Characters can modify components after crafting them. Typically crafters create them as part of a complete set, but they may also be crafted or purchased in isolation for future use. A character may swap or remove techniques or enchantments in a suit of armor, weapon, or shield with different ones they have on hand, provided they have the crafting skill to use those techniques or enchantments in crafting and the new component does not raise the total difficulty of the armor’s techniques or enchantments above 10.

Crafting Example: George has 4 Ranks of Crafting and wants to make some cool armor. He first selects a technique (Heavy Armor) and adds on a Medical Kit to help him aid his allies in battle. The total difficulty of the technical components he has chosen is 3. He then selects a material (Steel) and decides against any material coverings, totaling a difficulty of 3 for all the material components. He then looks into enchantments which he decides against for the time being. The difficulty of each section is then 3 / 3 / 0, all of which are less than 4 so he may make the armor without a check.

Armor Technique			
Base	Defense Values	Difficulty Score	Cost/Other Prerequisites
Robe (No Armor DVs)	0 DV	0	None
Light Armor	3 DV	0	None
Medium Armor	5 DV	0	None
Heavy Armor	7 DV	0	None
Shield	1 DV	0	None
Optional Technical Addon			
Secret Compartment	A secret pocket on the inside of the armor capable of concealing an item a few inches thick and a few feet long/wide.	2	2 / 3 GP
Built in X (Armor Only)	An item such as a weapon or shield can be attached to the armor, making it immune to any disarming attacks. The item still requires the appropriate number of hands to wield.	4	10/ 12 GP
Medical Kit	The action cost of healing via knowledge skill is reduced to a swift action.	3	25 / 30 GP
Alchemic Suite	The action cost of alchemy is reduced to a swift action, and the wearer gains a stacking placed roll on alchemy checks.	8	50 / 60 GP
Casting (Shields Only)	The shield no longer inhibits casting.	4	10 / 12 GP
Runic Inscription	+ 1 stacking placed roll on all metamagic checks.	5	30 / 36 GP
Dashing Style	+ 1 stacking placed roll on all interpersonal checks.	5	15 / 18 GP
Grappling Hook	Character attaches a grappling hook with 30' of reach to their armor. Requires a movement action to use. Can only latch onto sturdy objects.	2	2 / 3 GP
Advanced Grappling Hook	Character attaches a grappling hook with a reach equal to their movement. Requires a movement action to use. Can be used to grapple onto targets with an attack roll (Core Action, or as part of a grappling attack.)	6	30/ 36 GP
Collapsible	The Armor or shield can collapse to be the size of the character's palm (no weight change) as a swift action.	3	10 / 12 GP
Ejectible X	Characters can launch a potion, armor, weapon, or other item as a swift action, up to 40'.	2	5 / 6 GP
Fortress Shield (Shield Only)	The character plants their shield into the ground, allowing a character to take cover behind it. Selenium, Illastrium, and Oricum shields provide exceptionally protective cover.	5	15/ 18 G

Armor Material			
Base	Description	Difficulty Score	Cost/Other Prerequisites
Iron	Standard Defense Values	1	2 / 3 GP
Steel	+1 DV	3	15 / 18 GP
Lumil	+2 DV	5	50 / 60 GP
Adamant (Armor Only)	+3 DV	9	250 / 300 GP
Orichalcum	+ 1 placed roll on any attempts to resist an ability.	9	250 / 300 GP
Selenium	The armor can hold double the normal maximum difficulty score of enchantments (20, instead of 10.) Crafter's ranks in crafting are doubled when working with this material.	9	250 / 300 GP
Illiastrum	Mundane Damage Reduction 4, Negates a weapon's bonus damage, unless it is a <i>Magical Damage</i> type; character no longer benefits from armor DVs.	10	500 / 600 GP
Material Coverings			
Invisible Ink	The item itself is invisible, allowing it to be seen through, showing whatever is beneath it.	1	30 / 36 GP
Vacuum Proof (Armor Only)	Makes the armor vacuum-proof (Protecting them from some hostile environmental conditions). Has a life support system that lasts for up an hour, that is restored upon a rest period.	3	20/ 25 GP
Dragon Scales	<i>Resistance</i> to a single type of mundane damage of the character's choosing.	7	100 / 120 GP
Golden (Armor Only)	+ 1 stacking placed roll on all performance checks.	3	100/ 120 GP
Hood (Armor Only)	+ 1 stacking placed roll on subtlety checks	3	15 / 18 GP
Cape (Armor Only)	+ 1 stacking placed roll on acrobatics checks	3	15 / 18 GP

Armor Enchantments

Enchantment	Description	Difficulty Score	Prerequisites / Monetary Cost
Sequenced Magic	Spell resistance checks set by the caster are always 11 + the caster's ranks in crafting.	3	Any Group: 3 / 6 GP
Elemental Resistance	<i>Resistance</i> to a single type of elemental damage of the character's choosing.	10	Any Elemental Group: 10 / 20 GP
Aegisite	Elemental <i>Damage Reduction</i> 1	10	Any Group: 10 / 20 GP
Earthen infusion	+1 DV	4	Terramancy: 4 / 8 GP
Ice Infusion	<i>Slows</i> the first target that successfully strikes the character with an attack roll, in a round, until the end of their next turn	4	Aquamancy: 4 / 8 GP
Lighting Infusion	+10 Bonus Movespeed	5	Aeromancy: 5 / 10 GP
Astral Infusion	Inflicts 1d10 pure magic damage to the first target that successfully strikes the character with an attack roll in a round.	5	Astral Power: 5 / 10 GP
Fire Infusion	Inflicts an instance of <i>suffering (fire)</i> on the first target that successfully strikes the character with an attack roll in a round	5	Pyromancy: 5 / 10 GP
Protective Field	+ 1 to the roll on any attempts to resist an ability.	5	Interdictions: 5 / 10 GP
Chronosteel	Gain a placed roll on initiative checks and allows the character to dismiss and summon the item from a pocket dimension as a swift action.	5	Space Time: 5 / 10 GP
Disguised Armor	Twice per day, change the visual appearance of the armor within reason.	2	Illusions: 2 / 4 GP
Sensing Armor	+ 1 stacking placed roll on implicit awareness checks	4	Scrying : 4 / 8 GP
Charming Allure	Enemies have a displaced roll on to hit rolls against the character if the character hasn't taken any hostile actions against them.	4	Charms: 4 / 8 GP
Restorative Armor	All healing this character gives/receives is increased by 2.	3	Life: 3 / 6 GP

Armor Enchantments Continued

Enchantment	Description	Difficulty Score	Cost/Other Prerequisites
Natural Lighting	Wears armor emits light in a 40' radius around them.	1	Light: 1 / 2 GP
Leeching Infusion	Wearer recovers 10 HP at the end of each turn, up to a maximum daily total of 80, restored after a complete rest period.	10	Death: 10 / 20 GP
Nightvision	Wearer's vision in natural darkness is equal to their normal vision.	4	Darkness: 4 / 8 GP
Living Armor	The armor has a 10 HP temporary barrier, restored after a complete rest period.	1	Flora: 1 / 2 GP
Natural Armor	Wearer gains d12 claws and a d12 bite.	3	Fauna: 3 / 6 GP
Adaptive armor	Wearer is unaffected by temperature, and the wearer does not need to breathe as long as they are wearing the armor.	2	Tempest: 2 / 4 GP
Auric Armor	The wearer's maximum HP is set to 10 and cannot be increased. At the start of each turn, the wearer receives a HP shield of 35. This shield reapplies itself to the character at the start of each round. If enhanced with <i>enhanced enchantment</i> this is increased to 45.	8	Turmoil: 8 / 16 GP
Duplicate armor	The wearer can give someone a temporary copy of their own armor without the duplicate enchantment once between rest periods (lasts 8 hours.)	5	Equilibrium: 5 / 10 GP
Enhanced Enchantment	This enhancement is equivalent to 2X the effect of a separate enchantment, however, the enchantment's difficulty score is also doubled.	Special	Effigy: 5 / 10 GP

Weapon Techniques			
Base	Description	Difficulty Score	Cost/Other Prerequisites
Standard Weapon	Standard Weapon Die Size	0	0
Unique Weapon	The weapon does not ascribe to standard specializations. Create a new weapon specialization referencing the rules	4	15 / 20 GP
Musical Weapon	The weapon is also an instrument.	2	5 / 10 GP
Double Weapon	The weapon acts as two distinct weapons at the same time.	2	15 / 20 GP
Triple Weapon	The weapon acts as three distinct weapons at the same time.	6	30 / 40 GP
Technical Addons			
Casting	The weapon does not inhibit casting	4	10 / 12 GP
Secret Compartment	A secret pocket on the inside of the weapon capable of concealing an item a few inches thick and a few feet long/wide.	3	10 / 12 GP
Collapsible Weapon	The weapon can collapse to be the size of the character's palm (no weight change) as a swift action.	2	20 / 24 GP
Phial Mount	The weapon can store up to 5 doses of a single type of potion. A dose can be applied to the weapon as per the potion's writeup as a reaction	5	50 / 60 GP
Adaptable Weapon	The user can purchase the relevant combat style and weapon specialization using an attribute of the character's choice, for use with this weapon. The character utilizes the attribute of their choice to set those resistance checks.	5	150 / 180 GP
Structured Weapon	Weapon skill resistance checks set by the character are always 10 + the character's ranks in crafting (Cannot be further enhanced.)	3	25/ 30 GP

Weapon Chart

*Note Casting Wands and Staves; The spellcaster can use the weapon instead of a hand as a catalyst for a spell.

Weapon List						
Type	Damage	Damage Type	Hands	Reach/Range	Strength Requirement	Combat Style
War Axe	1d12	Edged	1	5'	6	Versatile Axe
Battle Axe	2d8	Edged	2	5'	6	Heavy Axe
Great Axe	1d20	Edged	2	5'	9	Heavy Axe
Shortbow*	1d4	Piercing	2	80'	2	Precision Bow
Longbow*	1d10	Piercing	2	80'	4	Versatile Bow
Crossbow*	2d8	Piercing	2	80'	6	Heavy Crossbow
Cestus	1d12	Blunt	1	5'	6	Versatile Brawling
Pistol	1d4	Piercing	1	40'	2	Precision Handgun
SMG	1d4	Piercing	1	40'	2	Precision Machine Gun
Machine Gun*	1d10	Piercing	2	60'	4	Versatile Machine Gun
War Hammer	1d12	Blunt	1	5'	6	Heavy Hammer
Maul	2d8	Blunt	2	5'	6	Heavy Hammer
Giant Hammer	1d20	Blunt	2	5'	9	Heavy Hammer
Dagger	1d6	Piercing	1	5'	2	Precision Knife
Spear	1d12	Piercing	1	10'	6	Versatile Polearm
Glaive	2d8	Piercing	2	10'	6	Heavy Polearm
Sarissa	1d20	Piercing	2	10'	9	Heavy Polearm
Carbine*	1d10	Piercing	2	60'	4	Versatile Rifle

Casting Staff	1d10	Blunt	1	10'	6	Versatile Polearm

Weapon Materials			
Base	Description	Difficulty Score	Cost/Other Prerequisites
Iron	Base Weapon Damage	1	1 GP
Steel	+ 1 of the Weapon's Damage Type to each attack	3	6 / 8 GP
Lumil	+ 2 of the Weapon's Damage Type to each attack	5	25 / 40 GP
Adamant	+ 3 of the Weapon's Damage Type to each attack	9	150 / 180 GP
Selenium	The armor can hold double the normal maximum difficulty score of enchantments (20, instead of 10.) Crafter's ranks in crafting are doubled when working with this material.	9	250/ 300 GP
Illastrium	Increases the number of damage dice the weapon inflicts by one I.E. A Illastrium War Axe would roll 3d8, not 2d8 on hit; the weapon cannot be enchanted.	10	350 / 420 GP
Orichalcum	Weapon <i>ignores resistance and damage reduction</i> to it's damage type and can harm <i>ethereal</i> targets.	7	150 / 180 GP
Material Coverings			
Silvered	The weapon is treated as though it were made of <i>Silver</i> .	1	15 / 18 GP
Auruphyte Coating	Weapon's Damage Type is changed to <i>Blight</i> .	5	125 / 150 GP
Soulsteel Coating	Base Weapon's Damage Type is changed to <i>Divine</i> .	5	150 / 180 GP
Serrated Edge	The weapon's base damage is reduced to 0. Instead of inflicting damage, each successful attack inflicts an instance of <i>suffering</i> (of the weapon's mundane damage type.)	9	50 / 60 GP
Extending Range	Increases the reach of a ranged weapon by 40'	3	25 / 30 GP
Extending Range II	Increases the reach of a ranged weapon by 120'	7	60 / 72 GP
Extending Reach	Increases the reach of a melee weapon by 5'	3	25 / 30 GP
Extending Reach II	Increases the reach of a melee weapon by 15'	7	60 / 72 GP

Weapon Enchantment			
Enchantment	Description	Difficulty Score	Cost/Other Prerequisites
Magical Enchant I	+ 1 bonus to attack rolls	3	Any Group: 3 / 6 GP
Magical Enchant II	+ 2 bonus to attack rolls, becomes +3 with Magical Enchant I	7	Any Group: 7 / 14 GP
Magical Affinity	Applies any damage bonus granted by the weapon to any attack rolls caused by the casting of a spell. The damage type is reflected by the spell's damage type.	3	Any Group: 3 / 6 GP
Runic Enchant	+ 2 to the Weapon's Damage Type.	7	Any Group: 7 / 14 GP
Warp Mechanism	Struck targets cannot teleport until the end of their next turn and allows the character to dismiss and summon the item from a pocket dimension as a swift action.	4	Space Time: 4 / 8 GP
Elemental Property	+ 2 Damage of a chosen element type, alters the material/base damage to reflect the elemental property.	7	Any Elemental Group: 7 / 14 GP
Phantom Blade	First successful this turn reduces the target's MU by 4.	7	Interdictions: 7 / 14 GP
Anima	Evocations are finessed once in a direction of the user's choosing, when channeling through this weapon.	7	Astral Power: 7 / 14 GP
Illusory Weapon	The weapon is an intangible illusion with special properties - the user can alter which of the 5 senses it carries as a swift action. The character cannot change the damage, base range, or weapon category that it functions as.	5	Illusions: 5 / 10 GP
Predictability	The weapon's critical hit value is changed to 11. The weapon always hits on this number, multiplying all damage done by 1.5x. All other critical hit values lose their effectiveness as critical hits, causing them to inflict normal damage.	10	Scrying: 10 / 20 GP
Hex of Attachment	The weapon can be returned to the owners hands as a swift action, if it is within 100' of the character.	2	<u>Charms</u> : 2 / 4 GP
Magnetism	The weapon is magnetized - causing it to float telekinetically around the character, extending its reach by 5', though it is still wielded normally. The STR requirement is converted to an equal INT requirement when using the weapon telepathically.	4	Terramancy: 4 / 8 GP
Explosive Weapon	All within a 10' radius of the target take 1d12 fire damage (excluding the target), on the first successful strike in a turn.	7	Pyromancy: 7 / 14 GP

Weapon Enchantment P2.

Enchantment	Description	Difficulty Score	Cost/Other Prerequisites
Shifting Weapon	All attacks made with the shifting weapon grapple a target, once struck the weapon itself grapples the target, transforming into watery chains. The STR of the chains is 10 + creator's rank in crafting. When broken, the weapon falls to the ground resuming it's normal form.	8	Aquamancy: 8 / 16 GP
Light as Air	The STR requirement of the weapon is reduced to 0.	5	Aeromancy: 3 / 6 GP
Preservation	The weapon's damage type becomes <i>stress damage</i> .	3	Life: 3 / 6 GP
Guiding Light	Taking an hour of sun exposure to charge, the wielder can release this sunlight in 20' radius around themselves as a swift action. It remains there for a minute	1	Light: 1 / 2 GP
Death Toll	If the target is unconscious or below 0 HP this weapon instead instantly kills the target when they are struck. (Can kill immortal beings who meet the criteria of the attack.)	5	Death: 5 / 10 GP
Dread	This weapon gains a placed roll when attempting to hit a target in darkness and two placed rolls when hitting targets in magical darkness.	7	Darkness: 7 / 14 GP
Embedded Weapon	The weapon takes root in one's body. This reduces the amount of arms needed to wield this weapon by 1.	7	Flora: 4 / 8 GP
Familiar	The weapon gains the ability to transform into a harmless familiar that obeys the wielder. The owner can toggle the ability to see through their familiar's eyes as a swift action. The familiar must be at least 5" x 5" and can be up to 5' x 5', with a land speed of 30' or flight speed of 10' The familiar can be visually different each time it is summoned.	3	Fauna: 3 / 6 GP
Stormchaser	On a successful spell (above rank 0) attack roll, the wielder of the weapon can teleport anywhere within melee reach of the target	3	Tempest: 3 / 6 GP
Chaos incarnate	Inflict chaos bolt on hit, however the weapon forcibly expends 8 HP per chaos effect.	5	Turmoil: 5 / 10 GP
Mimic	The weapon has the ability to turn into any weapon the caster can see (perfect replica), as a swift action. The mimic effect wears off after an hour. This can only be used once in between rest periods.	3	Equilibrium: 3 / 6 GP
Duplicate	When this weapon is forged it splits in two, creating two identical weapons. As a swift action, the caster can pull one weapon to the other if it is within 200' of the other.	3	Effigy: 3 / 6 GP

Unique Weapons

Unique weapons follow a standard procedure with which they are built. First, the character must choose a vessel; their weapon can be anything from a frying pan to a laser blaster.

Constructing the Weapon

The player begins by choosing a base game weapon to use as a mold drawn from the weapon table. The character keeps everything the same except the damage type it inflicts and its weapon specialization. For example, if they create an umbrella they should first consider whether they want precision, versatile, or heavy umbrella. In this example, the weapon will be a *precision* umbrella. Observing the existing precision melee weapons, it will be a dagger. This means that the weapon will have a reach of 5', a STR requirement of 2, it will require 1 hand to wield, and inflict a d6 of damage on hit. Finally, it requires a damage type; the character can select any mundane damage type. For the precision umbrella, we will choose blunt.

Choosing Specializations

Choose specializations from the specialization effect list to give the weapon it's specializations. First, consider whether the unique weapon is melee or ranged. Melee weapons receive 7 specializations while ranged weapons receive 6. Custom weapons may only have a maximum of one passive. Custom weapons may not choose specialization effects marked with a * as these are considered unique. If *Lethal* is selected, the weapon receives *Lethal III* and if *Lethal Barrage* is selected, the weapon receives *Lethal Barrage II*. If the weapon has a reach greater than 5' they must have Radial Attack, and if the weapon has a reach of greater than 10' they must additionally select Extending Reach.

Custom Specialization Skill

A player's character sheet has a section marked for a custom weapon specialization, which they may utilize to name their skill, spending the appropriate experience to increase their ranks in the weapon as appropriate.

Special Interactions

Certain weapon specialization skills when combined will produce different effects - for example, if a grappling attack is combined with a ranged weapon - the weapon must have a grappling hook or advanced grappling hook and the wielder is pulled to the target upon a successful grappling attack, expending their movement action on use. If the weapon does not immediately make sense or seem workable - it is best to discuss how it can be used with a GM.

General Magic Items

Any spell rank 1 or higher can be encased within an object and turned into a magic item. The spells retain its original action cost. To do so, the crafter must either be or have the assistance of a spellcaster that knows that spell. The difficulty score associated with that enchantment is equal to the rank of the desired spell. A crafter can make an item with enchantments whose difficulty totals their ranks in crafting skills. If the crafter does not know the spell themselves, they must treat the spell as though it were 4 ranks above its current rank, to account for the coordination required in the crafting process.

Increasing Usage/Potency

Effects start as once per week; by applying multiple instances of the same spell to an item, those effects can become once per day, and then twice per day effects. The spell put into a general enchantment may be finessed, following standard finessing protocol. The resistance check for these items is always set by 11 + the crafter's ranks in crafting.

Magic Item Limitations

An adventurer may only activate/make use of 6 distinct magic items each week (including their weapons/armor if these are magically enchanted.) The spells put into a general enchantment may be finessed, following standard finessing protocol. When the item is created the caster loses mana as if they had cast that spell. The character chooses their magic items at the end of a rest period, and may not choose different ones until the end of the next one.

General Magic Item Examples

Orb of teleportation: 3 instances of (Fade 2 - Space Time), this orb may be used twice per day and has a difficulty score of 6 to craft.

Shiny Glasses: 3 instances of (Blinding Furor 1-Light) finished once for targets. This may be used 3 times per day to cast Blinding Furor finessed once for target. This item has a difficulty score of 6.

Cost of Crafting General Magic Items

Creating a general magic item comes with an associated cost. The higher the rank of a spell, the more expensive the materials needed to construct such an item.

Item Cost	Spell Ranks / Difficulty Score
1 Gold	1-2
2 Gold	3-4
5 Gold	5-6
10 Gold	7-8
50 Gold	9-10

Item Hit Points

All items have a HP value, though the HP value of any item in particular, as well as its particular STR, HEA, or other attribute scores is determined by the GM. Generally, the more rare an item is, the more difficult it is to break, though there are some exceptions. Selenium is an incredibly powerful material, though it is more likely to make a PWR check than it is to make a STR check. Certain items could require potent rituals to deconstruct, depending on their material.

Item Effects

Unless otherwise stated, an item must be drawn from or worn in order to benefit from it.

Special Items

Typically the product of intensely magical incantations; these items are a result of unique circumstances that may be impossible to replicate. They can often consume more than one magic item slot - and specify if they do.

Special Item Examples

Prismatic Blades

Magical Weapon

Magic Item Slots - 2

A pair of weightless d20 + 5 (stress damage) greatswords, one blade can be brought to the other utilizing a swift action. Both weapons can act as a catalyst for casting. Finally, the blades shock the user with knowledge - they can purchase Sword Skill and Heavy Weapons using INT instead of STR, and utilize INT to set the weapon skill checks instead of AGI or STR.

Conduit Stone

Magical Necklace

Magic Item Slots - 2

A crystalline gem that is able to store a single charge of a spell indefinitely. This spell must be of 4th rank or lower. When this crystal is worn on the body the spell can be cast as a swift action. This crystal may also be forged into a weapon, allowing the user to cast this spell with the area being replaced by any target hit by their attacks as a swift action. Their attacks do not deal their normal damage, they instead transmogrify into the spell itself. It takes a minute to enchant the crystal into holding a particular spell. The mana is lost at the time of enchantment.

Third Eye

Magical Eye

Magic Item Slots - 1

A gleaming gem sparkling with the symbol of an eye. As a swift action the character may concentrate. For the rest of their round any attacks made with an attack roll use the character's PWR stat as the modifier for their to hit rolls. This can be done twice between rest periods.

Sacrificial Dagger

Cursed Magical Weapon

Magic Item Slots - 1

A weightless d6 combat dagger, whose edge never seems to stop bleeding. When attuned to the wielder, they can choose to cast spells using their HP instead of MU. The HP cost of the spell is equal to the spell's rank multiplied by 2, and they can no longer be finessed. The character can only recover HP through rest periods.

Mirror Shield

Magical Shield

Magic Item Slots - 2

Borne of **selenium**; the mirror shield reflects the force of any attacks back onto the original attacker. Whenever a successful attack roll is made against the wearer; the attacker receives half of the attack's damage in its original damage type. The shield currently has no enchantments applied to it.

Equipment and Currency

Crescent has basic currencies that act as a common tool for transactions. They act as a point of commonality between cultures and language barriers. The common currency includes copper coins (**cc**), silver coins (**sc**), gold coins (**gp**), platinum coins (**pc**), and selenium coins (**sc**.) These coins have a stringent standard that results in the coins being respected across Cahyali.

Alternative Currencies

Characters can use other currencies in exchange for objects. Often in the form of magical items, materials, knowledge, or bargain with social capital.

Using Items

Characters typically have two hands, allowing them to hold an item in each hand or a single two-handed item using both hands. There are actions that revolve around the usage and interaction with items.

Item Limits

Characters are capable of carrying a huge quantity of items, though there are still limits. A character decides the total weight of the items they can carry by determining their *encumbrance*.

Wielding Items

Often abilities will require the character to use a specific item. A character is wielding the item while they are carrying it.

Broken Objects

Objects are broken when their HP threshold reaches 0. A crafter can repair a broken object with a relevant crafting check, depending upon the damage taken by the object. Broken objects are unusable and do not resume function until a crafter repairs them. A crafter cannot repair an item that has taken double its maximum HP in damage.

Valuation of Coins

The following tier of coins is 10 times as valuable as the previous tier. Silver coins are worth 10 copper, while gold coins are worth 10 silver. Platinum coins are likewise worth 10 gold. Selenium coins are worth 10 Platinum coins, though their rarity makes them uncommon for actual trade.

Coins	cp	sp	gp	pp
Copper (cc)	1	0.1	0.01	0.001
Silver (sc)	10	1	0.1	0.01
Gold (gp)	100	10	1	0.1
Platinum (pp)	1000	100	10	1

General Purpose Items

Many common items exist in the world, including rope, tools, and oil. These items are not necessarily martial or useful but can carry either aesthetic or sentimental value.

General Item Statistics

Object	Cost	Weight	Hands
Alchemist's Lab	1 gp	30 kg	2
Amulet (Silver)	1 gp	-	-
Ankh (Silver)	1 sp	-	-
Armband (Silver)	1 sp	-	-
Backpack	1 sp	5 kg	-
Bandolier	1 sp	-	-
Bedroll	1 sp	3 kg	-
Belt Pouch	1 sp	-	-
Chain (30')	5 gp	1 kg	1
Chest (Silver)	1 gp	5 kg	-
Climbing Gear	1 gp	5 kg	1
Clothing (Normal)	5 sp	1 kg	-
Compass	1 gp	-	1
Cooking Supplies	1 gp	5 kg	-
Flint and Steel	1 sp	-	1
Hourglass	5 sp	-	1
Instrument	5 sp	1 kg	2
Lantern	5 sp	1 kg	-
Lock	5 sp	-	1
Manacles	1 gp	-	1
Mirror	1 gp	1 kg	-
Mug	1 sp	-	1
Oil	2 sp	-	-
Rations (1 Week)	5 sp	-	1
Rope Ladder (30')	1 sp	1 kg	-
Selenium Manacles	100 gp	1 kg	1
Symbol	1 sp	-	-
Textbook	1 sp	1 kg	1

Object	Cost	Weight	Hands
Journal	5 sp	-	1
Makeup	5 sp	-	2
Map	5 sp	-	1
Repair Kit	5 sp	5 kg	2
Rope (30')	5 sp	10 kg	1
Satchel	5 sp	-	-
Scroll	5 sp	-	1
Sheath	5 sp	-	-
Tent	1 gp	10 kg	2
Torch	5 sp	1 kg	1
Vial	5 sp	-	1
Waterskin	5 sp	1 kg	1
Wiring	5 sp	-	1
Writing Tools	5 sp	-	1

Weight and Hands

Items with a weight of N/A still have a weight, but it is negligible to the character. They cannot have an unreasonable amount of this item. Some items also require hands to utilize, taking up that number of hands as long as they are in use.

Increasing Value of Items

The value of items can be increased. Most minor items such as amulets or Ankhs are normally made of silver, but the character can increase the value of the material the item uses. They do this by multiplying the base cost of the item by 10, making it out of the next most valuable material.

General Services

Characters can also exchange currency for services. Services come in the form of transportation, food, lodgings, or labor.

Service	Cost
Beverage	5 cp
Beverage (Good)	1 sp
Beverage (Exquisite)	5 sp
Labor (Unskilled, month)	3 gp
Labor (Skilled, month)	10 gp
Lodging	5 sp
Lodging (Good)	1 gp
Lodging (Exquisite)	10 gp
Food	1 sp
Food (Good)	5 sp
Food (Exquisite)	1 gp
Transportation	5 sp
Transportation (Boat)	20 sp
Transportation (Airship)	2 gp
Transportation (Teleportation)	5 gp

Living Expenses

The way characters live their lives influence how much money they spend on a day to day basis. They may desire a more extravagant lifestyle, which will have a greater expense than a more humble one.

Living Conditions	Week	Month
Basic	1 sp	4 sp
Fine	5 sp	20 sp
Exquisite	20 sp	8 gp

Animal Companions and Mounts

There are two kinds of animals that merchants sell in Cahyali, transportation mounts and war beasts that are capable of devastating attacks. The price and availability of animals varies on a regional basis, as well as their rental price (**for a week.**) Transportation animals are likely to run or become *frightened* in an actual combat encounter. War beasts or transportation mounts can be a significant increase in power for a character, so the GM may want to assign a *magic item* value for having one. There are more creatures that exist in the world that can be mounted, but are not commonly available.

Transportation Mounts

Mount Name	Rent	Purchase
Horse	1 gp	8 gp
Giant Sea Turtle	2 gp	12 gp
Riding Dolphin	3 gp	15 gp

War Beasts

Mount Name	Rent	Purchase	Slots
Warhorse	2 gp	15 gp	1
Drake	6 gp	45 gp	2
Warbear	6 gp	45 gp	2
Landshark	6 gp	45 gp	2
Wravleh	8 gp	85 gp	3
Dusk Hunter	10 gp	130 gp	3
Romzaleh	10 gp	130 gp	3

Slots

Slots indicates the number of magic item slots a war beast takes up.

Performance

Performance is an art rooted in both mundane and magical ability. Performers can tie magical and martial abilities into the way they move, dance, and sing. By weaving magic into a higher art form; they can improve their abilities.

Styles

At rank **1** of the performance skill, the performer may choose a performance style: Dance, Instrumental, or Vocal. A character may only use Performance abilities from the one style, until rank **5** in which the performer may choose a second style. At rank **10** a performer has mastered all styles.

Using Performance Abilities

As part of a rest period, a character may prepare Performance abilities from their styles, selecting abilities across all known styles up to a total cost of their ranks in performance*2.

Types of Abilities

PASSIVE - These abilities are always active.

ACTIVATED - The character may activate these abilities an unlimited amount of times. However, activating these abilities typically has some sort of action cost.

CHARGED (X) - The character has X charges of this ability; the character must expend one or more charges of said ability in order to utilize it. All charges are restored upon completing a rest period.

Dance

Dance lends itself to quick and nimble movements. It becomes difficult to keep the performer in one place. Dancers turn the battlefield into a stage. Through graceful movements and a commanding presence, they draw attention to themselves. Dancers only need manual components to cast (they must have at least 2 free limbs.) They must dance to cast - and cannot cast if immobilized.

Vocal

Either through weaving a harmonious melody of music or piercing the air with vicious shrieks, vocal performance allows a character to mesmerize others with the strength of their voice. Vocal performance only requires vocal components to cast their spells - discarding the need for manual components, though they must use their voice to cast - and cannot cast if unable to vocalize.

Instrumental

Instrumental performance uses an instrument as a catalyst for the performer - allowing them to channel magic through their chosen instrument. The character must be able to play their instrument to cast a spell - and the instrument must either be played through normal manual components or vocal components. They cannot cast if physically unable to operate their instrument.

Dance

1 – Ballroom Dancing

Action Cost: Swift Action

Target: Touch

Area: Single Target

Type: Focus

Duration: Instantaneous

Resistance: N/A

The dancer partners with a willing target; the dance persists as long as one partner maintains their focus on the dance. While dancing together, wherever one partner moves, so do the other. If one of the dancers is grappled/pinned, the dance is broken.

1 – Ballet

Action Cost: Swift Action

Target: Character

Area: Self

Type: Activated

Duration: Instantaneous

Resistance: N/A

The dancer leaps feet equal to twice an acrobatic check, allowing them to jump to anywhere in that distance. The dancer may leap off of any solid surface, be it the ground, a wall, etc.

2 – Jazz

Action Cost: Swift Action

Target: Character

Area: Self

Type: Activated

Duration: Instantaneous

Resistance: N/A

It becomes nearly impossible to slow the dancer; allowing them to utilize their swift action to make themselves *immune* to the *slow* status condition until the end of their next turn.

3 – Hip Hop

Action Cost: N/A

Target: Character

Area: Self

Type: Passive

Duration: Instantaneous

Resistance: N/A

The dancer's arcane flow and musical flow combine, protecting them from harm. The dancer gains 2 bonus DVs when they spend mana. All DVs granted by this skill are removed when the caster ends their turn without having spent mana.

3 – Disco

Action Cost: Reaction

Target: Character

Area: Single Attack

Type: Charged (4)

Duration: Instantaneous

Resistance: N/A

As a reaction, the character can contest the attack roll of an incoming attack using their Performance, if it is higher than the attack roll, the attack does not strike, as they dodge out of the way of its effects.

3 – Flamenco

Action Cost: Swift Action

Target: LOS 30'

Area: Single Target

Type: Activated

Duration: Instantaneous

Resistance: N/A

Dancing in a provocative style; the character demands the target's attention. Contesting their CHA against the target's WIL, on success the target can only make attack rolls and only against the character until the start of the character's next turn.

7 – Breakdance

Action Cost: N/A

Target: Character

Area: Self

Type: Passive

Duration: Instantaneous

Resistance: N/A

It becomes impossible to grapple or move the dancer; they are *immune* to being grappled and forcibly moved, deftly weaving out of the way in all situations.

Vocal

1 – Projection

Action Cost: Swift Action

Target: Character

Area: 5 Mile Radius

Type: Focus

Duration: instantaneous

Resistance: N/A

Clearly projecting their voice within the area, the character's voice pierces through any obstructions, such as a vacuum. This ability lasts as long as they maintain focus on it.

2 – Acapella

Action Cost: Swift Action

Target: LOS 100'

Area: Single Target

Type: Activated

Duration: Instantaneous

Resistance: WIL

Drawing opponents into a haze with their melodic tone, the character contests their CHA against the WIL of the target, forcing them to immediately move up to twice their full movement towards the character on success.

2 – Rap

Action Cost: Swift Action

Target: LOS 80'

Area: Single Target

Type: Activated

Duration: 1 Round

Resistance: AGI

Pointing out flaws with their beats, the character contests their CHA against the AGI of the target, knocking them prone and giving them a displaced roll on their next attack roll on success.

2 – Screamo

Action Cost: Swift Action

Target: LOS 10*Rank'

Area: Single Target

Type: Activated

Duration: Instantaneous

Resistance: N/A

Twisting the flow of reality with their voice, the character gives the target a displaced roll or + 2 bonus on setting resistance checks until the start of the character's next turn.

3 – Duo

Action Cost: Reactionary

Target: LOS 10*Rank'

Area: Single Target

Type: Activated

Duration: Instantaneous

Resistance: HEA

As a reaction to having a condition applied to them, the character contests their CHA against the target's HEA, applying the condition onto the target as well on success.

4 – Vibrato

Action Cost: Swift Action

Target: LOS 5*Rank'

Area: Single Target

Type: Focus

Duration: 1 Minute

Resistance: WIL

Disrupting the natural rhythm that binds the targets to life, the character contests their CHA against the target's WIL, *dazing* them on success, and removing their ability to use a group of the character's choice (This can include martial perks, spellgroups, or specific weapon skills) or stripping them of their archetype.

6 – Siren Song

Action Cost: Core Action

Target: LOS 5*Rank'

Area: Single Target

Type: Charged (1)

Duration: 1 Hour

Resistance: WIL

Singing an alluring tune, the caster can contest their CHA against a chosen target's WIL, charming them on success. The affected target automatically re-attempts the check at the end of their turn.

Instrumental

1 – Somber Tune

Action Cost: Swift Action

Target: LOS 20*Rank'

Area: Single Target

Type: Activated

Duration: Instantaneous

Resistance: WIL

Performing a slow melody; the character contests their CHA against the target's WIL, calming the target's intense emotions on success. This does not prevent affected targets from regaining tense emotions, it only quiets present emotions.

2 – Love Song

Action Cost: Swift Action

Target: LOS 10*rank'

Area: Single Target

Type: Activated

Duration: 1 round

Resistance: N/A

Stringing a beautiful song; the character grants the target 2 bonus Martial Points or a free finesse on a single spell that they can utilize until the end of their next turn.

2 – Rhythm and Blues

Action Cost: Reactionary

Target: LOS 10'*Rank'

Area: Single Target

Type: Charged (2)

Duration: Instantaneous

Resistance: N/A

Attuning themselves to the flow of magic around them; the character can redirect the check from a willing target onto themselves. This must be done before the check is attempted.

2 – Sound Waves

Action Cost: Swift Action

Target: LOS 10*rank'

Area: Single Target

Type: Activated

Duration: 1 Round

Resistance: WIL

The performers sound waves extend around a target's weapon increasing or decreasing the range/reach of that weapon by Rank*5'(Minimum of 5'), WIL save to negate. The resistance check is set with CHA.

3 – Musical Bridge

Action Cost: Swift Action

Target: LOS 10'*Rank'

Area: 2.5' Radius

Type: Focus

Duration: 1 Minute

Resistance: N/A

The performer has mastered sound manipulation; allowing them to transport music to a 5' sphere within range, nullifying the effect of cover or invisibility in the target area. If the performer casts magic, the magic stems from that location. This ability persists as long as the performer retains focus.

4 – Ballad

Action Cost: Core Action

Target: LOS 10*Rank'

Area: 6 Targets

Type: Focus

Duration: 1 Minute

Resistance: N/A

Setting the stage; the character chooses up to 6 willing targets, granting them an additional damage die on all sources of damage. These targets also have access to one placed roll each round, that can be expended as a reaction. On subsequent turns the character forcibly expends their swift actions as long as they maintain the ballad. The ballad can continue to affect targets so long as they can hear it.

4 – Rocking Out

Action Cost: Swift Action

Target: Self

Area: Single Target

Type: Charged (3)

Duration: Variable

Resistance: N/A

The performer jams out, increasing the action cost of a spell by one round for every mana they wish to decrease the cost of a spell by. If a spell costs a swift action it is first increased to a core action before becoming a multi-round spell. Spells always cost at least 1 mana, and this ability can only reduce the cost of a spell up to four times.

Martial Ability

Martial specialists strive to be the world's heroic fighters. They hone their skills and body to make the most of their mortal abilities. They use their martial skills to protect their friends, inflict damage on their enemies, and disrupt their opponents.

Combat Styles

Combat styles represent proficiency with a particular style of weapons. A character's rank in a weapon's combat styles determines the amount of **MP** they receive when making an attack with that weapon. The three combat styles are Heavy, Versatile, and Precision. The combat style of a weapon also determines which set of combat style skills a weapon has access to.

Specialization

Specializations represent proficiency with a particular weapon type. A character's rank in a weapon's specialization determines the maximum amount of MP they may spend on the corresponding weapon's Specialization Skills in a single **Weapon Attack**. Every weapon has a specialization corresponding to its weapon type.

Buying Combat Styles and Specializations

A character can only purchase ranks in a combat style or specialization sequentially. Each combat style has a governing attribute that determines what rank the ability can be bought to.

Martial Points

When using the **Weapon Attack** ability, the character gains the ability to make a single **strike** with a weapon they are using, and gain **Martial Points (MP) equal** to their ranks in the weapon's **combat style**. They may spend and divide their **MP** among any of the options offered by the styles / specializations of their weapon(s.) A character may only use skills that cost 0 MP and passive skills if they have at least rank 1 in that weapon's **specialization**.

Strikes

A **Strike** is the simplest and most common use of a weapon. To perform a strike, make an attack roll (PER) against the desired target. If the attack roll is successful, deal the weapon's damage to the target. A character making a **Weapon Attack** receives the ability to perform one **Strike** at no additional cost. Many specialization and combat style skills modify, replace, or grant additional **Strikes**.

Dual Wielding

Characters may attack with multiple weapons. If they do, they gain a total number of martial points equal to their highest **combat style**. A character may not use more MP on a weapon than they have points in its **combat style**, regardless of specializations. A character only receives one free strike per turn, so they will need to gain more strikes to attack with both weapons. The weapon skill **Offhand Attack** will be especially useful for attacking with multiple weapons.

Combat Style Skills

Combat Style	Multi Attack	Lethal Bonus	Offhand Attack	Precise
Precision	2 MP	+ 1	1 MP	3 MP
Versatile	3 MP	+ 2	2 MP	3 MP
Heavy	5 MP	+ 3	3 MP	3 MP

Lethal (1 MP per rank): Each rank purchased allows the character to add **X** damage to a **single** strike they make this turn.

Multiattack (X MP per strike): Every amount of martial points spent equal to the weapon's **multi attack cost** allows the character to make an **extra strike**.

Offhand Attack (X MP per strike): Spending an amount of martial points equal to the **offhand attack cost** allows the character to make an **extra strike** with their offhand weapon. This action can only be taken once each round.

Precise (3 MP per rank): Every 3 martial points spent, the character receives a placed roll to all strikes made that turn.

Weapons With Multiple Styles

A weapon type may be listed with multiple styles. This does not mean that a weapon of that type can be wielded with either style. Rather, it means that weapons of that type corresponding to either style exist in the world. For example, both War Axes that can be used with the Versatile combat style and War Axes that can be used with the Heavy style can be found by players, but there are no War Axes that can be used with both styles.

Hands

If the character has 150% (I.E, a weapon requires 6 strength to two-hand can be one handed with 9 strength) or more of the required strength, they can wield the weapon in one hand, even if it requires two hands to utilize. Inversely, if a character were to wield a one-handed weapon with two hands, they halve the strength requirement. Weapons with an asterisk always require two hands.

Martial Resistance Checks

Weapon skills may call for a target to attempt a resistance check. When doing so, they roll an attribute check based on the weapon's governing attribute.

- ❖ The governing attribute for all heavy weapons is strength.
- ❖ The governing attribute for all precision weapons is agility.
- ❖ The governing attribute for all versatile weapons is the character's choice of strength or agility.

The target must then attempt an attribute check, which must meet or exceed the value rolled by the character to succeed. **In all cases**, the target can re-attempt the relevant save / check by utilizing a *swift action* to break free of the effect on success; if it persists and they are physically able. Effects similar to launch and concussive strike do not persist.

Weapon Movement

Characters are unable to utilize weapon abilities that would cause them to move, should they lack access to movement speeds, or if their movement speeds are 0.

Weapon Skill Example: Maria has 7 ranks in versatile weapons, 7 ranks in swords, and 5 ranks in brawling. Gaining 7 martial points upon taking the weapon attack option, she hopes to use both of her specialization skills. She makes a strike with her longsword, using 3 MP with the strike (spent on staggering blow), then expends 4 martial points to make an offhand grappling attack with her cestus.

Weapon Chart

*Note Casting Wands and Staves; The spellcaster can use the weapon instead of a hand as a catalyst for a spell.

Weapon List						
Type	Damage	Damage Type	Hands	Reach/Range	Strength Requirement	Combat Style
War Axe	1d12	Edged	1	5'	6	Versatile Axe
Battle Axe	2d8	Edged	2	5'	6	Heavy Axe
Great Axe	1d20	Edged	2	5'	9	Heavy Axe
Shortbow*	1d4	Piercing	2	80'	2	Precision Bow
Longbow*	1d10	Piercing	2	80'	4	Versatile Bow
Crossbow*	2d8	Piercing	2	80'	6	Heavy Crossbow
Cestus	1d12	Blunt	1	5'	6	Versatile Brawling
Pistol	1d4	Piercing	1	40'	2	Precision Handgun
SMG	1d4	Piercing	1	40'	2	Precision Machine Gun
Machine Gun*	1d10	Piercing	2	60'	4	Versatile Machine Gun
War Hammer	1d12	Blunt	1	5'	6	Heavy Hammer
Maul	2d8	Blunt	2	5'	6	Heavy Hammer
Giant Hammer	1d20	Blunt	2	5'	9	Heavy Hammer
Dagger	1d6	Piercing	1	5'	2	Precision Knife
Spear	1d12	Piercing	1	10'	6	Versatile Polearm
Glaive	2d8	Piercing	2	10'	6	Heavy Polearm
Sarissa	1d20	Piercing	2	10'	9	Heavy Polearm
Carbine*	1d10	Piercing	2	60'	4	Versatile Rifle
Long Gun*	2d8	Piercing	2	80'	6	Heavy Rifle
Shotgun*	2d8	Blunt	2	20'	6	Heavy Shotgun
Longsword	1d12	Edged	1	5'	6	Versatile Sword
Bastard Sword	2d8	Edged	2	5'	6	Heavy Sword
Great Sword	1d20	Edged	2	5'	9	Heavy Sword
Lash	1d6	Edged	1	20'	2	Precision Whip
Great Lash	1d12	Edged	1	20'	6	Versatile Whip
Casting Wand	1d4	Piercing	1	5'	2	Precision Knife
Casting Staff	1d10	Blunt	1	10'	6	Versatile Polearm

Specializations

Weapon specializations offer multiple devastating attacks, commanding the attention of foes, backstabbing opponents, manipulating the pace of the battlefield in their favor, and disabling their opponents without lethality. The minimum martial points required to activate an ability is next to each specialization skill.

Specialization Skill	
Melee Weapons	Ranged Weapons
Axes Versatile / Heavy	Bows Precision / Versatile
Brawling Versatile	Crossbows Heavy
Hammers Heavy	Handguns Precision
Knives Precision	Machine Guns Precision / Versatile
Polearms Versatile / Heavy	Rifles Versatile / Heavy
Swords Versatile / Heavy	Shotguns Heavy
Whips Precision / Versatile	

Weapon Skill Notation

Weapon skills have four ways of communicating their effects. These are altered strikes, extra strikes, executing an action, and next successful strikes, each with distinctions that govern their function.

Altered Strike - An altered strike changes **one** of the character's strikes to inflict additional or new effects. A character can choose to either alter their initial strike; or any provided by **extra strikes**.

Extra Strike - The character gains an additional strike that they may utilize with the appropriate weapon.

Executes an Action - The character activates an ability as a part of their weapon skill, they may still utilize the rest of their weapon skill / other actions as a part of executing an action.

Next Successful Strike - When the character successfully matches or exceeds the target's DVs with any strike using the associated weapon during their entire turn. If selecting the same weapon skill multiple times, the character can choose to effect different targets, or the same target multiple times.

Weapon Specialization Notecards

Axes

Specialization Skills
Attribute: Versatile / Heavy Weapons

Momentum (Passive): Attacks made with the weapon, hit or miss, drive the target and attacker 5' in a direction of the character's choosing, if the target is of the same size or smaller than the attacker.

Charge (3 MP + 1 per rank): The character uses their **altered strike** to rush 10' forward + 5' per additional rank in a straight line, making an attack roll against every target whose space they move through. They then make a single damage roll against all targets they hit, adding any applicable bonuses from *Momentum*, *Cleave Armor*, *Lethal*, or *Pierce Cover* to **all** successfully struck.

Cleave Armor (1 MP per rank): The **next successful strike** this turn reduces the target's armor DVs by 1 per rank until the start of the character's next turn. Cleave armor cannot reduce the target's armor DVs below 0.

Embed (1 MP per rank): The **next successful strike** this turn inflicts a d10 of the relevant damage type per rank. While the weapon is embedded in the target, it is unusable until retrieved. The character cannot be moved by mundane means, and receives a placed roll on any magical attempts to move them while they hold onto the embedded object. The character also travels with the embedded object while it is held.

Lethal Offhand Attack (3 MP / 4 MP per strike): The character makes an **extra strike** using their offhand weapon, adding any lethal bonuses to the attack. They can only take this action once each round. This ability costs 3 MP for versatile weapons and 4 MP for heavy.

Pierce Cover (1 MP per rank): For every rank purchased, **all strikes** ignore up to 6" of stone and wood, 3" of iron and steel, or 1" of adamantite, and 2 shield DVs until the start of their next turn. This ability does not allow attacks to ignore armor DVs.

Throw (1 MP per rank): The character uses their **altered strike** to throw their weapon 30' per rank without a *might* or *acrobatics* check.

Brawling

Specialization Skills
Attribute: Versatile Weapons

Reverse Grapple (Passive): The character can execute brawling specialization attacks while grappling/grappled. As part of a core action utilizing their brawling, they can attempt to reverse a grapple they're caught within. The character initiates a grapple check. On success, they choose between escaping or grappling the target. This action can only be taken once each round.

Disarming Attack (3 MP per strike): The **next successful strike** this turn knocks whatever the target is holding in their hands 10' away in a direction of the character's choosing.

Disorienting Strike (2 MP per strike): The **next successful strike** this turn causes the target to lose their reaction until the end of their next turn. If the target is a size category larger than the character, WIL save to negate.

Grappling Attack (2 MP per strike): The **next successful strike** this turn automatically grapples the target.

Knockout (6 MP per strike): The **next successful strike** this turn causes the target to lose a core action until the end of their next turn, or instead be knocked *unconscious* if they are below half their maximum HP, their choice of a WIL or HEA save to negate either effect. If the target is of a similar size or smaller in comparison to the character and *grappled*, they cannot resist the effect.

Launch (1 MP per rank): The character **executes an action**, launching **themselves** or another target 20' per rank in any direction, AGI or STR save (target's choice) to negate. If the target is of a similar size or smaller in comparison to the character and *grappled*, they cannot resist the effect. This ability requires a suitable surface to push off of if used on oneself.

Lethal Barrage II (1 MP per rank): For every rank purchased, the character adds 2 damage to **all successful strikes** this turn.

Hammers

Specialization Skills
Attribute: Heavy Weapons

Grazing Strike (Passive): Strikes made with this weapon inflict half damage and inflict appropriate weapon skill effects if the strike at least matches the target's combined movement and bonus DVs.

Charge (3 MP + 1 per rank): The character uses their **altered strike** to rush 10' forward + 5' per additional rank in a straight line, making an attack roll against every target whose space they move through. They then make a single damage roll against all targets they hit, adding any applicable bonuses from *Grazing Strike*, *Cleave Armor*, *Knockout*, *Lethal*, or *Concussive Strike* to **all** successfully struck.

Cleave Armor (1 MP per rank): The **next successful strike** this turn reduces the target's armor DVs by 1 per rank until the start of the character's next turn. Cleave armor cannot reduce the target's armor DVs below 0.

Concussive (2 MP per strike): The **next successful strike** this turn *befuddles* the target until the end of their next turn, HE save to negate.

Knockout (6 MP per strike): The **next successful strike** this turn causes the target to lose a core action until the end of their next turn, or instead be knocked *unconscious* if they are below half their maximum HP, their choice of a WIL or HEA save to negate either effect.

Launch (1 MP per rank): The character **executes an action**, launching **themselves** or another target 20' per rank in any direction, AGI or STR save (target's choice) to negate. If the target is of a similar size or smaller in comparison to the character and *grappled*, they cannot resist the effect. This ability requires a suitable surface to push off of if used on oneself.

Lethal IV (1 MP per rank): Each rank purchased allows the character to add **4** damage to a single strike they make this turn.

Knives

Specialization Skills
Attribute: Precision Weapons

Blitz (Passive): Spending the appropriate martial points to activate **Bleed**, **Blinding Attack**, **Crippling Attack**, and **Throw** causes every successful strike made with a knife to apply these specialization effects.

Assassination (2 MP per rank): The character uses their **altered strike** to inflict 1d10 piercing damage per rank. The damage dice rolled is doubled if the character has at least one placed roll on the attack or if the target of the attack is adjacent to at least one of their opponents.

Bleed (2 MP per strike): The **next successful strike** this turn prevents the target from recovering any HP until the end of their next turn.

Blinding Attack (3 MP per strike): The **next successful strike** this turn blinds the target until the end of their next turn.

Crippling Attack (3 MP per strike): The **next successful strike** this turn causes the target to lose functionality of a limb, AGI or STR save (target's choice) to negate. Should all of the targets' means of mobility be crippled, they no longer have access to movement DVs. The target must recover any amount of HP for the limb to function again.

Throw (1 MP per rank): The character uses their **altered strike** to throw their weapon 30' per rank without a *might* or *acrobatics* check.

Lethal Barrage II (1 MP per rank): For every rank purchased, the character adds **2** damage to **all successful strikes** this turn.

Polearms

Specialization Skills
Attribute: Versatile / Heavy Weapons

Impaling Weapon (Passive): All successful **strikes** inflict an instance of *suffering (piercing)*. When striking a *prone* or *pinned* target, the character's attack roll has a minimum value of 14.

Fulcrum (1 MP per rank): The character **executes an action**. For every rank purchased the character propels themselves 30' into the air and reduces the MP cost of *Sky Strike* on their **next turn** by 1. The character begins falling at the start of their next turn. This ability can also be used to mitigate 30' worth of fall damage as the character deftly maneuvers through the air.

Sky Strike (3 MP per strike, only usable in air): The character **executes an action**, moving 30', returning to the ground without fall damage, and **alters** their next **strike**. On a successful strike, they pin the target, AGI or STR save to negate (target's choice) if the target is a size category larger than the character. On a successful pin, the character's weapon stays in the target, requiring a swift action to remove it (Anyone can, and doing so Inflicts three instances of *suffering (Piercing)* when done.)

Lethal IV (1 MP per rank): Each rank purchased allows the character to add 4 damage to a single strike they make this turn.

Radial Attack (4 MP per strike): The character uses their **altered strike** to extend their attack to all targets within the weapon's reach, making an individual attack roll against them. They then make a single damage roll against all targets successfully struck, adding any applicable bonuses from *Tripping Attack*, *Fending Strike*, *Lethal*, or *Impaling Weapon* to all successfully struck.

Tripping Attack (2 MP per strike): The **next successful strike** this turn knocks the target prone. If the target is a size category larger than the character, AGI save to negate.

Throw (1 MP per rank): The character uses their **altered strike** to throw their weapon 30' per rank without a *might* or *acrobatics* check.

Swords

Specialization Skills
Attribute: Versatile / Heavy Weapons

Duelist (Passive): Swords are modal weapons that can be adjusted with the usage of a *swift action*. There are two modes; *Offense* and *Defense*. In order to use an offensive stance, the character must have 4 ranks in this specialization.

- ❖ **Offense:** The MP cost of **staggering blow** for the first strike made each turn is reduced to 0.
- ❖ **Defense:** At the end of their turn, for every distinct target the character has made a **successful strike** against on that turn, the character gains 1 **bonus** DV until the start of their next turn.

Charge (3 MP + 1 per rank): The character uses their **altered strike** to rush 10' forward + 5' per additional rank in a straight line, making an attack roll against every target whose space they move through. They then make a single damage roll against all targets they hit, adding any applicable bonuses from *all other sword specialization abilities* to all successfully struck.

Disarming Attack (3 MP per strike): The **next successful strike** this turn knocks whatever the target is holding in their hands 10' away in a direction of the character's choice.

Disorienting Strike (2 MP per strike): The **next successful strike** this turn causes the target to lose their reaction until the end of their next turn. If the target is one or more size categories larger than the character, WIL save to negate.

Staggering Blow (3 MP per strike): The **next successful strike** this turn knocks the target 10' backwards, opening them up to other attacks. All attack rolls against the target have a placed roll until the end of the character's next turn.

Lethal Barrage II (1 MP per rank): For every rank purchased, the character adds 2 damage to all **successful strikes** this turn.

Lethal IV (1 MP per rank): Each rank purchased allows the character to add 4 damage to a single strike they make this turn.

Whips

Specialization Skills
Attribute: Precision /Versatile Weapon

Inertia (Passive): For every 30' a character physically moves in one round, the damage of their **next successful strike** is increased by 5 of the weapon's relevant damage type.

Disarming Attack (3 MP per strike): The **next successful strike** this turn knocks whatever the target is holding in their hands 10' away in the direction of the character's choice.

Extending Reach (1 MP per rank): For every rank purchased, the character adds 5' of reach to all strikes made this round.

Grappling Attack (2 MP per strike): The **next successful strike** this turn automatically grapples the target.

Lethal Barrage II (1 MP per rank): For every rank purchased, the character adds 2 damage to **all successful strikes** this turn.

Swing (2 MP per activation): The character **executes** an **action**, they may fling their weapon, latching onto a suitable support, target, or object, within reach, AGI or STR save (target's choice) to negate. If the target is another person, one of them acts as support. The character may launch themselves or the target anywhere within reach of the support.

Radial Attack (4 MP per strike): The character uses their **altered strike** to extend their attack to all targets within the weapon's reach, making an individual attack roll against them. They then make a single damage roll against all targets successfully struck, adding any applicable bonuses from *Lethal*, *Disarming Attack*, and *Extending Reach* to **all** successfully struck.

Bows

Specialization Skills
Attribute: Versatile Weapon

Recurve Shot (Passive): Strikes made with this weapon curve. Should a strike with this weapon miss a target, the character can redirect the attack roll to a different target within the weapon's range. The character can only make use of this ability once each round.

Burst Shot (2 MP per rank): The character makes an **altered strike**. If it hits, they then roll damage for **extra strikes** equal to the ranks of this ability purchased.

Tipped Arrows (2 MP per rank): For every rank purchased, the character can choose to add one stacking instance of their choice of toxic, fire or piercing suffering to **all successful strikes** this turn.

Object Shot (1 MP per strike) The character makes an **altered strike**. They load an object weighing less than 40 kilograms into their weapon and fire it at a target, passing the object onto the target should it at least meet their movement DVs. Unless otherwise specified, objects fired this way will inflict a d6 blunt damage. The character can choose to forgo weapon damage when using this ability.

Whistling Shot (3 MP per strike): The **next successful strike** this turn causes the target to become *frightened* of the character until the end of their next turn.

Volley (4 MP per strike): With this **altered strike**, the character may choose a point within their weapon's range, and make an individual attack roll against all targets within a 10' radius of the point, adding any applicable bonuses from *Lethal*, *Burst Attack*, *Tipped Arrows* and *Whistling Shot*.

Crossbows

Specialization Skills
Attribute: Heavy Weapon

Hunter's Ammunition (Passive): A crossbow starts with one charge for each of the following abilities:

- Blazeshot
- Stunshot
- Marking Shot
- Bola Shot

It takes a swift action to load another bolt into the crossbow (it no longer costs an action to reload the crossbow at rank 4.) Only one of these abilities may affect a given strike at a time; When a crossbow is reduced to **zero** charges, it gains a charge of Skyshot. This charge only lasts for one round. When this charge of Skyshot is lost, a crossbow's starting charges are replenished. A character may also expend a core action to replenish their crossbow's charges.

Blazeshot (Blazeshot Charge): The **next successful strike** this turn inflicts an instance of *suffering (fire.)*

Stunshot (Stunshot Charge): The **next successful strike** this turn causes the target to lose their core action until the end of their next turn, HEA save to negate. If the target is below one a quarter of their maximum HP and they fail the save, they will instead be knocked *unconscious*.

Marking Shot (Marking Shot Charge): The **next successful strike** causes all attacks against the target to gain a placed roll, until the end of the character's next turn.

Bola Shot (Bola Shot Charge): The **next successful strike** this turn knocks the target prone. If the target is a size category larger than the character, AGI save to negate.

Skyshot (1 MP per rank, Skyshot Charge): With this **altered strike**, the character may choose a point within their weapon's range, making an individual attack roll against all targets within a 5' radius of the point, inflicting d12 bonus piercing damage per rank purchased.

Handguns

Specialization Skills
Attribute: Precision Weapon

Akimbo (Passive): When choosing to dual wield this weapon, each strike this character makes with their primary hand is replicated onto their offhand. When using this ability the MP cost of all specialization skills and combat styles is increased by 1. Furthermore, *Assassination's* cost increases by one for each additional rank purchased.

Assassination (2 MP per rank): The character uses their **altered strike** to inflict 1d10 piercing damage per rank. The damage dice rolled is doubled if the character has at least one placed roll on the attack or if the target of the attack is adjacent to at least one of their opponents.

Crippling Attack (3 MP per strike): The **next successful strike** this turn causes the target to lose functionality of a limb, AGI or STR save (target's choice) to negate. Should all of the targets' means of mobility be crippled, they no longer have access to movement DVs. The target must recover any amount of HP for the limb to function again.

Lethal Barrage II (1 MP per rank): For every rank purchased, the character adds **2** damage to **all successful strikes** this turn.

Pinpoint (2 MP per rank): For every rank purchased, the character gains a placed roll to a single strike they make this turn.

Tripping Attack (2 MP per strike): The **next successful strike** this turn knocks the target prone. If the target is a size category larger than the character, AGI save to negate.

Machine Guns

Specialization Skills
Attribute: Precision / Versatile Weapons

Cascade (Passive): The multiattack cost is inherently reduced by one. Additionally, Once one attack strikes a target, all further strikes against that target also hit. If at least two strikes hit a target they are slowed until the start of the character's next turn. If at least three strikes hit a target all attacks made as a part of this Weapon Attack against that target are considered Critical Hits and do double damage.

Overwatch (4 MP per activation + 1 MP per additional rank): The character **executes an action**; they may select a point within their weapon's range and apply suppressive fire in a 10' radius area until the start of their next turn. Should anyone in the area take a movement or core action - the character is granted the ability to attack the target with 3 MP + 1 MP per additional rank. Those in the area have a displaced roll on any AGI checks / saves and have a displaced roll on attack rolls.

Interrupt (2 MP per strike): The **next successful strike** this turn interrupts an enemy. An interrupt cancels whatever action the target last attempted to execute should they fail a HEA save. Interrupts only function if the character is somehow able to activate the ability on the target's turn, such as through the use of *Overwatch*.

Shred (2 MP per rank): All **successful strikes** reduce the targets' armor DVs by 1 per rank if they at least hit the target's movement DVs. This lasts until the start of the character's next turn.

Disarming Attack (3 MP per strike): The **next successful strike** this turn knocks whatever the target is holding in their hands 10' away in a direction of the target's choice.

Concussive (2 MP per strike): The **next successful strike** this turn *befuddles* the target until the end of their next turn, WIL save to negate.

Rifles

Specialization Skills
Attribute: Versatile / Heavy Weapons

Aiming (Passive): If the character forgoes taking a movement action this round in favor of aiming for vitals, each shot they fire deals a minimum of 8 base damage.

Overcharged Shot (2 MP per rank): The character makes an **altered strike**. If it hits, they add their weapon's damage dice to their strike an additional time for every rank.

Piercing Attack (3 MP per strike): The **next successful strike** ignores anything that would reduce its damage and bypasses (ignoring them) temporary barriers. This skill does not affect *immunity*.

Pierce Cover (1 MP per rank): For every rank purchased, **all strikes** ignore up to 6" of stone and wood, 3" of iron and steel, or 1" of adamantite, and 2 shield DVs until the start of their next turn. This ability does not allow attacks to ignore armor DVs.

Pinpoint (2 MP per rank): For every rank purchased, the character gains a placed roll to a single strike they make this turn.

Punchthrough (4 MP per strike): The **altered strike** cuts through all foes in a line until colliding with a physical or magical barrier. The character makes a single attack roll and then makes a single damage roll against all targets successfully struck, adding any applicable bonuses from *other rifle specialization skills and lethal* to **all** successfully struck.

Shotguns

Specialization Skills
Attribute: Heavy Weapons

Modal(Passive): Shotguns are modal weapons that can be adjusted with the usage of a *Swift Action*. There are two modes; *Slugs* and *Buckshot*.

- ❖ *Buckshot* inflicts 2d8 damage at ranges of 10' and below. The weapon inflicts 1d6 damage at ranges above 10'
- ❖ *Slugs* inflict 1d12 damage and gain a + 2 bonus to their attack roll.

Overcharged Shot (2 MP per rank): The character makes an **altered strike**. If it hits, they add their weapon's damage dice to their strike an additional time for every rank. Additionally, the strike gains the following effects on hit:

- ❖ If the shotgun is in *buckshot* mode, the target is forced back 15' per rank.
- ❖ If the shotgun is in *slug* mode, the target's movement speed is reduced by 15' per rank on their next movement action.

Area Attack (4 MP per strike): The **altered strike** affects all targets in a 10'X10' cone with *buckshot* or 20'X20' cone with *slugs* applying a single attack roll, adding any applicable bonuses from *Lethal, Modal, and Concussive strike* to **all** successfully struck.

Stopping Power (1 MP per rank): For every rank purchased, the target of the strike (Regardless of whether it hits or not) loses 5' of on all movement speeds until the start character's next turn. If they are reduced to 0 on all movement speeds, their movement DVs are halved.

Blowback (1 MP per rank): The character **alters** their **strike**; launching **themselves** (opposite the direction of the shot) or another target(in the direction of the shot) 20' + 10' per additional rank. If used on an unwilling target, the character contests their STR against the target's AGI or STR (target's choice.) If the target is of a similar size or smaller in comparison to the character and the weapon is in ***buckshot* mode**, there is **no check** on hit.

Concussive Strike (2 MP per strike): The **next successful strike** this turn *befuddles* the target until the end of their next turn, WIL save to negate. If the weapon is in ***slug* mode**, there is **no check** on hit.

Specialization Effect List

A character's skill in a weapon specialization entitles them to the specific maneuvers that a weapon has available. These maneuvers and terminologies are located *here*. A few of the effects listed here are unique or may differ from their specialization counterparts; these exist as a reference for constructing a **unique weapon**.

Akimbo (Passive): When dual wielding this weapon, each strike this character makes with their primary hand is replicated onto their offhand. When using this ability the MP cost of all specialization skills and combat styles is increased by 1. Costs **1** martial point to activate.

Assassination (2 MP per rank): The character uses their **altered strike** to inflict 1d10 piercing damage per rank. The damage dice rolled is doubled if the character has at least one placed roll on the attack or if the target of the attack is adjacent to at least one of their opponents.

Bleed (2 MP per strike): The **next successful strike** this turn prevents the target from recovering any HP until the end of their next turn.

Blinding Attack (3 MP per strike): The **next successful strike** this turn blinds the target until the end of their next turn.

Blitz (Passive): Spending the appropriate martial points to activate **Bleed**, **Blinding Attack**, **Crippling Attack**, and **Throw** causes every successful strike made with a knife to apply these specialization effects.

Charge (3 MP + 1 per rank): The character uses their **altered strike** to rush 10' forward + 5' per additional rank in a straight line, making an attack roll against every target whose space they move through. They then make a single damage roll against all targets they hit.

Cleave Armor (1 MP per rank): The **next successful strike** this turn reduces the target's armor DVs by 1 per rank until the start of the character's next turn. Cleave armor cannot reduce the target's armor DVs below 0.

Concussive (2 MP per strike): The **next successful strike** this turn *befuddles* the target until the end of their next turn, WIL save to negate.

Crippling Attack (3 MP per strike): The **next successful strike** this turn causes the target to lose functionality of a limb, AGI or STR save (target's choice) to negate. Should all of the targets' means of mobility be crippled, they no longer have access to movement DVs. The target must recover any amount of HP for the limb to function again.

Disarming Attack (3 MP per strike): The **next successful strike** this turn knocks whatever the target is holding in their hands 10' away in a direction of the character's choice.

Disorienting Strike (2 MP per strike): The **next successful strike** this turn causes the target to lose their reaction until the end of their next turn. If the target is a size category larger than the character, WIL save to negate.

Embed (1 MP per rank): The **next successful strike** this turn inflicts a d10 of the relevant damage type per rank. While the weapon is embedded in the target, it is unusable until retrieved. The character cannot be moved by mundane means, and receives a placed roll on any magical attempts to move them while they hold onto the embedded object. The character also travels with the embedded object while it is held.

Extending Reach/Range (1 MP per rank): For every rank purchased, the character adds 5' of reach/range to all strikes made this round.

Fending Strike (3 MP per strike): The character uses their **altered strike** to unbalance the target, preventing them from making melee attack rolls against the character until the start of the character's next turn.

Fire Object (1 MP per rank): For every rank, the character may load an object weighing < 30 lbs into their weapon and fire it at an enemy or ally. If fired at an ally, it is as if you passed the object to them. If fired at an enemy, treat it as a standard ranged attack roll. Unless otherwise specified, objects fired this way will inflict 1d6 blunt damage.

Flaming Munitions (2 MP per rank): The **next successful strike** this turn inflicts an instance of *suffering (fire)* per rank purchased.

Fulcrum (1 MP per rank): The character **executes an action**. For every rank purchased the character propels themselves 30' into the air and reduces the MP cost of *Sky Strike* on their **next turn** by 1. The character begins falling at the start of their next turn. This ability can also be used to mitigate 30' worth of fall damage as the character deftly maneuvers through the air.

Grappling Attack (2 MP per strike): The **next successful strike** this turn automatically grapples the target.

Grazing Strike (Passive): Strikes made with this weapon inflict half damage and inflict appropriate weapon skill effects if the strike at least matches the target's combined movement and bonus DVs.

Interrupt (2 MP per strike): The **next successful strike** this turn interrupts an enemy. An interrupt cancels whatever action the target last attempted to execute should they fail a HEA save. Interrupts only function if the character is somehow able to activate the ability on the target's turn, such as through the use of *Overwatch*.

Knockout (6 MP per strike): The **next successful strike** this turn causes the target to lose a core action until the end of their next turn, or instead be knocked *unconscious* if they are below half their maximum HP, their choice of a WIL or HEA save to negate either effect.

Launch (1 MP per rank): The character **executes an action**, launching **themselves** or another target 20' per rank in any direction, AGI or STR save (target's choice) to negate. If the target is of a similar size or smaller in comparison to the character and *grappled*, they cannot resist the effect. This ability requires a suitable surface to push off of if used on oneself.

Lethal Barrage II (1 MP per rank): For every rank purchased, the character adds **2** damage to **all successful strikes** this turn.

Lethal IV (1 MP per rank): Each rank purchased allows the character to add **4** damage to a single strike they make this turn.

Lethal Offhand Attack (4 MP per strike): The character makes an **extra strike** using their offhand weapon, adding any lethal bonuses to the attack. They can only take this action once each round.

Momentum (Passive): Attacks made with the weapon have a placed roll on the initial weapon damage die. Hit or miss, the attack drives the target and attacker 5' in the direction of the character's choosing, if they are of the same size or smaller than the attacker.

Overwatch (4 MP per activation): The character **executes an action**; they may select a point within their weapon's range and apply suppressive fire in a 10' radius area until the start of their next turn. Should anyone in the area take a movement or core action - the character can choose to attack the target utilizing 4 MP. Those in the area have a displaced roll on any AGI checks / saves and have a displaced roll on attack rolls.

Pierce Cover (1 MP per rank): For every rank purchased, **all strikes** ignore up to 6" of stone and wood, 3" of iron and steel, or 1" of adamantite, and 2 shield DVs until the start of their next turn. This ability does not allow attacks to ignore armor DVs.

Piercing Attack (3 MP per strike): The **next successful strike** ignores anything that would reduce its damage and bypasses (ignoring them) temporary barriers. This skill does not affect *immunity*.

Pinpoint (2 MP per rank): For every rank purchased, the character gains a placed roll to a single strike they make this turn.

Punchthrough (4 MP per strike): The **altered strike** cuts through all foes in a line until colliding with a physical or magical barrier. The character makes a single attack roll and then makes a single damage roll against all targets successfully struck.

Radial Attack (4 MP per strike): The character uses their **altered strike** to extend their attack to all targets within the weapon's reach, making an individual attack roll against them. They then make a single damage roll against all targets successfully struck.

Reverse Grapple (Passive): The character can execute brawling specialization attacks while grappling/grappled. As part of a core action utilizing their brawling, they can attempt to reverse a grapple they're caught within. The character initiates a grapple check. On success, they choose between escaping or grappling the target. This action can only be taken once each round.

Shred (2 MP per rank): All **successful strikes** reduce the targets' armor DVs by 1 per rank by 1 per rank if they at least hit the target's movement DVs.

Sky Strike (3 MP per strike, only usable in air): The character **executes an action**, moving 30', returning to the ground without fall damage, and **alters** their next **strike**. On a successful strike, they pin the target, AGI or STR save to negate (target's choice) if the target is a size category larger than the character. On a successful pin, the character's weapon stays in the target, requiring a swift action to remove it (Anyone can, and doing so Inflicts three instances of *suffering* (*Piercing*) when done.)

Smash Shield (3 MP per strike): If the **altered strike** at least matches the movement DVs of the target; their shield is damaged enough to make it unusable. The shield is not destroyed and can be repaired.

Staggering Blow (3 MP per strike): The **next successful strike** this turn knocks the target 10' backwards, opening them up to other attacks. All attack rolls against the target have a placed roll until the end of the character's next turn.

Stopping Power (1 MP per rank): For every rank purchased, the target of the strike (Regardless of whether it hits or not) loses 5' of on all movement speeds until the start character's next turn. If they are reduced to 0 on all movement speeds, their movement DVs are halved.

Swing (2 MP per activation): The character **executes an action**, they may fling their weapon, latching onto a suitable support, target, or object, within reach, AGI or STR save (target's choice) to negate. If the target is another person, one of them acts as support. The character may launch themselves or the target anywhere within reach of the support.

Throw (1 MP per rank): The character uses their **altered strike** to throw their weapon 30' per rank without a *might* or *acrobatics* check.

Tripping Attack (2 MP per strike): The **next successful strike** this turn knocks the target prone. If the target is a size category larger than the character, AGI save to negate.

Volley (4 MP per strike): With this **altered strike**, the character may choose a point within their weapon's range, and make an individual attack roll against all targets within a 10' radius of the point, adding any applicable bonuses from *Lethal*, *Whistling Arrow*, or *Flaming Munitions* to **all** successfully struck.

Whirling Shot (3 MP per strike): The **next successful strike** this turn knocks the target prone and pushes them 15' in a direction of the character's choice, STR or AGI save (target's choice) to negate.

Whistling Arrow (4 MP per strike): The **next successful strike** this turn causes the target to become *Frightened* of the character until the end of their next turn.

Perks

Characters choose perks at a base cost of **3** and may buy as many perks as they wish. Perks must be bought sequentially, however characters may skip freely between lists. A character must have a rank 1 perk to buy a rank 2 perk and so on. Characters may only purchase a perk if either their AGI/2 or their STR/2 is greater than or equal to the rank of said perk.

Defensive

Defensive perks allow characters to create defensive fields, reduce the damage taken by their allies, or otherwise negate the movement and offensive actions of other characters.

Offensive

These perks enhance offensive capabilities, altering, or otherwise changing the character's maneuvers and attacks to suit the situations they create or find themselves in.

Supportive

Supportive perks allow a character to enhance their abilities and the abilities of those around them. They provide unique protective and defensive actions that serve others while tackling odd problems.

Utility

Opening new and unique options that a character would not otherwise have access to, utility perks allow them to warp the pace, flow, and direction of combat.

Perk Resistances

When determining the resistance check for a perk, a character can use their choice of **STR** or **AGI** to set the check.

How to use Perks

Perks come in 4 styles, passive perks, activated perks, charged perks, and perk upgrades. These are indicated by the *type* of perk.

PASSIVE - These perks are always active.

ACTIVATED - The character may activate these perks an unlimited amount of times. However, activating these perks typically has some sort of action cost.

CHARGED (X) - The character has *X* charges of this perk; the character must expend one or more charges of said perk in order to utilize it. All charges are restored upon completing a rest period.

UPGRADE (Old Perk Name) - This perk acts as an upgrade to a perk that the character has already purchased.

Passive HP & Movement Speed

When buying perks, characters receive HP or movement speed depending on the rank of the perk and what type of perk it is. Each time a Defensive or Supportive Perk is purchased they gain (rank of the perk*3) HP. Each time an Offensive or Utility Perk is purchased they gain (rank of the perk*2) to all movespeeds. Only one instance of passive HP gain or movement speed gain can apply per perk rank .

Ex: Sally has both Shieldbearer and Bloodlust: two rank 4 perks. She may only get passive benefits from one of them, so she must choose whether she wants 12 additional HP or 8 additional movement speed.

Scaling

Certain perks scale as the character acquires other perks. A character's 'perk level' is equal to their highest ranking perk. If a perk has '/P' it refers to how the strength of the perk scales per perk level.

Ex: Block is a reactionary ability that reduces an incoming source of damage by 1d6/P. It reduces 1d6 of damage, which scales up to 5d6 of damage by perk level 5.

Defensive Perks

1 – Defensive Maneuvers

Action Cost: Swift Action

Target: Variable

Area: N/A

Type: Activated

Duration: 1 Round

Resistance: N/A

The character can take up a defensive position.

- ❖ As a swift action, the character selects a target to protect within the range/reach of their weapon. When the protected target is the target of an attack roll, the character may make a strike against the attacker. All combatants have a displaced roll when making ranged attack rolls against the protected target.
- ❖ As a swift action, the character can choose a 5-10' radius within their weapon's range/reach (this radius must be within your normal attack range/reach). Whenever someone moves through this area the character may choose to make a free strike against them.

1 – Dodging

Action Cost: Reaction

Target: Character

Area: Self

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character has their movement DVs set to 15 + 1/P, though they forgo the usage of armor and shields (No benefit from DVs when wearing a shield or armor.) This DV gain is active so long as the character maintains focus.

- ❖ As a reaction, the character can contest the attack roll of an incoming attack if it is higher than the attack roll, they negate the strike.
- ❖ As a reaction to a target missing the character with an attack roll, they may make a strike against the opponent if they are within reach/range.

1 – Mitigative

Action Cost: Reaction

Target: Variable

Area: N/A

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character has become adept at defending themselves and those around them, they can...

- ❖ As a reaction, block an attack roll aimed at a target within 10' by granting them 3 bonus DVs; this DV bonus only applies to the single attack roll.
- ❖ As a reaction, decrease a source of mundane damage directed at a target within 5' by 1d8/P.
- ❖ As a reaction, rush over to an ally within 10', forcing the attack rolls of a single target to be against the character instead.

2 – Steady Hand

Action Cost: N/A

Target: Character

Area: Self

Type: Passive

Duration: Instantaneous

Resistance: N/A

The character has learned how to zero in on a target's weak points, given time.

- ❖ If the character is in cover, or they have not moved since their last round, they gain a placed roll on their first attack roll made during their turn.

Taking cover no longer takes an action

2 – Countermeasures

Action Cost: Reaction

Target: Melee Reach

Area: N/A

Type: Activated

Duration: Instantaneous

Resistance: AGI

The character gains access to several actions that allows them to defend themselves against an opponent's attacks.

- ❖ As a reaction, the character can reduce the damage of an incoming ranged attack by 1d10/P. If the damage is reduced to 0, they can catch the projectile, should they have a free hand, redirecting it at a target within 50' by making an attack roll, inflicting the attack's damage on a successful hit.
- ❖ As a reaction, the character can redirect a **missed** attack roll against them to a target within their weapon's melee reach.

3 – Lifelink Aura

Action Cost: Swift Action

Target: Touch

Area: 10 Targets

Type: Activated

Duration: Variable

Resistance: N/A

As a swift action, the character extends their life force to up to 10 other targets. Should the targets take any damage, the damage is transferred to the character instead. This effect lasts as long as the character retains focus. The character cannot benefit from immunity while this ability is active.

3 – Relentless Defender

Action Cost: Reaction

Target: Melee Reach

Area: Self

Type: Charged (3)

Duration: Instantaneous

Resistance: N/A

The character becomes adept at unorthodox defensive maneuvers, gaining access to several reactions. When a target gets within melee reach of the character...

- ❖ As a reaction, they can *make* a melee attack roll against an incoming target, with 1MP/P.
- ❖ As a reaction, take a movement action.

4 – Shieldbearer

Action Cost: Swift / Core Action

Target: Character

Area: Self

Type: Activated / Passive

Duration: 1 Minute

Resistance: N/A

The character can defend themselves more adequately with a shield.

- ❖ As a core action, the character takes on a defensive stance, gaining *resistance* to all damage until the start of their next turn. The character can utilize a swift action to make a strike, using up to half of their maximum **MP** when doing so.
- ❖ As a swift action, the character can charge up to their land movement, making a melee attack roll against a target, knocking them *prone* on hit.

These abilities are only usable while wielding a shield; The character gains a stacking placed roll on all HEA saves/checks while wielding one as well.

4 – Immaculate Deftness

Action Cost: Swift Action

Target: Character

Area: Self

Type: Activated / Passive

Duration: Instantaneous

Resistance: N/A

The character gains access to a number of abilities that aid them in deftly crossing the battlefield unscathed.

- ❖ The character becomes *immune* to *stun* and *paralysis*
- ❖ The character halves the damage of any effect requiring an AGI check. If they succeed at the check, the damage is instead negated. If the check is failed, the damage is halved.
- ❖ As a swift action, the character can take up a defensive stance. Attack rolls cannot have placed rolls against them, nullifying all effects that grant them.

5 – Auric Defense

Action Cost: Swift Action

Target: Variable

Area: Variable

Type: Charged (5)

Duration: Variable

Resistance: N/A

The character gains three abilities that they can utilize.

- ❖ As a swift action, the character gains a HP barrier equal to one-quarter of their maximum natural HP. The barrier lasts until the beginning of the character's next turn.
- ❖ As a swift action, the character gains *two* placed roles on all resistance checks until the start of their next turn.
- ❖ As a swift action, the character can create an indestructible 5' x 5' barrier within 60' LOS, remaining for as long as they maintain focus. The character can move any number of these barriers using their swift action, up to 30'. Any projectile with a ranged attack roll passing through the barrier is immediately destroyed. The barrier counts as an exceptionally protective cover.

5 – Perfect Defense

Action Cost: Swift Action

Target: Character

Area: Self

Type: Passive

Duration: Instantaneous

Resistance: N/A

Standing behind the character now confers the same benefits as standing behind cover, nullifying the need for taking a swift action to do so. They can extend this ability to 10' on either side of themselves as a Swift Action - effectively becoming a wall, as a jut of opaque energy extends on either side. This effect lasts as long as the character retains focus. The character is *always* considered to be in normal cover as long as they are in their armor and have a shield.

Offensive Perks

1 – Berserker's Frenzy

Action Cost: Reaction / Swift Action

Target: Character

Area: Self

Type: Charged (5)

Duration: 1 Minute

Resistance: N/A

By expending a charge of this ability, and swift action, the character enters into a *Frenzy*, consuming their *focus* and allowing them to use new actions. These actions do not consume charges of this ability, and they may activate one of their *frenzy* abilities as a part of entering their frenzy, but only so long as it costs a swift action to activate.

- ❖ As a reaction to reducing a target to 0 HP, the character can take a movement action to approach a target and make a melee strike.
- ❖ As a swift action, the character may take a movement action to approach an enemy.
- ❖ As a swift action, the berserker loses 2 movement DVs until the start of their next turn but has a placed roll on all of their melee attack rolls until the beginning of their next turn.

1 – Substance

Action Cost: Swift Action

Target: Character

Area: Self

Type: Activated

Duration: Instantaneous

Resistance: N/A

As a swift action, the character materializes a handheld, mundane object with properties of their choosing. If they conjure a weapon this way, it must take its attributes from a mundane pre-existing weapon. Alternatively, the character may imbue an object they are holding with mystical energy. They may have up to one object conjured at once, and up to one weapon imbued at once. The character may make the following interactions with their imbued or conjured objects:

- ❖ As a swift action, the character dismisses the object into an extraplanar space. They may immediately drop this at any time, without any action cost, allowing them to reequip the object, store it on their person, or have it harmlessly appear in an unoccupied space within 5' of their person.
- ❖ If the object is within 300', the character may recall it back to their hand as a swift action, making a single strike against all targets it passes. The object destroys all reasonably fragile obstacles and will attempt to move around tougher obstacles.

2 – Sixth Sense

Action Cost: Swift Action

Target: Character

Area: Single Target

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character hones their knowledge of the battlefield to adapt to their enemies on the fly.

- ❖ As a swift action, they alter their attack roll into a HEA or AGI **save**. This character uses their STR or AGI to determine the difficulty.
- ❖ As a swift action, they alter their attack. Any additional martial points spent as a part of a missed *altered strike* are refunded (Such as Lethal.) This ability excludes the initial multi-attack costs.
- ❖ As a swift action, they cause their first successful strike this turn to disrupt the target's position, causing them to lose 4 armor DVs until the start of the character's next turn if the attack at least touches the target's movement DV.

2 – Bladedancer

Action Cost: Reaction / Swift Action

Target: Weapon's Reach

Area: LOS 40'

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character gains the ability to deftly wield their weapon to both protect themselves and pierce an opponent's defenses.

- ❖ As a swift action, the character prepares to defend themselves from a target foe. If the target attempts to strike the character with a melee attack, the character takes a reaction to make an attack roll to contest the incoming attack (with a placed roll). If the character's roll is higher, the attack misses, the character hits the enemy with a strike, and the enemy is left *prone with 0'* of movement speed until the end of their next turn.
- ❖ As a reaction to an attempt to interpose or contest the incoming attack roll, the character completely nullifies any attempts to do.

2 – Mighty Rage (Berserker's Frenzy Upgrade)

Action Cost: Swift Action

Target: Weapon's Reach

Area: Single Target

Type: Passive / Upgrade

Duration: Instantaneous

Resistance: N/A

The character requires *Berserker's Frenzy* to pick this perk. The character gains access to more actions while *Frenzied*.

- ❖ As a swift action, the character prepares to cleave through the target of their next melee attack. If the roll is high enough to hit the first target, it hits normally. If the roll is also high enough to hit a second target directly adjacent to the first, the character may continue the arc of their swing to also hit the second target. The character inflicts full damage to the first target and second target.
- ❖ As a swift action, the character prepares to devastate their foe with their attacks. The character has a placed roll on the damage die of all further attacks this turn.

3 – Risk Taker

Action Cost: Reaction / Swift Action

Target: Weapon's Reach

Area: Single Target

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character takes risks for temporary gain.

- ❖ As a swift action, the character alters one of their strikes. The attack roll suffers two displaced rolls. On a successful strike, it inflicts 25 bonus damage on hit. If the attack misses, then the enemy may use their reaction to make an attack roll, inflicting 25 bonus damage on hit.
- ❖ As a reaction to being struck with an attack roll by a target within the character's melee reach, the character may make a single strike against the target.

3 – Explosive Attacks

Action Cost: Swift Action

Target: Weapon's Reach / Range

Area: 10' Radius

Type: Charged (3)

Duration: Instantaneous

Resistance: AGI

As a swift action, the character may prepare one of their weapons to strike with explosive force. For the duration of the round, all of their strikes explode on hit. All targets within 10' of any of the explosive strikes receive an amount of force damage equal to all of the damage inflicted by the user's weapon this turn; this may include the user. All targets get a single AGI save to negate the damage from all of the explosive attacks. The character does not make attack rolls when utilizing this ability.

4 – Bloodlust

Action Cost: Swift Action

Target: Character

Area: Self

Type: Activated

Duration: 1 Minute

Resistance: N/A

As a swift action, the character readies themselves to absorb their enemies' vitality. At the end of their turn, the character gains a HP barrier equal to one-fourth of all damage they inflict during their turn; this barrier lasts until the end of their next turn. This ability consumes focus unless the character is *frenzied*, in which case the ability is applied automatically without action cost.

4 – Overdrive

Action Cost: Swift Action

Target: Character

Area: Self

Type: Charged (1)

Duration: Instantaneous

Resistance: N/A

Every motion brings the character one step closer to their opponent's defeat.

- ❖ As a swift action, gain 2 MP/P that may be used on any weapon specialization/combat style regardless of skill.
- ❖ As a swift action, replicate their strike against a single target onto 4 other targets within reach/range, including all weapon skills utilized against the first target.

5 – Unstoppable Bloodrush

Action Cost: Reaction

Target: Character

Area: Self

Type: Activated / Charged

Duration: Instantaneous

Resistance: N/A

The character becomes a force of nature, gaining access to new abilities.

- ❖ As a reaction to being knocked below 0 HP, their HP is instead set to 3. The character has 3 charges of this ability that replenish upon a complete rest period. This ability is charged.
- ❖ As a reaction to moving out of the character's melee reach, the target must make their choice of a STR or AGI check. On failure, they lose their movement action and are knocked prone 20' away in a direction of the character's choice. This ability is activated, not charged.

If the character is *frenzied* they are immune to the *slow* status condition, and there is no longer an action cost to maintaining a *grapple*. This ability is a passive.

5 – Indomitable

Action Cost: Swift Action

Target: LOS 80'

Area: Single Target

Type: Charged (2)

Duration: Instantaneous

Resistance: N/A

The character takes up an offensive stance as a swift action - choosing a target, and absorbing all damage from them (Receiving none of it.) On their next turn, the character may add this damage onto the first attack roll they make as bonus damage.

Supportive Perks

1 – Knight Protector

Action Cost: Swift / Movement Action

Target: LOS 40'

Area: Single Target

Type: Activated

Duration: Variable

Resistance: N/A

The character can extend their abilities to their allies and help their team reposition.

- ❖ As a swift action, the character replaces the weapon skills and specialization of any willing target within 40'. The target adopts all of the weapon skills/specializations of the character. This ability persists as long as the character maintains this focus.
- ❖ As a movement action, the character swaps places with another willing target within 40'.

1 – Mark and Muse

Action Cost: Swift Action/Passive

Target: LOS 60'

Area: 2 Targets

Type: Activated

Duration: 10 Minutes

Resistance: WIL

The character can designate two targets as either a *Mark* or a *Muse* as a swift action, consuming their focus when they do so.

- ❖ The character receives a placed roll when making any attack rolls against the mark, but a displaced roll against all other targets.
- ❖ As a reaction to the mark forcing the muse to make a resistance check, the character can grant the muse a placed roll on the check.
- ❖ When the muse and the character are within arms reach of one another, both of them have one instance of Mundane Damage Reduction

The character can reselect a new mark/muse as a swift action.

2 – Mechanist

Action Cost: Swift Action

Target: 60'

Area: Single Target

Type: Charged (4)

Duration: Variable

Resistance: WIL

The character uses their knowledge to support and antagonize others they can...

- ❖ As a swift action, consume a target's temporary barrier, causing themselves or the target to heal by that much, WIL save to negate.
- ❖ As a swift action, give a target a 20 HP temporary barrier, persisting for a minute before expiring.
- ❖ As a swift action, release a disrupting pulse against a target, decreasing their armor DVs by 2 + 1/P, HEA save to negate. Upon failure, the armor remains damaged until it is repaired.

2 – Sacrifice

Action Cost: Reaction / Swift Action

Target: LOS 40'

Area: Variable

Type: Charged (3)

Duration: Instantaneous

Resistance: N/A

The character gains access to a number of actions that allows them to defend their allies.

- ❖ As a swift action the character shares their DVs with a target until the end of the character's turn. All of the target's DVs are replaced with those of the character.
- ❖ As a reaction, the character can choose to absorb an instantaneous area of effect damaging ability as if it were a single target effect. In doing so, they automatically fail the check/save.
- ❖ As a reaction, when they or a target within 40' is struck by any single target attack roll, they can distribute the damage of the attack evenly between themselves and up to 3 other willing targets.

3 – Tactical Aid

Action Cost: Swift Action

Target: LOS 60'

Area: 1/P Targets

Type: Activated

Duration: 1 Round

Resistance: N/A

The character is a true teammate, always looking out for those around them, ready to provide aid.

- ❖ As a swift action, give 1/P targets a placed roll on the next resistance check/save they make.
- ❖ As a swift action, give 1/P targets an extra d10 of damage on a single attack against a target of the character's choice.
- ❖ As a swift action, give 1/P targets + 2 bonus DVs.
- ❖ As a swift action, give 1/P targets the ability to reduce the first source of damage by 4.

3 – Orchestrated Warfare

Action Cost: Swift Action

Target: LOS 60'

Area: Single Target

Type: Activated

Duration: 1 Round

Resistance:

The character has learned how to orchestrate both themselves and others...

- ❖ As a swift action, give another target the ability to immediately make a movement action and swift action.
- ❖ As a swift action, give another target the ability to immediately make a strike against a target within reach / range.

3 – Enguard (Mark and Muse Upgrade)

Action Cost: Reaction / Core Action

Target: Variable

Area: Variable

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character turns battle into art with their flash and guile, gaining access to several abilities.

- ❖ As a reaction to the muse using a supportive ability that targets the character, the character may extend that ability to also affect the muse. This does not work on abilities that require focus.
- ❖ As a core action, all falling damage the character would take is instead transferred to a 5' radius around where they land
- ❖ As a reaction to the *mark* attempting to strike their *muse* with an attack roll of any kind, the character moves up to twice their highest movement to their muse. If they are next to the muse, they contest every attack roll made by the *mark* against *the muse*, if they roll higher the attack is nullified.

4 – Spirit Guardian

Action Cost: Swift Action

Target: Touch

Area: Single Target

Type: Activated

Duration: Special

Resistance: N/A

The character turns into intangible, partially transparent energy and reaches out to a willing target, with a *swift action*. The character envelops the target, forming a protective outer layer. The two characters count as a single target, however, each of them still retain the ability to take their separate actions. For the purposes of resistance checks and to hit rolls they utilize the DVs and physical attributes of the character that becomes the armor and the mental attributes of the target wearing said armor. The character's movement speed is set to 0'. All damage the combined combatants would suffer is instead suffered by the character alone. This is active so long as the character retains their focus on this ability. While this is active, the character gains *elemental* resistance.

4 – Team Player

Action Cost: Swift Action

Target: LOS 60'

Area: Variable

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character has become exceptionally experienced at orchestrating their teammates.

- ❖ As a swift action, switch initiative orders of two willing targets. This ability does not allow a target to take their turn twice in a round, and should a target move to a higher initiative than the character they take their turn after the character.
- ❖ As a swift action, select a target throwing them off their balance. They must take a reaction immediately.
- ❖ As a swift action, allow two willing targets to share the same initiative for the next round. They can choose to go on the lower or higher initiative.

5 – Judgement

Action Cost: Reactionary

Target: LOS 60'

Area: Variable

Type: Charged (2)

Duration: Instantaneous

Resistance: N/A

The character has learned how to orchestrate those around them.

- ❖ As a reaction, give **another** target an extra core action.
- ❖ As a reaction, give up to 5 targets the ability to immediately take a movement action.
- ❖ As a reaction, give **another** target 2 extra reactions they can utilize until the start of their next turn.

5 – Chronotrigger

Action Cost: Swift Action

Target: LOS 60'

Area: Single Target

Type: Charged (1)

Duration: -1 Round

Resistance: WIL

As a swift action, the character undoes the effects of the previous round for a single target, reversing the outcome of any effects applied to that target, causing them to resemble how they were at the end of their previous turn, WIL save to negate. Chronotrigger's charge is always expended upon use, even through time.

Utility Perks

1 – Disruptor

Action Cost: Reaction / Swift Action

Target: Melee Reach

Area: Single Target

Type: Activated

Duration: Instantaneous

Resistance: STR

The character gains access to several abilities they can use to disrupt others.

- ❖ As a reaction to being successfully struck by a target, the character strikes back with a concussive counterattack. The character makes an attack roll against the target if they are within range/reach. On hit, the target is unable to make any further strikes until the end of their turn.
- ❖ As a swift action, the character contests their strength with an adjacent target. On success, the target is thrown 30' in the direction of the character's choice. If thrown onto another target, the character makes a ranged attack roll, inflicting 1d8/P blunt to both targets' damage on a successful hit.
- ❖ As a reaction to a target leaving the character's melee reach, they can execute a melee strike against the target.

1 – Wrestling

Action Cost: Reaction / Swift Action

Target: Melee Reach

Area: Single Target

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character gains expertise in grappling and holding their foes. It now only costs a swift action to maintain a grapple.

- ❖ As a swift action, the character may attempt to grapple an opponent with a melee attack roll.
- ❖ As a reaction to a target entering the character's unarmed reach, they may attempt to grapple the target.

1 – Viscous Coating

Action Cost: Swift Action

Target: Reach / Range

Area: Self

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character can alter their attacks, choosing between any of the following three effects as a swift action:

- ❖ The character's first strike *slows* the target until the end of their next turn.
- ❖ The character converts any damage type with an attack roll into stress damage.
- ❖ The character converts any damage type with an attack roll into toxic damage.

1 – Traps

Action Cost: Swift Action

Target: Melee Reach

Area: 5' radius

Type: Charged (4)

Duration: 1 Hour

Resistance: Varies

The character gains the ability to place a single use trap at any point within their melee reach. If any targets move within 5' of the trap, it instantly activates, affecting all within 5' of it. The character cannot trigger the trap (unless they do so manually) and is immune to its effects. As the character is placing the trap, they may choose between any of the following three effects:

- ❖ *Claw Trap:* Pin caught targets, AGI save to negate. Affected targets can re-attempt with a core action.
- ❖ *Concussive Trap:* Disrupt focus, HEA save to negate.
- ❖ *Poison Trap:* Inflict 4 instances of *suffering (Toxic)*, AGI save for half the instances.

2 – Shadow Trickery

Action Cost: Swift Action

Target: Variable

Area: Variable

Type: Charged (3)

Duration: Variable

Resistance: WIL

The character gains access to a number of swift actions that allows them to warp themselves and the battlefield.

- ❖ The character or a target within melee reach becomes *ethereal* for 6 rounds, WIL save to negate. Affected targets can end the effect with a core action.
- ❖ Upon a successful ranged attack roll, the character reappears at any point along the projectile's path.
- ❖ The character throws a smoke bomb at their feet, affecting a 20' radius. All characters are *blinded* as long as they stand inside of the smoke bombs area. The smoke bomb persists for 1 minute.

3 – Hexshot Rigging (Perk Upgrade, Traps)

Action Cost: Swift Action

Target: Character

Area: Self

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character can imbue a projectile with different properties as a swift action.

- ❖ The projectile ignores any intervening objects, such as windows, walls, barriers - though the character suffers a *blindness* penalty if they do not know where the target is.
- ❖ The projectile drains 1/P of the target's mana on hit.
- ❖ The projectile forces the target to lose their reaction until the end of their next turn on hit.

The character can apply an *alchemy* potion to a trap as a swift action, causing the trap to inflict an alchemy effect. If the potion would typically explode in an AOE it does so, otherwise the potion effect only applies to the target that triggered the trap.

3 – Absolute Focus

Action Cost: Reaction / Swift Action

Target: Touch

Area: Single Effect

Type: Charged (4)

Duration: Variable

Resistance: N/A

The character has learned how to channel their focus. The character may choose between any of the following three effects as a swift action:

- ❖ Transfer the focus of a willing target onto themselves. The character is now the one maintaining the focus for that effect. The character must have focus available to do so.
- ❖ Replicate a target's armor or weapon utilizing their *focus*, causing a copy to appear in their hands. The item persists for as long as the character retains their focus.
- ❖ Use their focus to give another character their ranks in an origin skill. This effect persists for as long as the character retains their focus.

3 – Phantom

Action Cost: Core / Swift Action

Target: Character

Area: Self

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character gains access to several abilities that help them become one with the shadows.

- ❖ As a swift action, the character may teleport up to 10' in any direction that they have line of sight. The character returns to their original location at the end of their turn.
- ❖ As a core action, the character becomes *invisible*. This invisibility breaks upon making a check or attack roll of any kind (except subtlety.) The character may repeat the ability each round to maintain invisibility, or else it ends at the start of the caster's next turn.

4 – Theatrics

Action Cost: Reaction

Target: Character

Area: Self

Type: Activated

Duration: Instantaneous

Resistance: N/A

The character lives on the edge of life and death,

- ❖ As a reaction to a damage source inflicted upon the character, they instead receive damage at the end of their next turn. This ability applies to a single instance of damage.
- ❖ As a reaction to an initiative roll, the character gains two placed rolls on the initiative roll.

4 – Trapper (Perk Upgrade, Traps)

Action Cost: Swift Action

Target: Variable

Area: Variable

Type: Activated, Charged

Duration: 1 Hour

Resistance: Variable

The character must have *Traps* to utilize *Trapper*. Trap gain the following benefits:

- ❖ The traps' triggering range is now 10' instead of 5'.
- ❖ Inflict 5d12 piercing damage should the target fail the save associated with the trap.

The character can affix their traps to a weapon as a swift action, inflicting the effects of the trap to the first target struck. Additionally, the trapper gains 2 more charges of traps.

5 – Mystic Warrior

Action Cost: N/A

Target: LOS 100'

Area: Self

Type: Passive

Duration: special

Resistance: WIL

The character is in tune with surrounding magics and is able to copy continuous and focus effects onto themselves. Unwilling targets can attempt a WIL check to negate the effect. On subsequent rounds affected targets may reattempt the check as a swift action. The character may only have one ability copied at a time and copied focus abilities still consume the character's focus.

5 – Hexsmith

Action Cost: Swift Action

Target: Variable

Area: Variable

Type: Charged (2)

Duration: Variable

Resistance: WIL

The character dabbles in the realm of hexing and mind alteration. As a swift action they can use the following abilities.

- ❖ The character can attempt to link themselves with a target for a minute, WIL save to negate. Any damage dealt to the character is also dealt to the target.
- ❖ The character can enhance an attack they make. On hit, the attack instantaneously releases a noxious cloud for a turn, HEA save to negate. Those within 10' of the target (Including the target) lose access to their swift actions and reactions for 3 turns.
- ❖ The character contests their WIL against a target. If the target fails, they fall unconscious and take over the body of the target for as long as the target loses the contested check. The character can do any ability the target can do, except for suicidal actions. The affected target loses all actions, but the contested check is repeated at the start of the target's turns. When the effect breaks, both parties can resume their normal actions.

Magic

Elemental magic manipulates the universe with knowledge and skill, whereas divine magic is drawn from belief and dedication to the primal forces of the universe.

Purchasing Spells

A caster may buy ranks in a spell group starting at rank 1, purchasing spells sequentially (a caster must buy 2 to buy 3, etc) and may learn (buy the first rank in) up to **(INT/2)** elemental groups and **(CHA/2)** divine groups. When the first rank of a group is purchased the caster gains all rank 0 spells associated with that spell group - though the power of the associated rank 0 spells will grow as the caster invests more into the spell group. The caster's power attribute **(PWR)** must be equal to or greater than the rank of the spell they are attempting to purchase.

Mana

Mana represents built up magical force. The caster must spend mana to create magical effects. Spells cost mana equal to their rank and cost an additional mana per *finesse* applied to it. Mana is only spent on a successful casting (ex. A countered spell is still cast and you lose the mana. A spell you are prevented from casting is not cast and you retain the mana if you attempt to cast.) Casters have an amount of mana equal to the sum of all of their maximum ranks of each of their spell groups.

Recovering Mana

When a spell is cast, the required mana is deducted from the caster's total. Expended mana may be recovered by resting. Normally, mana regenerates at the rate of a caster's (PWR attribute)*2 for each full rest period, but some conditions may modify this amount. Ex: If a rest period is interrupted, only a partial amount of mana is restored, determined by the GM.

Casting Spells

Magical power is integral to a character's ability to succeed at casting magical spells. Mana is spent as a spell is cast, so no mana is utilized if the magical practitioner decides to stop casting a spell before it goes off. Power is added to the resistance check roll, increasing the check by that amount.

Components of Spellcasting

Verbal: Unless otherwise specified, all magical spells require the caster to focus the flow of energy into phrases of power. They cannot cast if they cannot speak, regardless of whether this is caused by a non-functional voice, magical silence, or being gagged.

Manual: Spellcasters also use their hands to help focus and direct the energies of their spells. This manual motion helps the practitioner of the magic cast in a timely fashion. For each of the caster's hands that is restricted somehow, they take an additional round to cast all spells.

Resistances

Most spells have an associated save or check. A save is a contested check between the caster and the target(s). Each save has an associated attribute. To perform a save, roll 2d10+PWR against the target's 2d10+attribute. If the target's total is equal to or greater than the character's, they make the save and the spell's effects are reduced as noted in the spell. Failed saves last for the entire duration of the spell, or until the character drops the spell. Checks are rolled similarly to saves, but they can be reattempted on further turns. The player should note the roll for resistance checks.

Continuous Spells and Resistance Checks

Spells such as *Thundering Steel* (Aeromancy - 2) call for resistance checks against individual targets but can target different characters across several rounds. In this instance, the caster sets a resistance check for each target individually but keeps that resistance check throughout the duration for that individual target.

Extended Casting and Interruption

Some spells require more than one round to cast. Though these spells are powerful, they are susceptible to special restrictions. These spells are liable to interruption. If a magical caster takes more damage than their **WIL** attribute throughout one round, then the spell they are attempting to cast is interrupted.

Finessing Spells

The casting of spells requires the execution of precise techniques, though magical casters may still refine their spells by applying finesse. By spending additional resources, the caster may alter the range, duration, area, or the effect of the spell. Each finesse the caster applies costs 1 extra mana. Places a spell may be finessed are marked in the format (original effect) + (amount increased) per number of finesse. Ex: (1 + 1/F) indicates that per every additional finesse applied, the effect grows stronger by 1.

Limitations of Finessing

Magical practitioners may finesse a spell up to the rank they have bought in a spell group. Individual parameters of a spell may not be finessed more than four times.

Automatic Finesses

Certain spells alter finessing - if a spell provides a finesse without a mana cost, it counts toward the finesse cap for a direction. Automatic finessees may be applied more than the rank based cap on total finessees on a spell.

Spell Types

Evocation

An evocation happens instantaneously - taking effect immediately.

Focus

Focus spells are especially powerful spells that occur over a duration. A caster must utilize their focus on these spells to keep them active. At any point in time, the caster may only have a single focus spell active unless they have the *Sorcerer* archetype.

Continuous

These spells occur over a duration, but do not require active focus for the caster to maintain the spell's effects. The effects of the spell remain in the area.

Rituals

Rituals are unique spells that function by different rules, typically requiring a much larger investment than other kinds of abilities.

Targeting Spells

Self

Unless otherwise specified, spells that specify caster as a target can only affect the one casting the spell.

Touch

Spells that specify touch as the target require the caster to touch the intended target. To touch an unwilling target, the caster must make a melee attack roll against the target, beating out their DVs to apply the effects of the spell.

Line-of-sight

Abbreviated as LOS, spells targeting individuals typically require line of sight to the intended target for the spell effect to occur. To target an object or character, the caster must have a clear path to the target. A character may use LOS spells on themselves

Additional Rulings

Light and Darkness

Light and darkness from magical and non-magical sources interact with one another in unique ways. Non-magical light will illuminate darkness but will never be able to do so within magical darkness. Magical light always shines in non-magical darkness, but it shines in magical darkness only if the light spell has a rank equal to or higher than the darkness effect. Spells causing darkness can end an effect causing light if they are of a higher rank than the effect causing light and vice versa.

Memorized Location / Person / Object (MemLoc)

A character can memloc a target location by focusing on it for a minute, granting them sufficient knowledge of the location to recall and visualize it in other circumstances. Memlocs can interact with spells to allow the caster to act in unique ways. A character is capable of having a number of memlocked locations equivalent to their INT.

Spell Stacking

The effects of the **same** spell cast multiple times do not inflict the ability multiple times in an area. Instead, the most damaging instances of the spell take precedence.

Objects

Objects, as defined by spells, are typically defined within the ability, carrying either size or weight limit. If there is no listed limit it must be 20' X 20' or smaller.

Magic Items and Spells

Magic items that cause an effect similar to those within these lists are assumed by default to be causing a spell effect of that name. If an item provides an effect that is not identical to a spell listed here, then it must have a name, or it is assumed by default to share the name of the item that grants it, and all effects the item grants are under that shared name.

Losing Intelligence and Power

Upon losing a point in their PWR attribute, a character can no longer cast a spell rank that exceeds their PWR attribute. Losing intelligence will cause a character to lose the spell group they have the least number of spells in, followed by the next group they have the lowest number of spells in.

Dropping a Spell

Continuous and focus spells may be dropped as a swift action, causing their effects to cease

Reading Spells

Each spell has the following format, this example is provided as a quick reference to allow players to decipher how a spell is utilized.

Spell Rank – Spell Name

Action Cost: The action cost required to cast a spell.

Target: Distance a spell is able to affect a target from.

Area: Area, or number of targets that are affected.

Type: The kind of spell it is, be it continuous, evocation, or focus spell.

Duration: How long a spell lasts until it dissipates.

Resistance: Applicable resistances that could help in reducing the effects of a spell.

Description - the descriptive content of a spell is located in this portion. This area contains the effects of a spell and tends to include some of the information from other portions of the spell format.

Core Magic

Upon learning spells, a caster imbues their essence with magic - lacing their existence with the unexplainable arcane threads that move in tandem with the universe.

Mage Core Spells

Not always bound by an element, the core magics vary in both functionality and utility. Harnessing and twisting their own energy allows the character to exercise magic to alter and break reality. These spells are created independent of a caster's element, though the elemental attunement of the mage can cause a variance in their spells, in the form of *Adaptive Damage*, and *Adaptive Resistance*.

Adaptive Damage and Adaptive Resistances are altered based upon the caster's primary element. For example, a *Warp Bolt* cast by a Fire mage would inflict *Fire Damage*, but would inflict Force, Ice, or *Lightning Damage* if done by other elemental schools. The resistances related to these elements are likewise altered to reflect the spell's new element. When proficient in multiple elements, they may choose the damage type they utilize without action cost - provided they are acquainted with the element, and should a mage lack an element or be proficient in all of them, their adaptive damage becomes *Pure Magic*.

Interdictions allows the caster to better resist and reflect magic by tapping into the arcane energy from which all magic draws its energy.

Space Time allows the raw manipulation of time and space itself to favor the mage's will.

Illusions allow the caster to begin conjuring images and magics that prey upon the mind and senses.

Scrying allows the caster to witness the present and predict the future with their magics.

Charms provides for the direct manipulation of others by twisting and distorting the minds of allies and enemies alike.

Astral Power calls the power of the universe's primal forces to enhance their own power, allowing them to break the fundamental laws of magic.

Arcane Battery enables the caster to continue acquiring magical energy.

Arcana these spells scale off of a caster's highest rank spell in any group, this does not count towards the INT cap imposed by the number of spell groups one may have, at a cost of 3 ability points - any single spell may be chosen upon purchasing a rank in this group. These spells do not provide mana.

Core Magics List

Interdictions	Spacetime	Illusions	Scrying	Charms	Astral Power
0 – Shield	0 – Pause Object	0 – Minor Illusion	0 – Alter Fate	0 – Daze	0 – Minor Orbital
1 – Resist Magic	1 – Adjust Gravity	1 – Probe	1 – Share Memory	1 – Shadow Thought	1 – Cosmic Lance
2 – Halt Magic	1 – Blur	1 – Disguise	1 – Magic Sense	1 – Loose Lips	1 – Unbound
2 – Dispel	2 – Fleet Foot	2 – Phantasm	2 – The Lovers	2 – Bend Presence	2 – Orbital
3 – Steal Energy	2 – Fade	3 – Invisibility	3 – Scry	2 – Twist Mind	3 – Wax
3 – Mage Armor	3 – Quicken	3 – Force Illusion	3 – Meddle	3 – Minor <i>Charm</i>	3 – Wane
3 – Delay	4 – Slow	4 – Mirror Image	4 – Justice	3 – Collapse	4 – Singularity
4 – Counterspell	4 – Wormhole	5 – Emotional Trickery	4 – Possession	4 – Tunnel Vision	4 – Cosmic Force
5 – Silent Ward	5 – Warp Space	5 – Major Illusion	5 – Delve	4 – Witch’s Power	5 – Corona
5 – Sorcerous Shield	5 – Paradox Shot	6 – Doppelganger	5 – Hierophant	5 – Baleful Betrayal	5 – Twilight Orbital
6 – Arcane Shield	6 – Anchor	6 – Perfect Distortion	6 – The World	6 – Frenzy	6 – Arcane Orbital
7 – Backlash	7 – Warp Bolt	7 – Focus Illusion	7 – The Devil	7 – Compulsion	7 – Skyshatter
7 – Forcelock	7 – Bluefield	8 – Phantasmal Evasion	8 – The Hermit	7 – Mass Confusion	8 – Black Hole
8 – Redirect	8 – Phase	8 – Illusory Life	8 – The Wheel of Fortune	8 – Major <i>Charm</i>	8 – Gemini
9 – Silent Field	9 – Arcane Pull	9 – Phantasmal Attacker	9 – The Magician	9 – Fate Link	9 – Moon Presence
10 – Arcane Death	10 – Frame Freeze	10 – Phantasmal Defender	10 – The Hanged Man	10 – Leech	10 – Pulsar

Interdictions

0 – Shield

Action Cost: Swift Action

Target: LOS 60'

Area: Single Target

Type: Focus

Duration: 1 Minute

Resistance: N/A

A mark of the caster's choice appears above a willing target. The mark generates a magical barrier that absorbs (Rank) damage before breaking, all remaining damage continuing as normal. This shield reapplies itself to the target at the start of each round.

1 – Resist Magic

Action Cost: Swift Action

Target: LOS 10' + 5'/F

Area: Single Target

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

A mark of the caster's choice appears above a willing target for the spell's duration. When a resistance check or save targets them, they gain 2 + 1/4F placed rolls on up to 2 + 1/2F checks or saves before the mark and spell expire. All checks count as a use, even if they are not resisted.

2 – Halt Magic

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 2 + 1/F Targets

Type: Continuous

Duration: 2 + 1/2F Rounds

Resistance: WIL

Caster blocks the target's ability to transmit magic, forcing them to spend an additional 3 + 1/F mana to cast a spell, WIL save to negate.

2 – Dispel

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 1 + 1/2F Target Spell Effects

Type: Evocation

Duration: Instantaneous

Resistance: WIL

1 + 1/2F target spell effects end, WIL save by the effect's caster to negate. Targets must always attempt to resist this spell. Permanent effects are only suppressed for up to one hour on a failed save.

3 – Steal Energy

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: HEA

Caster steals the target's magical energy. They receive the caster's choice of an inferior WIL, CHA, or INT while a separate target of the caster's choice gains an exceptional of the same attribute, WIL save to negate.

3 – Mage Armor

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Continuous

Duration: 3 + 1/F Hours

Resistance: N/A

An arcane aura of the caster's choice surrounds them, granting the caster 8 + 1/2F armor DVs.

3 – Delay

Action Cost: Reactionary

Target: LOS 60' + 20'/F

Area: Single Spell

Type: Evocation

Duration: Instantaneous

Resistance: WIL

This spell is used as a reaction to an attempt to cast another spell. If the target loses in a contested WIL check against the caster, the spell fizzles and is nullified. The spell will return to reality at the end of the caster's next 1 + 1/2F turns, going to the same location - offending spells will treat any target at the location as the new target.

4 – Counterspell

Action Cost: Reactionary

Target: LOS 60' + 20'/F

Area: Single Spell

Type: Evocation

Duration: Instantaneous

Resistance: WIL

This spell is used as a reaction to an attempt to cast another spell. If the targeted spellcaster loses a contested WIL check against the caster, the spell does not go off.

5 – Silent Ward

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 5 + 1/F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

A mark of the caster's choice appears above willing targets for the spell's duration. Each target receives a temporary barrier that absorbs 12 + 2/F damage. This shield reapplies itself to the targets at the start of each round.

5 – Sorcerous Shield

Action Cost: Swift Action

Target: LOS 30' + 10'/F

Area: 20' x 20' + 5' x 5'/F Line

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL

Caster creates a swirling wall of collected magical energy in front of themselves that negates incoming magical energy, causing area of effect spells to wrap around the shield and projectiles to dissipate on its side. The barrier itself has a HP total of 110 + 20/F and breaks upon receiving that much damage from spells. When a target walks through the shield, all magical effects affecting them are targeted by *Dispel - Interdictions 2*. As a Swift Action, the caster may move the barrier 10' in any direction.

6 – Arcane Shield

Action Cost: Reactionary

Target: LOS 40' + 20'/F

Area: 2 + 1/2F Targets

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Several shields appear, protecting willing targets from attacks. This spell grants the targets' 4 + 1/2F to their shield DVs in addition to providing them a temporary barrier that absorbs 35 + 5/F damage. The arcane shield is active until the end of the caster's next turn.

7 – Backlash

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

For this spell's duration, when the caster is targeted by or starts a turn under the effect of a spell cast by another creature, the caster of that spell suffers 2 + 1/2F d20 adaptive damage. Backlash does not distinguish between enemies and allies.

7 – Forcelock

Action Cost: Core Action

Target: LOS 70' + 20'/F

Area: 15' + 5' Radius

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

A barrier forms at the target location. It forms into either a wall with dimensions of 30' tall, 30' long and 2" thick, or into a 15' radius hollow sphere. If the barrier were to annihilate a target by cutting them in half, they are instead pushed onto a side determined by the caster, unless they cannot fit, then they are forced outwards. Anything moving through the barrier on either side loses all momentum and any remaining actions, regaining them at the start of their next turn. They can continue forward in either direction on their next turn. Spells whose collisions interact with the barrier do not affect it, instead, they wrap around it and disperse harmlessly on its surface.

8 – Redirect

Action Cost: Reactionary

Target: LOS 60' + 20'/F

Area: Single Spell

Type: Evocation

Duration: Instantaneous

Resistance: PWR

This spell is used as a reaction to an attempt to cast another spell. Caster may choose to redirect the spell at a target within 60' + 20'/F - becoming the new caster of the spell, PWR save to negate, though retaining the original spell's resistance check. The caster also gains an inherent knowledge of the spell upon redirecting it. Caster may choose to allow the spell to glow with an aura denoting the caster's element.

9 – Silent Field

Action Cost: Core Action

Target: LOS 80' + 20'/F

Area: 40' + 20'/F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

A shimmering field of anti-magic energy grows over the indicated area. Any targets in the area of the spell's effect are *spell jammed*. *Silent Field* negates any continuous or focus spells in the area. Magic (buffs, debuffs, *charms*, and items) does not function in the area - though magic begins working again once outside the radius. Magic targeting characters in the area disperse harmlessly, fizzling without effect.

10 – Arcane Death

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: WIL

Caster launches an antimagic sphere at a single target. The target's mana pool is set to 0 and all active magical effects on the target expire, WIL save to negate.

Space Time

0 – Pause Object

Action Cost: Core Action

Target: LOS 10'

Area: Inanimate Objects

Type: Continuous

Duration: Permanent

Resistance: STR

For the duration of this spell, the selected objects are suspended in time, losing all of their momenta. When the caster drops the spell, the items begin moving again - regaining all previously held momentum. Caster can only have a total amount of mass equal to $20 * (\text{Rank})$ kilograms suspended by this spell at once. Objects can support a total mass of up to 500 kilograms with this spell at once; breaking this limit causes the spell to end. Targets must make a STR check to move an object from suspension. Objects affected by this spell are merely paused, and so retain the momentum they had before the spell ended.

1 – Adjust Gravity

Action Cost: Core Action

Target: LOS $40' + 20'/F$

Area: $2 + 1/F$ Targets

Type: Focus

Duration: $1 + 1/F$ Minutes

Resistance: N/A

Targets of this spell suffer no damage from falling. Should the spell ends before the target(s) finish falling, they start falling at the normal rate and take damage appropriate for falling the remaining distance. Upon activation of the spell, targets can apply the following adjustment to themselves

- ❖ Have the rate at which they fall slowed down to $50' - 10'/F$ (min 10') per round.
- ❖ Have the rate at which they fall increased by $50' + 10'/F$ (min 10') per round.

1 – Blur

Action Cost: Reactionary

Target: Caster

Area: Self

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster temporarily bends the space around themselves, allowing them to avoid immediate and future attacks. Until the start of their next turn, the caster gains $3 + 1/F$ shield DVs.

2 – Fleetfoot

Action Cost: Swift Action

Target: LOS $20' + 10'/F$

Area: $2 + 1/F$ Targets

Type: Continuous

Duration: $10 + 10/F$ Minutes

Resistance: N/A

Targets of this spell move more quickly through time, gaining $25' + 5'/F$ bonus movement speed.

2 – Fade

Action Cost: Swift Action

Target: LOS $60' + 20'/F$

Area: Self

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster fades out of reality, their body turning to dust as it scatters. They then instantly teleport to another location within their target line of sight.

3 – Quicken

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 1 + 1/3F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Targets of this spell move slightly faster through time. They can use their Swift Action to either take an additional 1 + 1/4F move actions or to gain an **extra attack** the next time they make a *strike* this turn. Affected targets also receive 2 + 1/4F placed rolls on all AGI checks.

4 – Slow

Action Cost: Swift Action

Target: LOS 5' + 5'/F

Area: 1 + 1/3F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL

The caster slows the flow of time around the targets, making their actions take more time. Affected targets may only perform a single action (one core action *or* one swift action *or* one movement action *or* one reaction) per turn. Affected targets also suffer a displaced roll on any AGI roll. Affected targets automatically re-attempt the save at the end of their turn.

4 – Wormhole

Action Cost: Swift Action

Target: LOS 60' + 20'/F

Area: 5' + 5'/2F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: AGI

Caster generates a shimmering, translucent purple portal somewhere in the LOS and a second identical looking portal at another target location in the target LOS. Anything that moves through either portal comes out of the other portal. If a target is *forced* into or through a portal in any fashion they have an AGI save to negate being shoved from one portal to the other.

5 – Warpspace

Action Cost: Core Action

Target: LOS 80' + 20'/F

Area: 30' + 10'/F Radius

Type: Continuous

Duration: 1 + 1/F Hours

Resistance: N/A

Spatial energies warp the area, allowing for teleportation. Immediately upon casting this spell, and then as a swift action during all later turns the caster may swap the positions of two targets in the area.

5 – Paradox Shot

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 3 + 1/F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

A prismatic coat forms over the targets, WIL save to negate. For the duration of the spell, the caster can utilize their Swift Action to return the targets to the position they held at the end of their previous turn. Affected targets can re-attempt with a core action.

6 – Anchor

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 2 + 1/2F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: AGI

A wave of ectoplasmic energy engulfs the targets, AGI check to negate. The targets are placed at the bottom of the initiative order, arranged as the caster chooses, they do not gain more turns if they have already taken turns. For the spell's duration, all attack rolls against the targets gain 2 + 1/4F placed rolls. Affected targets can re-attempt with a swift action. Ending this spell *does not* return the targets to their original place in the initiative order.

7 – Warp Bolt

Action Cost: Core Action

Target: LOS 100' + 20'/F

Area: 5' Wide 100 + 20'/F Line

Type: Evocation

Duration: Instantaneous

Resistance: Adaptive, AGI

Caster launches a bolt of energy in a straight line originating from themselves. Targets receive 8d10 +1/F adaptive damage and are forcibly teleported to an unoccupied space of the caster's choice within this spell's area of effect. AGI save for halve damage and negate being teleported. This spell also affects inanimate objects.

7 – Bluefield

Action Cost: Reactionary

Target: LOS 15' + 5'/F

Area: 20' Line, 10' Tall, 1" Wide

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Until the start of the caster's next turn, all physical projectiles colliding with the target area are suspended in time - causing them to lose all momentum. At the start of their next turn, the caster immediately fires each of the projectiles at a target within 60' without action cost, making a ranged attack roll for each projectile. A projectile fired in this way inflicts the damage die of the weapon it was fired from. Projectiles that are not fired fall harmlessly to the ground.

8 – Phase

Action Cost: 2 Rounds

Target: Touch

Area: 4 + 1/2F Targets

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Willing targets teleport to a location that the caster has memorized, or they can see on the same plane. This spell must be finessed twice to teleport into another plane.

9 – Arcane Pull

Action Cost: Core Action

Target: LOS 60' + 30'/F

Area: 40' Radius, 150' Length Cylinder

Type: Evocation

Duration: Instantaneous

Resistance: AGI

Caster pulls all targets against the flow of gravity, forcing them 120' in a direction of the caster's choice (such as upwards), AGI save to negate. If there is a collision, the target will receive a d12 of adaptive damage for every 10' they are forcibly moved. Targets start falling at the start of their next turn. Sufficiently small buildings will receive a STR check to remain in the ground. Larger structures will not have to make the check.

10 – Frame Freeze

Action Cost: Core Action

Target: Caster

Area: Self

Type: Continuous

Duration: 3 Rounds

Resistance: N/A

Caster briefly stops the flow of time for everyone but themselves; no time passes for others, while they take 3 turns in a row, during which the caster can move as normal. The spell ends if one of the actions used during this period affects a creature or object (Other than themselves or what is being worn/carried by them.)

Illusions

When another character interacts with an illusion, they must make an INT check to reveal it's true nature. Upon failure, a character must normally wait an hour before re-attempting the check. Circumstances can alter this if the illusion is shown to be false.

0 – Minor Illusion

Action Cost: Core Action

Target: LOS 40'

Area: 5' Radius

Type: Focus

Duration: 5 Minutes

Resistance: N/A

Caster creates an illusion of their choosing in the target area. This illusion may have and produce a continuous stream of sensory properties of - sight, smell, hearing, and taste to fool the basic senses, though the caster may only choose up to (Rank/2) of these sensations. The illusion has a maximum movement speed of 30', the caster can move the illusion utilizing their Swift Action. No illusion produced by this spell can create sensory stimuli so strong that it causes harm.

1 – Probe

Action Cost: Core Action

Target: LOS 10'

Area: 4 + 2/F Targets

Type: Evocation

Duration: Instantaneous

Resistance: WIL

Caster probes the minds of the targets, should they have one, WIL save to negate. The caster can truthfully glean a question about the targets - though the question must be answered with a "Yes" or "No." For 24 hours after being affected by Probe, targets get a displaced roll to detect illusions made by the caster and checks to resist the caster's Illusion spells.

1 – Disguise

Action Cost: Core Action

Target: Touch

Area: 1 + 1/2F Targets

Type: Continuous

Duration: 8 + 1/F Hours

Resistance: None

Caster changes the target's appearance to another of their choosing. The spell may make the target appear up to one foot shorter or taller. The spell cannot produce dramatic changes such as making a humanoid target non-humanoid and vice versa. The illusion does not hold up to physical interaction. This disguise is an illusion and is subject to illusion detection rules.

2 – Phantasm

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 500' + 250'/F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: Stress

Caster creates a phantom up to 10' tall, 10' wide, 10' deep that can continuously move in the area - with an accompanying flight speed of 30'. Caster may use their Swift Action to direct the phantasm to attack a target within the LOS, making a melee attack roll. The phantasm inflicts 2 + 1/2F d6 stress damage on a successful strike. This phantom can have visual, auditory, temperature, or smell properties. When creating the phantom, caster can choose any combination of these properties - though it must hold a visual property of some sort.

3 – Invisibility

Action Cost: Core Action **Target:** Touch **Area:** 1 + 1/F Targets
Type: Continuous **Duration:** 20 + 10/F Minutes **Resistance:** N/A

Willing targets become invisible until the end of this spell. Anything being worn, equipped, or carried by the invisible targets also becomes invisible. This spell ends when targets come in physical contact with another creature in any way, when the targets make any check or save, or when they force another target to make a check or save.

3 – Force Illusion

Action Cost: Core Action **Target:** Touch **Area:** 10' x 10' x 10' Area
Type: Continuous **Duration:** 1 + 1/F Minutes **Resistance:** AGI

A wave of energy enshrouds the area - rendering it illusory. The area loses its physical substance - allowing anyone to harmlessly pass through it. If the surface a character is standing on is affected by Force Illusion, that character has an AGI save to move to a location outside of its effect. This spell does not affect sentient targets.

4 – Mirror Image

Action Cost: Swift Action **Target:** Caster **Area:** Self
Type: Continuous **Duration:** 1 + 1/F Minutes **Resistance:** N/A

4 + 1/F illusory duplicates of the caster are created in spaces adjacent to them. By default, duplicates mimic every part of the caster's actions, confusing enemies and making them unable to tell which of the duplicates is the real caster. Immediately after casting the spell and afterward as a Swift Action, the caster may command every illusion to move. The illusions have a movement speed equal to the caster. The duplicates have no physical presence, and their nature is revealed when they are struck or damaged. For illusion detection, each duplicate is an individual illusion.

5 – Emotional Trickery

Action Cost: Core Action **Target:** LOS 100' + 20'/F **Area:** 1 Intelligent Target
Type: Continuous **Duration:** 1 + 1/F Hours **Resistance:** WIL

Caster delves into the mind of a target and summons an illusory copy of the person or thing that relates to a chosen emotion or feeling the most, WIL save to negate. The illusion can move anywhere in the LOS as part of any usage of this spell. The illusion can have the sensations of sight, smell, touch, hearing, and taste. If the emotion is love, it shall be what they desire. If it is sorrow, it shall be what brings them sorrow; with four finesses the illusory copy is completely real to the target. Immediately upon casting this spell, and then as a Swift Action during all later turns, the caster can direct this illusion to *frighten* or *convince* the target until the end of their next turn as a Swift Action. If the target is frightened, they are frightened of the caster.

5 – Major Illusion

Action Cost: Core Action

Target: LOS 80' + 20'/F

Area: Up to 30' Radius

Type: Focus

Duration: 20 + 10/F Minutes

Resistance: INT, Stress

Caster creates an illusion of their choosing in the target area. This illusion may have the sensory properties of - sight, smell, touch, hearing, and taste to fool the basic senses; the illusion's ability to cause harm is dependent upon how believable it is. The caster can continuously change the illusions within the area of Major Illusion by expending their Core Action, and any illusions within the area of effect can act independently of the caster. A target gets an AGI save to move to the nearest safe location, instead of falling if the illusion is modified to remove the floor from under them.

6 – Doppelganger

Action Cost: Core Action

Target: LOS 120' + 20'/F

Area: Self

Type: Focus

Duration: 10 + 1/F Minutes

Resistance: N/A

Caster creates an Illusory copy of themselves - though this copy has a few unique properties. The caster can choose to switch positions with the copy as a Swift Action by expending 2 mana. The caster can choose to make their strikes and spells originate from the copy instead of themselves, effectively extending their range. The copy's HP is equal to half of the caster's and has the same DVs. The caster can direct the copy to move up to 60' as a swift action. The copy dissipates if it leaves a 120' + 20'/F LOS area around the caster.

6 – Perfect Distortion

Action Cost: Core Action

Target: Touch

Area: 2 + 1/F Targets

Type: Focus

Duration: 1 + 2/F Minutes

Resistance: N/A

Willing targets become invisible for the spell's duration. Anything being worn or equipped by the invisible targets also becomes invisible. This invisibility is not lost upon interacting with creatures, attacking, or taking any other actions, though such actions may reveal a target's current position to an enemy.

7 – Focus Illusion

Action Cost: Swift Action

Target: Special

Area: Special

Type: Focus

Duration: Permanent

Resistance: N/A

An illusion spell of the caster's choosing remains permanent as long as the caster retains their focus on this spell. The caster may drop the spell at any time as a Swift Action, but this spell and the original ends. This spell functions on Major Illusion, Emotional Trickery, Phantasm, Minor Illusion, or False Reality.

8 – Phantasmal Evasion

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster gains the ability to create illusory clones that take the place of the caster, allowing them to dodge. For the duration of the ability, the target may use their reaction to prepare 2 + 1/3F illusory clones. The caster may expend a clone at no action cost to dodge an attack by allowing a clone to take the hit and jumping out of the way (up to 10'). This ability may be used to dodge physical and magical attacks, but sufficiently magical spells (rank 6 and above) cannot be blocked in this way. Additionally, the caster may only dodge an area of effect if the 10' jump is enough to take them out of the radius.

8 – Illusory Life

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 1 + 1/2F Targets

Type: Continuous

Duration: 5 + 1/F Minutes

Resistance: WIL

Caster sends out a wave of energy towards the targets, WIL check to negate. They become illusory, allowing the caster to disable any number of the following senses in them and disable other creatures' ability to use the following senses to perceive them; sight, smell, touch, hearing, and taste. (For example, a target with disabled sight is invisible but also blind, a target with disabled hearing is silent but deaf, etc). Affected targets can re-attempt with a swift action.

9 – Phantasmal Attacker

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 20' + 5'/2F Radius

Type: Continuous

Duration: 30 + 30/F Minutes

Resistance: N/A

A phantasmal fighter appears adjacent to the target, following them wherever they go whenever they move. Phantasmal fighters have DVs equal to the target they follow. Phantasmal fighters dissipate when their associated target makes a successful attack roll against them. While a phantasmal fighter is adjacent to the target, they receive two displaced rolls on attack rolls against creatures other than their phantasmal fighter.

10 – Phantasmal Defender

Action Cost: Core Action

Target: LOS 150' + 20'/F

Area: Self

Type: Focus

Duration: Permanent

Resistance: N/A

Caster creates a phantasm (resembling them) that shares a space with them and persists with Focus. It is invisible to those without ranks in illusion. The caster can direct the phantasm using their Core Action (granting it a core and movement action) to manipulate objects (Such as weapons) or cast abilities as if it were the caster, observe a target (memlock and maintain LOS even if the caster cannot), with the same skill as the caster. The phantasm shares all DVs and attributes with the caster - any damage done to the phantasm is reflected onto the caster. Once cast, this spell can be toggled on and off using a Swift Action - though it can be interrupted as though it were a focus spell.

Scrying

0 – Alter Fate

Action Cost: Core Action

Target: Caster

Area: Self

Type: Continuous

Duration: Special

Resistance: WIL

Caster rolls up to (Rank/2) dice of any size and records each die's result to form a dice pool. When a character within 60' LOS of the caster makes a roll, the caster may expend a die from the pool to substitute that die for one of the dice in the roll. Unwilling targets get a WIL save to prevent their rolls from being modified.

- ❖ This spell cannot be recast until the completion of a rest period, and only one instance of it can be active at a time. Dice from the pool may only be used to substitute dice of equal size.

1 – Share Memory

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: WIL

Caster implants 1 + 1/F minutes of a memory they have into the target's mind. The target will retain this memory as they would one of their own, though they are aware that this memory was magically implanted into them, WIL save to negate.

1 – Magic Sense

Action Cost: Core Action

Target: Caster

Area: 40' + 10'/F Radius

Type: Continuous

Duration: 2 + 1/F Hours

Resistance: N/A

Targets glow with an aura. The caster can identify which spells are being cast (Or the spells' effects) by expending a reaction. The caster can identify active effects by expending a Swift Action. The strength of the glow is reflective of the strength of the magical effects upon them.

2 – The Lovers

Action Cost: Swift Action

Target: Touch

Area: 5 + 1/2F Targets

Type: Continuous

Duration: 60 + 30/F Minutes

Resistance: N/A

This spell allows the caster and other willing targets to link their minds. As long as individuals remain on the same plane as each other, they may communicate telepathically with each other. Telepathic communication can convey more information in a shorter time period than verbal communication, though limits still exist.

3 – Scry

Action Cost: Core Action

Target: Same Plane

Area: 50' + 10'/F Radius

Type: Continuous

Duration: 10 + 5/F Minutes

Resistance: N/A

Caster places a 6" radius magical eye in an extrapolated (Within 100') or memlocked location - granting them line of sight. By using a swift action, the caster may switch their perspective over to that of the eye and back again, blinding and deafening themselves, but they gain the eye's vision and hearing - the eye can see 20' through magical darkness. For two finesse this eye can move at a movement rate of 5' within the radius.

3 – Meddle

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 4 + 2/F Targets

Type: Continuous

Duration: 1 + 1/F minutes

Resistance: WIL

Caster telepathically reaches out towards targets in the area around them, WIL save to negate. The caster can detect what the targets are thinking, including passing thoughts for the duration, WIL save to negate. Questions verbally asked of the target are likely to shape their thoughts. As a core action, the caster may shape a target's surface thoughts. This effect is not mind control, and a target will discard an implanted thought if it is significantly different from a thought they might consider normal for themselves to have.

4 – Justice

Action Cost: Special

Target: Caster

Area: Self

Type: Evocation

Duration: Instantaneous

Resistance: N/A

This spell may be cast with a reaction. If this spell is cast on the caster's turn, it may instead be cast with a Swift Action.

- ❖ This spell can be cast in reaction to the caster making any kind of roll. The caster rerolls the roll with a placed roll. The user may then choose to either keep their original result on the roll or to replace it with the new one.
- ❖ Alternatively, the caster can use this spell to reroll any number of dice in their Alter Fate pool, then roll new dice to add to the pool until the pool's usual capacity is reached.

4 – Possession

Action Cost: Core Action

Target: Same Plane

Area: Single Target

Type: Continuous

Duration: 30 + 15/F Minutes

Resistance: N/A

Caster requires a biological sample of the creature they are targeting, consuming the sample as a part of casting the spell. The caster gains complete access to the target's senses for the spell's duration. The target is unaware that this spell is being cast on them, but if the target is not already magical, they radiate magical energy for the spell's duration.

5 – Delve

Action Cost: Core Action

Target: Touch

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: WIL

The caster gains a series of visions about the target's life, revealing the most intense events of the past 7 + 2/F days, proceeding backward from the moment, WIL save to negate. More emotionally intense memories are more clear to the caster, and once viewed, these memories are treated as the caster's for other spell effects.

5 – The Hierophant

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 30/F Minutes

Resistance: N/A

Caster mystically attunes themselves to the fates of those surrounding them, allowing them to more easily deal with their intentions. Caster receives 2 + 1/4F placed rolls on the first resistance check they make each round in addition to 4 + 1/4F bonus DVs, and can no longer be surprised. They become *immune* to being *convinced*.

6 – The World

Action Cost: Special

Target: Anywhere

Area: Special

Type: Continuous

Duration: Special

Resistance: Special

Caster may cast any scrying or space-time spell they know on a memlocked location, even across planes. Casting this spell is a two-round process: On the first round, the caster casts this spell. On the second round, the caster casts the spell they wish to transfer to the target location. The caster still pays both spells' mana costs.

7 – The Devil

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 2 + 1/2F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Fate bends and twists around the target; they gain a placed roll on **every** roll (examples include but are not limited to turmoil d6 rolls, damage rolls, resistance check rolls, and attack rolls) The target has unnatural luck, reality twists itself to suit the needs of the target.

8 – The Hermit

Action Cost: Core Action

Target: Caster

Area: 300' Radius

Type: Continuous

Duration: 20 + 10/F Minutes

Resistance: N/A

Caster begins to draw knowledge of the area to themselves, gaining a profound insight into the backgrounds of the deities, histories, and secrets of the area. A figure lectures the caster on all of these topics. If an ability is actively preventing the user from knowing something about the area, the caster of this spell sees a firm silhouette of what/who is blocking this information. The blocker can also feel the presence of the caster. Alternatively, this spell can be used to attempt to contact any mysterious entities in the area.

8 – The Wheel of Fortune

Action Cost: Core Action

Target: LOS 50' + 20'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster rolls a chosen set of 5 dice, setting aside any dice that have their maximum value, rerolling the rest - caster keeps rerolling as long as a die has its maximum value on it. If no die has its maximum value, caster stops rolling. Caster adds all dice - including the dice they have set aside, to their Alter Fate pool (Scrying - 0.) The dice added by Wheel of Fortune do not count toward the limit imposed by the spell. Additionally, until the caster's next rest period there is no action cost to substituting dice with Alter Fate (Scrying - 0.)

9 – The Magician

Action Cost: Core Action

Target: Caster

Area: Self

Type: Continuous

Duration: 10 + 1/F Minutes

Resistance: N/A

This ability allows the user to more easily see through all illusions, disguises, and shape changes. Caster's form will sprout eyes all over their body as they sense and see every part of the world - even through magic. They will automatically see secret and hidden doors. They can see all invisible, *ethereal*, or immaterial targets more easily as well. The caster is immune to *blindness* and can see through all illusions.

10 – The Hanged Man

Action Cost: Core Action

Target: LOS 100'

Area: Single Target

Type: Evocation

Duration: 1 Round

Resistance: N/A

Until the end of their next turn, the willing target will automatically succeed all resistance checks (except for Dispel and spells like it, in which case the target must resist as normal), and is immune to all damage. In the case of instant kill effects, the target shimmers with white light as the effect harmlessly passes over them.

Charms

0 – Daze

Action Cost: Core Action

Target: LOS 40'

Area: Single Target

Type: Continuous

Duration: 1 + (Rank/5) Rounds

Resistance: WIL

Target loses (Rank) memloc'd locations, loses grip of any active focus spells it is maintaining, and is *befuddled* for 1 + (Rank/5) rounds, WIL save to negate. Resisting this effect allows the target to automatically succeed on saves against *Daze* for the next 4 rounds.

1 – Shadow Thought

Action Cost: Core Action

Target: Touch

Area: Single Target

Type: Continuous

Duration: 8 + 1/F Hours

Resistance: WIL, *Charm*

Target's course of action may be influenced by the caster, as long as the changes do not conflict with the target's wishes, the target receives an inferior WIL, displaced roll on all skill checks for the duration of the ability, and they struggle to form their thoughts, WIL save to negate.

1 – Loose Lips

Action Cost: Core Action

Target: LOS 30' + 15'/F

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Hours

Resistance: WIL

Targets are compelled to blurt out information related to a subject that they would not typically share and lose 2 + 1/2F of their INT attribute, WIL save to negate. Targets blurt out a singular sentence.

2 – Bend Presence

Action Cost: Swift Action

Target: Caster

Area: 20' Radius

Type: Continuous

Duration: 30' + 10'/F Minutes

Resistance: WIL

Caster coats themselves in a mind-altering magical aura that wipes the memories of anyone who views them and replaces themselves with a nondescript figure, WIL save to negate. After this spell ends, those who witness the aura have 5 + 5/F minutes worth of memory before and after wiped, leaving the targets with only vague recollections of the figure. For two finesses, the caster can instead choose to be remembered as another figure, instead of wiping the memories.

2 – Twist Mind

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 3 + 1/F Targets

Type: Continuous

Duration: 1 + 1/2F Rest Periods

Resistance: WIL, *Charm*

Targets receive a nightmare or daydream during their next attempted rest, WIL save to negate. This prevents them from recovering mana, HP, or any other effect normally gained through rest and *convinces* them of something of the target's choice. Caster can specify a few conditions, such as the nature of the nightmares, if the dream stops when the target reaches a certain location, etc. Targets are not aware they are under magical effects.

3 – Minor Charm

Action Cost: Swift Action

Target: LOS 30' + 15'/F

Area: 1 + 1/2F Targets

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: WIL, *Charm*

Caster can choose to *Frighten*, *Deafen*, *Encourage*, *Convince*, or *Blind* the target, WIL check to negate.

Encouraged targets feel happier and gain a placed roll on origin skill checks.

3 – Collapse

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: HEA

Caster twists the energies affecting the target against them. The target receives a number of d12s in adaptive damage equivalent to the number of status conditions, continuous, or focus spells they are being affected by, HEA save for half damage.

4 – Tunnel Vision

Action Cost: Core Action

Target: LOS 60' + 40'/F

Area: 3 + 1/F Targets

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: WIL, *Charm*

The targets' minds are plunged into a mystical void (the appearance of which is chosen by the caster), they become frightened of the caster and mesmerized by the void (whose appearance is determined by the caster), WIL save to negate. While mesmerized, the target can only perceive themselves, the caster, and the mystical void. The spell is broken if the line of sight between the target and the caster is broken.

4 – Witch's Power

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 3 + 1/4F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL

Caster inspires a magically enhanced fervor in a number of willing targets, providing them 2 + 1/4F placed rolls on all resistance checks as well an exceptional PWR. If cast on an unwilling target, they instead have 1 + 1/2F displaced rolls on the setting of all resistance checks, WIL save to negate.

5 – Baleful Betrayal

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL, *Charm*

Caster magically warps the target's sense of friend and foe, WIL check to negate. When the target attempts to target a character with an attack, spell, or another effect, the caster can spend a reaction to direct the attack at one of the target's allies within range. After this, the target can immediately re-attempt the WIL check without action cost.

6 – Frenzy

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 5 + 1/2F Targets

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: N/A

Caster draws arcane magic from the air, directing it towards willing targets. Willing targets are granted 2 + 1/4F bonus martial points and have their spells automatically finessed 1 + 1/4F times in a direction of their choice. Additionally, targets receive a placed roll on all STR checks.

7 – Compulsion

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: Single Target

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: WIL, Charm

The caster hijacks the target's mind and can expend their reaction to grant the target another Core Action, WIL check to negate. What the target does with this Core Action may be decided by the caster. The affected target will believe the action they take is of their own volition. After each time this happens, the target immediately re-attempts the initial check at no action cost.

7 – Mass Confusion

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 10' + 5'/F Radius

Type: Continuous

Duration: 3 + 1/F Rounds

Resistance: WIL, Charm

An aromatic mist begins to settle in the area, confusing all caught in its wake, WIL check to negate. Affected targets automatically re-attempt at the end of their turn.

8 – Major Charm

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 2 + 1/2F Targets

Type: Focus

Duration: 2 + 1/F Hours

Resistance: WIL, Charm

Caster can choose to *Charm*, *Confuse*, or *Petrify* the targets, WIL check to negate. Affected targets automatically re-attempt the check at the end of their turn.

9 – Fate Link

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 4 + 1/F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

Two or more targets become linked together and share effects applied to one or more of them to others in the link; if one of them becomes a target, fails a check or save, or takes damage then it is applied to all in the link (If one becomes a target, they are all targets, if one of them fails a check, they all fail and suffer the consequences, and if one of them takes damage, they all take damage), WIL save to negate being linked. This cannot cause anything to repeat more than once per target. (An AoE does its damage, once, to all in the link but if it hits more than one target in the link it does not repeat its effect more than once.)

10 – Leech

Action Cost: Swift Action

Target: LOS 60' + 20'/F

Area: 20' Radius, Single Target

Type: Focus

Duration: 1 + 1/F Hours

Resistance: WIL

Wrapping themselves or a target in a *charming* aura, all targets in a 20' radius around the initial target must make a WIL save. On failure, the targets are *charmed* by the initial target, and become susceptible to suggestions from them. Furthermore, it is impossible to tell the motivation, thoughts, or truthfulness of the initial target by any magical means for the duration of the spell. The caster can choose to display any thoughts of their choosing to those attempting to read their mind.

Astral Power

0 – Minor Orbital

Action Cost: Swift Action

Target: Variable

Area: 1' radius

Type: Continuous

Duration: Permanent

Resistance: N/A

Caster creates a small planet-like or star-like body that aids in casting and orbits around them. The caster can move the orbital to any point within (Rank x 5)' of themselves as a Swift Action and may cast spells as though the spells were originating from the orbital. The caster may choose to attack with all orbitals, making ranged attack rolls with their core action - inflicting 1 + (Rank/5) d10 adaptive damage upon a successful hit. Only a single Minor Orbital can be active at once.

1 – Cosmic Lance

Action Cost: Core Action

Target: LOS 100' + 100'/F

Area: 1 + 1/2F Targets

Type: Evocation

Duration: Instantaneous

Resistance: N/A

A jet of energy erupts from the casters fingers in the shape of an object of choice. The caster makes a ranged attack roll, inflicting 2 + 1/F d12 adaptive damage on hit.

1 – Unbound

Action Cost: Swift Action

Target: Touch

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

An aura of pure energy surrounds the target until the end of their next turn. Caster allows the target to alter their **next** spell with an area.

- ❖ If the spell's range is a line, it is instead a cone with half range
- ❖ If the spell's range is a cone, it is instead a 5' wide line with double range.
- ❖ If the spell's range is a radius, it is instead a cylinder with half the radius and double the height.
- ❖ If the spell's range is a cylinder, it is instead a sphere with the same radius.

2 – Orbital

Action Cost: Swift Action

Target: Variable

Area: 1" radius

Type: Continuous

Duration: 10 + 1/F Minutes

Resistance: N/A

Caster enhances their Minor Orbital for the duration. Anyone may fire a single target evocation with a ranged attack roll through this Orbital, fracturing the spell into two separate, equal attacks. These attacks may target the same or different individuals so long as they are within the LOS of the ability. Each attack roll has 2 - 1/4F displaced rolls when moving through the orbital. Spells can only pass through an orbital once.

3 – Wax

Action Cost: Swift Action

Target: LOS 60' + 20'/F

Area: 1 + 1/4F Targets

Type: Focus

Duration: 4 + 2/F rounds

Resistance: N/A

Caster shrouds a willing target in celestial twilight. The spells they cast are finessed 1 + 1/4F in a direction of their choice. Immediately upon casting this spell and then as a Swift Action on subsequent turns, caster gains a placed roll on PWR checks.

3 – Wane

Action Cost: Swift Action

Target: Self

Area: 1 + 1/4F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster shrouds a willing target in celestial twilight. All of the target spells are finessed against a certain category of the caster's choosing twice. The caster saves 1 + 1/4F mana on each spell they cast, and they gain Elemental / Magic Damage Reduction 2. When finessing against a category, the category gets weaker in proportion to how much it would have gotten stronger. This effect will downgrade the spell to the next lowest increment if it is any fractional quantity.

4 – Singularity

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 15' + 5'/F Radius

Type: Evocation

Duration: Instantaneous

Resistance: STR

Caster lets loose a ripple of energy in the area, inflicting 4 + 1/F d10 adaptive damage pushing targets as close to the center of the area as possible, STR save for half damage and to negate being pushed.

4 – Cosmic Force

Action Cost: Swift Action

Target: Self

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster channels cosmic energies to infuse their next 2 + 1/2F spells with celestial power. The next time that target casts an evocation or continuous spell, the spell gains the following effects:

- ❖ The spell receives 2 + 1/2F free fineses and may be finessed 4 times past the original cap.
- ❖ The spell's damage dice cannot be below half its maximum if it is rolled for less it is treated as having rolled half its possible max dice result.
- ❖ The spell's resist check cannot be below half its maximum; if it is rolled for less it is treated as having rolled half its possible max dice result.

5 – Corona

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: Adaptive

Caster converts any damage that is inflicted upon them into raw energy, sustaining the injury but gaining a pool of magical force. For every 6 - 1/2F damage the caster suffers, they add 1d8 to their next attack roll, of any damage type the attack can inflict. Stored damage decays at the rate of 6 each round. Stored damage is expended upon making the empowered attack.

5 – Twilight Orbital

Action Cost: Swift Action

Target: Variable

Area: 1" radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: HEA

Caster enhances their Minor Orbital. Upon making a successful ranged attack roll with their Minor Orbital, it becomes stuck to the target. The caster can then deliver touch spells through the orbital (bypassing movement DVs) or expend their core action to activate it for a turn. The target receives 5 + 1/F d10 adaptive damage, HEA save for half when it is activated. Affected targets can remove the Minor Orbital with a Core Action.

6 – Arcane Orbital

Action Cost: Swift Action

Target: Variable

Area: 1" radius

Type: Continuous

Duration: 10 + 5/F Minutes

Resistance: N/A

Caster creates 3 + 1/2F Orbitals (Astral Power - 2) and may move all orbitals at once as a Swift Action at a speed of 30' + 10'/F per round. The orbitals may move anywhere in the LOS; when utilizing these orbitals the caster forgoes all somatic and verbal components of their spells.

7 – Skyshatter

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 20' + 10'/F Radius

Type: Continuous

Duration: 2 Rounds

Resistance: AGI, Adaptive

On the first round, a beautiful prismatic moon falls from the sky, shattering into colorful rays of light, inflicting 6 + 1/F d12 adaptive damage to all within the radius, AGI save for half. On the second round of this spell, stars begin raining from the sky, targeting 3 + 1/F different targets dictated by the caster, making ranged attack rolls for each star, inflicting 4d10 adaptive damage on hit.

8 – Black Hole

Action Cost: Core Action

Target: Caster

Area: 20' + 10'/F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: STR, Adaptive

Caster enhances themselves or an orbital with cosmic energy, drawing all targets in a 20' radius towards the caster or orbital. Targets that collide with the caster or orbital receive 2 + 1/2F d20 adaptive damage, lose their movement action, and are dragged wherever the caster or orbital moves along their path, STR check to negate the pull and halve the damage. This pulling effect is continuously active for the spell's duration. Affected targets may reattempt the STR check with their core action on subsequent rounds.

8 – Gemini

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster generates a magical arcane apparition. The apparition always acts in the next round's initiative order with a 15 for its initiative check and must copy the movements and actions the caster took the previous round. The apparition does not attack targets, instead of firing all attacks and spells on the locations held by the targets. This effect may cause many single target attacks or other spells to miss, should the targets move. The apparition will only copy instantaneous evocations and actions, such as weapon skill attacks.

9 – Moon Presence

Action Cost: Swift Action

Target: LOS' 40' + 20'/F

Area: 1 + 1/F Mile Radius

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster blocks the sun with sorcerous magic, causing a total eclipse. As the skies darken, a sorcerous moon hangs overhead for the duration of the spell. All spells cost 2 + 1/4F fewer mana to cast.

10 – Pulsar

Action Cost: Core Action

Target: LOS 100' + 20'/F

Area: 5' Wide 100' Line

Type: Evocation

Duration: Instantaneous

Resistance: AGI, Adaptive

A massive stream of energy flies from the caster's fingertips in a straight line, inflicting 8 + 1/2F d20 adaptive damage, searing affected targets flesh with magical energy - causing them to have 2 displaced rolls on all HEA checks for the next minute, AGI save for half damage and to negate the displaced rolls.

Arcane Battery

1 - 10 – Arcane Battery

Action Cost: N/A

Target: Caster

Area: Self

Type: N/A

Duration: Passive

Resistance: N/A

Caster taps into the primal ley-lines that bind all energy in the universe together, increasing their mana pool by (Rank * 2.) The mana provided by this ability is considered part of the caster's natural mana pool.

Arcana

0 – Arcane Grip

Action Cost: Core Action

Target: Variable

Area: 6"

Type: Focus

Duration: 1 Hour

Resistance: N/A

Caster can forcibly manipulate an area using their will from up to (Rank * 5)' away. Caster can use their core action to exert their will upon an object, manipulating these objects from afar. When using their will in such a way, they cannot perform attacks or manipulate anything more than (Rank *3) pounds.

0 – Telepathy

Action Cost: Core Action

Target: Variable

Area: Single Target

Type: Continuous

Duration: 1 Minute

Resistance: WIL

Caster reaches out towards a mind up to (Rank * 10) away. The caster can maintain a continuous stream of mental communication with them, allowing them to both communicate with one another so long as they share one language in common, WIL save to negate. The caster can mask their presence so that the target does not know where the voices came from.

0 – Sorcerous Strike

Action Cost: Core Action

Target: Caster

Area: Self

Type: Evocation

Duration: Instantaneous

Resistance: Blunt

Caster expends their core action to make a melee attack roll. On hit, the caster inflicts (Spell Rank/2) d10 extra adaptive damage in addition to their weapon's base damage.

0 – Forge

Action Cost: Swift Action

Target: Touch

Area: Single Weapon

Type: Continuous

Duration: 1 Round

Resistance: N/A

Caster alters the properties of the weapon, it now deals adaptive damage of the caster's type instead of its regular damage type. This effect reapplies itself at the start of each round, and can only be active on a single weapon at once.

0 – Inner Glow

Action Cost: Swift Action

Target: LOS 100'

Area: Variable

Type: Continuous

Duration: 10 Minutes

Resistance: Fire

Caster releases (Rank) orbs into their line of sight - the orbs dissipate should they leave it. Each orb emanates enough light to illuminate a 5' area. The caster can arrange these orbs of light however they please, directing them as a Swift Action or forcing them to coalesce around the caster, causing them to glow with an aura of whatever color they please. The orbs have a movement speed of 60' when directed by the caster as a Swift Action. Caster may only have one instance of this spell up at a time.

0 – Renew Object

Action Cost: Core Action

Target: Touch

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster can repair simple broken things or extremely superficial wounds (Rank/2) times per day. It does not restore the inherent magical properties of an object. Any repairs done with this spell leave an obvious substitute where the damage used to be.

0 – Stabilize

Action Cost: Core Action

Target: Special

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster stabilizes a target in a state of unstable unconsciousness if they are up to (Rank)*2 ft away. This effect prevents the target from bleeding out further.

0 – Darken

Action Cost: None

Target: Caster

Area: Self

Type: Continuous

Duration: Permanent

Resistance: N/A

Caster manifests darkness within the physical world. The number of effects that the caster can do simultaneously is equal to (Rank/2). Caster may select one of the following effects:

- ❖ A small fire, candle, or other light source is snuffed out.
- ❖ Easily moveable objects in the area such as unlocked doors, leaves, and curtains, all move to create shade within a 5' radius.
- ❖ Natural shadows appear in a 5' radius for the next minute.

0 – Bend Elements

Action Cost: None

Target: Caster

Area: Self

Type: Continuous

Duration: Permanent

Resistance: N/A

Caster manifests elemental power around them. The number of effects that the caster can do simultaneously is equal to (Rank/2). Caster may select from the following effects:

- ❖ Produce minor, non-damaging elemental effects, such as leaving a trail of energy as footprints, or forcing their eyes to glow.
- ❖ Shift easily moveable objects in the area, such as unlocked doors, leaves, and curtains.
- ❖ Casually manipulate objects less than (Rank) pounds with air, though they cannot make attacks with this effect.
- ❖ Inflict slight temperature changes, warming themselves up or cooling themselves down

0 – Binding

Action Cost: Core Action

Target: Touch

Area: Single Target

Type: Continuous

Duration: Variable

Resistance: N/A

Caster must make a melee attack roll to touch a target - upon a successful touch attack, the target is pinned until the end of their next turn, pulsing magical chains wrapping around them.

0 – Assemble

Action Cost: 2 Rounds

Target: Touch

Area: 5' x 5' x 5' cube

Type: Focus

Duration: 1 + 1/F Hours

Resistance: STR

The caster transforms a mundane material, such as dirt, into an item. The item can be up to the size of a 5' x 5' x 5' cube. The item is as sturdy as iron, appears to be magical, and cannot replicate anything more advanced than an analog watch.

0 – Form Familiar

Action Cost: 1 hour

Target: Touch

Area: Single Target

Type: Continuous

Duration: Permanent

Resistance: N/A

To create a familiar, the caster fractures a piece of their soul and concentrates it into a small rock or gemstone of some kind, this fusion creates an obedient pet that can take a variety of forms. The familiar's form must be of size category small. By default familiars only have 5HP, a land speed of 20', and have an attack that does 1d4 damage in any chosen damage type. Familiars must breathe water or air and be either nocturnal or diurnal. Familiars have telepathic communication with their masters, though they cannot speak or learn language, and will follow simple commands. At the following ranks they gain upgrades....

- ❖ Rank 2: As a Swift Action caster loses all their senses but gains the senses of their familiar. This ability is maintained with focus.
- ❖ Rank 4: The familiar can now either have a swim speed of 15', fly speed of 15', or a land speed of 30'.
- ❖ Rank 6: The familiar can be teleported anywhere within LOS of the caster as a Swift Action. The familiar can also be used as a point of casting all spells.
- ❖ Rank 8: The familiar can now have two kinds of movement (outlined in Rank 4 upgrade).
- ❖ Rank 10: The familiar can now be of the Tiny or Medium size class as well.

If the familiar dies, the soul rushes back to its other half and with it comes the last minute of memories the familiar had. The familiar's form does not need to stay consistent across summonings but once summoned that form is considered permanent until they are reformed. The familiar can be reformed at any time and will have the memories of all past familiar forms.

Elemental Magics

Elemental Magic is representative of the core fabrics of the multiverse itself. The elements are what make up the world around us, though one can seek to master them. Upon buying up all the spells in a group, the caster gains resistance to that element's damage type, though only one type of resistance may take effect at a time from this effect. The active elemental resistance can be altered with swift action.

Elemental Groups

Terramancy allows the caster to manipulate the laws of reality, subjugating them to their will. Terramancers excel at defense, and their methods are often direct, calculated, and forceful.

Pyromancy brings forth the raw destructive potential of energy. To a pyromancer, fire is not merely the process of burning, but an exchange of energy which can be manipulated to their advantage.

Aquamancy provides for the containment of energy, rather than its violent release. While other mages excel at taking action, the Aquamancer excels at denying and controlling foes.

Aeromancy creates a steady balance of momentum and fury, allowing practitioners to glide through the air with grace with the same energy that allows them to call lightning from the skies.

Elemental Magic List

Terramancy	Pyromancy	Aquamancy	Aeromancy
0 – Harden	0 – Firebolt	0 – Icy Blast	0 – Voltspike
1 – Earth Shield	1 – Flamespike	1 – Create Water	1 – Blink
2 – Earth Tunnel	1 – Firepick	1 – Brainfreeze	1 – Thundering Steel
2 – Reduction	2 – Smoke Cloud	2 – Waterlog	2 – Flash
2 – Stoneskin	2 – Hand of Flame	2 – Effervescence	2 – Favor of the Wind
3 – Mountain’s Might	3 – Inferno	3 – Hydrodisk	3 – Zephyr
3 – Tremorsense	3 – Flashbang	3 – Water Wall	3 – Wind Wall
4 – Spiral Spikes	3 – Rune Brand	3 – Silent Snow	4 – Lightning Bolt
4 – Cloak of Stone	4 – Fireball	4 – Minor Puppet	4 – Cloak of Storms
4 – Vigor	4 – Cloak of Sparks	4 – Cloak of Snow	5 – Hawksoar
5 – Ironskin	5 – Cinderflame	5 – Whirlpool	5 – Forceful Winds
6 – Terraform	6 – Fire Control	6 – Water Control	6 – Lightning Cascade
6 – Obsidian Storm	7 – Path of Light	7 – Freeze	7 – One with the Wind
7 – Deflection	7 – Path of Flame	7 – Mass Puppet	7 – Gathering Winds
8 – Demolish	8 – Flamestorm	8 – Blizzard	8 – Chain Lightning
8 – Crystal Scales	8 – Firelink	8 – Storm Bubble	8 – Thunderlink
9 – Field of Ruin	9 – Comet	9 – Avalanche	9 – Warp Weapon
10 – Absolute Fury	10 – Flameburst Epidemic	10 – Crystal Mirrors	10 – Gathering Storm

Terramancy

0 – Harden

Action Cost: Swift Action

Target: LOS 40'

Area: Willing Target

Type: Continuous

Duration: 1 Round

Resistance: N/A

Caster creates a protective barrier composed of earth and rocks around a willing target, granting them (Rank/2) bonus DVs until the start of the character's next turn.

1 – Earth Shield

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: N/A

Caster manipulates existing stone, earth, or similar substances to create a mobile shield between the target and others. This shield has a HP pool of 8 + 5/F HP. This effect breaks LOS between the target and others; this barrier does not inhibit the wielder's LOS to others.

2 – Earth Tunnel

Action Cost: Core Action

Target: Caster

Area: Self

Type: Continuous

Duration: 10 + 1/F Minutes

Resistance: N/A

Caster gains a burrowing speed equal to a quarter of their movement speed. Caster can finesse the spell twice to have the opening close up behind them as they move. Burrowing speed is affected by the materials being burrowed through.

2 – Reduction

Action Cost: Reactionary

Target: LOS 20' + 5'/F

Area: Single Attack

Type: Evocation

Duration: Instantaneous

Resistance: N/A

An earthen aura surrounds the target's body. This spell is cast in reaction to the caster or a nearby target being hit by an attack that inflicts mundane damage, reducing the damage by half.

2 – Stoneskin

Action Cost: Swift Action

Target: Touch

Area: 2 + 1/F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Willing targets receive a 3 + 1/4F bonus to all DVs. Their skin hardens, making them tougher and more akin to stone.

3 – Mountain's Might

Action Cost: Swift Action

Target: LOS 10' + 10'/F

Area: 1 + 1/F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster increases the power of the target's physical attacks by enchanting their weapon. The targets have 1 + 1/3F placed rolls on the damage die of all attack rolls made with the enchanted weapon.

3 – Tremorsense

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Continuous

Duration: 10 + 10/F Minutes

Resistance: N/A

The caster can sense the vibrations in the ground to pinpoint any creature that moves or takes core actions in a 100' radius. This spell does not work on flying creatures or creatures that are not connected to the caster through a completely solid medium. This sense is highly accurate on targets that it can perceive and may replace vision in case of *blindness*.

4 – Spiral Spikes

Action Cost: Core Action

Target: Caster

Area: 10' X 40' Cone

Type: Evocation

Duration: Instantaneous

Resistance: Force, HEA

A flurry of stone spikes rise in a cone in front of the caster. They inflict 5 + 1/F d10 force damage to all caught in the area of effect, AGI save for half. These spikes remain on the battlefield, *slowing* all who attempt to move through the area.

4 – Cloak of Stone

Action Cost: Swift Action

Target: LOS 30 + 15/F'

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: Force

Caster covers the willing target in a thick layer of elemental energy, damaging **other** targets within 10' + 5'/2F of them for 2 + 1/4F d10 force damage at the end of their turn. This spell also grants the target force resistance.

4 – Vigor

Action Cost: Core Action

Target: LOS 10' + 5'/F

Area: 2 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster surrounds the bodies of the targets in an aura of force. Targets of this spell gain an exceptional HEA and an exceptional STR and increase their size categories by 1.

5 – Ironskin

Action Cost: Swift Action

Target: Touch

Area: Single Target

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

The target of the spell gains immunity to a mundane damage type of the caster's choice. Additionally, the targets of this spell can expend a reaction to make a contested STR check to negate one melee attack each round.

6 – Terraform

Action Cost: Core Action

Target: LOS 60' + 50'/F

Area: 500 + 200/F Cubic ft.

Type: Focus

Duration: 10 + 5/F Minutes

Resistance: Force

Immediately upon casting this spell, and then as a Swift Action during all later turns the caster can use one of the following abilities.

- ❖ Suspend and control the volume of earth up to the area in the air and change its shape, by moving it 10' + 10'/F per round.
- ❖ Use earth to attack a target within the LOS by making a ranged attack roll - inflicting 4 + 1/4F d8 force damage on hit.
- ❖ Shape and create structures out of the volume of earth as a Swift Action. These remain in place even after the spell has expired. Walls formed out of this spell have a HP pool of 11 + 4'/F.

6 – Obsidian Storm

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 20' + 5'/F Radius

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: AGI, Force

Obsidian spikes rain down upon the area. Targets caught in the storm receive 2 + 1/4F d12 points of force damage, AGI check for half damage and to negate being *pinned* until the end of their next turn. Additionally, any targets in the area of the spell receive a displaced roll on all HEA checks.

7 – Deflection

Action Cost: Reactionary

Target: Caster

Area: Self

Type: Evocation

Duration: Instantaneous

Resistance: N/A

The caster surrounds themselves with a reflective aura until the start of their next turn. After a creature misses an attack roll against the target, the creature is forced to roll to attack itself with the same amount of energy. Attacks made against oneself ignore Movement DVs.

8 – Demolish

Action Cost: Core Action

Target: Touch

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Force

Metals from the ground move to the caster's arm, strengthening their punch but making their control unwieldy. The caster can make a melee attack roll against an object (such as a building) or a target with a displaced roll - inflicting 6 + 1/2F d20 force damage on a successful strike, and rendering any armor worn by the target unusable until it is repaired. This damage is doubled against buildings.

8 – Crystal Scales

Action Cost: Swift Action

Target: Touch

Area: Single Target

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: N/A, AGI

A crystalline, scale-like coat covers the target for the duration of the spell, or until the armor breaks. This armor grants a willing target 4 + 1/2F bonus DVs and 6 instances of mundane damage reduction. The armor blocks all damage until it has taken 40 + 8/F damage, at which point it breaks - no longer providing a benefit (breaking naturally at the end of the duration.) Upon breaking, an explosion radiates around the caster - causing all, excluding the target to receive 4 + 1/F d12 force damage in a 10' radius.

9 – Field of Ruin

Action Cost: Core Action

Target: LOS 60' + 30'/F

Area: 30' + 10'/2F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: Force

Caster superheats the ground, causing it to spew earth onto the surface, creating an area of dangerous force terrain. Anyone that falls into the area has the die size of any falling/push damage increased from a d6 a d12. Additionally, the character applies 2 + 1/4F effects to the Field of Ruin.

- ❖ Targets selected by the caster do not receive the negative effects while in *Field of Ruin*, instead, they receive the benefits of *Vigor*
- ❖ Targets selected by the caster do not receive the negative effects while in *Field of Ruin*, instead, they receive the benefits of *Stoneskin*
- ❖ As a swift action, the character can cast the spell *Spiral Spikes (Terramancy -4)*, originating from any point in the field.

10 – Absolute Fury

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 3 + 1/2F Targets

Type: Focus

Duration: 3 + 1/2F Rounds

Resistance: N/A

Caster enhances the targets with the strength of earth. Willing targets receive a placed roll on all PWR, STR, and AGI checks, gain a 4 + 1/4F bonus martial points, and all evocations are automatically finessed twice in a direction of the caster's choosing for free.

Pyromancy

0 – Firebolt

Action Cost: Core Action

Target: LOS 40'

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Fire

Caster makes a ranged attack roll, firing an arc of flame from their fingertips inflicting (Rank/2)d10 fire damage to the target on hit.

1 – Flamespike

Action Cost: Core Action

Target: LOS 20' + 10'/F

Area: 1 + 1/2F Targets

Type: Evocation

Duration: Instantaneous

Resistance: Fire

Caster makes a ranged attack roll against a target. A spire of flame erupts on top of the target inflicting 2 + 1/F d10 fire damage. Being struck by the flame spike inflicts 1 + 1/F instances of *suffering (Fire)* to the target.

1 – Firepick

Action Cost: Core Action

Target: LOS 10' + 5'/F

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: Fire

Caster makes a ranged attack roll, inflicting 1 + 1/2F d10 fire damage if used against a living target. The effect's common usage is carving in solid structures. When utilized, the firepick gives 1 + 2/F placed rolls on crafting checks, given some time, can carve a hole through a door, break a lock, weld, melt metal and even cauterize minor wounds.

2 – Smoke Cloud

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 15 + 5/F' Radius

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: Fire

Caster generates intense fires in the radius, causing a plume of thick black smoke to erupt from inside the region.

- ❖ Those inside the smoke cloud receive the benefits of cover.
- ❖ Those inside are obscured, making it difficult to track their movements.

2 – Hand of Flame

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 5' Sphere

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: Fire

Immediately upon casting this spell, and then as a Swift Action during all later turns, the caster can make a ranged attack roll with a floating hand made of fire (Provided they are within the LOS), inflicting 3 + 1/2F d6 fire damage on hit.

3 – Inferno

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 20' + 5'/F Area

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: HEA, Fire

Target area erupts into flame, inflicting 4 + 1/2F d6 fire damage if they perform any of the following actions, with a HEA save for half damage in each instance.

- ❖ Physically move through the area using their movement action
- ❖ They begin their turn in the designated area.

3 – Flashbang

Action Cost: Core Action

Target: LOS 30 + 15/F'

Area: 20' + 5'/F

Type: Continuous

Duration: 1 + 1/F Minute

Resistance: HEA

Caster creates an explosion of energy that leaves those within 20' + 5'/F of the radius *blinded* and Deafened on a failed HEA check. On a successful check, targets may choose whether they are *blinded* or Deafened.

Affected targets can re-attempt with a swift action to remove one of the effects.

3 – Runebrand

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 10' + 5'/2F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL, Fire

Caster casts a runic brand onto all within the radius, should they fail a WIL check. While branded all healing done to the affected targets is fire damage instead. Affected targets can re-attempt with a swift action.

4 – Fireball

Action Cost: Core Action

Target: LOS 60 + 25/F'

Area: 20 + 5/F' Radius

Type: Evocation

Duration: Instantaneous

Resistance: HEA, Fire

Caster condenses energy into a single spark that flies to the targeted area. Energy is then violently released, inflicting 8 + 1/F d6 fire damage with a HEA save for half damage. The fireball ignites flammable objects and targets, inflicting an instance of suffering (Fire) to targets that fail the save.

4 – Cloak of Sparks

Action Cost: Swift Action

Target: LOS 30 + 15/F'

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: Fire

Caster covers the willing target in a thick layer of elemental energy, damaging **other** targets within 10' + 5'/2F of them for 2 + 1/4F d10 fire damage at the end of their turn. This spell also grants the target fire resistance.

5 – Cinderflame

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 15' + 5'/F Radius

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: HEA, Fire

Caster produces a blast of black smoke flecked with live cinders, igniting targets acting within the cloud. Each time a target takes any actions within the cloud, they receive 3 + 1/F d12 fire damage, with a HEA save for half. The cinders incinerate the armor of those inside, burning away 3 + 1/2F armor DVs each time they fail the save (Any damage inflicted by the cinders must be repaired before the armor can provide the same level of benefit.)

6 – Fire Control

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 500 + 200/F cubic ft.

Type: Focus

Duration: 10 + 5/F Minutes

Resistance: Fire

Immediately upon casting this spell, and then as a Swift Action during all later turns the caster can use one of the following abilities. Anyone that ends their turn in an area surrounded by this fire gains a stacking instance of fire suffering.

- ❖ Suspend, control, and create a volume of fire up to the spell's area and change its shape by moving it 60' + 10'/F per round.
- ❖ Use fire to attack a target within the LOS by making a ranged attack roll - inflicting 4 + 1/2F d10 fire damage on hit.
- ❖ Blast all targets with flames, firing in a 5' x 20' cone in front of the caster, inflicting 4 + 1/4F d12 fire damage, with an AGI save for half damage.

7 – Path of Light

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: N/A

Caster ignites their body, wreathing themselves in magical flames that are harmless to them but warp the visibility around them while altering their fire magic. While active, any spells that inflict fire damage blind targets until the end of their next turn. Additionally, the caster may cast Fireball (Pyromancy - 4) by utilizing their Swift Action.

7 – Path of Flame

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: N/A

Caster's body is seared by fire magic, enhancing its magical potential. All of the caster's flame-based abilities leave an afterburn. The afterburn is an additional effect on all of the caster's fire spells. While active, any attacks that inflict fire damage also incur 1 + 1/3F Instances of *suffering (Fire)* to the targets in addition to the attack's primary effects.

8 – Flamestorm

Action Cost: Core Action

Target: LOS 100' + 20'/F

Area: 10' + 5'/2F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: AGI, Fire

Caster creates a fiery whirlwind that travels across the battlefield. The storm has a movement speed of 30', and the caster may command the storm to move as a Swift Action. The storm will continue moving in a direction until it receives commands to stop. Anyone caught in the storm must make an AGI check to halve 2 + 1/2F d20 fire damage and negate being knocked *prone*.

8 – Firelink

Action Cost: Core Action

Target: LOS 50' + 20'/F

Area: 20' + 5'/F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: HEA, Fire

Blazing chains link all targets to the area with a HEA check to negate, inflicting 3 + 1/F d20 fire damage, and burning away 3 + 1/2F armor (Any damage inflicted by the flames must be repaired before the armor can provide the same level of benefit) should they end their turn outside of the spell's area of effect. Affected targets can re-attempt with a core action.

9 – Comet

Action Cost: Core Action

Target: LOS 100' + 30'/F

Area: 60' + 30'/F Radius

Type: Evocation

Duration: Instantaneous

Resistance: HEA, AGI Fire

Caster harnesses an immense amount of magical energy - it coalesces around them in a massive sphere that engulfs them. The caster then unleashes a comet from their fingertips. Those struck by the comet receive 6 + 1/2F d20 fire damage, with a HEA or AGI (target's choice) save for half damage and to negate being knocked prone. The comet's impact inflicts heavy damage to terrain, potentially destroying buildings and leaving a crater.

10 – Flameburst Epidemic

Action Cost: Core Action

Target: LOS 50' + 20'/F

Area: 20' + 5'/F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: HEA, Fire

Hellish flames expand outwards from the target point, inflicting 5 + 1/2F d20 fire damage, HEA save for half, and to avoid being marked. Flameburst Epidemic can be cast without mana cost on marked targets, centered on the target, and spreading outwards for the duration of the spell. Casting in this manner consumes the mark. There is nothing that prevents a target from regaining marks.

Aquamancy

0 – Icy Blast

Action Cost: Core Action

Target: LOS 40'

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Ice

Caster summons a ball made of ice and launches it, making a ranged attack roll, inflicting (Rank/2)d8 ice damage, and slowing them until the end of their next turn.

1 – Create Water

Action Cost: Core Action

Target: LOS 80' + 20'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Stress

Caster fills a container with water sufficient to provide enough potable water for most creatures to survive for a day. Water can also be created within the lungs of a target inflicting 2 + 1/F d10 stress damage to them, HEA save for half damage.

1 – Brainfreeze

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: HEA, Ice

Caster creates a magical frost that settles on the target's head, causing them distress and slowing mental faculties, HEA check to negate. Targets activate thought-activated magic items, effects, or spells which cost a Swift Action with a Core Action instead and lose their reactions for the duration of the spell. Affected targets automatically re-attempt the check at the end of their turn.

2 – Waterlog

Action Cost: Core Action

Target: Caster

Area: 40' X 10' Cone

Type: Evocation

Duration: Instantaneous

Resistance: AGI

Caster condenses water into a cone, saturating all targets, soaking water into their armor, clothes, and body until they struggle to move. Targets who fail an AGI save are *slowed* until the end of their next turn, and lose half of their movement DVs while *slowed* by Waterlog or any other source (Of *slow*) for the next minute.

2 – Effervescence

Action Cost: Reactionary

Target: LOS 20' + 5'/F

Area: Single Attack

Type: Evocation

Duration: Instantaneous

Resistance: N/A

An aqueous aura surrounds the target's body. This spell is cast in reaction to the caster or a nearby target being hit by a source of elemental or magic damage, reducing the damage to the target by half.

3 – Hydrodisk

Action Cost: Swift Action

Target: LOS 80' + 20'/F

Area: 4 + 1/F Targets

Type: Continuous

Duration: 1 + 1/F Hours

Resistance: AGI

A series of watery disks fly from the caster, *pinning* the targets, AGI save to negate. The disks have 1 HP and 0 DVs, the discs breaking upon taking that much damage, releasing the target. If a target under this spell's effect takes ice damage, the disks freeze, increasing their HP to 10.

3 – Water Wall

Action Cost: Core Action

Target: 20' + 10'/F

Area: 40' x 20' + 10' x 10'/F Line

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: STR, Blunt

Caster erects a wave of water that acts as a wall, standing 10' + 5'/F tall. Projectiles moving through the water wall have their total damage halved. Targets moving through the wall make a STR or AGI check (target's choice) and on failure stop moving, losing all remaining movement. When the wall is hit with ice damage, it is frozen. If the wall is frozen, it is impossible to see or move through the wall. A frozen wall has 30 HP and 0 DVs.

3 – Silent Snow

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: WIL, Ice

Caster surrounds a target with a flurry of snow and howling wind that makes spell casting difficult by *spell jamming* them, WIL check to negate. Caster may move the storm as a Swift Action - forcing the next target caught within its wake to make the WIL check or be inflicted with the condition. Affected targets can re-attempt with a swift action.

4 – Minor Puppet

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

Targets lose their movement action to the caster, WIL check to negate - as the caster manipulates the water in their body. Immediately upon casting this spell, and then as a Swift Action during all later turns, the caster can force them to move in a manner of their choosing, taking effect on their next turn. Affected targets can re-attempt with a swift action.

4 – Cloak of Snow

Action Cost: Swift Action

Target: LOS 30 + 15/F

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: Ice

Caster covers the willing target in a thick layer of elemental energy, damaging **other** targets within 10' + 5'/2F of them for 2 + 1/4F d10 ice damage at the end of their turn. This spell also grants the target ice resistance.

5 – Whirlpool

Action Cost: Core Action

Target: LOS 40' + 5'/F

Area: 15' + 5/2F'Radius

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: STR, Blunt

A torrent of water collects at the target location in a whirlpool, dragging everyone as close to the center as possible and pinning them, and inflicting 1 + 1/4F d10 blunt per target in the whirlpool's center, STR check to negate. Affected targets can re-attempt with a core action, using their swim speed upon breaking.

6 – Water Control

Action Cost: Core Action

Target: LOS 60 + 20'/F

Area: 500 + 200/F Cubic ft.

Type: Focus

Duration: 10 + 5/F Minutes

Resistance: Blunt

Immediately upon casting this spell, and then as a Swift Action during all later turns the caster can use one of the following abilities.

- ❖ Suspend and control the volume of water up to the spell's area and change it by moving it 10' + 10'/F.
- ❖ Use water to attack a target within the range and inflict 4 + 1/4F d8 blunt damage with an AGI save for half and negate being *slowed* until the end of their next turn.
- ❖ Evaporate a volume of water equal to half the area.
- ❖ Condense a volume of water equal to half the area
- ❖ Heat up or cool down water equal to the volume, up to a point where the water can damage, inflicting 2d8 fire or ice damage at the end of the caster's turn to those in the water.

7 – Freeze

Action Cost: Core Action

Target: LOS 5' + 5'/F

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: HEA, Ice

Caster freezes a target, forcing them to make a HEA save to negate being frozen in ice - losing all of their actions. The ice has a HP pool of 100, and 0 + 25/F % damage inflicted onto the ice is transferred to the original target. Upon hitting 0, the ice shatters and the target is no longer frozen. This does not harm the target, and affected targets automatically re-attempt at the end of their turn. Upon breaking, they regain their swift and movement actions.

7 – Mass Puppet

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 10' + 5'/F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL

Targets lose their movement action to the caster, WIL check to negate. The caster manipulates the water in their bodies - Immediately upon casting this spell, and then as a Swift Action during all later turns, the caster can force all affected targets to move in a direction of their choosing using their movement action on their turn. Affected targets can re-attempt with a swift action.

8 – Blizzard

Action Cost: Core Action

Target: LOS 60' + 30'/F

Area: 30' + 10'/F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: HEA, Ice

A furious snowstorm descends in a 30' + 10'/F area for 4 + 2/F rounds, limiting LOS to 10' within it; ending a turn within it inflicts 4 + 1/F d12 ice damage and *slows* the target, HEA save for half damage.

8 – Storm Bubble

Action Cost: Swift Action

Target: LOS 5' + 5'/2F

Area: 10' + 5'/2F Radius

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: N/A

A sphere of water surrounds the target point. Spells targeting individuals inside of the barrier below rank 5, or have a ranged attack roll have no effect whatsoever. Above rank 5, when a magical effect targets an individual inside the barrier, they have a placed roll on any attempts to resist the spell. Should the check be made, the target negates all effects from the spell. Individuals inside the barrier receive no penalties when attacking those outside of it.

9 – Avalanche

Action Cost: Core Action

Target: LOS 60' + 5'/F

Area: 5' + 5'/F radius

Type: Continuous

Duration: 4 + 2/F rounds

Resistance: AGI, Ice

Caster conjures a mess of rapidly moving snow. As a Swift Action, caster may move the avalanche up to 30' along the ground within range of the spell. On collision, the avalanche grapples and inflicts 5 + 1/Fd10 ice damage at the end of each of the caster's turn, AGI or STR check to negate (target's choice.) Characters must make a grapple check to break.

10 – Crystal Mirrors

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 15' + 5'/F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

Caster creates a storm of snow and ice that surrounds the boundaries of the area. Caster creates 2 + 1/2F mirrors adjacent to each target, generating half as many mirrors on a successful WIL save. A mirror has 70 + 10/F HP, 5 DVs, and is immune to non-damaging effects. The mirror shares damage dealt to it to whomever it depicts until it breaks (damage is not shared when targets attack their mirrors.)

Aeromancy

0 – Voltspike

Action Cost: Core Action

Target: LOS 40'

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Lightning

Caster fires an arc of lightning from their fingertips, making a ranged attack roll and inflicting (Rank/2)d10 of lightning damage to the target on hit.

1 – Blink

Action Cost: Movement Action

Target: LOS 40' + 20'/F

Area: Self

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster fades away in a manner of their choice, teleporting up to their current movement somewhere else in their LOS.

1 – Thundering Steel

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: HEA, Lightning

Caster produces ammunition for a ranged weapon or edges a melee weapon with magic. Enchanted weapons that miss its attack on a target under this spell's effect inflicts 1 + 1/4F d8 lightning damage for each attack missed (Cumulative for each attack missed), HEA save to negate the damage.

2 – Flash

Action Cost: Core Action

Target: LOS 10'

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Lightning

Numerous jolts of lightning fly out from the caster's fingertips. The caster makes 3 + 1/2F ranged attack rolls, inflicting 2d8 lightning damage on each successful strike.

2 – Favor of the Wind

Action Cost: Reactionary

Target: LOS 15' + 5'/F

Area: 2 + 1/4F Targets

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Willing targets within one size category of the caster may be forcibly shifted 10' + 5'/2F in a direction of the caster's choice. If this is enough to take a character outside of a weapon's reach, range, or area of effect's space, the ability does not affect the character.

3 – Zephyr

Action Cost: Core Action **Target:** LOS 40' + 10'/F' **Area:** 10' Wide Line 35' + 5'/F' Long

Type: Continuous **Duration:** 1 + 1/F Minutes **Resistance:** STR

Caster creates a massive gust that can move people, objects, blow away clouds, and snuff out a house-sized fire. Objects up to 40 + 5/F lbs can be moved up to 60' per round in the direction of the airflow. Targets are pushed 20' in the direction of the gust and knocked prone at the end of each of the caster's turns, STR check to negate. Caster can change the direction of the zephyr as a Swift Action.

3 – Wind Wall

Action Cost: Core Action **Target:** LOS 10' + 5'/F **Area:** 10' x 10' + 5' x 5'/F Line

Type: Focus **Duration:** 4 + 2/F Rounds **Resistance:** STR, AGI

This spell creates a swirling wall of air. Projectiles moving through the wind wall remove 3 dice from their attack roll. Targets moving through the wall make a STR or AGI check (target's choice) and on a failure stop moving, lose all remaining movement, and fall prone. Caster can move the wall 10' in any direction as a Swift Action.

4 – Lightning Bolt

Action Cost: Core Action **Target:** LOS 80' + 20'/F **Area:** 5' Wide 80' + 5' Wide/2F Line

Type: Evocation **Duration:** instantaneous **Resistance:** Lightning, HEA

A massive bolt of lightning flies from the caster's fingertips in a line, inflicting 4 + 1/F d12 lightning damage, HEA save for half damage.

4 – Cloak of Storms

Action Cost: Swift Action **Target:** LOS 30 + 15'/F' **Area:** Single Target

Type: Continuous **Duration:** 1 + 1/F Minutes **Resistance:** Lightning

Caster covers the willing target in a thick layer of elemental energy, damaging **other** targets within 10' + 5'/2F of them for 2 + 1/4F d10 lightning damage at the end of their turn. This spell also grants the target lightning resistance.

5 – Hawksoar

Action Cost: Swift Action **Target:** LOS 20' + 10'/F **Area:** 1 + 1/4F Targets

Type: Continuous **Duration:** 1 + 1/F Minutes **Resistance:** N/A

Magical energy propels the targets. They gain a magical flying speed of 60' + 10'/F or a magical flying speed equal to their land movement speed - whichever is higher.

5 – Forceful Winds

Action Cost: Core Action

Target: LOS 80' + 20'/F

Area: Object $\leq$ 4000 lbs

Type: Focus

Duration: 10 + 5/F Minutes

Resistance: STR, Mundane

Caster gains the ability to move or manipulate targets with the force of air. Immediately upon casting this spell, and then as a core action during all later turns the caster can grip a target, STR check to negate. The caster can shift their grip to a different target on each of their turns, though they may only grip up to 1 + 1/2F targets at once. As a swift action, the caster can do the following to all gripped targets.

- ❖ Move them 60' in any direction, inflicting 4d10 blunt damage on collision though the effect immediately ends upon leaving the LOS.
- ❖ Carefully and forcefully manipulate inanimate objects. The caster can make ranged attack rolls with these objects, inflicting 3 + 1/2F d12 piercing, blunt, or edged damage (As appropriate) on hit.

While held by the caster's grip, the targets are pinned. Affected targets can re-attempt with a swift action.

6 – Lightning Cascade

Action Cost: Core Action

Target: LOS 60' + 30'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Lightning

Dangerous storms form overhead. The caster makes 3 + 1/2F separate rolls to hit, as a series of lightning bolts strike a target. Each bolt inflicts 2d20 lightning damage on hit.

7 – One with the Wind

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: Lightning

For the duration of the spell, the caster can choose to dematerialize and subsequently materialize up to their move speed somewhere else in their LOS, immediately upon casting this spell and then as a Swift Action during all later turns. Upon materializing, those within a 10' radius of the caster receive 2d10 lightning damage.

7 – Gathering Winds

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: AGI, STR

Caster shrouds themselves in air, increasing their movement speed by 50' + 10'/F. Immediately upon casting this spell, and then as a Swift Action during later rounds, sweeps up anyone they move adjacent to, causing them to lose their movement actions and reactions - as they are forced to follow the whirlwind 10' behind the caster, STR, or AGI check to negate (target's choice.) Affected targets can re-attempt with a swift action.

8 – Chain Lightning

Action Cost: Core Action

Target: LOS 80' + 20'/F

Area: Special

Type: Evocation

Duration: Instantaneous

Resistance: Lightning

Caster fires a massive arc of lightning from their fingertips towards a target. Chain lightning inflicts $7 + 1/2F$ d20 lightning damage, HEA save for half - jumping to a new target of the caster's choice within 20' of the original target should they fail the save. The chain repeats itself until the caster ends it, or the HEA save is successfully made; in all cases, the lightning cannot jump back to targets that have already been struck.

8 – Thunderlink

Action Cost: Core Action

Target: LOS 50' + 20'/F

Area: 20' + 5'/F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: Lightning, HEA, WIL

An electric trail forms, linking all targets in the area. When a linked target ends its turn in the area, it receives $1 + 1/2F$ d20 lightning damage, HEA save for half. When a linked target leaves the area by any means, they are *stunned*, HEA save to negate.

9 – Warp Lightning

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster binds magical air to themselves. While bound by this force, each time a target fails a save/check associated with an *aeromancy spell* or is successfully struck by an attack roll emanating from *aeromancy* the target is forcibly pushed to a new location within 40' of their original location (Chosen by the caster.)

10 – Gathering Storm

Action Cost: Swift Action

Target: LOS 60' + 20'/F

Area: 5 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

A symbol of the caster's choice appears over the targets. For every 10' the target moves, they receive 1d8 lightning damage, and the caster builds up a *Static Charge* for every 10' the target moves. When the caster has built 5 charges they may cast Lightning Bolt as a Swift Action or cast Chain Lightning as a Core Action upon building up 10 charges. These spells do not cost mana when cast this way.

Divine Magic

Divine magic is a work of labor. It is a task, a dedication to a belief, god, or scripture. A practitioner's belief will shape and color their outlook on the world. These convictions fall into the broad categories of Order, Chaos, and Balance. An individual may worship a particular god, some fundamental law of nature, or simply devote themselves to an ideology.

Domain of Order

The domain of order represents the fundamental wheel of existence. Life and death, light and darkness - it is from this duality from which the universe draws its substance. Dawn presides over light and life within the world. It provides hope, love, and support to a world often plagued by troubles. When a priest of the dawn sees a problem, they strive to fix it and better the world to their best wishes. The dominion of Dusk realizes that there cannot be a day without night. All sunshine makes a desert, while Life unchecked causes chaos and overpopulation.

Life calls for the preservation of the world around it, acting as the guiding hand that lifts those who cannot muster the strength to stand.

Light taps into the raw destructive capability of the same brightness that preserves us.

Death brings forth enough room for new life. Culling those who have reached their time, making sure that life in excess does not lead to chaos.

Darkness provides a bastion for the weak, the sheltering cold nurturing those who find their home here.

Order Spell List

Life	Light	Death	Darkness
0 - Helping Hand	0 - Guiding Light	0 - Rot	0 - Shadowsight
1 - Healing Touch	1 - Piercing Light	1 - Life Drain	1 - Shadow Slick
1 - Assert Order	1 - Blinding Furor	1 - Soul Pull	1 - Dark Echo
2 - Refresh	2 - Radiant Raiment	2 - Curse of Steel	2 - Stygian Blur
2 - Honor Guard	2 - Divine Dawn	2 - Deathplague	2 - Hopelessness
3 - Rejuvenating Ray	3 - Reverie	3 - Curse of Sleep	3 - Stifling Shadow
3 - Willing Sacrifice	3 - Rebuke	3 - Infuse Plague	3 - Darkport
4 - Major Preservation	4 - Light Spectre	4 - Soul Command	4 - Shadowflash
4 - Physician's Poppet	4 - Direct Light	4 - Curse of Knowledge	4 - Umbrapush
5 - Purge	5 - Blind	5 - Curseplague	5 - Shadow Poppet
6 - Righteousness	5 - Divine Strike	5 - Curse of Death	6 - Grappling Darkness
6 - Assert Life	6 - Radiance	6 - Mass Life Drain	6 - Umbral Momentum
7 - Lifeline	7 - Reflection	6 - Scourge	7 - Shadow
8 - Avatar	7 - Banish	7 - Curse of Lethargy	7 - Confusing Darkness
8 - Lifeplate	8 - Radiant Command	8 - Blightfall	8 - Shadow Servants
9 - Mass Heal	8 - Last Vigil	9 - Soul Drain	8 - Dark Bastion
9 - Bastion of Dawn	9 - Celestial Sphere	9 - Harvest Soul	9 - Eternal Darkness
10 - Hallowed Stance	10 - Stardust Pulse	10 - Dust to Dust	10 - Shadowform

Life

0 – Helping Hand

Action Cost: Core Action

Target: Touch

Area: Single Target

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster aids the target by granting them a placed roll on the next attack roll, resistance check/save, or skill check of choice. The caster may use this ability (Rank) times per day.

1 – Healing Touch

Action Cost: Core Action

Target: Touch

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster touches an object or living creature and activates one of the following effects:

- ❖ Object: A small object is restored to pristine condition, reversing any damage caused in the last hour. This cannot influence magic items, any sentient item has a WIL save to negate.
- ❖ Creature: The target recovers 2 + 1/F d10 HP.

1 – Assert Order

Action Cost: Swift Action

Target: LOS 10' + 5'/F

Area: 1 + 1/F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

A mark of the caster's choice appears above a willing target for the spell's duration. When a resistance check or save that inflicts damage targets them, they may add 3 + 1/2F up to 2 + 1/2F times to the die roll before the mark and spell expires. All uses count, even if they are not resisted.

2 – Refresh

Action Cost: Core Action

Target: Touch

Area: 1 + 1/2F Targets

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: N/A

Caster marks a willing target, empowering them with life energy. Target recovers 1d8 HP at the end of their turn; additionally, the caster may stall 1 + 1/2F negative conditions or abilities until the spell ends, they stop receiving any negative effects or making checks until Refresh ends and then they make the appropriate number of saves/checks and suffer the appropriate consequences for the number of rounds delayed.

2 – Honor Guard

Action Cost: Swift Action

Target: LOS 10' + 5'/F

Area: 6 + 1/F Targets

Type: Focus

Duration: 1 + /F Minutes

Resistance: N/A

A sigil is affixed to the target, creating a 12 + 5/F temporary HP barrier. The barrier provides the targets with 2 + 1/2F bonus DVs until broken.

3 – Rejuvenating Ray

Action Cost: Core Action

Target: LOS 30' + 10'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

A jet of energy spills from the caster's hands toward the target, causing them to recover $6 + 1/F$ d10 HP. Any excess HP over the target's maximum converts into a temporary HP barrier that persists for 1 minute.

3 – Willing Sacrifice

Action Cost: Reactionary

Target: LOS 40' + 20'/F

Area: Special

Type: Evocation

Duration: Instantaneous

Resistance: N/A

As a reaction to an attack roll or single-target spell, the caster may use this ability to redirect it to a willing target. The willing target becomes the new target for the ability.

4 – Major Preservation

Action Cost: Swift Action

Target: Touch

Area: Single target

Type: Continuous

Duration: 1 + 1/F Hours

Resistance: N/A

Caster touches an object (up to about the size of a house) - enhancing and preserving it. The object is restored to pristine condition, reversing any damage caused in the last hour.

- ❖ If the item is a weapon, it gains 1 placed roll on its damage dice. If it is armor, it gains $3 + 1/4F$ bonus DVs.
- ❖ An item with limited uses (that can regain them) regains a use; other effects are possible with GM discretion. This ability cannot influence magic items or cause them to regain a spell charge; sentient items may make a WIL save to negate.

4 – Physician's Poppet

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 2 + 1/F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

Willing targets have miniature replicas created of them; appearing within the caster's grip or on their person, of whatever materials are available and appropriate. The poppets may only be used by the caster and they must have the poppet on their person to use it. Once per turn the caster may use a poppet as a swift action or reaction, using a poppet confers one of the following effects to the character the poppet represents:

- ❖ Gain a placed roll on the next HEA or WIL save / check over the duration.
- ❖ 14 HP barrier that persists over the duration.
- ❖ Target suffers 10 piercing damage, poppet and the target switch places.

5 – Purge

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 15' + 5'/2F Radius

Type: Evocation

Duration: Instantaneous

Resistance: WIL

Caster can choose to remove $2 + 1/2F$ spell effects/specific effects they name, WIL save to negate. If a specifically named ability is not present; some other random ceases. Targets must always attempt to resist the spell effect. Permanent effects are only suppressed for up to one hour on a failed save.

6 – Righteousness

Action Cost: Core Action **Target:** LOS 80' + 80'/F **Area:** 1 + 1/2F Targets
Type: Evocation **Duration:** Instantaneous **Resistance:** WIL, HEA

A mark of the caster's choice appears above all targets. Targets become subject to any 2 + 1/2F of the following effects:

- ❖ Targets are stripped of Divine or Blight resistance or DR, HEA save to negate.
- ❖ *Ethereal* targets are made corporeal/physical, HEA save to negate.
- ❖ Sentient targets become *spell jammed*, WIL save to negate.
- ❖ Construct/Object targets are rendered inert/deactivated (as unconsciousness), WIL save to negate. Affected targets can re-attempt with a swift action.

6 – Assert Life

Action Cost: Core Action **Target:** LOS 60' + 10'/F **Area:** 2 + 1/2F Targets
Type: Evocation **Duration:** Instantaneous **Resistance:** Divine, AGI

A mark of the caster's choice appears above all targets for the spell's duration. Targets become subject to the following affects:

- ❖ All living targets regain 6 + 1/F d10 HP. Any excess HP is converted into a temporary HP barrier that lasts for 1 minute. The barrier absorbs the pool's worth of damage before breaking, all remaining damage continuing as normal.
- ❖ If undead, the targets receive 12 + 2/F d10 divine damage, AGI save for half.

7 – Lifeline

Action Cost: Reactionary **Target:** LOS 40' + 20'/F **Area:** Single Target
Type: Evocation **Duration:** Instantaneous **Resistance:** N/A

Upon seeing a target go under 0 HP, caster reaches out towards their life essence - suffusing it with energy. The target's HP is instead set to 0 and they immediately recover 4 + 1/F d10 HP.

8 – Avatar

Action Cost: Swift Action **Target:** Caster **Area:** Self
Type: Focus **Duration:** 1 + 1/F Minutes **Resistance:** N/A

Caster generates a magical divine apparition, becoming resistant to divine damage in the process. As long as the avatar is active, the caster can utilize their swift action to cast any spell from the Life group with an action cost of a core action. Causing a target to recover HP while Avatar is active also confers the benefits of Assert Order (Life -1) to them.

8 – Lifeplate

Action Cost: Swift Action **Target:** Touch **Area:** Single Target
Type: Focus **Duration:** 4 + 2/F Rounds **Resistance:** N/A

An *ethereal* coat of energy covers the target for the duration of the spell, or until the armor breaks. This armor grants a target 4 + 1/4F bonus DVs and 6 instances of elemental damage reduction. The armor blocks all damage until it has taken 40 + 8/F damage, at which point it breaks - no longer providing a benefit

(breaking naturally at the end of the duration.) Upon breaking, an explosion radiates around the caster - causing all, including the target to recover 20 HP in a 10' radius.

9 – Mass Heal

Action Cost: Core Action

Target: LOS 60' + 10'/F

Area: 4 + 1/F Targets

Type: Evocation

Duration: Instantaneous

Resistance: N/A

A mark of the caster's choice appears above 4 + 1/F willing targets - infusing them with life energy. All targets recover 7 + 1/2F d12 HP, any excess HP over the target's maximum converts into a temporary HP barrier that persists for 1 minute.

9 – Bastion of Dawn

Action Cost: Swift Action

Target: LOS 20' + 10'/F

Area: 6 + 1/F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

A sigil is affixed to the target, creating a 30 + 5/F temporary HP barrier. This spell provides 4 + 1/4F bonus DVs until broken. When a resistance check or save that targets them, they gain a placed roll as long as the barrier persists.

10 – Hallowed Stance

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

A translucent barrier engulfs the target; when struck by an attack roll they may spend a reaction contest their WIL with the attacker. On success, they negate the damage of that attack. When they negate damage, they can spend a swift action to cause a target within 50' to recover that amount of damage.

Light

0 – Guiding Light

Action Cost: Core Action

Target: LOS 40'

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Divine

Caster makes a ranged attack roll, firing an arc of light from their fingertips inflicting (Rank/2)d8 Divine damage to the target on hit. The light sticks to the target, negating stealth, invisibility, or any attempt to take cover until the end of the caster's next turn.

1 – Piercing Light

Action Cost: Core Action

Target: LOS 80' + 10'/F

Area: 1 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/2F Rounds

Resistance: HEA, Divine

A lance of light flies from the caster's fingertips, inflicting 2 + 1/F d8 divine damage, HEA save for half damage and to negate being blinded until the end of their next turn.

1 – Blinding Furor

Action Cost: Reactionary

Target: LOS 5' + 10'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Light

As a reaction to an enemy attempting to strike the caster in melee reach, the caster strikes back with a blinding flash of light, blinding the target until the start of their next turn, HEA save to negate; causing their **current** and all further attacks by the target to suffer the blindness penalty.

2 – Radiant Raiment

Action Cost: Swift Action

Target: Self

Area: 20' Radius

Type: Continuous

Duration: 30' + 10'/F Minutes

Resistance: WIL

Caster coats themselves in an aura of multicolored light, making them difficult to perceive. They are seen as a non-specific agent of their (the character's) faith, WIL save to negate. Those who witness the aura have a period up to 5 + 5/F minutes before and 5 + 5/F minutes after this viewing replaced with the hazy memory of a divinity affirming event (typically an appropriate miracle.) For two finesses the caster can instead choose to place a specific memory they create in anyone who views them.

2 – Divine Dawn

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 4 + 2/F Targets

Type: Evocation

Duration: Instantaneous

Resistance: WIL

Caster releases a burst of radiant energy that enhances allies and weakens enemies. Chosen willing targets gain a placed roll on their next attack roll and unwilling targets are *blinded* until the start of the caster's next turn, WIL save to negate.

3 – Reverie

Action Cost: Swift Action

Target: Self

Area: 100' + 20'/F Radius

Type: Continuous

Duration: Special

Resistance: INT

All *blinded* targets in the radius have their senses manipulated by the caster. The caster can force the target to see whatever the caster wishes until they are no longer blinded, INT save to negate.

3 – Rebuke

Action Cost: Reactionary

Target: LOS 40' + 20'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Divine

As a reaction to being struck by an attack, the caster strikes back with a brilliant flash of light. Caster rolls 4 + 1/F d12, reducing the damage by that amount. If the caster blocks all of the damage, the remaining rolled amount is dealt back to the attacker as divine damage.

4 – Lightspectre

Action Cost: Core Action

Target: Caster

Area: Self

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: HEA

4 + 1/2F light-infused duplicates are created adjacent to the caster. The duplicates have a movement speed of 30 + 10'/F' and can be directed as a Swift Action by the caster. When one of the duplicates makes forceful contact with a target or is struck by a target, the duplicates detonate themselves, inflicting 3 + 1/2F d12 divine damage to the target if they are adjacent to the duplicate, HEA save for half damage.

4 – Direct Light

Action Cost: Special

Target: Caster

Area: 40' Radius

Type: Evocation

Duration: Instantaneous

Resistance: Divine

Caster must announce this spell before any other actions taking place on this round, losing their swift action on their turn when casting. Caster can choose to direct all willing targets in the area to fire upon a single target. All ranged weapons and spells with attack rolls gain 1d12 bonus divine damage and a placed roll when targeting the individual determined by the caster, until the start of the caster's next turn.

5 – Blind

Action Cost: Core Action

Target: LOS 70' + 20'/F

Area: 20' + 10'/F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: AGI Divine

Brilliant light fills the area for the duration - *blinding* all, HEA check to negate. The light functions similarly to magical darkness, though the sensory overload renders all means of sight impossible. Targets continue to be blinded, even outside of the radius should they fail the HEA check. Affected targets can re-attempt with a swift action.

5 – Divine Strike

Action Cost: Core Action

Target: Reach/Range

Area: Single Creature

Type: Evocation

Duration: Instantaneous

Resistance: Divine

Caster fills their weapon with latent energy - making an attack roll against a target (with two placed rolls when against blinded targets.) On a successful strike, the caster inflicts 6 + 1/F d12 divine damage in addition to the weapon's base damage on hit.

6 – Radiance

Action Cost: Core Action

Target: Touch

Area: 4 + 1/2F Willing Targets

Type: Focus

Duration: 10 + 5/F Minutes

Resistance: PER

Caster coats themselves and up to 3 other targets with an aura of light, preventing them (and anything they wear, equip, or carry) from being seen. They are invisible to others - targets who can see invisible the characters make a PER save to negate *blindness* for 4 turns when observing them. The effect ends for any target that makes an attack roll, casts a spell, or is forced to make a check/save but continues for any others.

7 – Reflection

Action Cost: Swift Action

Target: LOS 100' + 20'/F

Area: 2 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL,

The caster creates inert copies of the targets in a space adjacent to the caster (the copies retain the attributes and HP of the target), WIL save to negate. Damage and abilities inflicted upon the copy are reflected onto the target if the copy fails. Should the target leave the LOS, this spell ends.

7 – Banish

Action Cost: Core Action

Target: Touch

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: WIL

The target is sent back to its native plane - receding to an equivalent location, WIL save to negate. Should the target fail, they may not return to the plane of banishment for 1 + 1/F hours. This spell cannot affect targets native to the plane they are on.

8 – Radiant Command

Action Cost: Swift Action

Target: Caster

Area: 100' Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster ignites the spirits of any *blinded* characters with divine force, allowing the caster to compel them for the duration. The caster can expend their reaction to grant a *blinded* target another Core Action; the caster may spend this action to perform anything the target could normally do with this action. The affected target will believe the action they take is of their own volition.

8 – Last Vigil

Action Cost: Reactionary

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

As a reaction to being made unconscious (this does not prevent dying only respond to it), and if cast this way the caster removes the triggering condition (ie. return to consciousness.) The caster surrenders their body to their soul, which manipulates the flesh like a puppet granting them a $PWR * 7$ temporary HP barrier, making them immune to death effects (save for being reduced to negative their maximum health in HP), treating them as a celestial, demonic, or magical creature (caster's choice).

9 – Celestial Sphere

Action Cost: Core Action

Target: LOS 20' + 5'/F

Area: 10' + 5'/2F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: AGI, Divine

Caster creates an unstable 10' radius ball of prismatic light that hovers above the ground and moves up to 30' per round, either in a straight line or where the caster designates (spending their swift action); in either movement style - it moves through anything it shares a space with and continues movement unless forcibly stopped by a reflective surface (bouncing back in a random direction 10' before resuming movement) or another Celestial Sphere (both spheres bouncing off each other in random directions 10' before resuming movement.) When the sphere moves through an ally it grants them the effects of Divine Dawn (Light - 2) and they are immune to blindness until the end of their next turn; when it moves through an enemy (AGI save to skirt the sphere) they are blinded and are targeted by Reflection (Light - 7.) At any time during movement the caster may stop the sphere as a reaction, when the sphere is stopped or destroyed (by this or any other effect) it goes critical and bursts as a 10' radius AoE inflicting 5d20 divine damage, AGI save for half damage.

10 – Stardust Pulse

Action Cost: Core Action

Target: LOS 100' + 20'/F

Area: 10' Wide 100' + 20'/F Line

Type: Evocation

Duration: Instantaneous

Resistance: AGI, Divine

The caster burns up part of their soul to release a roaring blast of energy, inflicting 3d20 divine damage, AGI save for half damage. As a **reaction** to seeing this ability; targets within 60' and chosen by the caster (including the caster) can repeat this spell without spending mana (their HP is immediately reduced to zero when doing so, but they are in a stable unconsciousness.)

Death

0 – Rot

Action Cost: Swift Action

Target: LOS 40'

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Blight

Caster makes a ranged attack roll, inflicting $1 + (\text{rank}/5)$ instances of *rot* (Instances of *rot* stacking up to 10 times), inflicting 1d4 blight damage to the target at the end of the caster's turn for each instance. Targets may spend a swift action to remove any current instances of *Rot* for 1 HP per instance.

1 – Life Drain

Action Cost: Core Action

Target: LOS 80' + 10'/F

Area: 1 + 1/2F Targets

Type: Evocation

Duration: Instantaneous

Resistance: Blight

Caster shears away a portion of another creature's soul, making a ranged attack roll and inflicting $2d8 + 1/F$ Blight damage on hit while recovering HP equal to the amount of HP lost by the target; caster may instead choose to heal another person within LOS.

1 – Soul Grip

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 5' + 5'/2F Radius

Type: Evocation

Duration: Instantaneous

Resistance: WIL, AGI

Caster reaches out with a spectral hand to grab a soul within range; moving them 30' + 10'/F in a direction the caster's choice, WIL save to negate. Targets without a soul must be crudely physically manipulated, requiring an AGI save instead and only moving up to only half the distance.

2 – Curse of Steel

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 1 + 1/F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

Caster magically marks a target with a curse that causes a rejection between the body and weapon; whenever the target makes a weapon attack, they take damage equal to half that weapon's die size (ex. 1d20 inflicts 10) as Blight damage, WIL save to negate. Affected targets can re-attempt with a swift action.

2 – Deathplague

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: Single Target, 10' Radius

Type: Evocation

Duration: Instantaneous

Resistance: HEA

Plague spores erupt from a target, inflicting $1 + 1/4F$ d10 Blight damage to them and all characters in a 10' radius around them. All targets in the 10' radius (including the original) receive instances of *Rot* equal to the number on the original target, HEA save to negate the spread of *rot*, if applicable.

3 – Curse of Sleep

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 3 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

Targets have their unconsciousness threshold altered, WIL save to negate. Instead of falling unconscious at 0, they will instead fall unconscious at 25% + 5%/F of their HP, though any further damage taken below this threshold while the target is awake will immediately awaken the target, unless they are below 0 HP.

3 – Infuse Plague

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 1 + 1/3F Targets

Type: Evocation

Duration: Instantaneous

Resistance: HEA, Blight

Rotted tumors form on the target, inflicting 4 + 2/F instances of *rot* (Instances of rot stacking up to 10 times), inflicting 1d4 blight damage to the target at the end of the caster's turn for each instance, HEA save to halve the number of instances of *Rot* incurred. Targets may spend a swift action to remove any current instances of Rot for 1 HP per instance.

4 – Soul Command

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 10' + 5'/F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL, AGI

Caster reaches out with a pair of spectral hands, grabbing onto targets within range. The caster attempts to separate their soul or animating force from their bodies by grasping them, WIL save to negate; soulless targets must be crudely physically manipulated, requiring an AGI save instead and only moving up to only half the distance. Once per target, per round, a grasped target can be moved 30' + 5'/F, as a swift action. Affected targets can re-attempt with a swift action.

4 – Curse of Knowledge

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 2 + 1/2F Targets

Type: Continuous

Duration: 2 + 1/F Hours

Resistance: WIL

Caster magically marks targets with a curse that warps and attacks the mind, WIL save to negate. Whenever the targets cast a spell they receive 2d10 Blight damage and lose several mana equal to the curse's rank.

5 – Curseplague

Action Cost: Swift Action

Target: LOS 60' + 20'/F

Area: 10' Radius

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Lashing out at the essence of the targets, the blight in their bodies combusts, inflicting them with the caster's choice of a *Curse Spell* they know, as long as the number instances of rot they have is equal to or less than the rank of the curse spell. All instances of Rot are consumed upon activation of this spell.

5 – Curse of Death

Action Cost: Swift Action

Target: LOS 20' + 10'/F

Area: 1 + 1/4F Targets

Type: Focus

Duration: 30 + 10/F Minutes

Resistance: WIL

Caster reaches out towards the essence of an *unconscious* or *dead* (that has died within the last week) target, animating their body, WIL save to negate (The body must attempt the save, regardless of being able to take actions.) The body continues to function until destroyed, and the caster can command the affected targets with a swift action to perform a core action and its movement action. If directed using the caster's core action, it gains access to its movement, core, reaction, and swift actions or the caster gives all presently affected targets a movement and core action. Caster may gather information from the target, though depending on the state of the body, their mind may have deteriorated too much to be useful. The caster may command the body to use any ability it had access to in life.

6 – Mass Life Drain

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 4 + 1/2F Targets

Type: Evocation

Duration: Instantaneous

Resistance: HEA, Blight

Each target takes 5 + 1/2F d8 blight damage, HEA save for half. A target of the caster's choice within range of recover an amount of HP equal to the damage dealt by this spell.

6 – Scourge

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: Self

Type: Focus

Duration: 10 + 5/F Minutes

Resistance: Blight

Immediately upon casting this spell, and then as a Swift Action during all later turns the caster can use one of the following abilities.

- ❖ Blight a 20' radius area, inflicting 2 + 1/4F instances of *Rot*, HEA save to halve the instances.
- ❖ Use blight to attack a target within the LOS by making a ranged attack roll - inflicting 3 + 1/2F d10 blight damage on hit, reducing their maximum HP for 4 hours by an equal amount. This maximum HP reduction follows standard stacking rules and thus only the greatest instance applies.
- ❖ Compel a single target afflicted with *Rot* to speak about a topic listed by the caster, at least a sentence long.

7 – Curse of Lethargy

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 2 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

Caster magically marks a target with a curse that causes a rejection between the body and soul, WIL save to negate. The target is no longer capable of making attack rolls and receives an instance of *Rot* for every 5' they move. Affected targets can re-attempt with a swift action.

8 – Blightfall

Action Cost: Core Action

Target: LOS 80' + 20'/F

Area: 20' + 5'/F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: Blight

Caster shifts the flow of life and magical energies into a miasma. For every 5' of movement within the area, targets gain an instance of Rot (1 + rank/5 d4 blight damage for each instance) and immediately receive the effects for their current instances of rot. If a target would be given more than 5 instances as a result of this spell, they instead gain the caster's choice of a *Curse* spell the caster knows.

9 – Soul Drain

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 3 + 1/4F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL

Caster violently manipulates the souls of their allies and enemies alike - dragging allies closer to life and enemies closer to death, WIL save to negate. Allies designated by the caster can fight beyond the threshold of life - should their HP fall below zero, they will remain conscious. However, this will not prevent the target from dying at their normal threshold or from bleeding out. Enemies designated by the caster have their soul bound. For every 5' the target physically moves they take 6 blight damage - restoring an equal amount to the caster. Affected targets can re-attempt with a swift action.

9 – Harvest Soul

Action Cost: Core Action

Target: LOS 50' + 10'/F

Area: 2 + 1/F Targets

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: Blight, WIL

Caster conjures a spectral force that sweeps across that battlefield, making a ranged attack roll and inflicting 7 + 1/F d12 Blight damage on hit - any targets who die from this damage relinquish their soul to the caster. Caster may then spend that soul to resurrect a dead target that died within the past 10 minutes with 12 HP or they may choose a dead target - reanimating them, as a swift action. The reanimated target acts as *Doppelganger (Rank 6 - Illusion)* For its duration except that it resembles the reanimated target instead of the caster.

10 – Dust to Dust

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 3 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster warps the flow of life energy around them until it is a howling black mist that wipes away every trace of anything it kills. Targets receive 2 instances of *Suffering (Blight)* for each instance of rot they have. They cannot remove the *Suffering* condition while affected by a curse spell.

Darkness

Certain spells create areas of darkness usable by other spells in the *Darkness* group. *Shadow Slick*, *Stifling Shadow*, and *Shadowflash* do not create darkness so deep that it *Blinds* a target, but it is enough to enable the usage of *Dark Port* or invisibility by *Stygian Blur*. *Confusing Darkness* and *Eternal Darkness* create areas of *True Blindness*.

0 – Shadowsight

Action Cost: Swift Action

Target: Self

Area: Single Target

Type: Focus

Duration: 1 Hour

Resistance: N/A

Supernatural darkness swims in the target's eyes, congealing in their gaze, allowing them to see Rank*10' in natural darkness and Rank*5' in magical darkness. While under this spell's effect, the target may utilize their swift action to meet another target's gaze, forcing a contested check of WIL, causing them to become Frightened as the darkness in the character's eyes reflects an alien fear. Affected targets can re-attempt the check utilizing their swift action, becoming immune to effects from this spell for an hour on success. The visual effect of this spell does not extend the vision and terminates at the end of the target's natural vision if it is shorter.

1 – Shadow Slick

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 10' + 5'/F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

Shadows swim at the caster's discretion, breaking and reforming in twisting dark shapes as they shift the terrain, causing sight and touch to become unreliable. Targets within the area are slowed and targets who end their turn within the area are pinned until the start of their next turn, STR or AGI check to negate (target's choice.)

1 – Dark Echo

Action Cost: Swift Action

Target: Self

Area: Caster

Type: Continuous

Duration: 1 + 10/F Minutes

Resistance: WIL

Caster inscribes a 10' x 10' symbol onto the ground beneath them. Over the duration of the ability, the caster can expend their swift action to return to the symbol or return whatever is on top of the symbol to them. If whatever is lying atop the symbol is unwilling, they have a WIL save to negate

2 – Stygian Blur

Action Cost: Swift Action

Target: Self

Area: Caster

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster wraps themselves in a twisting cloak of shadows which snatch and consumes ambient shadows as it moves to defend its wearer and reflect back only shaded horror. Awareness checks against the caster inflict 2d8 stress damage and cause the target to lose any memlocks on them or their possessions, WIL save to negate. Additionally, the caster gains 2 + 1/4F bonus DVs and becomes *invisible* in darkness (this invisibility ends when targets come in physical contact with another creature in any way, or when the targets make any kind of check or save, resuming at the start of the next round should they still remain in darkness.)

2 – Hopelessness

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 3 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

Grim thoughts bear into the minds of the targets, forcing them to feel as though they are fighting for naught - giving them 2 displaced rolls on setting resistance checks, WIL check to negate. If their odds of victory are low, the target may feel compelled to retreat. Affected targets can re-attempt with a swift action.

3 – Stifling Shadow

Action Cost: Core Action

Target: LOS 30 + 15/F'

Area: 10' + 5'/2F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

A devouring shadow forms and breaks like a rushing wave, flooding the area with twisting shadows, flowing into victims and suppressing their magical energy, causing them to become spell jammed while in the area, with a WIL save to instead have the 1 + 1/F maintained continuous or focus spells paused while they are in the area. All targets within the area treat all other targets within the area as having cover unless they can visually pierce magical darkness.

3 – Darkport

Action Cost: Core Action

Target: LOS 100' + 20'/F

Area: 2 + 1/2F Targets

Type: Evocation

Duration: Instantaneous

Resistance: N/A

All willing targets disappear in a flash of darkness, before reappearing at another target location - though the target location must be shrouded in darkness.

4 – Shadowflash

Action Cost: Swift Action

Target: Self

Area: 20' + 10'/F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

A pall of darkness radiates from the caster, obscuring the area around them, making speech unintelligible to other characters, and transforming others in the area - making it difficult to tell who is who. Immediately upon casting this spell, and then as a Swift Action during all later turns the caster can switch places with another target within the area. Should the target be unwilling, they have a WIL save to negate

4 – Umbrapush

Action Cost: Core Action

Target: Self

Area: 30' Cone

Type: Evocation

Duration: Instantaneous

Resistance: STR

A horrifying sheet of shadows spread outwards from the caster, inflicting 1 + 2/F d20 stress damage, pushing targets 15' backwards and inflicting *frightened*, WIL check for half damage and to negate the push/*frighten*. Affected targets can re-attempt with a swift action to remove *frighten*.

5 – Shadow Poppet

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 3 + 1/2F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL

Targets have miniature shadow replicas created of them within the caster's grip or on their person, WIL check to negate. The poppets may only be used by the caster and they must have the poppet on their person to use it. Once per round caster may use a poppet as a swift action or reaction, using a poppet causes one of the following effects:

- ❖ Shadows pull the target 30' in any direction.
- ❖ Target becomes *Frightened* of the caster until the end of their next turn.
- ❖ *Blind* the target until the end of their next turn.

Affected targets can re-attempt with a swift action.

6 – Grappling Darkness

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 4 + 1/2F Targets

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: STR, AGI

Tendrils of darkness fly from the caster's fingertips, attempting to grapple the targets. The caster makes a ranged attack roll against each target, pinning them on hit. As a swift action the caster can pull grappled targets up to 30' closer to themselves while the spell is active. On subsequent rounds affected targets can attempt a STR or AGI check using their swift action to break free.

6 – Umbral Momentum

Action Cost: Swift Action

Target: Touch

Area: 3 + 1/2F Targets

Type: Focus

Duration: 1 + 10/F Minutes

Resistance: WIL

Caster envelops the targets with the deepest shadow, causing them to absorb light and move at inhuman speeds. Targets take half damage from damaging spells that would force a target to make an AGI check/save, or originate from the Light Spell group (Making the check in either case negates the damage and effect). The movespeed of targets is also increased by 25' + 5'/F.

7 – Shade

Action Cost: Swift Action

Target: Touch

Area: Single Target

Type: Continuous

Duration: 10 + 5/F Minutes

Resistance: N/A

Target is transformed into an *ethereal*, invisible creature that can pass through all obstacles. While they can see the material world, they cannot affect it nor be affected by it using any physical or magical means. The target can enable and disable this effect using a swift action.

7 – Confusing Darkness

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 30' + 10'/F Radius

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

Caster creates a veil of heavy, magical darkness over the area. Manipulative apparitions lap away at the minds of the targets, *confusing* them should they end their turn in the area, WIL save to negate. This lasts until the end of the character's next turn or until they leave the area.

8 – Shadow Servants

Action Cost: Swift Action

Target: LOS 60' + 20'/F

Area: 8 + 1/F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL

Malediction surrounds the caster, which is then directed at all selected targets, allowing the caster to either:

- ❖ Alter their motivation so long as it does not directly hurt themselves or people they care deeply for.
- ❖ *Confuse* them.
- ❖ *Frighten* them.

WIL check to negate. Affected targets can re-attempt with a swift action.

8 – Dark Bastion

Action Cost: Core Action

Target: Caster

Area: Self

Type: Continuous

Duration: 8 + 2/F hours

Resistance: N/A

Caster manifests darkness into a small pocket dimension, creating a 2" diameter ball of black, rubbery material. At any point during the duration of this spell, whoever holds the ball may open up a single 4' radius portal as Swift Action; the portal may also be closed as a Swift Action. Only one portal may be open at a time; opening a new portal closes the old one. Within the portal is a dark, empty, dome shaped room with a radius of 25'. At the end of the duration, the room starts slowly collapsing and all objects within the room are gently expelled.

9 – Eternal Darkness

Action Cost: Core Action

Target: LOS 70' + 20'/F

Area: 40' + 20'/F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL, Stress

Magical darkness spreads outwards from the chosen point, inflicting 4 + 1/2F d12 stress damage, WIL save for half. If the areas of *Shadow Slick*, *Confusing Darkness*, *Shadowflash*, or *Stifling Darkness* overlap with this spell's area, they extend to cover this spell's area as well.

10 – Shadowform

Action Cost: Swift Action

Target: Self

Area: Caster

Type: Focus

Duration: 1 + 10/F Minutes

Resistance: N/A

Caster turns themselves into a dark-ghost like shadow, giving themselves resistance to all damage except divine and pure magic. They are immaterial; they pass through all non magical, nonmetal objects, though they are still capable of casting spells. While in darkness, the caster can choose to dematerialize and subsequently materialize within 120' of their LOS if that location is also in darkness, immediately upon casting this spell, and then as a Swift Action during all later turns.

Domain of Chaos

Chaos is the beginning and end of all things. Without chaos, there is stagnation, an endless order that brings about an infinity of boredom and nothingness. It is new experiences that give life and meaning to a fragile existence.

Nature and Cataclysm

Nature is concerned with the freedom and self-expression of the individual. The idea of a defined purpose is foreign to those who worship the wilderness. The alien concepts of order and structure are useless to the free-spirited priests of nature. The haphazard and random growth of the world is necessary to stop a stifling pattern that leads to unhappiness. Cataclysm concerns itself with strength and justice. Tempests tend to find that those who are powerful are naturally suited to their position, and the only justice in the world is the justice that an individual can make. Our will and beliefs are something we must force onto reality. Turmoil finds that reality could always use a little bit more... chance.

Flora represents bounty and growth. Allowing the world to spring back from disaster and providing hope to those that have lost everything.

Fauna taps into the aggressivity of nature, reminding those who abuse the world that it has fangs.

Tempest is a raw force of destruction, ripping apart the world to make room for growth.

Turmoil taps into the raw chaotic energies of the universe acting as the hammer for those that cannot swing one. It stands for justice above all else.

Chaotic Damage: Chaotic damage represents a random damage type - not determined until it is rolled. Chaotic damage corresponds to a d12 roll that follows the following format to determine it's damage Type: 1: Fire, 2: Lightning, 3: Ice, 4: Force, 5: Piercing, 6: Edged, 7: Blunt, 8: Toxic, 9: Divine, 10: Blight, 11: Stress, 12: Pure Magic

Chaos Spell List

Flora	Fauna	Tempest	Turmoil
0 - Rampant Verdance	0 - Adaptation	0 - Lightning Whip	0 - Primordial Sphere
1 - Seed Scatter	0 - Maul	1 - Zap	1 - Ignition
1 - Wild Growth	1 - Wolf / Bear	1 - Eye of the Storm	1 - Chaos Bolt
2 - Lazarus Complex	1 - Butterfly / Raven	2 - Cyclone	2 - Random Spell
2 - Verdure Movement	2 - Wolf / Bear	2 - Pulse	2 - Chaos Inversion
3 - Piercing Vine	2 - Butterfly / Raven	3 - Lightning Reflexes	3 - Chaos Shield
3 - Blessing of Creation	3 - Transformation	3 - Uplift	3 - Unstable Presence
4 - Destructive Verdance	3 - Polymorph	4 - Gaseous Form	4 - Vernal Defense
5 - Entangle	4 - Wolf / Bear	5 - Current	5 - Super Chaos
5 - Underbrush	4 - Butterfly / Raven	5 - Stormcaller	5 - Outer Chaos
6 - Regrowth	5 - Wolf / Bear	6 - Dispersal	6 - Erratic Odds
7 - Bladeleaf Aura	5 - Butterfly / Raven	6 - Static Charge	6 - Chaos Curse
7 - Healing Font		7 - Unhittable	7 - Disordered Alignment
8 - Overgrowth		8 - Amorphous Weapon	7 - Chaos Control
8 - Parasitic Growth		8 - Vortex	8 - Reality Tear
9 - Plantkin		9 - Tempest	8 - Chaos Incarnate
9 - Ebb and Flow		9 - Storm	9 - Meteoric Acceleration
10 - Creeping Consumption		10 - Lightning Spear	10 - Pandemonium

Flora

0 – Rampant Verdance

Action Cost: Swift Action

Target: LOS 40'

Area: Special

Type: Evocation

Duration: Plant Lifespan

Resistance: N/A

Caster concentrates on a (Rank * 5) radius. Plant life begins to erupt in the area, if it is physically impossible the plant life instead immediately dies upon eruption this restriction holds true for all spells in this group that rely upon plantlife.

1 – Seed Scatter

Action Cost: Core Action

Target: Caster

Area: 15' + 5'/F Line

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: AGI

Caster directs a stream of leaves outwards, originating from their hands and striking anything in the stream's path, AGI save to negate. Any targets hit by the stream are pushed ten feet back and knocked *prone*.

1 – Wild Growth

Action Cost: Core Action

Target: LOS 20' + 10'/F

Area: 10' + 5'/2F Radius

Type: Evocation

Duration: Plant Lifespan

Resistance: AGI

Plant life begins to erupt at the target area. All characters are slowed and receive a displaced roll on AGI check and saves while moving through the area.

2 – Lazarite Growth

Action Cost: Swift Action

Target: LOS 100' + 50'/F

Area: 10' + 5'/F Radius

Type: Evocation

Duration: Plant Lifespan

Resistance: N/A

Caster infuses energy into an area- reviving plants and healing targets. All targets recover 3 + 2/F d4 HP - in addition to automatically bringing any non-sentient dead plant matter back to life . When revived or reinfused with life, plants are adapted to the surroundings in such a way that they are capable of surviving, however extreme. Sentient plants recover 4 + 2/F d10 HP (Including those under the effect of Plantkin) from this spell.

2 – Verdure Movement

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Continuous

Duration: 1 + 1/F Hours

Resistance: N/A

Caster may use plantlife to maneuver, allowing themselves to use plantlife to lift to lift or catch them, should they be falling. They are not slowed by plants, and walls of plants will move out of the way of the caster. Movement speed in areas with dense plantlife is increased by 30' + 10'/2F. While in the presence of dense plantlife, caster has 1 + 1/4F placed rolls on any AGI checks. Plants are no longer hostile to the caster, causing them to ignore spells such as *Destructive Verdance* or *Entangle*.

3 – Piercing Vine

Action Cost: Core Action

Target: LOS 20' + 10'/F

Area: 1 + 1/2F Targets

Type: Evocation

Duration: Instantaneous

Resistance: Piercing, AGI

A barbed, piercing vine erupts from the caster's fingertips. The vine impales and wraps around the target inflicting 5 + 1/2F d10 piercing damage and pinning them in place, AGI check for half damage and to negate being *Pinned*. Affected targets can re-attempt with a swift action.

3 – Blessing of Creation

Action Cost: Swift Action

Target: Touch

Area: 3 + 1/2F Targets

Type: Continuous

Duration: 3 + 1/2F Rounds

Resistance: N/A

Caster touches a number of targets, granting them a shield that blocks 16 + 4/2F damage, but allows all remaining damage to continue onto the target. As long as this shield remains active targets gain a placed roll on WIL, AGI, and HEA resistance checks/saves.

4 – Destructive Verdance

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 20' + 5'/2F Radius

Type: Continuous

Duration: 4 + 2/2F Rounds

Resistance: N/A

Plants in the area become animated, attacking all targets, inflicting 4 + 1/2F d10 piercing damage each turn they begin in the area, AGI save for half.

5 – Entangle

Action Cost: Core Action

Target: LOS 20' + 10'/F

Area: 20' + 5'/2F Radius

Type: Continuous

Duration: 4 + 2/2F Rounds

Resistance: AGI

Caster uses plants in the area in an attempt to pin all who begin their turn in the radius, AGI check to negate. Affected targets can re-attempt with a swift action.

5 – Underbrush

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 20' + 5'/2F Radius

Type: Continuous

Duration: 4 + 2/2F Rounds

Resistance: WIL

Caster suffocates the magical energies in the area, draining 1d8 mana from any target that ends their turn in the area, and *spelljamming* them for the whole duration, WIL check to negate. Affected targets can re-attempt with a swift action to stop being *spell jammed*.

6 – Regrowth

Action Cost: Core Action

Target: LOS 10' + 10'/F

Area: Single Target

Type: Continuous

Duration: 4 + 1/2F Rounds

Resistance: N/A

Natural energy flows into a willing target, causing them to recover 4 + 1/2F d10 HP at the start of each of their turns. The target glows with an aura of caster's choice.

7 – Bladeleaf Aura

Action Cost: Reactionary

Target: LOS 40' + 20'/F

Area: Single Target

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: N/A

5 + 1/F plants spring up defensively around a target, moving with them. Should they be hit by an attack with an attack roll, one of these plants interposes and sacrifices themselves. If it is a single target offensive spell, 2 of the plants can sacrifice themselves for the target. The plants wither when hit no matter how much damage is done to them. Only one instance of this spell can be active on a target at any given time.

7 – Plant Control

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 50' + 20'/F Radius

Type: Focus

Duration: 10 + 10/F Minutes

Resistance: N/A

The caster channels an immense amount of life energy, allowing them to shape and create large amounts of plant life for the duration. Immediately upon casting this spell, and then as a Swift Action during all later turns the caster can use one of the following abilities.

- ❖ The caster may grow or reshape trees into walls or shelter, cover the area in plant life adapted to the environment, and turn barren wasteland into verdant jungle.
- ❖ Make a ranged attack roll, wrapping a target in strangling vines on hit, pinning them until the end of their next turn.
- ❖ Shield a target until the end of their next turn, giving them a 20 HP temporary barrier. Plants created or reshaped persist past the end of the spell's duration.

8 – Overgrowth

Action Cost: Swift Action

Target: Touch

Area: Single Target

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: N/A

An array of plantlife covers the target for the duration of the spell, or until the armor breaks. This armor blocks all damage until it has taken 60 + 8/F damage, at which point it breaks (breaking naturally at the end of the duration.) As long as any of the barrier remains, the barrier recovers 20 + 5/F HP at the end of the user's turn up to a maximum of 80HP.

8 – Parasitic Growth

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: HEA, Piercing

Dangerous seedlings grow over the surface of the target, these seedlings decrease armor DVs by 6 (Any damage inflicted by the seedlings must be repaired before the armor can provide the same level of benefit) and inflict 3 + 1/4F d12 piercing damage each at the end of the caster's turn, HEA save to negate the armor damage.

9 – Plantkin

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster's body becomes plantlike. Immediately upon casting this spell, and then as a Core Action during all later turns the caster can force a target to be affected by the next turn of any present continuous spells.

9 – Ebb and Flow

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 10' + 5'/F Radius

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Wisps of energy fly from the caster towards the indicated location. All targets chosen by the caster in the radius may immediately succeed at any resistance check/save they re-attempt during their turn. In addition, the targets recover 6 + 1/F d10 HP.

10 – Creeping Consumption

Action Cost: Core Action

Target: LOS 30' + 15'/F

Area: 5' + 5'/2F Radius

Type: Focus

Duration: 3 + 1/F Rounds

Resistance: STR

Vines shoot down the throats of targets in the area, stunning them, HEA check to negate. Affected targets automatically re-attempt at the end of their turn.

Fauna

Base Cost: 3

0 – Maul

Action Cost: Core Action

Target: Melee Reach

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Blunt

Caster spends their core action to make a melee attack roll. On hit, the caster inflicts an extra (Spell Rank) d10 as blunt damage in addition to their weapon's base damage.

0 – Adaptation

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster morphs their body, taking on new traits. Specifically, the caster can allow themselves to take on any number of Fauna Adaptations - though these do not reduce the damage they take from effects, unless specifically stated. Caster can use this as a part of any other transformation listed in the Fauna group without focus or action cost. These adaptations require HEA to utilize.

1 – Wolf / Bear

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster transforms into a Wolf or a Bear.

1 – Butterfly / Raven

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster transforms into a Great Butterfly or Great Raven.

2 – Wolf / Bear

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster transforms into a Great Wolf or Great Bear.

2 – Butterfly / Raven

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster transforms into a Mawfly or Eruraven.

3 – Transformation

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster gains the ability to transform into a unique creature. They choose three “traits” that any other creature they have access to has and must similarly select a base creature from which they draw their attacks, movespeeds, and general size. They are not granted access to any HP, attribute or armor changes. They may also not choose the trait “Deadly.”

3 – Polymorph

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Focus

Duration: 1 + 1/F Hours

Resistance: WIL

Caster transforms the target into any animal with a tier equal to the caster's current tier minus 2, WIL save to negate. The target adopts all of the animal's attributes, but retains their ability to speak their current language if the animal normally has an INT above 0. This transformation has special rules; when the target is polymorphed their HP and mana is set to that of the animal, they may only use abilities the animal has access to, and upon depleting the HP of the transformed animal the target returns back to their exact state before being polymorphed, save location.

4 – Wolf / Bear

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster transforms into a Leechwolf or Earthenbear.

4 – Butterfly / Raven

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster transforms into a Solar Starfly or Roc.

5 – Wolf / Bear

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster transforms into a Duskhunter or Elemental Bear.

5 – Butterfly / Raven

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Caster transforms into an Astral Wanderer or Strygarii.

Fauna Transformations

Wolf, Category: Fauna Transformation - Medium Size

Attribute Changes: AGI: + 1, CHR: + 1

Armor Changes:	None	Traits:
HP Changes:	None	Agile: Wolves have two placed rolls on all agility checks, due to their agile nature.
Attacks:	d12 Bite (Versatile, Melee)	
Movement:	50' Land 25' Swim	Predatory Smell: Wolves have significantly better senses in comparison to most creatures. As long as the caster remains transformed, they can track any scent if they could notice even the slightest trace of it, gaining two placed rolls on smell related implicit awareness checks.
Description:	Native to the wilderness, wolves are distinguished from their smaller brethren due to their large sizes and less pointy features. Wolves are social animals that cooperate with one another to engage in hunting. Expressive and intelligent, wolves have had strong ties to the sentient peoples of Cayhali.	

Bear, Category: Fauna Transformation - Medium Size

Attribute Changes: STR + 1, HEA: + 1

Armor Changes:	8 DVs	Traits:
HP Changes:	+ 10	Vicious Roar: Upon transformation, caster lets loose a vicious roar - inspiring nearby targets. Targets chosen by the caster within 40' of their original location gain 1 bonus DV as long as the bear is within 100' and visible.
Attacks:	2d8 Claws (Heavy, Melee)	
Movement:	30' Land 30' Swim	Resistance: Bears gain <i>edged</i> resistance.
Description:	Inhabiting areas all over the world, bears are a widespread creature that tend to have large bodies with stocky legs, long snouts, small rounded ears, shaggy hair, a short tail and a pair of claws. Bears tend to be solitary animals though their tough fur affords them a strong excellent protection.	

Great Butterfly, Category: Fauna Transformation - Small Size

Attribute Changes: None

Armor Changes:	None	Traits:
HP Changes:	None	Casting: Butterflies may forgo the verbal and somatic components of spells while in this transformation.
Attacks:	None	
Movement:	20' Flying	Potency: If a spell is finessed in a direction twice, it is automatically finessed in that direction an additional time, for free. This allows the spell to go above the finesse cap once.
Description:	Soaring over the fields of Ley'ork, these large insects are known to be especially troublesome due to their ability to channel magic. Notable for being passive and lackadaisical, these butterflies are solitary creatures, distinguished by their relatively large sizes in comparison to their pollinating cousins.	

Fauna Transformations

Great Raven, Category: Fauna Transformation - Small Size

Attribute Changes: PER: + 1

Armor Changes:	None	Traits:
HP Changes:	None	Dash: Ravens may convert their swift action into a movement action and vice versa.
Attacks:	d6 Bite (Precision, Melee)	
Movement:	40' Flying	
Description:	Often taken as ill omens - thought to be either the ghosts of the dead or the souls of the damned. Ravens are mistrusted and thought as conduits for supernatural powers beyond understanding. The small birds tend to carry this reputation unknowingly as these opportunistic carnivores prey upon small mammals.	

Dire Wolf, Category: Fauna Transformation - Medium Size

Attribute Changes: AGI: +1

Armor Changes:	None	Traits:
HP Changes:	None	Agile: Wolves have <i>two</i> placed rolls on all agility checks, due to their agile nature.
Attacks:	d12 Claws, d12 Bite (Versatile, Melee)	Shriek: Upon transformation, the direwolf releases a debilitating shriek to all within 40' of its location. All targets within the area must make an AGI check or have their focus and stealth disrupted. The direwolf may re-use this ability every fifteen minutes.
Movement:	50' Land 50' Swim	Retains Predatory Smell , and can wield weapons with it's mouth, though it wields all weapons as though they were two handed and still requires the appropriate strength.
Description:	Larger and more ferocious than their cousins, these wolves are nearly the size of a horse. The races of Cahyali are lucky that these creatures are not nearly as sociable as the smaller variety. Partaking in big game hunting, these creatures are defined by their primal features.	

Dire Bear, Category: Fauna Transformation - Large Size

Attribute Changes: STR: + 1, INT: -2, HEA +2

Armor Changes:	10 DVs	Traits:
HP Changes:	+ 25 HP	Dire Roar: Upon transformation, caster lets loose a vicious roar - inspiring nearby targets. Targets chosen by the caster within 40' of their original location gain 2 bonus DVs as long as the bear is within 100' and visible.
Attacks:	d20 Claws (Heavy, Melee)	
Movement:	30' Land 30' Swim	
Description:	These creatures are said to roam the distant parts of the world - where strange, often murderous fauna are said to reside. Significantly larger than their more common cousins, these territorial creatures nevertheless keep to themselves but are always ready to defend what they lay claim to.	

Fauna Transformations

Mawfly, Category: Fauna Transformation - Medium Size

Attribute Changes: HEA: -2, PWR: +2

Armor Changes:	None	Traits:
HP Changes:	None	Casting: Butterflies may forgo the verbal and somatic components of spells while in this transformation.
Attacks:	None	
Movement:	20' Flying	Soul Affinity: Lacking regular senses (Mawflies are <i>Blinded</i> unless they are targeting souls, which they see normally), mawflies typically feast on lingering <i>ethereal</i> denizens. Mawflies are only capable of seeing souls - though all spells emanating from a Mawfly inflict <i>Pure Magic</i> damage and can affect targets on the <i>ethereal</i> plane.
Description:	Thought to be the emissaries of the primal aspect of death - these parasitic creatures feed upon wandering souls. They tend to descend upon places of great misery.	

Euraven, Category: Fauna Transformation - Small Size

Attribute Changes: PER: +1, INT +1

Armor Changes:	None	Traits:
HP Changes:	None	Astute: Euravens have two additional, stacking placed rolls on knowledge checks.
Attacks:	d6 Bite	
Movement:	50' Flying (Precision, Melee)	Dash: Ravens may convert their swift action into a movement action and vice versa. Time Dilation: Reaching out towards a willing target, the Raven sends them up to 2 rounds into the future, removing them reality for that time period, causing them to reappear in the same place. This ability can only be used once per transformation.
Description:	Three eyed creatures, these friendly ravens are astutely perceptive, carrying deep insights about the world wherever they go. Often more long-lived than even the oldest races, time is an shaky concept to these creatures.	

Leechwolf, Category: Fauna Transformation - Medium Size

Attribute Changes: AGI: +1

Armor Changes:	4 DVs	Traits:
HP Changes:	-20	Agile: Wolves have <i>two</i> placed rolls on all agility checks, due to their agile nature.
Attacks:	d12 Claws, d12 Bite (Versatile, Melee)	Sickly: Leechwolves have a displaced roll on all HEA checks.
Movement:	40' Land 40' Swim, 5' Burrowing	Leeching Strikes: The leechwolf recovers a quarter of the damage mundane damage dealt up to their maximum HP. Deadly: Leechwolves have their critical hit range extended to <i>18</i> , and inflict double damage on any successful critical roll. Retains Predatory Smell , and can wield weapons with it's mouth, though it wields all weapons as though they were two handed and still requires the appropriate strength.
Description:	These gruesome hunters feed upon the life essence of those they attack. Leechwolves make travel in Pthora dangerous without an escort. Dangerous creatures, they're known to strike out at distant, undefended settlements.	

Fauna Transformations

Earthernbear, Category: Fauna Transformation - Large Size

Attribute Changes: STR: + 1, INT: -2, HEA +2

Armor Changes:	12 DVs	Traits:
HP Changes:	+ 30	Resistance: Earthenbears are resistant to mundane damage types.
Attacks:	d20 Claws (Heavy Melee)	Earthencore: Earthen Bears have <i>Tremorsense</i> (Terramancy - 3.) Permanently active.
Movement:	30' Land 30' Swim	
Description:	The elemental plane of earth is said to be inhabited by large colossi made of dirt, gravel and stone. These creatures resemble bears, eat rocks and sleep for long periods of time before awakening to repeat their cycle.	

Solar Starfly, Category: Fauna Transformation - Medium Size

Attribute Changes: PWR +1

Armor Changes:	None	Traits:
HP Changes:	- 10	Casting: Butterflies may forgo the verbal and somatic components of spells while in this transformation.
Attacks:	None	
Movement:	30' Flying	Divine Flare: All damage inflicted by Solar Starflies is divine damage. Solar starflies are <i>resistant</i> to divine damage. Divine Warmth: Upon transformation, the Solar Starfly releases an aura of divine energy. Those chosen by the Solar Starfly within a 30' radius of itself have a placed roll against all attempts to inhibit or dispel their magic for an hour.
Description:	Beautiful creatures that often hang over the skies of Nahrul. They're never seen to eat plants or animals - leading many to suspect they make usage of magic. Drawn to children, it is considered a blessing to interact with Solar Starflies.	

Roc, Category: Fauna Transformation - Huge Size

Attribute Changes: PER: + 1

Armor Changes:	None	Traits:
HP Changes:	None	Breath Weapon: The Roc innately has a Breath Weapon, requiring no adaptive score spent on the relevant attributes.
Attacks:	d12 Bite	Dash: Ravens may convert their swift action into a movement action and vice versa.
Movement:	40' Flying	Presence: The raven specifies a target within LOS 200' and a spell/skill/perk group as a swift action. That target's mind is hijacked, WIL save to negate. They cannot utilize anything from a specified spell group or skill ex: Aquamancy, Versatile Weapons, Handguns, Life, Defensive Perks. This effect may only apply to one target at a time and lasts until the form is broken or a new target is specified.
Description:	A colossal bird whose existence can be scraped together by strange tales and rumours. An eagle said to be as large as a dragon, a raven who has been touched by lightning, or even a sparrow that had eaten too much. The Roc seems to evade the world's scientific knowledge.	

Fauna Transformations

Duskhunter, Category: Fauna Transformation - Large Size

Attribute Changes: AGI: +2

Armor Changes:	None	Traits:
HP Changes:	None	Agile: Wolves have <i>two</i> placed rolls on all agility checks, due to their agile nature.
Attacks:	d12 Claws (Versatile, Melee)	Lurking Presence: Duskhunters have <i>invisibility</i> as per the spell Perfect Distortion (Illusions - 6.)
Movement:	40' Land 40' Swim,	Howl: The duskhunter releases a vicious roar directed at a target within 20' utilizing their Swift Action. The target must make a HEA check, or become susceptible to a mundane damage type wolf's choosing (Until the start of their next turn.)
Description:	Preying upon isolated areas in the forests of Shinneok - Duskhunters stray away from towns and villages, though they're said to strike back if their hunting territories are encroached upon. These creatures hunt mammoths, dragons, and elephants when coming together as a pack.	

Elemental Bear, Category: Fauna Transformation - Large Size

Attribute Changes: STR: +1, INT: -1, HEA +2

Armor Changes:	11 DVs	Traits: Immunity: Upon transformation, the caster must select an elemental damage type (Fire, Lightning, Force, or Ice.) They are immune to this element. Elemental Form: Targets that use a melee attack roll against the bear take 1d10 of the relevant elemental damage type for each attack made (Cumulative for each attack made), with a HEA save to negate the damage. In addition, the bear can enter a hostile target's area and occupy the same area as them. The first time the caster enters a target's space on a turn, the target takes 1d10 of the relevant elemental damage and gives the target an instance of the relevant elemental <i>suffering</i> .
HP Changes:	+ 20 HP	
Attacks:	d20 Claws (Melee Heavy)	
Movement:	30' Land 30' Swim	
Description:	Creatures borne on the elemental planes, these lumbering giants most closely resemble bears. Equal parts dangerous and elegant, they are often used as a symbol of strength and primal fury.	

Fauna Transformations

Astral Wanderer, Category: Fauna Transformation - Large Size

Attribute Changes: PWR: + 1

Armor Changes:	None	Traits:
HP Changes:	- 10	Casting: Butterflies may forgo the verbal and somatic components of spells while in this transformation.
Attacks:	None	Unbinding: Astral Wanderers can cast <i>Unbound</i> (Astral Power - 1) without mana or action cost, though this can only be done once each turn when done in this way.
Movement:	30' Flying	Fate: Astral Wanders manipulate the fabric of time around them. Astral wanderers can increase or decrease any rolls made within melee reach of them by 1 at no action cost.
Description:	Huge insectoid creatures that leave a beautiful trail of star streaking light wherever they go, these Astral Wanders resemble oversized butterflies. Rarely seen on Cahyali, seeing an Astral Wanderer is a once in a lifetime experience. They are said to bring visions of the future.	

Strygarii, Category: Fauna Transformation - Large Size

Attribute Changes: PER: + 2, AGI: +1

Armor Changes:	None	Traits:
HP Changes:	None	Dash: Ravens may convert their swift action into a movement action and vice versa.
Attacks:	d6 Claws (Melee Precision)	Unfathomable: Strygarii can release a shriek as a swift action. All targets within 40' of the shriek must make a WIL check or have their focus disrupted.
Movement:	30' Land 50' Flying 30' Swim	Withering: Every attack that inflicts damage from the Strygarii also inflicts an instance of <i>suffering</i> (blight.)
		Uncomfortable: All within 100' of the Strygarii feel the Strygarii's thoughts creep into them, though the Strygarii can choose which thoughts they allow to spill into those around them.
		Spirited Away: While a target is grappled, the Strygarii can utilize their swift action to create a portal. A mass of dark writhing tentacles appear, grappling the target and dragging it into an otherworldly abyss, inflicting 5d10 blight damage at the start of their turn as their soul is shredded by nightmares made physical. The affected target must break free using standard grapple rules to escape, the nightmare utilizing the character's strength to maintain the grapple. Anything that dies in this way disappears forever, a sacrifice to some greater power.
Description:	These horrific creatures of the night are the monsters from which ravens acquire their poor reputations. Their presence turns all around them to terror. Leaving a black trail of darkness wherever they go - the presence of Strygarii often signals the omen of one's doom.	

Fauna Adaptations

Beasts of nature can perform feats that seem fantastical to the more civilized species. By adapting one's own body to harness the powers of the great beasts of nature, one may become even more powerful. A character may only acquire a cumulative adaptive score equivalent to their HEA stat.

- ❖ The adaptive scores of adaptations are found next to their names in the format of "Water Breathing - (Adaptive Score)". This list is simply a reference; it is not meant to be a comprehensive list of all the adaptations one could possibly make.

Movement

Adhesive - 2: Character gains a climbing speed equal to their land movement speed.

Burrowing - 4: Character gains a burrowing speed equal to an eighth of their land movement speed.

Extra set of Legs - 2: Character gains 10' of bonus land movement.

Glider - 3: Characters may glide instead of free falling, slowing their descent such that they take no damage and allowing them to fall 10' but glide 30' forward as a movement action. While gliding, a character's movement DVs are halved.

Slithering - 5: Character does not require the use of their limbs to move. The character can also spend a reaction (characters with slither retain their reaction while **grappled**) to slither out of a *grapple* or *pin*, with three placed rolls to break.

Webbing - 2: Character gains a swim speed equal to their land movement speed.

Wings - 5: Character gains a flight speed equal to half their land movement speed.

Defense

Hibernating - 2: Character may go into a comatose state for 16 hours recovering all HP and mana and cleansing themselves of any non magical ailments or broken bones during the process.

Land on Feet - 2: Decreases fall damage by (rank)d6.

Regeneration - 3: Character regenerates (rank) HP at the start of each turn - if they are missing any. They may do so a number of times up to their HEA per rest period.

Scales - 2: Hardened scales provide 2/2 shield DVs.

Attack

Breath Weapon - 5: Character may shoot a chosen elemental damage type in a 5' X (rank*10)' cone, inflicting (rank)d12 damage with an AGI save for half.

Claws - 1: Character may grow their choice of d6 precision or d12 versatile claws. The claws inflict piercing damage and may be used with knives or brawling skill respectively.

Horns - 1: Character grows 2d8 or 1d20 (9 STR) heavy horns that may be used with axe skill. The horns inflict edged damage.

Tail - 1: Character grows may grow their choice of a d12 versatile or d20 heavy tail. The tail inflicts blunt damage and may be used with polearm skill. The character requires 9 STR to use the heavy tail in combat.

Venomous Coat - 3: Grappling a target, or being **grappled** causes the target to gain an instance of *suffering* (Toxic) at the start of each of the character's turns in which the grapple is maintained

Extraneous

Environmental adaptation - 1: Character can persist in a chosen reasonably extreme environment such as extreme heat, cold, pressure, etc.

Extra Set of Arms - 5: Character grows two new arms somewhere on their body.

Goliath - 4: Character becomes one size category larger, stacking with any other bonuses.

Miniature - 2: Character becomes one size category smaller.

Night Vision - 2: Character sees (rank*10)' in natural darkness.

Non-Breathing - 4: Character no longer needs to breathe.

Sensitive Nose/Ears/Echolocation - 2: Character can track things by their scent/sounds acting as effective as normal vision in a radius of (rank)*5'.

Stretch - 4: Character's limbs have an increased reach of 10'

Water Breathing - 1: Character breathes underwater as if it were normal air.

Custom Adaptations

Characters can adapt for custom adaptations of their own creation. In those cases it will be up to the GM to determine how effective the adaptation can be and what its adaptation score should be. It can be helpful for the GM to call for the player to do a Metamagic check and use that as a reference for whether or not a custom adaptation will be successful.

Tempest

0 – Lightning Whip

Action Cost: Swift Action

Target: LOS (Rank*10)'

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster produces a whip of pure lightning energy, pulling a target toward themselves by making a melee attack roll with (Rank*10)' reach.

1 – Zap

Action Cost: Swift Action

Target: LOS 10' + 10'/F

Area: Self

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster teleports LOS 10' + 5'/F inflicting 1 + 1/2F d10 lightning damage to all targets within 5' of the caster upon arrival.

1 – Eye of the Storm

Action Cost: Reactionary

Target: LOS 30' + 10'/F

Area: 1 + 1/4F Targets

Type: Evocation

Duration: 1 Round

Resistance: STR, AGI

In response to another character's movement action, the caster can imprison them behind raging winds causing them to lose their movement action this turn, their choice of an STR or AGI save to negate.

2 – Cyclone

Action Cost: Core Action

Target: LOS 80' + 20'/F

Area: 10' + 5'/2F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: AGI, Blunt

Caster weaves a cyclone of water and air that moves across the battlefield. The cyclone has a movement speed of 20'. The caster may command the cyclone to move as a swift action. The cyclone will continue moving in a direction until it receives commands to stop. Anyone caught in the cyclone receives 2 + 1/2F d6 blunt damage and is swept into the cyclone - losing their movement action while inside, AGI check to negate both effects. Affected targets can re-attempt with a swift action, immediately regaining their movement action upon breaking free.

2 – Pulse

Action Cost: Swift Action

Target: Touch

Area: Weapon

Type: Continuous

Duration: 2 + 1/2F Rounds

Resistance: N/A

Caster electrifies a weapon increasing the reach or range of the weapon by 10', while also causing the first struck enemy to be knocked *prone*.

3 – Lightning Reflexes

Action Cost: Reactionary

Target: Self

Area: Caster

Type: Evocation

Duration: Instantaneous

Resistance: N/A

As a reaction to a target coming within melee reach of the caster, The caster may use up to $4 + 1/F$ of their own MP to make an attack against them.

3 – Uplift

Action Cost: Core Action

Target: LOS $50' + 10'/F$

Area: $20' + 10'/F$ Radius

Type: Continuous

Duration: $4 + 2/F$ Rounds

Resistance: N/A

A whirlwind of air violently pushes targets inside the area $10'$ upward. So long as targets remain within the area, they have two displaced rolls on all AGI checks/saves and are *slowed*.

4 – Gaseous Form

Action Cost: Swift Action

Target: Self

Area: Caster

Type: Focus

Duration: $1 + 1/F$ Minutes

Resistance: N/A

Caster's body and everything they are wearing/holding evaporates into a mist. The mist has $20' + 10'/F$ flight speed and can only be affected by area of effect abilities. The mist cannot make attacks or form the verbal/somatic components of spells.

5 – Current

Action Cost: Core Action

Target: LOS $80' + 20'/F$

Area: $80' \times 10'$ Line

Type: Continuous

Duration: $1 + 1/F$ Minutes

Resistance: STR

Caster manifests a stream of water in the air. The stream can be oriented any which way within the area so long as it is a straight line. The water in the current halves movement DVs, rid's affected targets of their movement action, and carries those within it $40' + 10'/F$, STR check to negate the loss of their movement action and the halving of their movement DV's. The caster can change the direction of the current as a swift action. The current itself does not move, only those within it. Individuals in the current may re-attempt the check as a swift action.

5 – Stormcaller

Action Cost: Swift Action

Target: LOS $80' + 20'/F$

Area: $4 + 1/F$ Targets

Type: Continuous

Duration: $1 + 1/F$ Minutes

Resistance: WIL

Caster reaches out to $4 + 1/F$ targets, taunting them with a display of power, forcing them to use their movement action to move towards the caster in a non-suicidal manner on each of their turns, WIL save to negate. If they are right next to the caster, they must stay as close as they can. Affected targets can re-attempt with a core action.

6 – Dispersal

Action Cost: Core Action

Target: Caster

Area: 40' + 10'/F Radius

Type: Evocation

Duration: Instantaneous

Resistance: AGI, STR, Blunt

Caster slams the ground - a wave of wind emanating outwards from the point of impact, blowing all targets 60' backwards, knocking them prone, and inflicting 6 + 1/F d12 blunt damage to them with a AGI or STR save (Target's choice) for half damage and to negate being knocked back and *prone*. 3d6 additional blunt damage may be taken if targets are knocked into a solid structure.

6 – Static Charge

Action Cost: Swift Action

Target: Caster

Area: Single Target

Type: Continuous

Duration: 2 + 1/4F Rounds

Resistance: Lighting

Caster supercharges their melee attacks this turn and the next. All the damage dealt to one target can jump LOS 40' to another target, HEA save to halve this damage and stop the static from jumping onto another target, repeating the effect. The chain repeats itself until the caster ends it, or the HEA save is successfully made; in all cases the lightning cannot jump back to targets that have already been struck.

7 – Unhittable

Action Cost: Reactionary

Target: Caster

Area: Self

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: N/A

Caster surrounds themselves with tempestuous energy and turns away attacks with impeccable accuracy. After an attack roll is made against them, the caster rolls a d6. Should the roll be 4 or above, the attack misses, even if it were to otherwise hit.

8 – Amorphous Weapon

Action Cost: Swift Action

Target: Touch

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

Drawing raw destructive force out of their chest, the caster forces it to coalesce around their hands, extending outwards in the shape of a weapon. Caster can instead choose to manifest this weapon and bind it to another target; allowing them to use the weapon. Changing the form of the weapon has no action cost. It can become any basic weapon; additionally, the wielder of the weapon gains 3 bonus martial points and 3 stacking ranks in every weapon specialization and combat style.

8 – Vortex

Action Cost: Core Action

Target: LOS 100' + 25'/F

Area: 10' + 5/F' Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: STR, AGI, Blunt

Caster crafts a 70' tall vortex with a move speed of 60', though it disperses if it leaves the LOS. If the caster does not direct the vortex it remains stationary. If the vortex hits a target they must make an AGI or STR save (their choice). If failed, they are flung to the top and carried with the vortex, falling at the start of their turn. Falling will typically cause targets to take 7d6 blunt damage. If cast centered on themselves, the caster may ride the vortex to the top, staying there. The caster can control the vortex's movement utilizing their Swift Action.

9 – Cloudburst

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: AGI

All of the caster's strikes burst on impact sending out a wave of nimbus clouds. The clouds cover a 10' radius around those attacked and persist for the duration of the spell. Any target in a cloud, save for the caster, is considered susceptible to lightning. Additionally, any attacks directed against a target in a cloud have 1 + 2/F placed rolls. The target of the character's attacks take full damage, while all other targets within 10' of the bursts also take an equal amount of lightning damage; this may include the user. All targets struck by the AOE get a single AGI save to halve the damage.

9 – Storm

Action Cost: Swift Action

Target: LOS 40' + 20/F'

Area: 40' + 20/F' Radius

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: HEA, Lightning

A storm forms overhead. Torrential rain pours onto everyone in the area, limiting LOS to 20'. Immediately, and then all rounds afterwards using their swift action, the caster can direct a torrent of elemental energy from the storm at any target within its radius, making a ranged attack roll and inflicting 4 + 1/2F d12 lightning damage on hit.

10 – Tempest

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: AGI

Caster becomes a furious conduit of tempestuous power, gaining the ability to cast any Rank 0 spell as a swift action or reaction. They also gain the ability to dodge and nullify a singular attack roll made against the caster as a reaction. After dodging an attack roll, the caster can immediately choose to make a strike using up to 4 martial points against the original attacker, should they be within reach/range.

Turmoil

0 – Primordial Sphere

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster surrounds themselves in a sphere of raw chaotic energy, granting themselves their choice of mundane resistance or elemental resistance until the start of their next turn. However, whichever resistance they don't choose, they become susceptible to.

1 – Ignition

Action Cost: Reactionary

Target: LOS 40' + 20'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

As a reaction to a skill check, save/check, or attack roll, roll 1d4. Caster may choose to add this to the rolled value.

1 – Chaos Bolt

Action Cost: Core Action

Target: LOS 80' + 30'/F

Area: 1 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/F Days

Resistance: N/A

Caster makes a ranged attack roll, launching a bolt of pure chaotic energy at 1 + 1/2F targets, inflicting a random chaos effect on hit.

2 – Random Spell

Action Cost: Core Action

Target: Variable

Area: Variable

Type: Variable

Duration: Variable

Resistance: Variable

Caster channels the pure chaotic energies of the universe. Caster must roll a d2 to determine whether it will be elemental: 1, or divine: 2. Caster then rolls a d10 to determine which spell group they will cast from where spell groups are numbered in the same order as the book. Then roll a d6 + 1/F to determine the rank of the spell. At this point the caster may select which spell they wish to cast so long as it is in the proper group at the correct rank.

2 – Chaos Inversion

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Focus

Duration: 1 + 1/F Hours

Resistance: N/A

Reaching out towards the essence of the target, caster exchanges what languages and origin skills are known between themselves and the target, caster loses access to any languages and origin skills they currently have and gain whatever languages and origins skills the target has for the duration of the spell. This can instead be used on a written or electronic document to scramble it beyond any recognition, by forcing the document to randomly alternate between the grammatical and written intricacies of the languages they comprise. This can be used on non-sentient targets.

3 – Chaos Shield

Action Cost: Reactionary

Target: LOS 40' + 20'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: HEA

In reaction to being struck by an attack roll, the caster strikes back with a brilliant flash of energy. The target takes 3 + 1/F d12 chaotic damage and is targeted by a chaos effect (lasting 1 + 1/F days), HEA save for half damage and to negate the chaos effect.

3 – Unstable Presence

Action Cost: Swift Action

Target: Caster

Area: Self

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

The caster disrupts their connection to reality with chaotic energy, causing themselves to phase in and out unpredictably. At the end of each turn, the caster rolls a d6. On a result of 4-6, the caster phases out of reality completely until the start of their next turn. During this time, they are treated as though they do not exist. They may observe the world but not interact with it. On a result of 1-3, the caster suffers a random chaos effect.

4 – Vernal Defense

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 1 + 1/F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster infuses the targets with energy. Willing targets lose their movement action, cannot be moved by magical or mundane means, lose their ability to perform AGI checks, and their movement DVs, but they gain 22 + 1/2F armor DVs. This spell cannot be dropped until it's duration expires.

5 – Super Chaos

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Days

Resistance: N/A

A glob of ectoplasmic chaos flies towards the target as the caster makes a ranged attack roll, inflicting 8 + 1/F d10 chaotic damage and causing a chaos effect. The caster chooses 2 + 1/F effects within 2 + 1/F of the rolled effect, the caster knows what this effect is. They may not choose the same effect twice and must choose at least one effect.

5 – Outer Chaos

Action Cost: Core Action

Target: Caster

Area: 100' + 50'/F Radius

Type: Continuous

Duration: 10 + 30/F Minutes

Resistance: AGI, STR

The caster draws upon the realm of chaos to aid in shaping the battlefield, gaining a selection of random components to reshape surrounding terrain. To determine your selection of components, roll (4 + 1/F)d6 and gain components from the following table in accordance with each die's value:

- ❖ 1: A 5'x1' steel battlement. A character standing behind this item gets exceptionally protective cover but may make ranged or melee attacks through it.
- ❖ 2: Two 5'x5', 10' deep pitfall traps. The trap is covered in earth, though a successful awareness check will detect it. When a character steps on it, they must make an AGI save or fall in. A character unaware of the trap gets a displaced roll on this save. These may not be placed on occupied spaces.
- ❖ 3: A 10' radius of difficult terrain that inflicts *slowed* on all characters moving in it
- ❖ 4: A 10'x30' gust of wind in the caster's chosen direction. A character entering or starting their turn inside of this item must make a STR save or be pushed 10' in the wind's direction.
- ❖ 5: A 5' radius of fog that grants cover to all characters in it
- ❖ 6: Three 5'x5', 10' tall blocks of iron wall. These may not be placed on occupied spaces.

The caster may distribute their components within the spell's area as they see fit.

Components vanish in a flash of chaotic energy at the end of the spell's duration

6 – Erratic Odds

Action Cost: Swift Action

Target: LOS 60' + 20'/F

Area: 2 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: WIL

Instead of rolling 2d10 on attack rolls, resistance, skill, and attribute checks, the character rolls 1d6, WIL save to negate. On a 4-6, the attack roll/save/skill check is considered a success (If it is reasonable), on a 1-3 it is considered a failure. In the case of resistance check setting, 4-6 sets the resistance check to 25; 1-3 sets the resistance check to 2. Affected targets can re-attempt with a swift action. This spell cannot be dropped until it's duration expires.

6 – Chaos Curse

Action Cost: Swift Action

Target: LOS 60' + 20'/F

Area: 1 + 1/2F Targets

Type: Continuous

Duration: 2 + 1/F Rounds

Resistance: WIL

Chaotic energy surrounds the targets, undermining their senses, WIL save to negate. Whenever the target attempts to make an attack roll or cast a spell, roll a d6. On a result of 4-6, the caster may choose a new target for that attack or spell by expending a reaction. The spell is still treated as though the target cast it. Affected targets can re-attempt with a swift action.

7 – Disordered Alignment

Action Cost: Swift Action

Target: 80' + 20'/F LOS

Area: 3 + 1/4F Targets

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: WIL

Chaotic energies violently attempt to fuse the targets, sending them both to an isolated but safe 80' radius area in the plane of chaos, causing them to share 1 + 1/F year's worth of random memory, and to become immediately hostile to one another for the duration, WIL save to negate all effects. The caster must always be one of the targets, and all targets are returned to the location they were in previously, or the nearest safe location.

7 – Chaos Control

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 4 + 2/F Targets

Type: Continuous

Duration: 4 + 2/F Rounds

Resistance: HEA

Twisting chaos into a powerful force, caster grants the effects of *Primordial Sphere (Turmoil - 0)* to 4 + 2/F targets; while also removing any active chaos effects, HEA save to negate both effects. Caster determines what resistance is given upon casting. Affected targets can re-attempt with a swift action.

8 – Reality Tear

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 20' + 10'/F Radius

Type: Focus

Duration: 4 + 2/F Rounds

Resistance: AGI

Caster rips the fabric of reality open, unleashing primal chaos upon the targets. A random effect is inflicted on all targets that end their turn in the rift by rolling on the chaos chart (This effect lasts for 1 + 1/F Days) in addition to inflicting 4 + 1/2F d12 chaotic damage to them, AGI save for half damage and to negate the chaos effect.

8 – Chaos Incarnate

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: None

Chaotic forces coalesce to protect the target. At the casting of the spell, roll 1d4. Apply an effect to the target according to the result from this table; lasts until the start of the target's next turn:

- ❖ 1: Until the start of their next turn, the target is immune to mundane damage
- ❖ 2: Until the start of their next turn, the target is immune to elemental damage
- ❖ 3: At the start of each of their turns; target gains a 40 HP barrier
- ❖ 4: Attack rolls against the target suffer two displaced rolls and they receive two placed rolls to all saves and resistance checks.

9 – Meteoric Acceleration

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 4 + 1/F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: N/A

Willing targets sacrifice their body and mind in exchange for power. They become vulnerable to all effects and have 2 displaced rolls on all resistance checks. At the end of the initiative, targets receive another Core, Movement and Swift Action that they may use as they wish. This spell cannot be dropped before it's duration expires.

10 – Pandemonium

Action Cost: Core Action

Target: LOS 60' + 20'/F

Area: 20' + 10'/F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: AGI, HEA

The caster summons an apocalyptic storm. At the end of each of the caster's turns, they roll 1d6. All targets in the storm suffer an effect from the following table corresponding to the die's value.

- ❖ 1: Every target within the storm is *pinned* by a wave of force, until the end of their next turn
- ❖ 2: All targets in the storm receive an instance of *Chaos Warp*. Upon becoming *Warped* they must cast chaos once every 24 hours or receive the consequences.
- ❖ 3: Lightning bolts strike up to three different targets of the caster's choice in the storm, inflicting 5d20 damage and inflicting *slow* until the end of their next turn, AGI save for half damage.
- ❖ 4: All targets in the storm are *stunned* until the end of their next turn, AGI save to negate.
- ❖ 5: All targets in the storm have their HP set to half of it's normal maximum, HEA save to negate.
- ❖ 6: All targets in the storm at or below half their maximum HP immediately fall unconscious and are put into a forced rest period, as per *Stable Unconsciousness*.

Domain of Balance

The domain of balance understands the importance of all the forces in the makeup of the universe, seeking to make sure that one does not snuff out the other, acting as a necessary equilibrium in situations where one could threaten to overrule the other. Arbiters of the natural order, they act as a bulwark against rapid change or stifling stagnation. Forcing the hand of destiny in one way or another, priests of balance strive for harmony above all else.

Equilibrium represents the forcible and willing redistribution of the energies of the universe, making use of the essence of magic to tear apart foes and grant boons to allies alike.

Effigy represents a manifestation of the powers that make up the universe, allowing for the recreation of creatures and characters that exist within the world.

Balance Spell List

Equilibrium	Effigy
0 - Twilight Flurry	0 - Forge Effigy
1 - Share Vision	0 - Direction
1 - Life Transfer	1 - Vigilance
2 - Shared Burden	1 - Transposition
2 - Energy Transfer	2 - Sensation
3 - Forcerush	2 - Artifact
3 - Incantation	3 - Aspect
4 - Twinned Souls	3 - Copycast
4 - Copycast	4 - Replicate
5 - Prismatic Volley	4 - Overload
5 - Displacement Orb	5 - Empowered Effigy
6 - Meld	5 - Unconscious Coordination
6 - Balance	
7 - Energy Conversion	
8 - Energy Reset	
9 - Link Vitality	
9 - Halfflight Lance	
10 - Celestial Alignment	

Equilibrium

0 – Twilight Flurry

Action Cost: Core Action

Target: LOS 40'

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: Pure Magic

Caster makes a series of ranged attack rolls, firing (rank/2) arcs of multi-coloured rays from their fingertips inflicting 1d10 pure magic damage to the target on hit.

1 – Share Vision

Action Cost: Swift Action

Target: LOS 60' + 20'/F

Area: 2 + 1/2F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL

Caster shares or forces their sight onto the targets, WIL save to negate. Affected targets lose their sight, and are only capable of seeing through the eyes of the caster. Affected targets can re-attempt with a swift action.

1 – Life Transfer

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 3 + 1/F Targets

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster's essence reaches out towards up to 3 + 1/F willing targets, re-distributing their life energies as they see fit. Caster may freely rearrange the HP pools of the targets, though a single target's maximum HP cannot exceed their normal maximum. The caster must use the HP pools of the target and cannot transfer temporary barriers.

2 – Shared Burden

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: WIL

Caster attempts to transfer any active conditions or abilities they or a willing target have onto another target, WIL save to negate if the target is unwilling.

2 – Energy Transfer

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 3 + 1/F Targets

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Caster's essence reaches out towards up to 3 + 1/F willing targets, re-distributing their magical energies as they see fit. Caster may freely rearrange the mana pools of the targets, though a single target's maximum mana cannot exceed their normal maximum.

3 – Forcerush

Action Cost: Reactionary

Target: Caster

Area: 10' + 5'/F Radius

Type: Evocation

Duration: 1 Round

Resistance: N/A

As reaction to a target making an attack roll in the area, the caster may contest an attack roll in the target area $4 + 1/2F$ times. Should the caster roll higher, the attack is negated. This spell lasts until the start of the caster's next turn.

3 – Incantation

Action Cost: Core Action

Target: Caster

Area: 10' + 5'/2F Radius

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: Variable

A thin barrier of energy surrounds the area around the caster. All incoming and outgoing ranged projectiles are converted into either force, fire, lightning or ice damage - determined at the casting of this spell. The damage type can be altered as a core action.

4 – Pandemonium

Action Cost: Swift Action

Target: Touch

Area: Single Target

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

This ability allows the willing target to utilize any spells or skill that the caster has access to - though they must be cast with the target's own mana. This spell affects both the caster and the target with the link, as the caster also has access to any spells that the target has. This consumes the target's focus as well.

4 – Energy Conversion

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster enhances a willing target with a layer of magical energy. The target has a placed roll on resistances checks/saves stemming from their choice of divine, fire, force, ice, pure magic, or lightning damage types, $1/2F$ to select additional damage types. Should the associated check/save be made - the rolled damage is stored as a barrier for the target and they suffer no damage from the ability.

5 – Prismatic Volley

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 10' + 5'/2F Radius

Type: Evocation

Duration: Instantaneous

Resistance: Pure Magic

Caster launches a flurry of prismatic bolts at the target area, making $3 + 1/2F$ ranged attack rolls. Targets take 3d8 pure magic damage on hit or receive temporary hit points equal to the bolt's damage for $4 + 2/F$ rounds, as decided by the caster.

5 – Displacement Orb

Action Cost: Core Action

Target: LOS 60' + 25'/F

Area: 20' + 5'/F Radius

Type: Evocation

Duration: Instantaneous

Resistance: WIL

A glob of energy fires from the caster's fingertips, sapping the energy of everything around. Those impacted by the orb lose 2 + 1/4F d10 mana and have their focus disrupted, WIL save to negate. These mana can be recovered normally via a rest period.

6 – Meld

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: Single Target

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL

A field of static surrounds the target, attempting to drain any active focus spells from them, WIL save to negate. All active focus spells on the target are dispelled, and melded into a single effect that is transferred to the caster. The caster maintains the focus for this single ability on themselves.

6 – Balance

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 1 + 1/2F Targets

Type: Continuous

Duration: 1 + 1/F Minutes

Resistance: HEA

A shockwave of pure energy descends upon the targets, they are stripped of lightning, fire, force, and ice resistance, or elemental resistance should they have any, HEA save to negate.

7 – Link Vitality

Action Cost: Swift Action

Target: LOS 40' + 20'/F

Area: 4 + 1/2F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: WIL

Targets combine their HP pools into one, WIL check to negate. Should any linked targets take damage or receive healing, it is subtracted from or added to the shared HP pool. All fall unconscious and die at the same thresholds. At the conclusion of this spell they have their remaining HP distributed evenly. Affected targets can re-attempt with a swift action.

8 – Energy Reset

Action Cost: Core Action

Target: LOS 50' + 20'/F

Area: 15' + 5'/F Radius

Type: Evocation

Duration: Instantaneous

Resistance: WIL

An overwhelming rush of energy floods into the area, causing the duration of all active continuous and focus spells expires, WIL save to negate. The caster regains 1 mana for each individual spell that expires through the usage of Energy Reset, so long as the expired spells had a mana cost.

9 – Copycast

Action Cost: Reactionary

Target: LOS 60' + 20'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

This spell is used as a reaction to an attempt to cast another spell. The caster copies the exact effects of the spell onto another target or point.

9 – Halflight Lance

Action Cost: Core Action

Target: LOS 100' + 20'/F

Area: 15' Wide 100' Line

Type: Evocation

Duration: Instantaneous

Resistance: HEA, Pure Magic

A beam of twilight flies forward, granting targets designated by the caster a 6 + 1/2F d12 barrier (that expires after 1 + 1/F minutes) and inflicting an equal amount of damage as pure magic damage to targets not designated by the caster, HEA save for half.

10 – Celestial Alignment

Action Cost: Swift Action

Target: Touch

Area: 5 + 1/2F Targets

Type: Focus

Duration: 1 + 1/F Minutes

Resistance: N/A

Caster touches a number of willing targets within one size category of themselves, and all of their bodies merge into one. This merger physically alters their body so that you appear as a mixed version of the participants. Affected targets decide what equipment is absorbed into the fused being and what equipment remains available for use. These fused items are restored once the spell ends. For the duration, the caster's body and that of all of the target's are effectively one and the same, and together they share one turn, though all except the caster lose their movement action. All fusees can communicate telepathically. All are aware of each other's surface thoughts, knowledge, or memories of each other, but can purposefully conceal anything not at the forefront of their consciousnesses.

For the duration, targets:

- ❖ Have the combined maximum hit points/mana and remaining hit point/MUs of each fusee.
- ❖ Can make any attribute check, attack roll, or skill check using the highest available modifier.
- ❖ Can use all abilities and spells of the fusees, except for those they purposefully conceal from others.
- ❖ Individuals maintain their personal action sets and cannot make use of another's archetype
- ❖ At any time, fusees can use their reaction or swift action to end this spell early. When the spell ends:
- ❖ The targets reappear in an unoccupied space of the caster's choice within 5 feet of the fusion, and their bodies return to normal. If there is insufficient space, the targets are magically forced through whatever physical matter is blocking its reappearance in the shortest possible path to an open space, before reappearing in that space
- ❖ All equipment on each fusee that was absorbed in the transformation is returned to its original positions on its original owners.
- ❖ Remaining HP/mana are evenly split between all fusees up to their normal maximum.
- ❖ Any conditions, diseases, or similar effects that were afflicting the targets before the fusion are returned to them as appropriate. Any such effects gained during the fusion are retained only by the caster.

Celestial Alignment consumes the focus of all involved, though they can continue casting focus spells if they are able to maintain more than one. Using this spell on an effigy does not count towards utilized focus.

Effigy

Base Cost: 3

An effigy is a minion that a character can create via mechanical, magical, or other means. This construct is at their bidding and can be directed via Direction-0. Should anything happen to destroy the effigy; they can be reforged once every three days using Forge-0. The power level of the effigy reflects both the power of the character and how many ranks they have bought into this group. Effigies can draw from any existing spellgroup/subclass, buying up ranks in those groups as they level up and gaining the appropriate Mana, movepeed, and HP.

Effigy Rules

- ❖ The character and the effigy **do not** get any benefits from effects that would grant them extra actions while the effigy is present(within 500' of the caster), if those effects do not come from this group
- ❖ The effigy cannot go unconscious; it is destroyed should it fall below 0 HP.
- ❖ The effigy shares a mental connection with the one that forged it; they always know it's condition and can give specific commands using their swift or core action.
- ❖ Items can be given to and be used by the effigy.
- ❖ The effigy's form can be that of any creature or figure between 2' and 10' long that the character is familiar with. The effigy's form must be reflective of its abilities (mainly attack and movement methods). Additionally, the creator of the effigy can have the effigy take on the categories of either undead, construct (mechanical), or construct (magical) if it is at least level 3.
- ❖ The character may choose for the effigy to not have a susceptibility if they also forfeit the resistance. This also applies to immunity and vulnerability.
- ❖ The character may always choose for the effigy to attack with a lower die size.
- ❖ Should the caster be unable to take any actions, the effigy can act independently of the caster.
- ❖ Effigies that are casters may wear light armor given to them, fighters can wear medium armor given to them

Multiple Effigies Rules

The character can have a number of effigies active equal to the rank they have in this group. The total levels of the effigies must be equal to or less than the highest rank bought into this group. Ex: If Mary has bought the rank 5 effigy spell, she would typically have 1 level 5 effigy, however she could instead have 5 level 1 effigies, or 2 level 2 effigies and 1 level 1 effigy, etc.

How to Build an Effigy

All effigies start with the same basic shell. They have attributes, a movement speed, HP, Mana, DVs and an Ability.

Effigy Shell	
Attributes	Effigies have a starting standard array of (6, 5, 5, 5, 4, 4, 3, 2)
Movespeed	25' Land or 5' Flight Move
HP	Effigies have half the HP of the caster.
Armor	Their armor is equivalent to their level. EX: 1/1 for a level 1, 2/2 for a level 2
Ability	Choose to have a caster or a fighter. If you choose a caster, also select a spell group. If the character chooses a fighter their effigy will gain martial perks instead of spells.

Leveling

The effigy's level is equal to the highest rank a character has in the effigy spell list. If you have multiple effigies refer to [Multiple Effigies Rules](#). Damage types and resistances may only be mundane (piercing / edged / blunt) or elemental, likewise for vulnerabilities and susceptibilities.

Level	Movement Bonus	Armor DVs	Melee Attack Die Size	Ranged Attack Die Size	Bonuses Minor/Major	Attribute Increases	Resistance	Immunity
1	+5'	1/1	d6 (Type)	N/A	1/0	1	No	No
2	+10'	2/2	d10 (Type)	N/A	1/0	2	Yes	No
3	+15'	3/3	d12 (Type)	d6 (Type)	2/0	3	Yes	No
4	+20'	4/4	2d8 (Type)	d10 (Type)	3/0	4	Yes	Yes
5	+25'	5/5	2d10 (Type)	d12 (Type)	3/1	5	Yes	Yes

Attributes: One attribute increase per level.

Movespeed: 5' for applicable movement speed per level.

Defense Values: 1/1 DV increase per level.

Abilities: The effigy gains ranks in the chosen ability as they level. For a base cost 1 ability, the effigy gains a new ability each level. For a base cost 3 ability, the effigy gains a new spell/perk every other level.

Strike: The effigy's melee strike and ranged strike increase every level. At level 3 the effigy gains an LOS 40' ranged attack that inflicts the effigy's selected damage type.

Minor Bonus: Effigies gain minor bonuses at ranks 1, 3 and 5.

Major Bonus: Effigies gain a Major Bonus at rank 5.

Resistance: Starting at rank 2, the effigy becomes resistant to 1 damage type. If a resistance is chosen, a susceptibility must also be chosen.

Resistance: Starting at rank 4, the effigy becomes immune to 1 damage type. If an immunity is chosen, a vulnerability must also be chosen.

Minor Bonuses (These stack with each other)	Major Bonuses
HP increases by 5	HP increases by 20
Increase DVs by 2/2 (Only stacks with base armor DVs.)	Gain 3 ranks in a new spell group, following standard purchasing rules.
10' Land Movement or 15' Flight Movement.	30' Land Movement or 15' Flight Movement.
Increase all size dimensions by 5'.	Selected Damage Types may be magical.
Mana increases by 2	Mana increases by 6
Selected Weapon Skill increases by 2	Gains ranks in a weapon specialization equivalent to Weapon Skill.

Effigy Spell List

Base Cost: 3

0 – Forge Effigy

Action Cost: 1 Hour

Target: Self

Area: Caster

Type: Focus

Duration: Permanent

Resistance: N/A

Calling upon either the twisting energies of the universe, their own knowledge, or guile - the caster creates their effigy/effigies. This spell can only be used once every three days, and the effigies' abilities can only be altered once every month.

0 – Direction

Action Cost: Variable

Target: Effigy

Area: LOS 400'

Type: Evocation

Duration: Instantaneous

Resistance: Variable

When in turn by turn mode, the effigy must be directed using either a swift or core action. If directed by a swift action - the effigy gains access to it's core action and its movement action. If directed using the caster's core action it gains access to its movement, core, reaction, and swift actions or the caster gives all present effigies a movement and core action. This can only ever be used once each turn per effigy, and the effigy acts independently from the caster once outside of the area.

1 – Vigilance

Action Cost: Reactionary

Target: LOS 10' + 10'/F

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

In response to an attack roll being made against anyone within 10'+ 10'/F of the effigy - the effigy can interpose - shoving the target behind them as it moves. The attack roll is made against the effigy instead of the target.

1 – Transposition

Action Cost: Swift Action

Target: LOS Effigy

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

A shroud of purple smoke engulfs the effigy and the caster. The effigy and the caster swift places. Alternatively, this spell teleports the effigy to an unoccupied space next to the caster or vice versa.

2 – Sensation

Action Cost: Swift Action

Target: Caster's Effigy

Area: Single Target

Type: Continuous

Duration: Special

Resistance: N/A

Caster goes unconscious - and remains so as long as they maintain this spell. They gain direct control of the effigy - gaining all of its senses, replacing their own actions with those of the effigy. The caster can utilize their swift action to end this effect.

2 – Artifact

Action Cost: Core Action

Target: LOS 40' + 20'/F

Area: 2.5' Radius

Type: Continuous

Duration: 3 + 1/2F Rounds

Resistance: N/A

A ball of vicious energy erupts at the target location. The ball has 15 HP, 14/14 armor DVs (0/0 Movement DVs), and automatically makes a ranged attack roll directed at the nearest target hostile to the caster at the end of each of the caster's turns (As long as they are within 40' of the artifact.) On hit, the ranged attack roll inflicts 2 + 1/2F d8 pure magic damage.

3 – Aspect

Action Cost: Swift Action

Target: Self

Area: Caster

Type: Continuous

Duration: 1 + 1/F Hours

Resistance: N/A

Caster's physical form is replaced with that of their effigy. All of the following values are set to that of the effigy: Movespeed, DV's, physical size/appearance, Resistances, Susceptibilities, Immunities, replications and vulnerabilities. Caster also gains access to any abilities the effigy knows (spells and skills).

3 – Attunement

Action Cost: 1 Minute

Target: Touch

Area: Effigy

Type: Continuous

Duration: 1 + 1/F Hours

Resistance: N/A

Magical energy surrounds the hands of the caster as they reach out and temporarily alter the effigy, allowing them to realign all of its attributes and characteristics, though these changes are only active for the duration, at which point the effigy returns to its previous state.

4 – Replicate

Action Cost: Swift Action

Target: LOS 40' + 10'/F

Area: Single Target

Type: Continuous

Duration: 1 + 1/F Hours

Resistance: N/A

The target has one of their abilities copied (Chosen randomly by the GM) onto the caster's effigy. The effigy must have the necessary resource to utilize the ability, unless a resource itself is stolen. This stolen ability is able to take the form of a target's unique power at the GM's discretion, such as an elemental immunity or an archetype. The effigy always knows what ability is stolen before using it.

4 – Overload

Action Cost: Swift Action

Target: Caster's Effigy

Area: Single Target

Type: Evocation

Duration: Instantaneous

Resistance: N/A

A tremendous degree of energy floods into the effigy, greatly amplifying its abilities. All damage dice rolled as a result of an effigy's actions are doubled and it has an additional core action as a part of Direction. At the start of the caster's next turn, the effigy is destroyed.

5 – Empowered Effigy

Action Cost: Swift Action

Target: LOS Effigy

Area: Single

Type: Evocation

Duration: Instantaneous

Resistance: N/A

Strands of energy wrap into the effigy's form as it loses its susceptibility and vulnerabilities for $4 + 2/F$ Rounds. The effigy is restored to its maximum HP and can take an extra Core and Movement Action.

5 – Synthesis

Action Cost: Swift Action

Target: Caster's Effigy

Area: Single Target

Type: Continuous

Duration: $1 + 2/F$ Hours

Resistance: N/A

Caster fuses with an effigy as per *Celestial Alignment (Equilibrium - 10)*, however the caster does not gain any new actions - keeping their standard suite of actions. They otherwise receive all other benefits.

Rituals

Rituals allow spellcasters to affect the world on a scale larger than traditional magics. Requiring longer casting times and associated expenses, they generally share the same components with other spells but have a few new additions. Requirements denote the minimum rank a caster needs in an associated spell group to begin a ritual, while the mana expense lists how many overall mana the caster needs to be able to utilize at once. The caster's natural total mana pool must match or exceed the listed amount to cast the ritual and they must inherently know the ritual (they cannot use an ability such as celestial alignment to gain enough temporary knowledge to conduct a ritual.) Rituals do not count as spells and cannot be altered by effects that alter spells, such as archetypes.

Ritual Effects

Some rituals are temporary, while others are permanent. These permanent effects can still be suppressed by the usage of *Antithesis* or any other spell that temporarily dispels permanent effects. These permanent effects should be recorded somewhere by the player to provide an easily accessible reference.

Ritual Strength

The sheer scale of alterations made from rituals will lead to vastly different effects, making them difficult to quantify. Spells like *Summon Entity* or *Creationism* have a minimum expense; though the user can sacrifice more to alter the outcome. The spell *Metacreativity* likewise is near-unlimited in scope and power, though it should provide an equal sacrifice from the user in comparison to what they gain (if anything) - making its usage dangerous. Typically, the greater the scale of deviance from the ritual's original intention, the greater degree of possible ways things could go wrong.

Ritual Knowledge

Legendary myths lace every corner of Cahyali; characters inherently know a ritual once they have met the requisite requirements to begin. It is not necessary to purchase them with ability points.

Available Rituals

Antithesis

Action Cost: 1 Hour

Target: LOS 40'

Area: Single Target

Requirements: Interdictions: 8; 25 Mana

Duration: Instantaneous

Resistance: WIL

Caster chooses a single effect, ability, or spell and attempts to suppress or dispel it forever, WIL save of 25 to negate. The effect is then dispelled as per the spell *dispel*, even if it were permanent. If the effect cannot be dispelled in any way, it is instead suppressed, preventing the expression of the effect or ability. *Antithesis* can be utilized to counteract *Antithesis*.

Apocalypse

Action Cost: 4 Hour

Target: LOS 2 Miles

Area: 1' Mile Radius

Requirements: Tempest: 10; 30 Mana

Duration: Permanent

Resistance: N/A

Harnessing the disastrous power of the universe; elemental energy can be seen and felt for miles off as it coalesces around the caster. A horrendous whirling vortex then forms at the target location. The vortex initially moves in the direction of the caster's choosing at a speed of 100' per round, though the caster must expend an additional 10 Mana to redirect it as a core action over the duration of the apocalyptic storm.

Ascendant Effigy

Action Cost: 1 Hour

Target: Character's Effigy

Area: Single Target

Requirements: Effigy: 5; 20 Mana

Duration: Permanent

Resistance: N/A

Fulfilling a portion of their incredible magical potential; the caster is now capable of enchanting their level 5 effigy, granting the effigy another major bonus that it does not already have. This effect persists until the effigy is destroyed

Communion

Action Cost: 10 Minutes

Target: Character

Area: Self

Requirements: Any Divine Group: 5; 10 Mana

Duration: Instantaneous

Resistance: N/A

Caster calls for the aid of a higher power, reaching out to either a specific or more general power. If the specific power does not answer, it is possible for another power to answer the call of communion. It is possible for this spell to fail to call out to any higher power, the communion is not guaranteed.

Confinement

Action Cost: 1 Minutes

Target: LOS 40'

Area: Single Target

Requirements: Equilibrium 8; 15 Mana

Duration: Instantaneous

Resistance: WIL

Caster creates magical restraints to hold a target forever, with a WIL save of 25 to negate the effect. While affected by this spell, the target does not need to breathe, eat, or drink, and it does not age - it's body is held in stasis. The caster can alter the terms and effect of the confinement in any manner, within reason.

Creationism

Action Cost: 1 Week

Target: Random

Area: Variable

Requirements: Astral Power: 10; 35 Mana

Duration: instantaneous

Resistance: N/A

Locking themselves into a trance, the caster calls forth cosmic energy over the course of a week. At the conclusion of the spell, a random planet appears somewhere in the plane. The caster has a memloc to a safe location on the planet (one that does not lead to instant death.) The caster can expend more Mana to create astral bodies that are larger than a planet.

Dark Dimension

Action Cost: 1 Hour

Target: Character

Area: Self

Requirements: Darkness: 8; 15 Mana

Duration: Permanent

Resistance: N/A

Calling upon the strength of shadow; caster creates a permanent version of *Dark Bastion* (Darkness - 8.) The caster can only ever have a single instance of *Dark Dimension* active.

Elemental Immunity

Action Cost: 2 Minutes

Target: Character

Area: Self

Requirements: Elemental Group: 8; 15 Mana

Duration: Permanent

Resistance: N/A

Elemental energy pours into the caster, empowering them. They become *immune to an* element they are attuned to (their choice), though this ability can be dispelled as though it were a spell and requires usage of the character's focus to maintain.

False Reality

Action Cost: 1 Hour

Target: Character

Area: 1 Mile Radius

Requirements: Illusions: 10; 25 Mana

Duration: 16 Hours

Resistance: INT

Trails of illusory energy begin converging on the caster. A spire of illusory energy forms from the sky towards the caster, visible for miles off. Once the ritual is completed, the caster gains complete control of illusionary magic within the region. They may conjure any form of illusion within the target area and change it all with a swift action. The illusions can have personalities as deep or shallow as the caster wishes. Within this radius, all Illusion spells rank 5 and under require only a single mana to cast for the caster.

Metacreativity

Action Cost: 1 Hour

Target: Character

Area: Self

Requirements: Scrying: 10; 30 Mana

Duration: instantaneous

Resistance: N/A

Unfathomable energy begins to pour into the caster as they reach a state of apotheosis - allowing them to alter the fabric of the universe. Metacreativity allows the casters to:

- ❖ Recreate any other non-ritual spell, the cast time of *Metacreativity* is reduced to a Core Action.
- ❖ Attempt to alter the reality of the universe in any way, potentially facing adverse consequences for doing so; or the feedback simply damaging the caster without noticeable gain for the caster.

Depending on the scale of change, more energy may be drained from the caster, or some other form of universal compensation is made. The changes asked by the caster may manifest themselves in ways that contradict the true wishes of the caster.

Permanent Chaos

Action Cost: 3 Rounds

Target: LOS 40'

Area: Single Target

Requirements: Turmoil: 8; 20 Mana

Duration: Permanent

Resistance: WIL

A stream of chaotic energy passes over the target, the caster inflicting a chaos effect upon them, WIL save of 25 to negate. The GM rolls on the chaos chart to determine the effect. This ability can be cast a maximum of once each week.

Phylactery

Action Cost: 1 Hour

Target: Character

Area: Self

Requirements: Death: 8; 20 Mana

Duration: instantaneous

Resistance: N/A

Separating body and soul; the caster deposits a piece of their soul into a small, mundane object of their choosing - this becomes their phylactery. Upon death, the caster turns to dust - dropping anything they are wielding. As long as this container remains, the caster will resurrect at the end of a 12 hour period at the location of the Phylactery, at which point the Phylactery is destroyed. While the Phylactery remains, the caster has their maximum number of magical Mana reduced by 4, which is further reduced by an equal amount for any other phylacteries that are maintained throughout the same time period.

Planeshift Nexus

Action Cost: 2 Hour

Target: Character

Area: Memloc

Requirements: Spacetime 8; 20 Mana

Duration: Permanent

Resistance: N/A

This ability creates a circle on the ground in front of the caster and another at the target location. Anyone stepping into one of the circles is instantly teleported into the other. This ability does not require active maintenance, though only up to 6 circles can be active at once and each circle created by the caster is networked into other circles created by the caster. The caster can reconfigure the circles within the network and alter their destinations within limits:

- ❖ Change the destination of a single circle. This circle and its desired destination circle must both be on the network.
- ❖ Each circle can only have 1 destination circle, otherwise it is deactivated.
- ❖ Multiple circles can be linked to the same destination circle.
- ❖ Circles without a destination circle are considered deactivated. These circles can only be used as destinations, nothing more.

Resurrection

Action Cost: 3 Rounds

Target: Touch

Area: Single Target

Requirements: Life: 8; 20 Mana

Duration: instantaneous

Resistance: N/A

Using a deceased body or soul as a focal point, the caster restores a recently deceased being to life. This ritual, while immensely powerful, does have downsides. First, the body must have died within 1 hour of the ritual's beginning. This time can be lengthened by 1 hour for every 10 extra Mana the caster can feed into the ritual. Second, the forces of death take offense to mortals playing fast and loose in their domain, and as such, will only allow 1 free resurrection per month per caster, all others must be bargained for (i.e. GM's discretion as to whether or not to allow the rez). Thirdly, the ritual is incredibly taxing on the restored body and soul, as such, the target returns at no Mana, half their maximum HP..

Sentience

Action Cost: 10 Minutes

Target: Touch

Area: Single Target

Requirements: Flora: 8; 15 Mana

Duration: Permanent

Resistance: N/A

Collecting the natural energies of the area around them, the caster directs them toward an object, plant, or non-sentient target to grant them sentience, increasing their INT to 0, if it is below that - in addition to granting the target autonomy. This spell can be used to break any *charm* effect or mind control. Alternatively, the spell can be used to render the caster permanently plant; allowing them to be a part of the plant creature category.

Shapeshift

Action Cost: 1 Hour

Target: Character

Area: Self

Requirements: Fauna: 3; 5 Mana

Duration: Permanent

Resistance: N/A

Primal energy flows into the caster, allowing them to permanently adopt an adaptation as per the spell *Adaptation* (Fauna - 0) without needing to utilize focus to maintain them. Should the number of adaptations they have interfere with their HEA, they may choose to rearrange their adaptations. This adaptive pool is shared with that used for *Adaptation* (Fauna - 0.)

Summon Entity

Action Cost: 20 Minutes

Target: Touch

Area: 20' Radius

Requirements: Effigy: 3, Relevant Group: 7; 10 Mana

Duration: 1 Hour

Resistance: N/A

After preparing an appropriate ritual site in the area the caster must give an offering of some sort to the entity - the offering must consist of a minimum of 10 Mana dedicated to the particular spell group they are channeling - they may add anything else, though a more potent offering may yield a more powerful entity. The entity appears within an unoccupied space in the ritual site, at the conclusion of the ritual. The entity summoned as a part of this ritual acts independently of the summoner, though if it's disposition is friendly enough, the entity can act *in place* of an effigy, deactivating the caster's current effigy. The caster may then command the entity as though it were an effigy for the duration.

Thrall

Action Cost: 1 Hour

Target: Touch

Area: Single Target

Requirements: Charms 8; 20 Mana

Duration: Permanent

Resistance: WIL

Engraving a symbol onto the target, the caster attempts to force the target into their service, WIL save of 25 to negate. On failure; the target becomes bereft of a soul. This ability allows the caster to command the target to take any action the target could normally perform. Should the target perform a suicidal action, they may immediately re-attempt the save at no action cost. The thrall re-attempts the save at the start of every week.

Antithesis

Action Cost: 1 Hour

Target: Character

Area: 4 Mile Radius

Requirements: Light: 8; 20 Mana

Duration: Permanent

Resistance: WIL

Brilliant light shines through every part of the region; An unnatural star looms above the area. Every time a target goes to sleep they have visions about a dream of the caster's choosing. The caster can choose to cause affected targets to lose the benefits of a rest period, WIL save of 25 to receive the benefits normally. The duration of this spell is equal to however long the caster stays conscious and focuses on upkeeping the spell.

Playing Crescent

This section provides an overview of some of the aspects that Crescent will deal with — namely modifiers, checks, thresholds, status conditions, and how diseases and plagues interact and function within the world. This section also details how DVs, armor, and other effects interplay with one another, as well as other minutiae — though ultimate discretion about rules rests in the hands of the GM.

Checks and Rolls

There are three primary types of rolls, resistance checks, attack rolls, and skill checks. Resistance checks contest attributes, while attack rolls aim to exceed DVs. Skill checks are determined by adding half of the associated attribute and all ranks of the skill. Most dice used in standard checks are d10s.

Identifying Modifiers

A character can have modifiers that affect their attributes and skills. Multiple bonuses targeting the same type of modifier do not stack. For example, only the highest source of placed rolls and the highest flat bonus will take effect.

Contested Checks

A contested check is a type of roll between two parties. Each character must make a 2d10 roll and add the appropriate values for each character. The character that has the higher roll wins. In the event of a tie, the check is rerolled. Most rolls use this format.

Placed and Displaced Rolls:

To make a placed or displaced roll, roll a number of extra dice on the associated check equal to the number of placed or displaced rolls gained from the highest single active source you have for that check. After all of the dice have been rolled, remove a number of dice from the check equal to the number of placed or displaced rolls you have for that check. For placed rolls, remove the dice that provide the least benefit to your character. For displaced rolls, remove the dice that provide the most benefit to your character.

If the character has both placed and displaced rolls on a check, then each placed roll will cancel out a displaced roll, and vice versa. If there are any remaining placed or displaced rolls after the cancellations, they are added to the check.

Other Bonuses or Penalties

It is possible to award characters a circumstantial bonus or penalty based upon the actions they take throughout their turn, such as being especially persuasive in their argument or being unique in their deception. Ultimately, these sorts of penalties or bonuses are determined by the GM. An example of a circumstance penalty could be attacking from far above a target — potentially granting a character a placed roll or flat bonus on their attack.

Resistance Checks

Whoever/whatever is forcing a check on a target must set the resistance check. Resistance checks are set by rolling 2d10 and adding the dominating attribute of the action that has caused the check to happen. The target can attempt to resist by rolling 2d10 and adding the resisted attribute. If the target's roll is higher than or matches the resistance check, it is resisted. A spell's resist-ance check is set when it is cast — keeping that value for all further checks against that instance of the spell unless the spell is altered.

Skill Checks

Skill checks occur whenever a character does an activity or action related to any of the origin skills. Whether a character attempts to hide, convince another character, or observe their environment, they can make a skill roll to determine their level of success. Skill checks are determined by rolling 2d10, adding any ranks they have in that skill, and that skill's dominating attribute **divided** by two.

Terminal Saves

In the case that abilities or skills result in an unintended death or result for a target, it is a *terminal save*. The target gets placed rolls or bonuses to resist the effect, determined by the GM.

Flat Checks

A flat check is one determined only by chance, with no other modifiers. This can come in the form of a “High-Low” guess or instead by rolling 2d10 and adding no values. In the first situation, the character will call High or Low, and then the GM will roll 2d10 to determine whether the outcome is in the player's favor, or against it - potentially operating on a gradient. In the other case, the GM sets a value, and the player must roll a 2d10 to match or exceed it.

Weapon Combat

Striking

A character must make an Attack Roll to determine if they may Strike a character. The character must be within reach of a target to perform a melee attack (typically 5') with a melee weapon or within range to perform a ranged attack with a ranged weapon.

Attack Rolls

When making an attack roll, a character wishes to exceed their target's DVs. If the attack matches or exceeds the value of the DVs, then the attack is considered a success. Characters execute attack rolls by rolling 2d10 and adding the character's PER.

PER and Attack Rolls

PER is utilized to determine the accuracy of all attacks rolls. All characters apply their PER evenly to all attacks. The value of an attack roll is the sum of a 2d10 roll, PER, and any applicable bonus.

Critical Success

Should the character roll a 19 or above on 2d10, their attack is a *critical success*, if the attack is an **attack roll**. If the total value of the attack roll would not hit, the attack is instead a hit. If the total value of the attack roll would normally hit, then the character adds an extra amount of damage to the attack roll based on the value of their natural roll to-hit:

- ❖ 19: The strike's total damage is multiplied by 1.5
- ❖ 20: The strike's total damage is multiplied by 2.0

Stacking

Bonuses can exist to change a player's rolls. In cases where the character has two bonuses of targeting the same aspect, only the largest active effect will always take precedence over any other ones — preventing the stacking of multiple effects. For example, with enough active effects a character can have a placed roll on their damage die, a placed roll on their attack roll, a bonus to their damage, and a bonus to their PER simultaneously, but cannot benefit from multiple effects granting bonuses to each individually. A character can only utilize the most powerful active effect in each category. This rule pertains for all bonuses and is only circumvented when a bonus is specifically labeled *stacking*.

Disrupting Attack Rolls and Spells

Numerous abilities and effects can disrupt other ones. When an attack roll is disrupted, they still use the actions they committed and will still expend any costs, but the action's effects do not occur unless the action was completely interrupted. If only one action is disrupted, then the character can alter the rest of their actions to account for the changes.

Often a disruption will allow for a character to correct for a disruption. If another character were to use their reaction to walk away from an attack roll and the character is making numerous attack utilizing weapon skill, they can use their movement to walk up to the character again and continue the rest of their attack barrage

Damage Types and Categories

When damage is done to an item, creature, or character, the damage will have a damage type and category associated with it. If multiple damage types are listed for an effect, the damage is applied separately - resistances and other effects only apply to the resisted damage type.

Elemental Damage: Elemental damage is typically expressed as the forceful reorientation, reshaping, or creation of the raw elements that make up the universe.

Magical Damage: Magic damage often represents a forceful interruption of the cycles that dictate existence - from rotting away life force, to delving between planar energies.

Mundane Damage: Mundane damage is brought about by the force of normal objects without an elemental or magical nature.

Type	Description
Blight (Magical)	Magical damage caused by eating away at the target's life force and soul. Blight damage rots away the very essence of a target, causing it to wither body and soul.
Blunt (Mundane)	Physical damage caused by the general dispersal of energy onto an area. Typically this includes smashing a target in some way, be it with a wave or with a hammer.
Divine (Magical)	Magical damage caused by the fundamental forces of the universe violently collapsing on a target. Divine damage sears the soul of the target with energy it is incapable of withstanding.
Edged (Mundane)	Physical damage caused by cutting its targets. Edged damage is usually done in broad slicing movements that result in gashes against a target.
Fire (Elemental)	Physical damage caused by burning or overheating its targets.
Force (Elemental)	Physical damage caused by striking its targets with a shockwave. Force damage is the expulsion of concentrated accelerated magic at the target.
Ice (Elemental)	Physical damage caused by freezing the target and rendering it too, potentially stopping biological processes or sapping the ability of the target to move.
Lightning (Elemental)	Physical damage caused by the violent release of an electrical current upon a target.
Stress (Mundane)	Magical or physical damage caused by placing targets under psychological distress. Stress damage cannot kill a target, instead rendering them unconscious.
Piercing (Mundane)	Physical damage inflicted by stabbing into a specific point of a target, piercing damage is often the result of puncturing a point.
Pure Magic (Magical)	Magical damage caused by the collapse of concentrated, unaligned energy, can affect some <i>ethereal</i> targets.
Toxic (Mundane)	Physical damage caused by corrosive or poisonous forces eating away and wearing down a target from the inside or outside.

Resistances

When a target has resistance to a damage type or effect, they halve the damage from that source and gain a placed roll on any relevant check. Only the damage that a target has resistance to is halved. All other damage from different damage types continues as normal.

Immunity

Immunity represents protection against an effect or damage type. Immunities only apply to specific sources, nullifying those specific effects, and allowing all others to occur as normal. A target with immunity to a damage type, condition, or check cannot be affected by the associated effects. It is possible to still target the character with attacks or effects; it simply ignores all damage and drawbacks from the relevant effect.

Temporary immunity

Certain effects will only grant immunity for a finite duration. If an effect grants temporary immunity, repeated applications of the effect do not affect the character for the duration of the temporary immunity. Temporary immunity does not prevent or end ongoing effects, but it does prevent new effects of the relevant type from being applied to the character.

Susceptibility

When a target is susceptible to a certain damage type or effect, they take twice the amount of damage from that source and have a displaced roll on any relevant check. Only the damage that a character is susceptible to is doubled. All other damage from different damage types continues as normal.

Vulnerability

When a character is vulnerable to an effect or damage type, it automatically fails the associated check, takes twice the amount of damage from that source, and they cannot reduce the damage they are vulnerable to. Only the damage that a character is vulnerable to is doubled, all other damage from different types continues as normal.

Resistances and Susceptibilities

Should a target gain susceptibility while resistant to the same damage type, these two statuses cancel out — the target will suffer damage as normal. Immunity is greater than a susceptibility and the target will continue to suffer no effect from the effects it has immunity to. If a character happens to be both vulnerable and immune to the same effect - the effects will cancel out.

Damage Reduction

Damage reduction (**DR**) reduces the amount of damage a character receives from a source based on the number of dice rolled. For example, for each instance of DR, the damage source is reduced by 1 for each die rolled. If a character has an instance of elemental damage reduction, they reduce the amount of damage received from *Fireball* (*Pyromancy* - 4) by 8. Damage reduction is applied after resistance. If a character with *fire resistance* and *DR 2* (Fire) is hit by *Fireball* (*Pyromancy* - 4) and takes 28 fire damage, they first halve the damage to 14, then reduce the damage by 16. Damage cannot be negative, so the character instead takes 0 damage.

Defensive Stacking

DVs

All attacks must at least match or succeed a target's DVs to hit them. Any abilities or items that grant DVs apply to a specific category of DV: movement, shield, armor, and bonus.

Armor Penalties

Anybody can wear light armor without **suffering** any penalties. Heavy/medium armor reduces the wearer's movement DVs by half if they are not proficient with it. Characters cannot cast while equipped with a shield that grants DVs - unless otherwise noted.

Sources of DVs

There are four sources of DVs for characters in Crescent. These are Movement, Armor, Shield, and Bonus DVs. A character benefits only from the single highest source of a DV in each category. A character's archetype determines whether they utilize heavy armor, medium armor, or light armor.

Touch DVs

Touch DVs are determined solely by movement DVs.

Movement DVs

Every character begins with 10 movement DVs. Being knocked **prone** halves movement DVs, while being **pinned** removes them.

Armor DVs

A character can benefit from only one source of armor DVs at any given time. In the case of a character wearing multiple sets of armor — they may only choose the benefits of a **single** source of armor, **suffering** an inferior AGI as long as they have multiple sets of armor active. Any kind of armor that is not provided by a magical effect takes 1 minute to put on or take off.

Shield DVs

Characters can only ever benefit from a **single** source of shield DVs. In the case of a character wearing multiple shields — they may only choose the benefits of a single source of shield DVs.

Bonus DVs

A character can only ever benefit from a single source of bonus DVs, using the highest active source. A bonus to a character's DVs can come from either spells or a skill.

Bound

When a character is bound or unconscious, only their armor and bonus DVs are calculated in terms of defending against attack rolls.

Damage Reduction

A character can benefit from two sources of **Damage Reduction** - they can benefit from Damage reduction from their armor and their shield. Should a spell grant damage reduction, it replaces their armor or shield, whichever is lower.

Life and Death

Hit Points and HP Gain

Hit points (HP), indicate a character's ability to sustain damage. When damaged, they have hit points temporarily subtracted from their total HP; the new total indicates their new condition. A character at level 1 typically begins with 18 HP.

Unconsciousness

Characters fall unconscious under two conditions; a character can choose to fall into a state of stable unconsciousness when they fall below one tenth of their maximum HP. Once in a state of stable unconsciousness, a character is forcibly put into a rest period for 8 hours.

Unstable Unconsciousness

Characters fall into a state of unstable unconsciousness when their HP falls below 0. Constructs (Mechanical) fall apart at 0 HP and cannot enter unstable unconsciousness. While unstably unconscious, a character's HP depletes at a rate equal to a fifth of their maximum, at the start of each of their turns. A character may be stabilized with a knowledge check of 10, or by receiving any amount of healing.

Death

If the amount by which a character HP falls below 0 matches or exceeds their maximum HP, they die. When a character dies, the GM can determine the outcome of their fate. When their HP is below double their maximum, the character's body is destroyed. There is nothing left to repair or resurrect.

Stabilization and Consciousness

A character who is in a state of stable unconsciousness gains the *unconscious* status condition and is forcibly put into a rest period.

Order of Combat/Initiative

A round is composed of each character's turns. They determine their place in a round through an agility check, commonly called an initiative roll. Initiative indicates the order in which the character will act within the round. The character with the highest roll going first, and then going in descending order from that point. In the case of a tie — the character with the higher agility attribute will go first. If it is still a tie — they will have a roll-off to determine who goes first.

- ❖ When combat begins, all combatants make an agility check.
- ❖ Determine whether there is a surprise round — if there is one, characters that are surprising others will go first.
- ❖ After the surprise round, all combatants are ready to begin the normal round of combat.
- ❖ The characters go in order of highest initiative to lowest.
- ❖ When all characters have had a turn, the next round begins repeating the previous step until turn by turn mode has concluded.

Creature Initiative

For groups of creatures, the GM can choose to have them all go on the same initiative — making a single agility check to determine their place.

Held Action

Characters can choose to hold their turn. When doing so, they declare a situation and wait until it is met. The character consumes their reaction when they do so. The character wastes their held action if they do not use it by the end of their turn / if the situation does not occur. A character can only hold onto one type of action and cannot hold a movement action.

Surprise

Often a group of adventurers, bandits, or other characters can execute a surprise round. Surprise rounds are adjudicated by the GM — though this will often be a result of intentional usage of stealth. When a surprise round is called, the character or characters have a round of actions before the initiative roll. Characters cannot take reactions when surprised.

Movement

A character can break up their movement action into multiple parts - for example, characters can make multiple attacks against several targets. Characters can utilize their movement to execute an action before moving onto another part of the movement. Characters can move up to their movement on their turn and can include a combination of different physical abilities, such as climbing or swimming.

Moving Through

A character can freely move through the space of another character that allows them to. If the character does not allow them to move through, they cannot move through space unless the two have different size categories.

Different Speeds

Characters can have access to multiple movement speeds. In such a situation, a character can freely switch between their movement speeds, though they subtract the distance they move from each movement's individual movement speed. Unless otherwise stated, a character's swim speed is half of their land movement.

Flying and Falling

If a flying creature loses their ability to fly, they begin to fall on their next turn. When falling, creatures fall up to 120' per round - receiving a d6 of damage for every 10' they fall. Should they not have a way to reduce the damage. Upon falling at least 30', a character is knocked **prone**. A character can only take a maximum of 40d6 of falling damage.

Size Categories

Characters wildly in shape and size. This can either open up options or present problems for a character. Characters cannot grapple a target if they are a size category larger than they are.

- ❖ Tiny characters are 6" by 6" or smaller.
- ❖ Small characters are 3' by 3' or smaller.
- ❖ Medium characters are 7' by 7' or smaller.
- ❖ Large characters are 15' by 15' or smaller.
- ❖ Massive characters are 30' by 30' or smaller.
- ❖ Colossal characters are 45' by 45' or smaller.
- ❖ Titanic characters are 45' by 45' or larger.

Mounts

In order to mount a target, the target must be a size category larger than the character and willing. The target must have the proper form and figure to allow the character to mount the target. Taming a mount typically requires training and a level of awareness that corresponds to the difficulty of taming the target.

Mounted Combat

A mounted character shares their initiative with their mount unless the mount is independent and not beholden to the person mounting it. A character can mount a creature as a swift action. While mounted, the character's base movement is replaced with that of the mount. If the character is capable of giving commands to the mount, they can give their mount a core and movement action as a swift action. They can only use this ability once each round. If an effect moves the mount while the character is on it, the character can use their reaction to not tumble with the mount, landing 5' from where it was knocked backward.

Piloted Combat

Piloted Mounts are similar to other types of mounts, though special rules govern them. While the pilot is controlling the piloted mount, its HP pool acts as a HP barrier for the characters HP pool, meaning they share a HP pool when the mount is piloted. The character still takes damage if they are directly targeted. The HP pools of the pilot and mount are apart when they separate. Any HP lost while piloted is retained when it is independent and vice versa.

Piloted Mount Usage

While the user is inside of the mount, they use it as an extension of themselves for spells and other abilities. They replace the character's movement speed with that of the piloted mount. The mount loses all of its actions when the character is piloting it. The character can typically repair the mount using knowledge skill or other abilities that cause objects to recover HP. The character treats it as a normal mount when they are not piloting it.

Time, Range, and Vision

Duration

Effects with durations use the turn of the character who originally applied them, including both magical effects, such as elemental spells as well as physical effects, such as poisons.

Example: Cerena the Ice Mage casts blizzard, a spell with a 4 round duration. Blizzard affects its target on the round they cast Blizzard, and for 3 of Cerena's next turn by turn rounds.

Rest

Rest periods are taken in exploration mode - and the amount of time required for a full rest period is a minimum of *eight hours*. Over the course of a rest period, a character restores a number of hit points equal to ten times the character's HEA and an amount of mana up to twice their PWR attribute, but some conditions can modify the amount of recovered. If a rest period is interrupted, only a partial amount of mana and HP are restored, as judged by the GM - typically a fraction of what characters might have recovered.

HP and mana may likewise not be restored beyond their original maximum total. Many character abilities recharge upon completing a rest period - though a rest period can only be taken once every 24 hours. In order to take a rest period a character cannot engage in strenuous activity for more than a few moments and must be sleeping for most backgrounds, or in a period of inactivity.

Rounding

When a number has a fractional value, it is convention to round downwards in **all cases**.

Range

Some abilities generate an effect that has a range and reach. Ranged weapons have a range. Attacks with ranged weapons work normally up to their listed range. Attacks against targets beyond that range suffer a displaced roll, which worsens by an additional displaced roll for every additional multiple of that range, up to a maximum of 4 displaced rolls after four additional range increments. Attacks beyond this range are not possible. For spells, the listed range is the furthest distance that it can travel.

Reach

Reach determines how far a character can physically extend their body or manipulate their weapon to make a melee attack roll against a target. Weapons can have different reaches — unless otherwise stated, a melee weapon's reach is 5'.

LOS

Typically, a character requires an unblocked path to the target of a spell, the origin point of an area, or the place where they create something with a spell or other ability. This is called line of sight within spell descriptions. Solid barriers can break line of sight, though amorphous materials or non-solid objects will not.

Lighting

A character determines their LOS by the lighting they find themselves in. Lightning can serve to alter a character's LOS, either hindering or helping a character. Characters might receive displaced rolls on perception checks based on the lighting. Poor lighting can affect the targeting of spells. Characters that do not rely upon sight will not have to deal with the consequences of lighting. It is not possible to see through an area **obscured** by a substance, such as smoke.

Differing Lighting

Light conditions in an area can vary from brightly lit, dimly lit, dark, to magical darkness. Different forms of lighting affect how a character can observe the areas around them.

Areas of Effect

Abilities with areas of effect or AoEs always have a point of origin, extending outwards from that point. There are a number of different types of areas — determining what form the area of effect attack takes.

Radius

Spells with a radius spread outward from the point of origin in the shape of a sphere, as it extends outwards in every direction.

Cone

A cone extends in a chosen direction from its point of origin. A cone's width at a given point along its length is equal to that point's distance from the point of origin. The given dimension for a cone determines its maximum length.

Line

Lines extend outward from an origin point, with a width of 5' (Unless otherwise stated), in the direction of the character's choosing.

Cylinder

Cylinders have a radial component, spreading outwards from the point of origin in the shape of a circle, extending directly upwards from the origin in the shape of a circle.

Senses

Some characters or creatures have senses beyond what is typically available or seen. For some of these senses — the target can utilize these senses to detect other targets even while blind. Senses such as soul sight or detect magic can be utilized to see without eyes.

Attribute Alterations

Characters with an exceptional attribute gain a static +1 bonus to the attribute; the character can stress their exceptional for benefits. General stress of exceptional attributes entitles them to two placed rolls on any check related to the attribute. Exceptionals are expended when stressed. If the character naturally has the exceptional — it is regained upon completing a rest period, allowing the character to make use of the exceptional once again. A character can only have a single exceptional active at once for an associated attribute. If a moment is pivotal to a character's overall motivation, the GM can choose to reward a character with a temporary exceptional.

Inferior Attributes

Characters with an inferior attribute receive a displaced roll on all checks associated with the attribute; a character with an attribute of 0 automatically receives an inferior in the relevant attribute as long as it is 0. An inferior attribute reflects an attribute in which a character is inept.

Gaining Exceptionals

One way in which a character can gain an exceptional attribute is by buying up to rank 8 in an origin skill associated with the attribute. If the character's original exceptional was in a skill, they may reallocate it to another attribute of their choice. These exceptionals still follow the normal rules of exceptional attributes - only a single exceptional attribute can be active at a time for an associated attribute, which is expended upon stress. If a character would otherwise have two exceptionals in the same attribute, they are treated as only having one.

Attribute Gain

As a character's level increases, so do their attributes. A character's attributes gain is meant to represent a general increase in their ability that is not necessarily captured by raw ability points. At the indicated level, they receive an attribute increase that they may use to increase an attribute of their choice.

Level	Total Attributes Gained
2	1
3	2
4	3
5	4
6	5
8	6
10	7
12	8
16	9
20	10
25	11

Hit Point Gain

Level	HP Gain per Level
levels 1-3	8
levels 3-15	4
levels 15-40	2
levels 40+	1 Every 10 levels

Specific Stresses

Specifically stressing will yield a benefit listed below. The action cost for these stresses is a reaction.

Name	Description
STR	The character rolls the maximum number on their choice of 3 damage dice this turn.
AGI	The character gains 10 additional movement DVs until the start of their next turn.
HEA	The character halves all incoming mundane and elemental damage from an individual instance.
PER	The character does not roll on their next attack roll - they instead automatically hit (within reason.)
WIL	The character automatically makes the attempted resistance check.
CHA	The character adds their <i>CHA</i> twice to an interpersonal check, instead of their interpersonal skill.
INT	The character may instead roll a skill check using their <i>INT</i> attribute as the modifier.
PWR	The character converts all damage they inflict this turn into <i>pure magic</i> damage.

Movement

Characters will typically have five different kinds of movements. They have a **land** movement speed — which determines how quickly a character can travel overland, a **burrow** speed, which decides how quickly a character can tunnel through the ground, **climb** speed, which determines the ability to climb up and down inclines on varying surfaces, a **swim** speed that allows characters to move through water, and a **fly** speed which allows characters to fly through the air.

Barriers and Bonus Health

Numerous spells provide barriers that protect a character's hit points. Only the highest effect provided by a barrier takes place — Only the most powerful effect granting bonus health would also take effect. In the case of barriers providing additional benefits, these benefits are dispelled upon a new barrier taking effect.

Gaining Movement

A character's base movement is 30' of land movement, though there are multiple ways to modify both their speed and the number of movement options they have access to. The acrobatics skill and offensive/utility martial perks both increase a character's base movement speed, stacking with one another. Bonus movement provided from spells or other sources goes on top of a character's base speed, though multiple sources of bonus movement speed do not stack with one another.

Status Effects and Conditions

This section describes status effects that can affect characters through magical effects, skills, potions, etc. The intent is that various effects that inflict such statuses will feature “*status names*” that players and game masters can look up in this section.

List of Status effects

Name — name of the status effect

Format — how status effect is presented within another effect description

Description — what effect the condition

Status Effects Pt. 1

Name	Format	Description
Blind	<i>blinded (type)</i>	Target cannot utilize its sight to perceive its surroundings, and has their LOS restricted to 10'. The target automatically fails any checks that require sight. • <i>True blindness</i> prevents all means of sight, even those provided by magical or unnatural senses. Magical darkness inflicts <i>True Blindness</i>, limiting LOS to touch. • The affected target suffers 2 displaced rolls on all attack rolls. • All attack rolls against the target gain a placed roll.
Charm	<i>charmed</i>	Targets affected by this condition will perceive the <i>charmer</i> as their ally, and refuse to harm them – and seek to protect them. The charmer may direct the charmed target to perform an action as a swift action, so long as it does not directly endanger/harm the charmed individual. The condition lasts for the duration of the magical effect causing it. In case the affected target or its possessions is a target of offensive actions stemming from the <i>charmer</i> , the charmed target is allowed to immediately re-attempt the original resistance check again to break the <i>charm</i> with no action cost.
Confuse	<i>confused</i>	Target cannot differentiate between friend and foe. It will attempt to resist any magical effects and if in the middle of combat will select targets for both its benign and offensive actions arbitrarily (roll a d6, 1-3 is benign, 4-6 is offensive), though it has a preference for the nearest targets.
Ethereal	<i>ethereal</i>	Targets affected by this condition are in the <i>ethereal plane</i> ; they.. ❖ Are immune to all damage that is not from its current plane. ❖ Can only affect other <i>ethereal</i> targets ❖ Are flying at a speed equal to their normal movement speed. ❖ Are capable of moving through non-magical materials such as wood or stone, but not enchanted materials and are <i>blinded</i> while inside solid materials. If the target turns physical, it is displaced to the nearest unoccupied space within 20'. If no such place exists, the target materializes inside a solid object, dead.
Frighten	<i>frightened</i>	Target is terrified by the source of this condition and will utilize its movement action to put space between itself and the source. In addition: ❖ They have a displaced roll on any check stemming from the source of the condition. ❖ They have a displaced roll when making an attack roll against the source of the condition.
Invisible	<i>invisible</i>	Target bends visible light around itself, turning invisible to normal vision, though it still releases noise. ❖ Attacks against them have a blindness penalty if they are undetected, otherwise only one displaced roll if hidden. ❖ Gain <i>two</i> placed rolls on subtlety checks.
Paralyze	<i>paralysed</i>	Target is paralyzed and cannot move its body, though it regains its movement action upon breaking free of the paralysis. ❖ Target is still aware of its surroundings, though unable to take actions. ❖ Upon taking any damage, the paralysis is broken immediately at no action cost. ❖ Target cannot make AGI checks while paralyzed.
Pin	<i>pinned</i>	Affected target suffers a number of penalties: ❖ A pinned target's movement speed is always 0. ❖ A pinned target's movement DVs are set to 0. ❖ Has two displaced rolls on all AGI checks and loses any placed rolls.

Status Effects Pt. 2

Name	Format	Description
Grapple	<i>grappled</i>	A grapple can be made with a successful melee attack roll, (inflicting no damage, though skill can alter grapples) pinning them on hit. The target is reduced to a core action (while grappled), and the grappler is <i>slowed</i>. The target regains their movement and swift action upon breaking the grapple. To maintain a grapple the character must spend a Core Action each round. ❖ It takes two arms to grapple a target of the character's own size class, one arm to grapple a target of a smaller size class, and the character cannot effectively grapple a target of a larger size class. ❖ Grappled targets can attempt to break by using a core action to attempt a new grapple check (contested might check.)
Petrify	<i>petrified</i>	Target is turned into a statue, losing all of their actions. In this state the target gains resistance to most damage types, but can receive blunt, magical or stress damages as normal. ❖ If the target takes blunt damage that brings it to negative HP, the statue is shattered, but can be glued back together. If the effect ends when the statue is shattered, the target is dead. If the target takes enough magical or mental damage to normally kill it, it dies. ❖ The target is not aware of its surroundings while under this condition. Unless otherwise stated, the target re-attempts the check at the end of each of their turns, breaking free on success.
Prone	<i>prone</i>	Target is knocked to the ground, gaining a number of effects until they utilize half of their movement to stand up. ❖ The target's movement DVs are reduced to zero ❖ Attacks against the target gain a placed roll. ❖ The target's movement speed is halved. ❖ The target suffers a displaced roll on AGI checks
Sick	<i>sickened</i>	<i>Sickened I.</i> Target suffers a displaced roll on all checks. Upon entering combat, the target becomes <i>confused</i>. <i>Sickened II+.</i> Target gains a stacking instance of <i>suffering (Toxic.)</i>
Slow	<i>slowed</i>	A <i>slowed</i> character moves at half of their normal movement speed and loses their reaction.
Spell Jammed	<i>spell jammed (magic type)</i>	The target cannot utilize magic under this condition. • If condition specifies magic type, only that magic type is blocked. Otherwise all magic is restricted. • This condition does not stop already activated spell effects from working, but does not allow activation of any new effects by the target.
Stunned	<i>stunned</i>	The target is stunned and cannot perform any movement, core, reaction, or swift actions. • Has a displaced roll on all HEA, WIL, STR, and AGI checks. • A stunned target's movement speed is always 0. • Target cannot access their movement DVs while pinned.
Suffering	<i>suffer</i>	Each instance of <i>Suffering</i> inflicts a d6 of a damage type at the start of a character's turn until cleared. Targets under the effects of <i>suffering</i> can remove all instances of it by expending their swift action.
Unconscious	<i>unconscious</i>	Unconscious targets have a number of distinctions: • Cannot perform any kind of actions and automatically fail all AGI and STR checks.
Fatigue	<i>fatigued</i>	The character failed to get a complete rest period. The scale of detriment increases for each night the character fails to rest. After missing their first night of rest, the character has a displaced roll on all attribute checks. On each subsequent day, the character receives a stacking displaced roll on every roll for each night the character misses a day's rest.

Other States and Conditions

Besides the usual conditions a character can be in - other states and situations that alter how the character interacts with the world exist.

Name	Format	Description
Encumber	<i>Encumbered</i>	The total weight of what the character is carrying exceeds that of the character's weight multiplied by their <i>Might</i> ($\frac{1}{2}$ <i>Strength Attribute</i> + <i>Might Ranks</i> .) When encumbered, they are <i>slowed</i> .
Warp	<i>Warped</i>	Upon gaining three instances of <i>Warp</i> a character becomes <i>Warped</i> . Each complete rest period reduces each instance of <i>Warp</i> by 1; unless they are already <i>Warped</i> . The character's mind has been shattered; either through insight into higher beings, extreme stress, addiction or circumstance. The character must fulfill the warp's condition, whatever it may be for the day. Failure to fulfill the warp's condition within 18 hours will cause the character to be unable to recover HP in any way and gain a displaced roll on all attribute checks until they fulfill the warp's condition. Warp can also twist a character's motivations, memories, and personality. Cures for warp are often highly personal. <i>Ex: Soul Warp - A character's obsession with blight forces them to consume a soul once each day.</i>
Befuddle	<i>Befuddled</i>	The character loses their sense of self, spacing out occasionally. The character has a displaced roll on all PER and INT related checks as long as the condition lasts. A <i>befuddled</i> character cannot maintain Focus, any active focus spells are broken upon becoming <i>befuddled</i> .

Noticed

Characters can properly observe characters they *notice* with a sense. For most characters, this *sense* is sight. It is possible to notice targets with senses other than sight, provided those senses are keen enough.

Hidden

Characters do not know the exact location of another character, either due to poor sight, visibility, blindness, or some other effect. They are aware of the general location the target lies, though it can be difficult to target a hidden character. Characters can attempt an *awareness check* using their swift action to locate hidden targets.

Unnoticed

Others around the *unnoticed* character do not know what space they occupy, but they realize the character is in the area. Those around the character have an inkling that they are present and can begin making *awareness checks* against the *unnoticed* character to detect them.

Undetected

Others around the undetected character do not even have an inkling that they are there. They are completely undetected, though they can become unnoticed if they give others an inkling they are present.

Terrain

Terrain varies between areas - creating obstacles that can serve to hinder or help the character or their companions. **Treacherous terrain** can create difficult situations that impede a character's movement across the area. Treacherous terrain could come in the form of high mountainous areas that are unsuitable to quick movement, wet marshlands, and anything in between. However, terrain that exists in this way will often inflict the **Slow** status condition to characters that are moving through the area of treacherous terrain. Terrain that is even more unsuitable could serve to impede a character further, either causing them to be frequently pinned by their surroundings or slowing them to a fourth of their movement speed.

Navigating Treacherous Terrain

Movement made while jumping, flying, tunneling, and other sorts of abilities will typically allow a character to ignore the effects of treacherous terrain, allowing them to cross a distance without interacting with the terrain. Other forms of travel can be affected by some forms of treacherous terrain. Treacherous terrain can cause trouble for a character, though it rarely causes imminent damage.

- ❖ Navigating through a treacherous series of spires, or narrow straits could force the character to make acrobatics checks to nullify the effects of the treacherous terrain.
- ❖ Extended time underwater will affect the character, as they can only hold their breath for a number of rounds equal to their HEA multiplied by 2. Once this time has expired, the character gains a stacking rank of **Suffering** (Stress) for every additional turn they spend underwater in addition to losing access to their core action.

Dangerous Terrain

Dangerous terrain damages the character whenever they move through it. Dangerous terrain will typically inflict **suffering**, applying direct damage to the character moving through, though rarely it will cause instant death. Forms of dangerous terrain includes:

- ❖ A field of lava will inflict multiple instances of **suffering** (Fire) every time the character moves through a set interval of space within it.
- ❖ A dangerous fog of a soul disrupting gas that will cause a character to fall *unconscious* upon failing a WIL save.
- ❖ A narrow surface that could lead to a precipitous fall, potentially forcing a *Terminal Save* should they fall off in some fashion.

Cover

If a character positions themselves behind an obstacle that they can use to block weapons, help them hide, or otherwise guard against opponents, they are in *Cover*. Cover normally rewards **2** bonus DVs, while exceptionally protective *Cover* will confer **4** bonus DVs and breaks line of sight to the character. Characters lose cover as soon as they move from their position, or they leave cover to cast a spell or make an attack roll. Some forms of cover allow characters to utilize abilities from their position, without the need for moving. Examples include an opening in a defense structure or a bunker, performing actions will not cause the character to break cover in this instance. If a character is too large to benefit from cover, the cover is ineffective for them.

Creating Dangerous Terrain

Characters are capable of creating dangerous terrain through the usage of abilities, either as an intended or unintended consequence. Casting a lightning spell into a target in water or launching a fireball at a wooded structure alters the area to become more inhospitable. Although a few methods of creating more dangerous terrain and their effects are located here - countless circumstances could lead to the creation of dangerous terrain as an unintended consequence.

Liquids and Dangerous Terrain

Liquids, such as the water produced by *Generate Water* (Aquamancy - 1), can generally be utilized to remove **Suffering** (Fire), Frozen with an ice-related spell such as *Freeze* (Aquamancy - 7), or used as a surface to conduit to conduct electricity if the water itself is impure. Casting lightning spells into a **massive** or smaller water source could have a number of effects such as:

- ❖ A single target lightning ability affects all targets connected to the water source equally, but the damage of the effect is reduced by *half*; if the ability has an attack roll, targets must instead make a HEA check determined by the character's PWR to half the damage.
- ❖ An area of effect lightning ability affects all targets connected to the water equally, the area of effect taking the shape of the water.
- ❖ In either case, should targets fail the associated check they gain an instance of **suffering** (Lightning.)

Most liquids can also be frozen, allowing a character to manipulate the liquid more easily. If large enough areas are frozen, they may cause characters to move through its area to be **slowed**.

Fire and Dangerous Terrain

Characters are capable of applying dangerous terrain with fire as well. Setting fire to a flammable area will typically cause it to ignite, while launching fire at water will cause it to evaporate, dispersing it. Some usages of fire include:

- ❖ Lighting oil, wood, or other materials on fire, causing either an explosion or the fire to begin spreading in a manner determined by the GM. In all cases, the GM determines the amount of **suffering** (Fire) inflicted by the result.
- ❖ Removing status conditions or effects caused by ice-related abilities. Applying enough fire to a target petrified by *Freeze* (Aquamancy - 7) will thaw the target, bypassing the check or cause ice to begin to melt, turning it into water. In order to flash-thaw a target, a character would need to apply a fire spell of an equivalent rank to the ice related ability, though the result is up to the discretion of the GM.
- ❖ Enough fire can be utilized to evaporate an area of water, potentially causing a cloud of smoke to form, similar to *Smoke Cloud* (Pyromancy - 2)

General Actions

Many standard actions within Crescent have an action cost associated with them. All characters are inherently capable of executing these actions.

Activate Magic Item

Action Cost: Variable Action **Target:** Character **Duration:** Instantaneous
The character activates a magic item. If the magic item replicates an effect, it replicates the action requirements of the effect. Otherwise, it is a core action.

Coup de Grace

Action Cost: Core Action **Target:** Melee Reach **Duration:** Instantaneous
The character kills an *unconscious* target.

Draw Item

Action Cost: None **Target:** Character **Duration:** Instantaneous
The character draws a handheld item of their choice, typically a weapon. If the item weighs more than 10 kilograms, the action cost will increase, as determined by the GM.

Drop

Action Cost: None **Target:** Melee Reach **Duration:** Instantaneous
The character drops the equipment in their hands — shield, weapon, item, or any combination of these.

Drop Spell

Action Cost: Swift Action **Target:** Character **Duration:** Instantaneous
The character immediately ends a focus or continuous spell.

Hold Action

Action Cost: Reaction **Target:** Character **Duration:** Instantaneous
The character holds their action, consuming their reaction in the process — waiting for a specified cue.

Impale

Action Cost: Core Action **Target:** Melee Reach **Duration:** Instantaneous
For every 15' the character moves, they add a d6 of damage — adding this damage to the weapon to the weapon's base damage upon a successful hit. The character must utilize their entire movement action in a single direction to impale a target. The maximum damage that they can inflict with this action is 12d6.

Mount

Action Cost: Swift Action **Target:** Single Target **Duration:** Instantaneous
The character utilizes their swift action to mount or dismount a willing target under the character's command.

Move

Action Cost: Movement Action **Target:** Character **Duration:** Instantaneous
The character uses up their movement action, going up to a maximum of their movement speed.

Re-Attempt

Action Cost: Variable **Target:** Character **Duration:** Instantaneous
Characters can typically re-attempt a resistance check. Most re-attempts require a *swift action* unless otherwise stated.

Remove

Action Cost: Variable **Target:** Character **Duration:** Instantaneous
The character removes all instances of *Suffering*.

Strike

Action Cost: Core Action **Target:** Weapon's Reach **Duration:** Instantaneous
The character makes an attack roll, inflicting the weapon's damage on hit.

Stand

Action Cost: Movement Action **Target:** Character **Duration:** Instantaneous
The character uses up ½ of their movement to stand up from prone.

Maintain Focus

Action Cost: None **Target:** Character **Duration:** Variable
The character maintains a focus ability. A character can only ever maintain focus on a single ability at once.

Take Cover

Action Cost: Swift Action **Target:** Character **Duration:** Variable
The character takes cover in a location, gaining 2 bonus DVs. They only retain the benefits of cover as long as the cover would reasonably defend them against attack rolls. The character loses the benefits of cover as soon as they move from cover, or they leave the cover to cast a spell, make an attack roll, etc. Exceptionally protective cover grants 4 bonus DVs and blocks line of sight to the target.

Throw

Action Cost: Swift Action **Target:** Single Weapon **Duration:** Instantaneous
The character launches an item in their hand by doing a might check. The character launches the item a number of feet equal to twice the might check.

Weapon Attack

Action Cost: Core Action **Target:** Weapon's Reach **Duration:** Instantaneous
When using the **Weapon Attack** ability, the character gains the ability to make a single **strike** with a weapon they are using, and gain **Martial Points (MP)** equal to their ranks in the weapon's **combat style**.

Exploration Mode

Exploration Mode carries a loose track of time, passing in a fashion determined by the GM. Exploration mode allows characters to associate with the world around them without worrying about every moment. Most conversations a character will have do not take place in a period where every moment is of the essence. The GM does not strictly track the speed at which characters move in terms of rounds. Instead, they determine it within the space of minutes, hours, or days.

Exploration Speed

A character's speed in exploration mode tends to mimic their speed in *Turn by Turn* mode, though the GM extrapolates it to greater durations. While *Turn by Turn* mode represents a character's maximal speed when exerting all of their efforts, their travel speed in exploration mode tends to be comparatively slower in the same period. Treacherous terrain will cause characters to move up to a quarter of the speed they would normally move through an area, while dangerous terrain could prove to be entirely impassable. Characters are capable of pushing through their normal physical limits to move faster than the listed speeds, though they may become *fatigued* upon doing so. Certain terrains will likely cause the GM to call for checks from the player - as they resist extreme cold, attempt to cross extreme gaps across chasms, or face off against other natural features of the world. Moving while *undetected* will also cause the characters to move at a slower pace, often utilizing the lowest *subtlety* roll of the group that is sneaking for detection. Characters moving as a group like this can attempt to execute a surprise round on a group that has not noticed them.

Exploration Speed Chart

Movement	Feet per Minute	Miles per Hour	Miles per Day
10'	100	1	8
20'	200	2	16
30'	300	3	24
40'	400	4	32
50'	500	5	40
60'	600	6	48

Origin Skills in Exploration Mode

Exploration mode will often allow players to engage with their origin skills - allowing them to persuade, prepare alchemy potions, or craft objects and items at their discretion, should the tools be available for them to do so. Cities, towns, and villages will often provide the necessary institutions for a character to express the skills they have honed to others. Depending on the size of the city, the character can use it as a shorthand method to determine what they can purchase on their own without slowing the pace of *Exploration Mode* by consulting the GM about each detail of purchases.

Category	Population	Available Resources
Hamlet	100 >	Common
Village	1,000 >	Uncommon
Township	10,000 >	Rare
City	100,000 >	Mythic
Metropolis	1,000,000 >	Legendary
Megapolis	10,000,000 >	Dependent
Ecumenopolis	> 1 Billion	Dependant

Certainly not an exhaustive list, this graph is more of a shorthand method to determine what is available in a population center. Some areas specialize in a resource that is particular to that area or has a profound lack in another resource. Typically a character can purchase a resource for it's listed price in the materials section in a population center of the relevant size, while potion availability will depend on the discretion of the GM - though typically, they will sell for their listed price unless otherwise stated. Enchanters, crafters, and specialists of varying types increase as the size of a population center increases. The GM can make broad rules of whether all potions in the materials section are available, or simply a handful - or none at all.

Other Origin Skills

Characters can utilize their subtlety to infiltrate organizations, their performance, and interpersonal skill to ingratiate themselves with various groups, while fitness, acrobatics, and might well allow a character special access to groups strongly associated with martial skill. They can use implicit awareness and knowledge to gather information about specific people or organizations in a city. The possibilities of what a character can do with their origin skill are limited only by imagination and reason.

Summarized Exploration Mode

Often, a great degree of time will pass in exploration mode. A player dictates the broad strokes of what their character does to pass the time. The GM can still determine the outcome, utilizing the characters relevant skills and abilities. A character can start a business, fall in love, make friends, or join local groups during this time that will allow them more contacts and people they are connected to - rounding out a character's personality. A character can also learn more about the general events about the region they find themselves in.

Survival

Adventurers are hardy enough to survive for periods without food or water, but begin to feel drawbacks should they fail to eat or drink for a day - causing them to become *fatigued* if they fail to do either for two days. In order to stave off fatigue, a character should at least consume a large meal and three gallons of water every two days.

Trade

Characters are typically capable of trading a piece of armor or a weapon for half of their total cost while an alchemy potion sells for the total ingredient cost. It is up to the GM whether the character attempts to garner a higher price for their creations.

Social Interactions

While in exploration mode, a character will have multiple opportunities to engage in social interaction - using the opportunity to convince other characters through *roleplaying*. The GM fills the role of all the non-player characters or NPCs, while players fill the role of other player characters. The player can utilize these social interactions to gauge the personality of those around them while interacting in a way that best suits their character. Depending on how a player portrays a character, they can gain a circumstantial bonus to their interpersonal rolls or forgo a roll entirely. Though if a character is not sure they can guarantee an outcome, they should play to their strengths, either in origin skill or through forms of magic.

Portrayal

Other characters will respond to how a character portrays themselves, their mannerisms, and the way they live. Although a character can deceive others, NPCs are often more receptive to characters that have similar backgrounds, origins, or lifestyles to them. If a character has an origin skill that is similar to that of an NPC, they may seem more favorable to the character, as they have a baseline similarity from which to build a working relationship.

Ability Points

Throughout their adventures, a character will gain ability points, representing an abstraction of their skill and talent. A player can choose to have their character find a particular character that teaches them about the skills on which they are expending their ability points. Although unnecessary, it could be a useful way for the character to learn more about how to access certain magics, or how those magics function about other ones. It could provide an opportunity for characters to learn about particular *rituals*, hone their practice, or figure out the particularities of the region around them. The GM decides how many abilities points a character gains at the end of a session if any.

Rest and Exploration

Rest periods are taken in exploration mode - and the amount of time required for a full rest period is a minimum of *eight hours*. Over the course of a rest period, a character restores a number of hit points equal to ten times the character's HEA and an amount of mana up to twice their PWR attribute, but some conditions can modify the amount of recovered. If a rest period is interrupted, only a partial amount of mana and HP are restored, as determined by the GM - typically a fraction of what characters might have recovered.

HP and mana may likewise not be restored beyond their original maximum total. Many character abilities recharge upon completing a rest period, though they can only take a rest period once every 24 hours. In order to take a rest period, a character cannot engage in strenuous activity for more than a few moments and must be sleeping for most races or in a period of inactivity.

Rest Interruption

A rest period can take longer than eight hours if characters are keeping watch in dangerous territory. Characters still require an uninterrupted eight hours for a full rest, potentially necessitating setting up a watch-type system, where characters watch over one another while others sleep, but this will extend the amount of total time rested if characters wait until they are all prepared.

Order of Travel

Characters can set an order of travel - which can determine their place in a hostile situation upon an ambush. This order of travel determines a character's place in relation to other characters. Order of travel can help players consider their spacing.

Additional Clarification

Numerous abilities have unique effects that can be difficult to decipher when combined with other abilities. Most examples will be listed here, though GM fiat **always** triumphs.

Monk (Archetype)

The disruption of actions by a monk includes their movement action, potentially allowing them to dodge out of the way of an attack that was going to hit them; if they end their turn outside of the original attack's reach/range/area.

Prone and Pin (Flying Targets)

When *knocked prone*, flying targets fall 120'; if this is enough to knock them onto a solid surface, they fall **prone**. If this is not enough to knock the target **prone**, the status condition is removed at the start of their next turn. *Pinned* targets remain flying; unless the *pin* disrupts flight, in which case the target begins falling.

Mystic (Archetype)

Spells with an area of effect like Fireball originate from the target point. The target is always struck with the full effect of the spell on hit, however any targets in the AOE of the spell attempt the resistance check as per normal.

Game Master Tools

Below are a number of different tools a Game Master (GM) can utilize to personalize the environment characters find themselves in. Environmental conditions could alter how a character approaches the world around them - either helping or inhibiting them.

Climate and Conditions

Climate affects the broad areas. Blizzards, heat, heavy winds, and fog can alter how a character approaches the world around them. It is often possible to utilize the climate of the area to the character's advantage, in either a social or combative situation.

Blizzards

A character's visibility is reduced by an amount determined by the GM, though the most severe blizzard would likely reduce visibility down to 5' in front of a character.

Intense Conditions

Intensive conditions could incur a periodic amount of damage to those without a proper way to deal with them. Be it extreme cold, heat, or the vacuum of space, intensive conditions can inflict an automatic amount of stress damage to a character or force them to make a check.

Wind

Wind conditions can limit flight and movement, with intensive wind conditions potentially halving a flying character's movement.

Natural Disasters

Natural disasters are also likely to alter how survivable an area is - often forcing targets to make a series of checks to mitigate and navigate the effects these disasters have upon a character.

Traps and Hazards

Traps and hazards present a potential threat to characters attempting to navigate through a dungeon or other territories. These hazards tend to require characters to make a check to notice them and another to disable them. The difficulty of these traps varies between one another.

Encounters

Characters will often come across others throughout their adventures, though the shape, form, and abilities of the other characters they meet will vary. The difficulty of coming up with other characters can be initially daunting for a GM. The process and general outline are vastly simplified in comparison to setting up a player character, though the GM can ultimately decide how nonplayer characters (NPCs) take form, as the word of the GM is ultimately final in a game.

What is an Encounter?

Encounters involve combatants in turn by turn or exploration modes taking hostile actions against one another. Encounters result from player action, inaction, or GM planning. Encounters are a chance to test a player's skills, provide tension, advance a plot point, or even allow players to explore their abilities. Player driven encounters do not necessarily need a purpose, though these come with the added difficulty that the GM may not have planned for these fights to occur, requiring improvisation.

Components of an Encounter

Encounters typically require a purpose, an enemy, an arena, and a measure of fairness.

Fairness

Fairness is critical, as a GM has infinite power. If the game were pitting players against the GM, there is no situation in which the players could win. An ideal encounter would challenge players in engaging ways while maintaining difficulty without impossibility. However, if players are making rash decisions and overlooking telegraphed warnings, the GM should not be afraid to present the players and their characters with consequences. Nevertheless, coming up with creative solutions to make encounters easier can be incredibly beneficial, as rewarding creativity is good. Likewise, if the GM feels that they are not challenging players enough, they can always present more challenges or encounters in the future. Suddenly escalating the difficulty of an opponent after players are too successful can discourage creativity (If the escalation of difficulty is unplanned.) Engagement is often tied to a player feeling as though their decisions matter, making it imperative that bad decisions bring consequences and good decisions improve their condition or standing. For humanoid opponents, it can be helpful to use the same general tools and abilities that players have access to, giving the feeling that the players are fighting an opponent of their caliber and that their enemies are not boundless.

Fudging Dice

Though keeping true to a roll is helpful, fudging dice can be useful when altering the roll would help improve the experience for everyone at the table. The GM should not inform players when they alter die rolls. Doing so could lead to tension at the table. In the same respect, if a player is breaking the rules either in character creation or by changing rolls, do not be afraid to approach them at an appropriate moment about it.

Arena

The GM should not overlook an encounter's location, as it plays a crucial role in setting the weight of encounters. Although unobstructed flat planes are possible, it can make an encounter boring. Experimenting with variable terrain height, natural hazards, obstructing objects that could block vision or be used for cover could lead to a more engaging encounter. The GM can also use terrain to the advantage of the opponents, such as having players fight an opponent immune to fire damage near an active volcano. Having a rich setting makes the experience more immersive and can challenge players to use new abilities and strategies.

Encounter Feeling

A game master should typically have a generalized concept in mind for a nonplayer character before creating their attributes and a unique role that could serve to set them apart from others. Nonplayer characters do not have to be nearly as complex as player characters. Cutting complexity while keeping the feeling of what a nonplayer character is supposed to represent is essential to communicating the feeling of the character. The GM can utilize the environment or abilities of creatures to communicate what feels the encounter is meant to represent. An encounter meant to terrify players could feature separation from one another or usage of abilities that limit their vision.

Encounter Attributes

The attributes of an opponent or any creature often varies on the same scale that player character attributes do. Though creatures are calculated on a scale of *Aptitude*, a general guideline exists for a few completely archetypal examples on attributes.

Level / Tier	Attribute Score	Difficulty
1-5 (1)	2-8 (4)	Average
5-10 (2)	3-10 (5)	Average
10-20 (3)	4-12 (6)	Average
20-30 (4)	5-14 (7)	Average
30-??? (5)	6-16 (8)	Average

While characters can vary in their starting skill (a level 2 character may begin with 7 PER and an exceptional), these general guidelines exist as a starting point. Most opponents have average attributes for the sake of brevity or they may have expert attributes or novice attributes. If a creature is an expert in a particular attribute through physiology or training, the attribute will be toward the upper range of their difficulty for their level / tier. These kinds of attributes should be reserved for creatures that are meant to pose a great amount of difficulty or they should have other weaker attributes to compensate. A mage for example may be frail, but capable of utilizing devastating spells with their PWR.

Encounter Defense Values

Right from their onset, characters are capable of setting devastating resistance checks and utilizing a high level of accuracy. Likewise, the opponent's characters are capable of fielding defenses and resisting devastating effects. While some opponents will have heavy armor that enables them to shrug off most attacks, others will utilize lighter armor that would cause them trouble if caught in the direct line of fire. There is nuance to the assignment of defense values to characters. Like encounter attributes, it could prove useful to either take the average for a tier, listed next to the variation for brevity.

Level / Tier	Defense Values	Difficulty
1-5 (1)	12/12-18/18 (14)	Average
5-10 (2)	14/14-20/20 (15)	Average
10-20 (3)	14/14-22/22 (16)	Average
20-30 (4)	14/14-24/24 (17)	Average
30-??? (5)	14/14-26/26 (18)	Average

Resistance Checks and Damage

Rolling for damage and the setting of resistance checks can **slow down** combat. While characters will make life or death contested checks, it is often best to instead take the average for certain rolls as a GM, to ensure that characters are not hit with devastating resistance checks until later in their character's career. When creating an average resistance check, it is set by adding 10 to the character's power attribute. Weaker mages may have a power attribute as low as 3, though it rarely tends to go much lower. It should be extremely rare to ever encounter PWR attributes above 11.

Encounter Hit Points

Creatures tend to vary wildly in HP. Powerful spellcasters may have a lower HP total than the average might dictate, while a front-line fighter may have a HP pool that is higher than the average. The effectiveness of a given HP total is modulated by *resistances*, *immunities*, *regeneration*, and *attributes*. A creature with a high value in these traits should have a HP total that compensates, to make sure they are not invulnerable to their adversaries.

Susceptibilities, vulnerabilities, or lower attributes are changes that could alter the flow of the fight in these instances. A damage type that reduces or eliminates regeneration for a turn can also be useful. The creature can also use reactions to reduce the damage of devastating attacks that characters may access.

HP numbers toward the higher end of the tier are meant to represent creatures that are incredibly hardy, able to withstand or shrug off most blows. These types of creatures should have weaknesses to compensate.

Level / Tier	Hit Points	Difficulty
1-5 (1)	12-150 (18)	Average
5-10 (2)	12-300 (50)	Average
10-20 (3)	12-450 (70)	Average
20-30 (4)	12-600 (100)	Average
30-??? (5)	12-800 (120)	Average

Encounter Damage

The GM should reserve devastating strikes for creatures that have a weakness in some form or the other - whether in their ability to deliver the attack or due to other aspects or attributes that are lower. Some creatures are also capable of making more than one attack and should likewise compensate.

Level / Tier	Strike Damage	Difficulty
1-5 (1)	1 - 30 (12)	Average
5-10 (2)	1 - 40 (18)	Average
10-20 (3)	1 - 50 (24)	Average
20-30 (4)	1 - 60 (36)	Average
30-??? (5)	1 - 70 (48)	Average

Area Damage

A creature's ability to inflict area damage should be taken into account, to not create a situation that results in a total party kill. Area damage can inflict massive amounts of damage to a group of characters multiplicatively due to the number of active participants. This type of damage should come with an associated save.

Rate / Tier	Group Damage	Difficulty
1-5 (1)	1 - 20 (12)	Average
5-10 (2)	1 - 30 (18)	Average
10-20 (3)	1 - 40 (24)	Average
20-30 (4)	1 - 50 (36)	Average
30-??? (5)	1 - 60 (48)	Average

Origin Skills

Not all encounters are against killing machines; characters will often face off against highly skilled opponents. These skills should be evident when interacting with these characters, or they make up an aspect of the character's personality. The GM can have a character's skills vary in the same way that their attributes do.

Reactions, Move and Swift Actions

As a GM, it can prove to be extremely difficult to keep track of an opponent's action economy. Most enemies should have simplified options, such as contesting an attack roll once or altering the way they utilize their attacks. Doing so can help reduce complexity. In the case of reactionary or swift action damage sources, these should be reduced in comparison to what an opponent can accomplish with their core action. If the GM feels as though a particular reaction or swift action is thematic or they are prepared to implement complexity, they can feel free to do so.

Encounter Difficulty

Certain effects are difficult for characters to deal with on early levels. For example, it may be difficult for characters to deal with high-level spell casters with debilitating resistance checks. Dealing with burrowing, paralytic, or *ethereal* creatures can be particularly troubling at lower tiers.

Encounter Defense

Across their travels, adventurers can face off against opponents that are more focused upon defense options. It is important to make sure a particular defense is not impossible for a group to overcome.

Encounter Offense

Opponents will be able to deploy unique offensive abilities depending on the aesthetic of the battle or the GM's whim. It is important to signal that these abilities are taking place through either descriptive force or through a specific action they are taking. For example, if an opponent is ready to utilize the warrior perk indomitable, they may make a hand motion towards one of the adventurers, beckoning them forward.

Complex Opponents

The heroes of a GM's adventure have come face to face with the villain tormenting them. These sorts of encounters tend to lend themselves to a greater degree of complexity than normal ones. Depending on the difficulty of the encounters, the GM can choose to make these opponents a Legendary or Mythical Opponent. These opponents do not play by the standard action rules. Instead, they function under the action economy of the *Rogue* archetype (Without the drawback.) These opponents also regenerate action points at the end of another character's turn, in addition to the action points they regain upon starting theirs (4.) When regaining action points in this way, these opponents can choose to immediately spend them at the end of another character's turn on an action type of their choice, or they can instead choose to instead save them. Though, they cannot store more action points than they have maximum AP. Additionally, these creatures tend to have *multiple* exceptionals, especially in WIL.

Opponent	Maximum AP	End of Turn AP
Legendary	6	1
Mythical	8	2
Nightmarish	10	4

These opponents also tend to utilize more abilities while also being focused on a theme. These opponents can work to create a stronger sense of the situation. Terrain and hazards can also play a role in setting the aesthetic of the battle, leading to intriguing scenarios. Static encounters in which character's attributes are smashed against one another can lead to a sense of staleness. When these opponents would suffer action reducing effects, they instead have a number of action points removed from their current pool. *Stun* will reduce their AP pool by 4, while paralysis will reduce it by 3. Other action reducing effects will likewise limit the opponent proportionally.

Average Enemy

The average opponent a character will face off depends on what kind of threat they represent. A knight will have higher than average defense values and higher hit points, for example.

Average Difficulty					
Level / Tier	Attribute Score	Defense Values	Hit points	Strike Damage	Group Damage
1-5 (1)	2-8 (4)	12/12-18/18 (14)	6-150 (22)	1 - 30 (12)	1 - 20 (6)
5-10 (2)	3-10 (5)	14/14-20/20 (15)	6-300 (50)	1 - 40 (18)	1 - 30 (18)
10-20 (3)	4-12 (6)	14/14-22/22 (16)	6-450 (70)	1 - 50 (24)	1 - 40 (24)
20-30 (4)	5-14 (7)	14/14-24/24 (17)	6-600 (100)	1 - 60 (36)	1 - 50 (36)
30-??? (5)	6-16 (8)	14/14-26/26 (18)	6-800 (120)	1 - 70 (48)	1 - 60 (48)

Encounter Abilities

Encounter abilities are sets of incredibly powerful abilities that are only available to opponents; they are **not meant to be usable** by players due to their disproportionate power.

Warping

Action Cost: Core Action **Target:** Character **Area:** 20' Radius

Type: Evocation **Duration:** Instantaneous **Resistance:** WIL

The character inflicts *Warp* to a number of targets, WIL save to negate. The area and target are malleable, with a larger area coinciding with a more powerful iteration of *Warping*.

Lethargy

Action Cost: Core Action **Target:** Character **Area:** 20' Radius

Type: Evocation **Duration:** Instantaneous **Resistance:** HEA

The character inflicts *Fatigue* to a number of targets, HEA save to negate. The area and target are malleable, with a larger area coinciding with a more powerful iteration of *Lethargy*.

True Immunity

Action Cost: None **Target:** Character **Area:** Self

Type: N/A **Duration:** Instantaneous **Resistance:** N/A

The character is immune to an effect, ability, group, or damage type. In extreme cases, the character is healed by the effect instead of suffering anything.

Truesight

Action Cost: None **Target:** Character **Area:** Self

Type: N/A **Duration:** Instantaneous **Resistance:** N/A

The character is immune to *Blindness*. They cannot have their vision hindered in any way - they can always see clearly in all situations.

Multiple Exceptionals

Action Cost: None **Target:** Character **Area:** Self

Type: N/A **Duration:** Instantaneous **Resistance:** N/A

The character has multiple exceptionals in an attribute, granting them abilities far above other creatures.

Weaken

Action Cost: Swift Action **Target:** Character **Area:** 20' Radius

Type: Evocation **Duration:** Instantaneous **Resistance:** HEA

The character attempts to make the target *susceptible* or *vulnerable* to a damage type or condition (Typically one that the character uses; such as *edged* for Wild Duskhunters), HEA save to negate.

Copy

Action Cost: Core Action **Target:** LOS 20' **Area:** Single Target

Type: Continuous **Duration:** 1 + 50/F Minutes **Resistance:** WIL

The character attempts to create a perfect replica of the target; the replica's goals change to that of the character.

Protective (X)

Action Cost: Swift Action **Target:** Character **Area:** Self
Type: N/A **Duration:** Instantaneous **Resistance:** N/A

Until the start of their next turn, the character assumes a protective form, granting themselves (X) bonus DVs. When a successful attack roll is made against the character, this ability deactivates.

Offensive (X)

Action Cost: Swift Action **Target:** Character **Area:** Self
Type: N/A **Duration:** Instantaneous **Resistance:** N/A

Until the start of their next turn, the character assumes an offensive form, decreasing their armor DVs by (X). The character adds X to all damage dice they roll for a damaging ability.

Plaguing (Name)

Action Cost: Core Action **Target:** LOS 10' **Area:** Single Target
Type: Evocation **Duration:** Instantaneous **Resistance:** Variable

The character attempts to inflict a disease onto a target. The area and target are malleable, with a larger area coinciding with a stronger iteration of *Plaguing*.

Summon X (Name)

Action Cost: Core Action **Target:** LOS 50' **Area:** Single Target
Type: Evocation **Duration:** Instantaneous **Resistance:** N/A

The character summons X number of another character, their name listed in the ability description. These characters share the initiative with the summoner, though acts independently.

Regenerative X

Action Cost: None **Target:** Character **Area:** Self
Type: N/A **Duration:** Instantaneous **Resistance:** N/A

The character recovers X HP at the start of each of its turns. Sometimes there are ways to disable this ability by targeting the character with a specific damage type or effect.

Disable (Name)

Action Cost: Core Action **Target:** LOS 60' **Area:** 15' Radius
Type: Evocation **Duration:** Instantaneous **Resistance:** N/A

The character disables usages of an ability (Such as spellcasting, martial abilities, or a specific spell group) in the area until the start of their next turn.

Mortify X

Action Cost: Core Action **Target:** LOS 60' **Area:** 15' Radius
Type: Evocation **Duration:** Instantaneous **Resistance:** AGI

Letting out a vicious wail, the character causes the target to be unable to recover HP or mana for X number of days, AGI save to negate.

Creature Categories

Across the multiverse are mysterious and familiar beings that abide by rules that make them different in comparison to other creatures. These creatures are often subject to special rules.

Animals

Animals typically have a lower intelligence attribute than other creatures, though this does not inhibit any of their other abilities. When a character hopes to acquire a mount, it tends to be an animal. Powerful animals in Cahyali tend towards magical origins.

Undead

Undead are creatures that used to be living at some point in their existence. Reanimated with powerful magic, they range from skeletons, zombies, to powerful liches. Undead are typically...

- ❖ Immune to toxic and stress damage.
- ❖ Cannot suffer from physical diseases.
- ❖ Immune to fatigue.
- ❖ Are susceptible to the divine damage type and silver weapons.
- ❖ Healing spells are half as effective on them.
- ❖ Resurrection spells have no effect on them, but some other methods can bring undead back to unlife or life.

Vampire

Vampires feed on either the life force or magical energies of other creatures. They can range from mindless thralls to mythical nobility - nearly immortal beings who have survived for hundreds if not thousands of years. It can be difficult to tell vampires apart from the creatures they once were. Members of vampire societies usually possess physical and mental strength above those of regular people but have allergic reactions to cinnamon and garlic.

Typically vampires...

- ❖ Are susceptible to divine damage and silver weapons.
- ❖ Have resistance to ice, mundane, and blight damage types.
- ❖ Do not age as long as they feed.
- ❖ Possess a high degree of skill in *Origin Skills* as a result of hundreds of years of accumulated knowledge.

Daemon

Daemon are strange creatures that dwell below Cahyali. Weaker demons obey stronger ones but fight among themselves, hoping for a chance to ascend to higher tiers. Their societies are characterized by constant turmoil, allowing rapid mobility and the opportunity to climb their societal ladder. Demons are often...

- ❖ Resistant to fire.
- ❖ Have distinctive animalistic features.

Celestial

Celestials are beings of divine nature. They represent the primal aspects of the universe. Their societies reflect what aspects of the universe they represent. Beings of extreme power hold the highest positions within their society. Celestials are mostly...

- ❖ Resistant to divine damage.
- ❖ Are banished if not killed on their native plane.

Higher Beings

Often granting themselves the title of gods, titans, deities, divinities, these entities often ascend to a realm of power above the comprehension of others. These entities seldom concern themselves with the trifles of mortal folk. Higher beings vary between one another to a tremendous degree, often themselves at the head of a host of celestials. Many backgrounds worship a higher being that personifies or represents them, while many priests worship an aspect of the universal order that takes the shape of a higher being. Higher beings are extremely rare and impossible to defeat in normal combat. Their avatars tend to share some traits..

- ❖ Immunity to multiple damage types and effects they have domain over.
- ❖ Resistance to all damage, though it is possible for them to have a weakness to a damage type, which they are affected normally by.
- ❖ Are banished if not killed on their native plane.

Beings of Magic

Elementals are creatures from another magical plane. While Cahyali is on a plane of magic, composed of the four elements, some creatures are from planes where one element is dominant over others. These creatures are typically immune to the element or substance they represent. Beings of magic have their essence tied to their magical potential They are...

- ❖ Typically immune to the element they comprise.
- ❖ Typically vulnerable to at least one element
- ❖ Are banished to their native plane once their mana is depleted.
- ❖ Are banished if not killed on their native plane.

Construct (Mechanical)

Robots are automatons, powered by conventional energy sources (steam, fuel, electricity, etc.) These constructs are less advanced than magical constructs, do not possess any mind of their own, and can only follow some predefined patterns. Machines are...

- ❖ Resistant to stress and toxic damage.
- ❖ Vulnerable to lightning damage.
- ❖ Immune to fatigue.
- ❖ Incable of using psionics.
- ❖ Killed upon reaching 0 HP.
- ❖ Do not regenerate HP through rest periods.
- ❖ Alchemical healing potions have no effect on them.
- ❖ Gain an additional magic item slot.
- ❖ Their body counts as workable armor for the purposes of crafting.

Construct (Magical)

Unlike their mechanical relatives, these constructs or golems are powered by strong magic. Some of them are originally mechanical and were animated later on. These constructs typically have a mind. Usually they...

- ❖ Possess a level of intellect that makes them viable targets for mind affecting spells.
- ❖ Become mechanical constructs once the magic keeping them together is gone, this will render them inert unless they have another power source.

Plants

Although most plants lack sentience experimentation has led to the creation of sentient plants. These intrepid creatures...

- ❖ Are susceptible to fire damage.
- ❖ Can regrow; this ability does not reverse death, instead the rate at which they bleed out is reduced to 10% of their maximum HP each round. The character can reattach severed limbs and damaged organs knit themselves back together at the rate of one tenth the creature's body mass per month.

Humanoids

A humanoid is usually a biped with two arms and a singular head. Humanoids tend to lack supernatural weaknesses or resistances that other creatures tend to have, but most can speak and tend towards well-developed societies.

Giants

Giants are *large* or bigger humanoids that tend to exist in separate societies. There are multiple types of giants that further delineate their societies into distinct cultures. Giants tend to have...

- ❖ Multiple exceptionals in STR, HEA, or WIL.
- ❖ Resistance to some forms of mundane damage types.

Abominations

Abominations are aberrant creatures that are created through either magical tampering, science, or powerful rituals. Abominations tend to resemble conglomerations of other creatures, beautiful yet unnatural wildlife, or creatures composed entirely of magic.
